ONG COLLECTION

We are proud to present the **ONG Collection**, a curated selection of original, hand-crafted pieces that celebrate the beauty and authenticity of their materials.

Every creation is designed to let these materials speak for themselves—their textures, tones, and natural imperfections becoming integral parts of the story.

Each piece carries a quiet narrative, shaped not only by the hands that made it but by the character of the materials themselves. Together, they form a collection that is as much about emotion and atmosphere as it is about form and function.

Behind this thoughtful approach is designer **Budiman Ong**, whose lifelong fascination with lighting fuels the vision of the collection.

Driven by a passion for modern design and a curiosity for exploring distinct material signatures, Budiman brings a refined, intuitive touch to his process. His work balances innovation with authenticity, creating designs that resonate with depth, simplicity, and soul.

Kentang Collection - ONG

A glimpse into one of our core values: material choices. In this case, natural hand made paper made out of banana fiber that creates an alchemy reaction, which now we identify as Ong Cen Kuang's methodology. We as human are attracted by the calming effect of repetition however perfect repetition is mundane and predictable, by weaving a little wave of disturbance to the layers of papers has added dynamic value and a signature quirk to our Kentang series. The shapes are all nods to Noguchi's lantern curves and natures.
