THE COLLECTIONS

Covering the windows of Australia

WHY CHOOSE SUNLIGHT PRODUCTS

EXPERIENCE

Sunlight Products has been in business for more than 40 years and during that time we have earned a reputation for excellence and professionalism.

Our expert team is highly trained, their focus is always to customise a solution that meets your needs and to make your experience seamless and hassle-free.

MADE TO MEASURE

Attention to detail is the key, which is why all products are made to measure to your exact measurements, ensuring the right fit every time.

ENVIRONMENT

We believe responsible environment management is a non-negotiable.

MANUFACTURED LOCALLY

We are committed to producing quality made products, manufacturing and assembling almost all of our products in our factories in Prospect NSW.

In addition to supporting local suppliers and employment, this also enables us to control quality and deliver only the best to our customers.

CHILD SAFETY

We are parents ourselves, so we know how important it is to keep your children safe. That is why all our blinds come with a choice of child-safe operating systems that are designed to ensure there are no choking or strangling hazards.

COMPONENTS

We can accommodate all your own manufacturing needs through our network of suppliers, allowing us to offer a wide range of components and fabrics at a very competitive price within the market.

VERTICAL BLINDS

MAKE IT VERSATILE

For the perfect blend of privacy, light control and style, take a look at our range of Vertical blinds. The crisp, sleek simplicity and modern lines of Vertical blinds from Sunlight Products will complement any decorating style. Choose from our extensive range of durable, low maintenance fabrics in exciting new-season colours, textures and patterns.

Made to measure, Vertical blinds are a great choice for controlling the direction and amount of light coming into your home.

- Economical solution for large windows, particularly sliding doors
- Can be made to fit sloping windows
- Range of blade widths available – 89mm, 100mm & 127mm
- Match your drapes with a coordinated pelmet, with or without a fabric insert

BOTTOM WEIGHT OPTIONS

CHAINLESS BOTTOM WEIGHTS

CHAINED BOTTOM WEIGHTS

SEWN IN ALL SIDES BOTTOM WEIGHTS (OPTIONAL EXTRA)

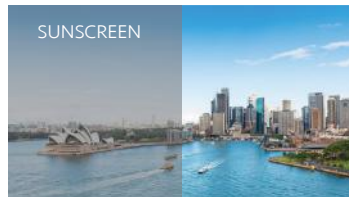

SIMPLE & STYLISH

Roller blinds give your home a clean, modern appearance. At the same time, they're one of the most practical solutions for managing light, heat, cold and privacy. They are especially useful if you don't have much space. Unlike curtains, they take up almost no room (either up or down), so they're perfect for your busy kitchen or bathroom.

- Practical solution for managing light, heat, cold and privacy
- Fabrics available for all companion products
- Easy to clean: most fabrics are soil- and stain-resistant, and can simply be wiped clean
- Options available for wet areas like bathrooms and kitchens
- Flame retardant, blackout, dim-out and glare reduction fabrics available

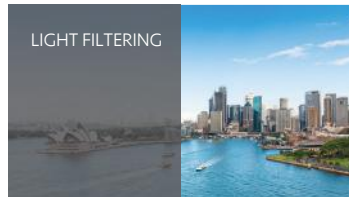

FABRIC OPACITY

SUNSCREEN

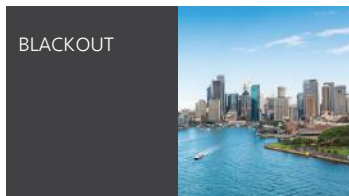

Control heat and light without losing your view, and increase night-time privacy by layering with blackout fabrics.

LIGHT FILTERING

Use Light filtering fabrics to filter out the sunlight whilst maintaining day and night time privacy. Light filtering fabrics do not allow a view through but bring textures and patterns to light.

BLACKOUT

When privacy is your goal, blackout fabrics are the answer. Night or day, they'll keep prying eyes out, and they'll also help you insulate your room.

DOUBLE ROLLER BLINDS

Get the best of both worlds, by combining a blackout blind on the outside with a sheer or light filtering blind on the inside. You can pull the blackout blind down whenever you need maximum privacy and UV protection, and leave it up when you don't. The light filtering blind gives you soft, diffused light during the day, and privacy at night, without impeding the cool summer breeze.

MOTORIZED BLINDS

Motorised blinds add a level of ease and convenience with the touch of a single button. Your entire home can be synced to a single remote control to open and close your interior blinds. There are other benefits that come with having automatic blinds beyond just the comfort.

WHY SHOULD YOU CONSIDER MOTORIZED BLINDS?

Convenience : With the simple touch of a button, you can move your blind to a position you like. You can also add sensors and timers so your products work for you even when you're not at home.

Energy efficiency : Reduce your energy usage by controlling the amount of heat and light entering your home.

Safety : The cords and chains are completely removed, providing a safer environment for your kids.

KEEP IT PRACTICAL

Designed as a modern alternative to vertical blinds, the panel glide blind is an innovative shading solution for larger windows and patio doors. Choose your preferred panel size - from 400mm right up to 1,000mm, they can be free-floating or connected, and can stack left or right when opening (or both).

- Can be used as a room divider
- One-way draw or centre-open
- 3, 4 and 5 channel track options, and up to 9 individual panels
- Velcro allows for ease of fabric attachment & detachment
- Change fabric easily if your room decor changes

VENETIAN BLINDS

ALUMINIUM VENETIAN

Aluminium Venetian blinds are still one of our most popular window furnishing styles and with good reason. They offer great flexibility and functionality, and make it easy for you to filter incoming light. Durable, efficient and economical, aluminium venetian blinds are also decorative. You have the choice of a 25mm Slimline or the 50mm wide slat in a selection of colours to suit most applications.

WOODEN VENETIAN

Add warmth and more luxurious feel to your home with our Wooden Venetian Blinds. A Classic style made from real timber which suits a variety of home environments. Choose from a gorgeous selection of rich wood tones and painted finishes from Super White to Oregon and Chestnut, all designed to help you create a wonderfully warm and welcoming scheme.

MOCKWOOD VENETIAN

A classic and beautiful adornment for any window, our Mockwood blinds complement most decors and are a practical and economical alternative to actual timber.. They boast a hard-wearing, water-resistant style, that's perfect for kitchens and bathrooms. You can choose from a range of on-trend coloured slats in gorgeous white and mineral tones. Available only in a smooth finish.

CELLULAR BLINDS

EFFORTLESSLY BEAUTIFUL

Cellular Blinds are comprised of a distinctive honeycomb design that capture pocket of air. These pockets of air reduce noise and also provide insulation, helping you keep your home warm in winter and cool in summer, reducing your bills.

- Available in single cell and double cell
- Top-down bottom-up
- Day and Night
- Cordless
- Motorised
- Skylight
- Vertical

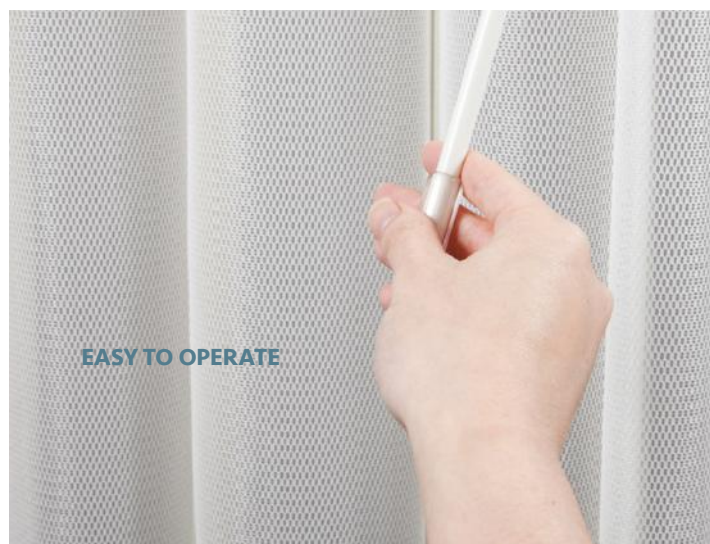

BE IN CONTROL

Cleverly designed to operate much like a roller blind, Lumens are simple to use, and because their fabric combines translucent and opaque horizontal strips, layered at the window, you gain better control over the balance of light and privacy.

Each blind comes with a control cord that moves individual translucent and opaque strips past each other. The more translucent strips you leave exposed, the more filtered light you let in. It's a revolutionary design that

makes Lumen blinds perfect for letting in the light you want without compromising on privacy.

- Contemporary design provides a striking look
- Stunning alternative to the classic venetian or roller blind
- Combines opaque and translucent fabrics
- Available in a beautiful range of fashion shades

EASY TO OPERATE

STYLISH AND ELEGANT

Veri Shades® are the new revolutionary window furnishings range that combines the sophisticated elegance, softness and style of curtains with the versatility of blinds.

The unique patented design is made from a soft, yet durable fabric that hangs luxuriously like curtains, while the supple fold operate like blinds to provide privacy, superior light airflow control.

There are no weights or chains to worry about, so you can walk through Veri Shades freely – whether they're open or closed.

Their versatility, functionality, durability, easy care low maintenance and chic classy styling make them perfect for any home or office environment.

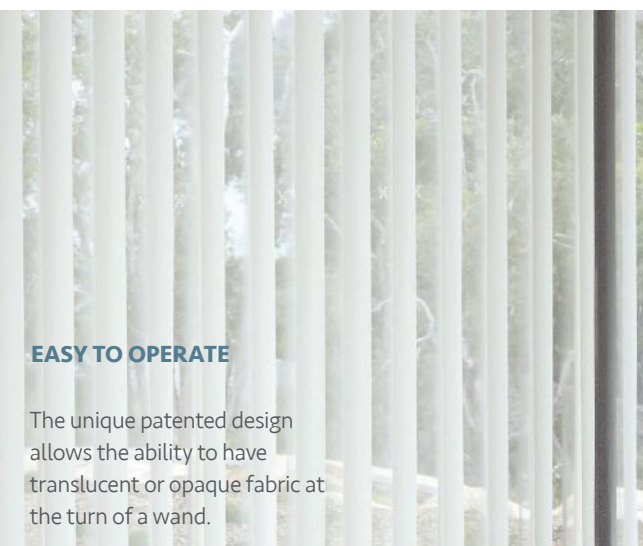

The two sided individual folds transition from translucent to opaque at the simple turn of a wand.

Veri Shades are child and pet safe and are available in a variety of high quality, stylish fabrics, colours and sizes to suit any space or décor.

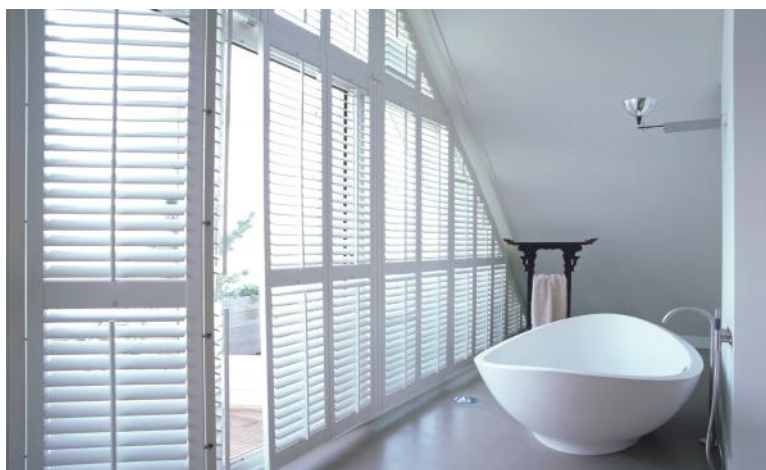

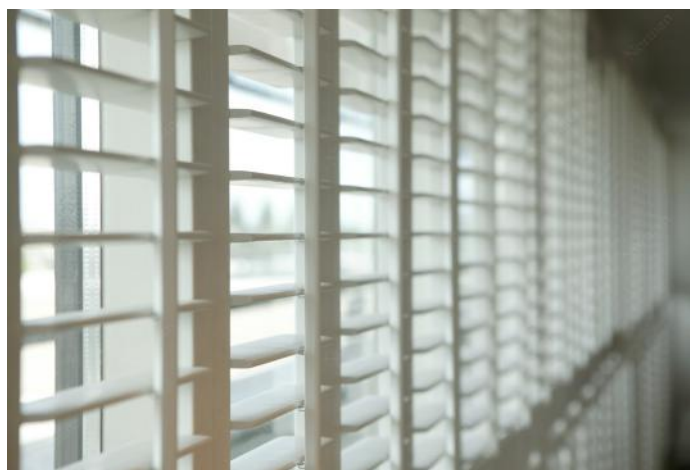

Talk to your Veri Shades expert today and enjoy a better way of living, the Veri Shades way!

EASY TO OPERATE

The unique patented design allows the ability to have translucent or opaque fabric at the turn of a wand.

SUN-SET SHUTTERS

SUN - SET PVC

Sun Set PVC Shutters are suitable for a range of purposes, including most internal and moisture area applications.

They have excellent thermal resistance, and provide a modern look as well as practical function.

Reinforced with aluminium core, our Sun Set PVC shutters ensure maximum strength on larger width panels.

SUN - SET WOOD

Sun Set Wood Shutters are made from a natural timber. The material type is chosen for its individual characteristics and durability, warmth, grain pattern and colour.

Our wood is of the highest quality and is sure to add value and charm to any home.

Our Sun Set Wood Shutters are responsibly sourced and are available in a huge range of modern paint colours and stains.

SUN - SET ALUMINIUM

Sun Set Aluminium Shutters are manufactured to the highest quality of finishes. Designed as a modern, functional plantation shutter, they are aesthetically appealing for exterior living spaces.

Durable and maintenance free, they have the ability to withstand tough environmental conditions whilst adding style to your home, office or commercial environment.

Suitable for a range of installation types including patios, verandas, alfrescos and balconies.

CURTAIN COLLECTION

HARVEST, Seafoam

WILSON
FABRICS

CURTAIN COLLECTION

Curtains are the perfect choice for creating an evocative space that can provide movement and flow into any room.

The options are limited only by the mood you want to create to complete your home. A sheer to soften the look, an uncoated fabric to add texture and body. Blackout or lined for a more dramatic formal effect.

We offer a wide variety of fabric choices from Australian and overseas suppliers.

Our relationship with Wilson & Basfords allows us to offer a coordinating story with your drapery and blinds having matching fabrics.

MOTORISED AWNINGS

No more ugly, hard-to-operate handles, especially in 35°C. Electric awnings can be operated easily with a remote control, tablet or smartphone.

Our range of motorised awnings are the perfect addition to any home. With the single press of a button, you can add comfort and convenience to your outdoor entertaining.

For more comfort, consider adding sensors. The sun sensor lowers the awning automatically to keep your living room cool. And, for more peace of mind when you're away, the wind sensor will automatically retract your awning when the wind picks up to protect your system.

FOLDING ARM AWNINGS

Folding Arm Awnings are the perfect solution for providing continuous shade and protection from the sun's harmful rays. These retractable systems are ideal for large areas such as deck and outdoor entertaining areas.

These awnings are available as Standard (open style), semi or full cassette. The semi and full cassettes conceal the mechanism inside the headbox when retracted. Standard operation is by crank (gear operation) or the awning can be motorised and linked with optional sun and wind sensors.

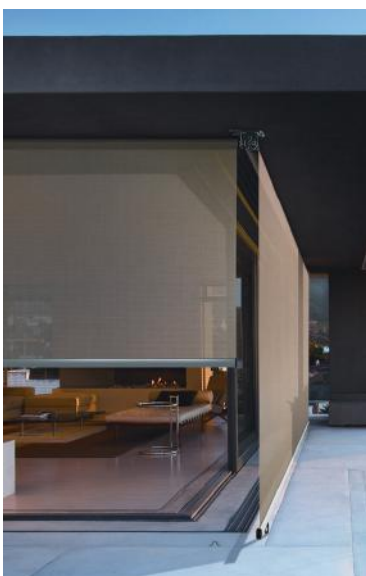

STRAIGHT DROP AWNINGS

Straight Drop awnings drop down at a right angle to the ground, providing shade for outdoor areas including windows, decks and patios. These awnings are very versatile and come in a range of different fabrics. We supply straight drop blinds in a number of styles:

CORD AND REEL: Available in all fabric types, these awnings are very popular, especially for verandahs and pergolas.

GEARBOX OPERATED: A good value for money option, gearbox operated blinds work with a crank handle that is hooked into the gearbox to wind the awning up and down. Because they have no cords they enjoy a clean finish while still being as easy to operate as a roller blind.

Alpha side retention system ©Hunter Douglas Australia 2016

CHANNEL GUIDE MULTI STOP: Their spring tension system makes these Awnings easy to operate by hand and with no gaps or messy cords you can achieve a wonderfully clean look. The bottom bar is spring loaded and locks into position at any point when it is turned and released.

WIRE GUIDE: Also known as stainless steel wire guide awnings, the wire guide lets the awnings move up and down easily and with a very close fit. These are very popular due to their ease of use, versatility and sleek modern appearance. Cables are 316 marine grade, making them ideal for coastal locations. These Awnings are usually crank operated but they can be motorised for extra convenience.

ZIPSCREEN

ENTERTAINING OUTDOORS IS EFFORTLESS WHEN PROTECTED BY THE ZIPSCREEN

- Contemporary square head-box blends seamlessly into existing structures.
- Child Safe - No cords or chains.
- Easy to operate - 3 styles available - Manual (Gearbox or Spring Loaded) or Motorised.
- Ultra-lock allows closing, locking and tensioning in one easy action.
- Patented Z-LOCK technology to ensure that the fabric holds taut.
- Minimalist, slimline, design means that they can be installed in buildings and homes.
- Unique self-aligning side channels makes installation easy being able to correct out of square areas.
- Sun/UV protection, Privacy, Wind and Insect Resistant.

Size: Up to 5000mm width and 4000mm drop.

Construction: Powder coated Aluminium channels and Contemporary 125mm Square Head-Box (Fully Enclosed or open available).

Features: The all-important Ultra-Lock function allows the screen to be closed, locked and tensioned all in one easy action adding this with the hidden Z-lock providing a secure guided movement that won't blow out in the wind.
An integrated feeding funnel and hidden tip stop, allows the fastener to be fed through into side channel easily as well as ensuring the blind comes to a stop at the highest point.

Operation: Manual (Gearbox or Spring operation) or Motorised

Colours: The standard colours are Mill, Anodised, Woodland Grey, Black, Classic Cream and White
Custom powder coating available at additional costs.

Recommended Fabrics: Outlook Mesh

ZIPTRAK® TRACK GUIDED AWNINGS

No cords, no zippers, no buckles, no fuss- Ziptrak® is the ideal solution for the quick, neat and easy operation of vertical screening. With a discreet track profile and colour options to match or compliment your existing space, Ziptrak® blinds offer superior functionality without compromising your style.

- No Zips, cords, ropes or wires
- Robust design
- Leave it at any height
- Lock at bottom
- Reduce your energy bills

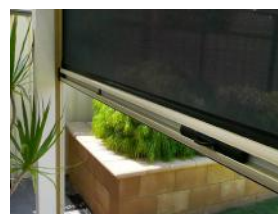

LEAVE AT ANY HEIGHT

Ziptrak® blinds can be left at any position along the track. Simply let the blind go, and it will stay at your desired height.

LIGHTWEIGHT, SIMPLE OPERATION

Astonishingly, most of the weight of the blind material disappears due to our patented spring-balanced system.

LOCK INTO PLACE

Ziptrak® blinds have locking mechanisms which allows the blinds to be locked when fully down, providing a secure hold, even in windy conditions.

CONVERTIBLE AWNINGS

This is the most popular type of Awning due to its versatility. Convertible awnings are suitable for both ground floor and upper level applications and can be operated externally with rope, tape or a winch or internally with tape or a winch.

Optional hoods are available in a selection of colours to protect the fabric on the roller when retracted. Florentine Awnings are based on the convertible awning and have guide rails connected flush to the wall. Ideal for doorways and balconies, the pivot arms are designed to allow more clearance under the awning.

AUTOMATIC AWNINGS

Automatic awnings are hand operated with self-locking arms that slide along vertical rails. Great for all exterior uses, especially covering windows and doors, these awnings can include a headbox to protect the roller mechanism and the fabric from harsh weather. Automatic awnings come in a number of different fabrics including sunscreen, canvas and acrylic.

PIVOT ARM AWNINGS

System 2000 Pivot Arm Awnings are ideal for shading a huge variety of windows. Pivot Arm Awnings will shade the window yet allow the air to flow around it, making them ideal for those hard to reach windows. They can be operated internally or externally via cord lock, winch or motor.

Among our most popular pivot arm awnings are the Robusta Pivot Arm Awnings. These are designed for high wind areas or larger windows and can be operated using a motor or a crank, both internally and externally.

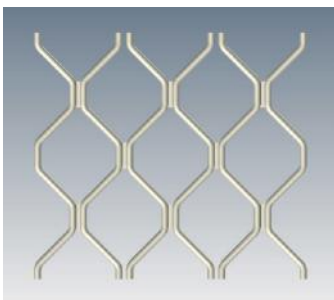

DIAMOND GRILLE DOORS

Finding the right balance between appearance and performance is not always easy. At Sunlight Products, we offer a wide range of designs, our proven quality ensures security requirements for any home can be met.

All products are custom made to enhance the design of your home. Our Diamond Safety Grilles are manufactured using special tempered Aluminium framing and meet the requirements of the Australian Security Door Standard AS5039 for greater strength and increased peace of mind.

Choose from a large range of modern colour in both grille or door frame or you can powder-coat to suit any décor.

STANDARD 7MM DIAMOND

ULTRA BARRIER™ SAFETY DOOR

The Ultra Barrier™ Safety Door offers affordability and quality at its best. Manufactured using 0.7mm stainless steel mesh, with a PVC wedge system, it provides peace of mind and keeps the bugs out, while still letting the cool summer breeze in.

Its advanced PVC Wedge system ensures not only strength and durability but also eliminates any corrosion issues that can occur when stainless steel meets aluminium. Without needing to use riveting in its manufacturing process, it provides a sleeker design with a quieter, smoother operation.

With a huge range of colours to choose from and assorted applications, selecting a safety door couldn't be easier. Plus, you can get matching safety grilles for your windows, so you have a consistent finish around your home.

- 0.7mm 304 Stainless steel mesh
- Strong aluminium frame available in popular standard powder coat colours
- Single lock
- Hinged, sliding doors and grilles available

OPTIONAL EXTRAS

- Triple lock
- Doggy door - available in small, medium & large
- Special powder coating colours available (with a surcharge)

DOGGY DOORS

Our doggy doors fit seamlessly into any of our custom made screen doors and come in three different sizes so your four legged family member can come and go with perfect ease.

- Lockable both sides
- Available in 3 different sizes (Small, medium, large) and 6 colours (Black, White, Primrose, Stone-beige , Bronze and Brown)
- Magnetic strips at the bottom for it to swing smoothly
- Clear plastic – easy to see through
- Can be installed anywhere in the door

SUNLIGHT SECURITY SYSTEM (SSS) DOORS

Sunlight Security System (SSS) door combines sophisticated technology, disciplined manufacturing and unmatched quality with an attractive design, giving you the ultimate security, style and peace of mind.

Constructed with a heavyweight extruded aluminium frame, high-strength marine grade 316 stainless steel, and our unique 3-way locking system, it ensures maximum protection of your property and family.

Naturally, because security is our chief concern, the ASM door has been rigorously tested to ensure it meets all relevant Australian and Industry Standards (AS5039), and it has passed the following tests:

- 🗑 Dynamic Impact Test
- 🗑 Lock and Hinge Lever Test
- 🗑 Knife Shear Test

FEATURES:

- Triple locking mechanism
- 0.8mm marine grade 316 stainless steel mesh
- Mesh count of 11 x 11 strands per inch (25mm)
- Heavyweight extruded aluminium frame
- Heavy duty corner stakes
- Wedge type fixing system
- Available in our full range of 20 standard powder coat colours
- Hinged and sliding doors and grilles
