

Wellness Checks

At AlertBlast, we put your customers' safety first. That's why we're launching Wellness Checks — a new service that helps your municipality stay informed and keep people safe, wherever they are.

What are Wellness Checks?

Our Wellness Checks are simple, automated safety check-ins your customers will receive at scheduled times. When your organization signs up for this service, it ensures the safety and wellbeing of your customers. Here's how it works:

Scheduled Wellness Call

Your client receives an automated check-in call at their scheduled time. They simply press 1 to confirm they're safe.

No Response? We Act Fast

If they don't answer or press 1, you'll get a text alert right away so you can take action quickly.

Emergency Response Activated

If there's no confirmation of safety, you can alert local emergency services to check on them — fast, reliable support when it counts.

 
Hello, this is the City of Mayberry performing a scheduled wellness check. Please **Press 1** if you are okay or **Press 2** if you need assistance.

Why Choose Wellness Checks?

Quick and Simple

If someone doesn't respond within the set time, we'll automatically alert your company's administrator.

Immediate Action

If something goes wrong, the company administrator can send help immediately – no delays, no extra steps.

Peace of Mind

Whether they're at home or on the go, you're giving your community an extra layer of care and protection, wherever life takes them.

What are Our Key Differentiators?

Reach Thousands Instantly

Mass Notification Capabilities: AlertBlast can easily reach thousands of residents within moments, ensuring no one is left behind when it matters most. Our platform is scalable, making it suitable for cities of all sizes.

Real-Time Feedback & Tracking

Monitor Responses: Receive real-time feedback on message delivery and response rates, ensuring you know when your wellness check notifications are received and responded to.

Scheduled Messaging

Pre-Schedule Alerts: Plan your wellness check notifications in advance. Whether for regular wellness assessments or emergency alerts, you can schedule messages to be sent at optimal times, ensuring timely communication.

Cost-Effective and Scalable

Affordable for Cities of All Sizes: Whether your municipality is large or small, AlertBlast's flexible pricing allows you to get the right service without breaking the budget.

Real-Time Alerts to Managers

Immediate Emergency Notifications: Real-time communication is sent to AlertBlast administrator. In the event of a wellness concern, admin can follow protocols for contacting first responders.

User-Friendly and Customizable

Simple to Use: No complex training is required. AlertBlast's intuitive interface makes it easy for municipal administrators to set up and send wellness check alerts to residents.

Tailor Messages to Your Community:

Customize messages based on individual needs, language preferences, and other relevant factors.

Wellness Check-In!

Reply YES if you are safe and okay.
Reply HELP if you need assistance.
