# What is Vocational Training ?

Vocational training is used to prepare for a certain trade or craft. Decades ago, it used to refer solely to such fields as welding and automotive service, but today it can range from hand trades to retail to tourism management. Vocational training is education only in the type of trade a person wants to pursue, forgoing traditional academics.

Vocational training programs allow students to get ready for specific careers. Some high schools provide vocational training; at the postsecondary level, prospective students can consider standalone courses, certificate/diploma-granting programs, associate's degree programs and apprenticeships

Vocational training, also known as Vocational Education and Training (VET) and Career and Technical Education (CTE), provides job-specific technical training for work in the trades. These programs generally focus on providing students with hands-on instruction, and can lead to certification, a diploma or certificate. Students may prepare for jobs

## The Connecting Link Between Theory And Practical Application

Students Can Abstain From Ending General Education Courses Associated With Most Post-secondary Programs And That Is Why It Can Be Said That Vet Is Basically Unconcerned With Theory Or Traditional Academic Skills.

It Works As A Connecting Link Between Thiouracil Education And The Real Working Environment And, Students Can Join These Types Of Programs At School Level Or Post-secondary Level As Well.

Vocational Training And Trade Eienstein Has Been Growing Prominently, This Causes More Innovate And Highly Skilled Workers To Solve Problems In Our Current Fast-paced Society.

Vocational Training Is A One Of A Kind Learning Experience That Specializes In The fields Of Cras, Trades And Careers At Various Levels.it Is Also Related To Apprenchships Learning

## IMPORTANCE OF VOCATIONAL TRAINING AND HOW IT HAS IMPACTED OUR WORLD.

Education helps us acquire and facilitate: knowledge, skills, values, beliefs, and habits with or without the help of an educator.

Education is often seen as a prerequisite for success.

But, school and learning institutions has always been a bridge to accommodate the education of an individual.

Although, learners may also educate them self in a process called autodidactic learning.

Education carries a significant benefit in one's life, it's normally the door way to greatness, it assures you to gain knowledge and awareness in which you can use to earn money and credibility

### VOCATIONAL TRAINING OVERVIEW

Vocational school, sometimes referred to as trade school, technical school, vocational college or career center is a type of school/college which offers mainly educational programs which are set to give you a specific profession needed in the job-market.

These schools were designed to provide secondary, post-secondary and skilled trades rather than provide academic degrees.

Some schools do have full degrees programs and some even started out as vocational schools and over time they grew to offer academic programs like California Institute of Technology and Carnegie Mellon University

Education requirements for programs offered in vocational schools are low, meaning getting into a vocational school is usually easier than to a university

Vocational training can also give applicants an edge in job searches, since they already have the certifiable knowledge they need to enter the field. A student can receive vocational training either in high school, a community college or at trade schools for adults.

Vocational education training provides candidates a clear edge in job searches because they possess the knowledge and prickle experience to enter a space held The training starts at high school level and students can also complete their associate degree programs from vocational school

These courses make them beer prepared for taking up highly rewarding, skilled jobs. Since an independent organization ceres that the students possess the skills required to perform a space occupant the credibility of these types of programs cannot be challenged

## UNDERSTANDING VOCATIONAL TRAINING CLEAR EDGE IN JOB SEARCHES AND GREAT CREDIBILITY

VET is also known by the name career and technical education (C.T.E.) and it provides candidates a clear edge in job searches because they possess the knowledge and practical experience to enter a specific field

The training starts at high school level and students can also complete their associate degree programs from vocational schools.

These courses make them better prepared for taking up highly rewarding, skilled jobs.

Since an independent organization certifies that the students possess the skills required to perform a specific occupation, the credibility of these types of programs cannot be challenged

## BETTER PERFORMANCE IN JOB INTERVIEWS AND COST EFFECTIVENESS

Today, Life has become extremely fast paced and young people have been finding really hard to find a good job in this fiercely competitively world.

That is exactly where the importance of vocational training comes in.

VET. or C.E.T programs offer practical skills that students can put to use in a job and various studies clearly show that students, who have completed VET programs successfully, perform better in job interviews compared to students with general academic backgrounds.

These types of programs are less expensive than conventional academic educational programs and they eliminate the disadvantages of the passive activities normally associated with conventional learning by promoting a hands-on training learning style.

## TRAINING PROGRAMS FOR DIFFERENT TRADES (TRADE SKILLS)

- Agriculture and Allied Technology
- Advertising and Media Industry
- Automobile Sector
- Art, Drawing and Painting
- Aviation
- Beauty Culture Spa & Cosmetology
- Building and Construction Technology
- Computer and Information Technology
- Cookery, Bakery, Confectionery and Food Processing
- Cottage Industry
- Cutting, Tailoring, Dress Making and Fashion Designing
- teacher training
- tattoo sector
- Chemical Industry
- Electrical and Electronics Sector
- Fire and Safety Sector
- Fishery Science Sector
- Footwear Technology
- Handicrafts Sector
- Health and Paramedical Sector
- Hospitality Sector
- Leather Industry
- Logistics and Shipping Management
- Printing Technology
- Plastic Industry
- Photography Industry
- Refrigerator and Air Conditioning Sector
- Secretarial Practice Sector
- Textile Technology Sector
- Teacher Training Sector
- Veterinary Sector
- Yoga & Ayurveda Sector
- NGO Management

## OUR MISSION

To raise the profile and recognition of skilled people, and show how important skills are in achieving economic growth and personal success.

Towards becoming a 'Center of Excellence' in only regular courses by offering Quality Training Program to meet the current and emerging needs of the adult population, by widening the access to vocational training and by functioning as a catalyst to bridge social, economical and to be a major part in developing India

## OUR VISION

Educational Board of vocational Training & Research shall make available innovative, socially relevant educational provisions that are Learner-centered seamless and are of High-quality by employing appropriate vocational training equity in education, sustainable social transformation and composite national development.

Educational Board of vocational training and research is the collective voice for skills excellence and development in vocational, technological and service oriented careers around the globe

## INTRODUCTION

Educational Board of Vocational Training and Research ((EBVTR) an autonomous education society registered under act. 21, 1860 Reign F-65931 mum 2016 gov. of India

Educational Board of Vocational Training and Research is a leading global talent development organization of India spanning in our country. It takes up resource activities for computer education skill program training, vocational education and training field, electronics and information technology.

The EBVTR has been playing a very important role in the field of technical / vocational education by promoting vocational education among the masses without any commercial ambitions. The EBVTR started conducting Open Merit Examinations of the students sponsored by the Ablated Institutions at various centers all over India. These examinations have gained immense popularity in India. With the study growth of industrial and IT developments in the post-independence period the need for technically qualified personnel increased but the facilities for training remained limited. EBVTR took the lead in framing common syllabus for examinations in the various faculties and started conducting examinations on All India basis.

Education is an endless process needed for the development of any nation. India being one of the developing country concentrates on four aspects of youth education as maximum percent of youth are in our country and who are going to build this universe. The four central aspects of youth education are identified as: (1) lifelong learning ;(2) an amplified version of basic education which includes pre-school, elementary and secondary level education; (3) links between formal and non-formal education; and (4) education for work.

First three are practiced by all the schools but the schools less concern the last one education for work. This aspect can be affected by means of vocational training.

Educational Board of vocational training and research has team of dedicated professionals manage education. The entire course is designed with balanced working of realistic modules. Affiliated to EBVTR More than 25,000 students available the facility and benefit from appearing for these examinations every year.

The syllabus for the different Certificate and Diploma courses are revise regularly and keep pace with the fast developing changes in the Industry necessitated by advances in the field of Information Technology. The syllabus gives due importance to Self-Employment of the country's youth.

## National Knowledge

### Commission recommendation

The education board of vocational training and research (ebvtr) considers Vocational Education and Training (VET) as an important element of the nation's education initiative. In order for VET to play its part effectively in the changing national context and for India to enjoy the fruits of the demographic dividend, there is an urgent need to redefine the critical elements of imparting vocational education to make them flexible, contemporary, relevant, inclusive and creative. The Government is well aware of the important role of VET and has already taken a number of important initiatives

- Placing Vocational Education entirely under the Ministry of Human Resource Development.
- Quaffing and monitoring the impact of vocational education.
- Increasing the flexibility of VET within the mainstream education system.
- Strengthening the current institutional structure.
- Ensuring a robust regulatory and accreditation framework.

### Training In Industry Programs

A number of industrial and business organization large and medium provide organized training for their employees. The type of training varies depending upon the organization and its needs. The training may be of the informal learning type of the type of organized interactional programed with in the planned under the supervision of the personnel department or of a special education and training division. As a general rule, the training conned to the accession of occupational knowledge and competence needed to cease producivity in the occupation concerned. Some programmes cater to providing related Ackerman and some instruction of a general education nature. Some are designed to train and retrain employees in specialized areas of occupations. The programed include apprenceship and pre-service job training, On-the job the training and supervisory training. A good proportion of the present work force is trained as skilled workers, operators and technicians through the system of training-in-industry. Thought limited in scope and applicant the training system can provide much needed occupational knowledge and skills extending beyond the normal institutional system of vocational education and training.

Since the aim of EBVTR Vocational Training is to provide the training for acquiring positive attitudes to work, practical skills, understanding and knowledge relating to occupations in various sectors of economic and social life, linking education and training with the economic life of the society

### Importance Of Vocational Education

Vocational Education refers to a system or course of study which prepares individuals for jobs that are based on manual or practical activities. Vocational Education is traditionally non academic in nature and is totally related to a specie trade, occupation or vocation. Because it is Vocation based, it is called Vocational Education. Until recently i.e until the end of the twentieth century, the aim of vocational education was to focus on specie trades such as automobile mechanic or welder and was therefore associated with the activities of lower social classes. Because of this, it attracted a level of stigma. Vocational education, in fact, is closely related to the age-old apprenticeship system of learning

But with the development of economies worldwide, the labor market became more specialized. The demand for higher levels of skill both in government and business sector started increasing. This lead to the further development of vocational education through publicly funded training organizations and subsidized apprenticeship or traineeship initiatives for businesses. At the post-secondary level vocational education is typically provided by an institute of technology, or by a local community college. Vocational education has also diverse over the 20th century. Demand for Vocational Professionals is required more than ever in various industries such as retail, tourism, information technology, funeral services and cosmetics, as well as in the traditional crafts and cottage industries

Vocational education prepares an individual for a job and not college. While most colleges will accept vocational education students, they tend to be limited because most colleges lecture proper courses. Vocational education is a multifaceted one as it tends to fused around several careers which include auto repair, woodworking, carpentry blacksmith, cosmetology, and other Elis There are many vocational schools across the try which provide the students to again valuable hands-on experience

## How is Vocational Education Beneficial?

- Vocational Education helps people in the better performance of their jobs as they acquire a great learning experience. Working professionals get a chance to hone their skills while making money
- Vocational education and training is a sort of introduction as it gets employees ready for the workplace which comes in handy while
- Many students who are in a dilemma whether they should attend college or not, Vocational education really opens a completely new door.
- The career of one's own choice is one of the major benefits of this education. A vast majority of people are caught in the wrong jobs because they were in it for the sake of job, money, lack of alternative and professional compromise whereas an individual pursuing Vocational Education is already pursuing his dream job
- Certain vocational skills acquired from Vocational Education teaches students the importance of manual work. The physical labor done under certain jobs makes them strong, healthy, active.
- School drop-outs and adults can also receive this type of education as it provides an opportunity to learn a skill or trade. There are many well-paid career elds in which a college degree is not required
- This education provides stable jobs as these are the jobs whose demand is never fallout

## Time Frame

**Time Frame Another Benefit of vocational training is that training programs can prepare students to enter the workforce more quickly than many academic education programs. Many high schools over vocational training programs that enable students to gain practical skills before reaching adulthood. In add-on technical colleges often over programs that prepare students for space career gelds in two years or less, which is a significantly smaller commitment than ending a four-year college. Getting into the workforce faster means students can start earning .**

## Practical Skills

**One of the advantages of vocational training is that it focuses on practical skills that students can put to use in a job immediately. Vocational training programs typically focus on teaching students how to perform the tasks that would be required of them in the workforce in various gelds such as auto maintenance, carpentry and medical assistance. Because the training is space related to their gelds students often and jobs easier than people with general academic backgrounds.**

## Certificate/Diploma Programs

**Certificate and diploma programs typically consist of a short series of job-specific courses. Unlike full degree or liberal arts programs, students may not be required to take general education courses in topics like math or English However, such classes are times prerequisites for admission. Program length varies, but certificate programs can generally be completed within six months to two years**
