Flush panel doors

Your door, your style, your way

We take pride in offering a wide range of customised options for our doors, ensuring that you can create a door that perfectly suits your taste.

Within our range, you'll discover the versatility of grooves and vision panels in multiple options and colours.

Your door is not just a functional element; it's a reflection of your unique style and preferences. Our commitment to customization ensures that you get a door that not only meets your practical needs but also enhances the beauty and personality of your home.

Two glass panes and two panels

Threshold

Hardwood or Fibre threshold

Ultimately, the choice between hardwood and fiber thresholds comes down to your specific needs and preferences. If you prioritize the timeless elegance of solid wood and long-term durability, hardwood thresholds may be the perfect fit. On the other hand, if you're looking for a solution with a lower profile height and excellent energy performance along with a Secure by design certification, fiber thresholds could be the ideal solution for your door.

Whether you opt for hardwood or fiber thresholds, you can rest assured that both options provide a reliable foundation for your doors, ensuring they function optimally while maintaining a beautiful appearance.

Fibre threshold for Inward and outward opening doors (SBD)

Hardwood threshold for inward opening doors

Hardwood threshold for outward opening doors

Sliding doors

Inline and push out

IC Sliding Doors, designed to provide a effortless operation. Our sliding doors are mounted on a low-profile threshold that can be seamlessly integrated into both internal and external floors. The double rollers ensure a smooth sliding action with minimal effort, while multiple locking points and a user-friendly pull-to-close system create a secure and airtight seal.

IC Sliding doors with low threshold (SBD)

Futura + push out sliding doors

Double Futura + push out sliding doors

Secure by design

Inward and outward opening doors

When it comes to ensuring the security of your home, the secure by design plays a crucial role. If your priority is the lasting safety and peace of mind for your home or business, choosing a door that is “secure by design” certified may be the best choice. These doors are engineered with features that enhance security, such as robust locking systems, reinforced frames, and impact-resistant materials.
