Long handles for better experiences

At Vieve we understand cupboards as being a versatile space. On the one hand they are furniture as shelter, the place where we put clothes and objects that are reminders of our lives. On the other hand, they are furniture as action, where we keep kitchen and work accessories and other general things.

Opening them is a daily activity that becomes something more when we accompany them with adequate handles.

MOON

Sophistication through pure shapes

Ilja Huber conceived the design for the Moon handle by observing the first moments of a lunar eclipse, just when the Earth's shadow hides part of its silhouette. A complement that radiates elegance and transfers the captivating force of the night sky to interiors that seek sophistication through pure, essential shapes.

The brushed black finish emphasises its elegant sobriety, while the stainless steel look and brushed brass cava finishes imbue rooms with a unique touch of brightness.

Moon is a large aluminium handle with a minimalist design that captures the charm of its simplicity. Robust and very pleasant to the touch, it brings character and sophistication to interior spaces. It is ideal for refrigerators and large doors. It is available in single-sided and double-sided installation systems, making it ideal for swing or sliding doors.

BRUSHED BLACK

Lengths: 424 / 1096 mm

POINT

Modernity with architectural character

The “T” shape of the Point handle stands out for its dot-engraved texture for a better user experience and comfort. Its relief is inspired by the architectural façades of contemporary buildings “perforated” with circular shapes to provide a source of light. Patricia Roig designed this handle with its unique personality with the aim of imbuing spaces with modernity wherever it is installed.

Titanium black

Made from aluminium and available in titanium black, brushed black and brushed brass cava finishes.

BRUSHED BRASS CAVA

Lengths: 110 / 228 / 356 / 996 mm

It is Viefe's longest T-shaped design. In knob format it includes a non-twisting tip to ensure its stability.

The industrial-style Point handle is highly versatile, both in terms of size and its ability to blend in with different surroundings and furniture styles. It can be fitted to drawers and cabinets, and works particularly well in bathrooms. Its texture, soft and pleasant to the touch, combines a brushed part with textured parts consisting of small dots. As well as providing an engaging feel, this combination adds character to its surroundings.

Natural harmony

The foot of the Linkk handle, inspired by the harmony conveyed by natural formations floating on water, is the characteristic element of this design, providing a light connection with the furniture, almost as if it were floating. Designer Alexis Vivet has given the foot gently rounded forms, whose natural essence provides a minimalist yet sophisticated look, so it adapts to furniture with absolute ease.

N

Nobility, elegance and distinction

The charm of nineteenth century stately homes permeates the design of the Nobb handle, bringing the essence of classical shapes to the present day. As its name suggests, Nobb is an accessory that conveys nobility, elegance and distinction. It is a classy handle, designed by Viefe Studio, that raises the category of a space through its timeless lines.

It is made of aluminium and comes in a stainless steel look, brushed brass cava and brushed black finish to emphasise its stately character.

Brushed black

Brushed brass cava

Stainless steel look

Exclusive and sophisticated, it works especially well in kitchens (available for appliances), and large pieces of furniture and cabinets in all types of homes.

Nobb is a large handle, ideal for interior design projects that seek originality. Its considerable height and dimensions mean it can be used on large doors and robust or heavy furniture. It is very pleasant to the touch thanks to its central section with classic, rounded, timeless fashionable forms. The knob format includes a non-twisting tip.

5 BI RO DO

Nordic spirit and refined shapes

For many years, traditional wood-turning mills were one of the most important industries in our region, the Ges Valley (Barcelona). Many of them specialised in the manufacture of games, similar to the legendary Burr puzzle with its refined shapes, which inspired the designer Ilja Huber to create the Duo handle.

Duo Big is a warm, Nordic-style handle with a good grip. Linear and free of superfluous details, the aluminium base and wooden handle create a balanced duo perfectly suited to modern spaces imbued with tranquillity.

It is available in single-sided and double-sided installation systems.

LOWWOOD

Organic spirit design

“Luv”, a word widely used in sailing, means “against the wind” in German and is the source of inspiration for this handle which reminds us of smooth undulating lines as found on sails and barges. The Kaschkasch studio describes it as an elegant handle with an organic spirit and a playful touch.

Model No.: 0664 / 0665 / 0671

Walnut

Oak

In combination with Luv wooden wall hooks, it creates minimalist environments full of balance and wellness, whether in residential or hotel projects.

The image features the word 'RISSE' in a large, bold, white, sans-serif font, arranged in a grid-like pattern. The letters are stylized with thick strokes and rounded terminals. The 'R' is on the left, followed by 'I', 'S', 'S' in the top row, and 'E' in the bottom row. The background is a solid dark blue.

Verticality in balance

“Riss” means “crack” in German. A concept that the Kaschkasch studio reinterprets to create the Riss handles, based on linear crevices present in nature. The purist design is characterised by vertical lines combining with one another in perfect balance to give the handle an innovative appearance enhanced by its different versions in fashionable colours.

Matt black

ARPA

The elegance of Art Déco

The symmetrical and straight lined aesthetic of the Arpa handle reminds us of the influences of the Art Déco style which appeared significantly in the 1920s during the last century and which is back in style today. This decorative style is based on geometry, elegance and the use of industrial materials and metallic finishes to create exclusive decorative objects.

The Arpa handles allow you to enhance the style of any type of furniture and cupboard, elevating them into a more exclusive category.

ARPA PLATE

A lasting collection with character

The Arpa Plate design is influenced by the first global decorative style: the Art Déco artistic and architectural movement, a style that was established in the 1920s during the 20th century, based on geometric shapes and industrial materials. It's a style which has withstood the test of time, being one of the most widely acclaimed styles for lovers of current interior decoration trends.

WAY

Pragmatic elegance

Way is an aluminium handle which is characterized by its versatility and pragmatism. With a simple linear structure, this handle can be easily fitted to cupboard doors and drawers with chameleonic results. Way is the perfect handle for surroundings with a minimal aesthetic looking for subtle details.

It adapts in a harmonious way to all types of furniture, adding integrity and elegance.

RAIL

The serenity of straight lines

Rail is an aluminium handle designed by Teruel i Paré which really makes it one of our designs par excellence. The longer version of 1.150 mm means it can be fitted perfectly onto cupboard doors in kitchens, bathrooms, dressing rooms and offices adding a touch of modernity and design. Made in aluminium, it contributes added personality and modernity to furniture.

GRAFF BIG

Industrial style, always great

The aluminium handle Graf Big long follows the modern, industrial best-selling aesthetic Graf2. By incorporating height into its design, its long, straight handle has a texture in the style of mesh which ensures a perfect grip. Its single size of 1200 mm is perfect for large cupboards and doors in kitchens, dressing rooms, bedrooms, hotels and for contract projects.

GRAF MINI

Long, comfortable and industrial

Our aluminium handle Graf Mini has evolved from the successful Graf with a modern, industrial aesthetic. Its texture with a mesh-like shape ensures a perfect grip when you pull on it. The two variations, with a knob or arched handle-like shape fit perfectly well with kitchen or bathroom furniture, in changing rooms, in bedrooms (from chests of drawers to bedside tables, to sets of drawers and cupboards). It is also suitable for hotel facilities and all types of contract projects.

Brushed dark brass

Stainless steel look

Brushed black

The image shows two vertical, brushed brass handles mounted on a dark grey background. The handles are positioned side-by-side, with a thin vertical line separating them. Each handle has a small, rectangular brass piece at the top and bottom, which appear to be the mounting points. The handles themselves are long, thin, and have a brushed metal finish.

EXXA
E

Linearity and transgression

Hexxa is a handle with an aluminium built-in profile with an innovative design. Its two sides have a small incline which gives it a visual effect that is both modern and elegant. The singular characteristic of this model is that it allows you to play with a combination of sizes, as one of the doors can have a longer handle than the other so as to emphasize its fashionable features.
