# The Ardmore Academic Programme

Our main aim is to help our students improve their ability to communicate effectively in English with increased confidence. We encourage them to take full advantage of being in an English-speaking environment, by using the Communicative Approach, widely recognised as highly effective when learning a language, especially in fluency.

Because we strongly believe that students not only learn inside the classroom, our programme includes 'Active English' sessions, which are designed to boost their English usage by giving students even more opportunities to practise and enhance their language skills outside the classroom, too.
