67C Carrying Case

BN67 Batters Net & Frame

PITCHING TARGET

Effective Velocity, by definition, is the study of pitch speed and how location changes the reaction time by forcing the hitter to hit the ball at a contact point that is different than they were ready for. When a pitcher throws the ball “inside” or “outside”, the speed of the pitch changes because the hitter needs to adjust to the location. A pitch can change up to 3 MPH for every 6” inches that the ball changes laterally. The **360° Pitching Target** helps a pitcher with location, thus fine-tuning his Effective Velocity.

Features:

- 40 oz. black vinyl
- Steel frame construction
- Ships via Ground
- Easy to assemble

360PT-1.....Pitching Target 5' x 6' (no frame)
360PT-2.....Pitching Target 6' x 7' with Frame
WK100.....Wheel Kit
