About Makebug

Brand founder

Our brand founder **Jason** had been interested in nature from the age of 5. His exploration of the world's creatures started from his backyard and extended to the Amazon rainforest. To enable more people to experience the magic of nature, he created MAKEBUG. Through the form of paper craft, he introduces numerous unknown species to people and continues to pursue his dream of experiencing the natural world.

Voices of Nature

Bring Nature Home

Every Season, MakeBug launches **10** or more products with different sizes/playstyles. Each product comes with detailed assembly instructions and videos.

3D Puzzle Kraft

Red panda

The model features multiple movable joints, allowing it to crawl and stand, and even raise its hands to intimidate. Its layered big tail is also flexible and can be bent.

PCS
263

Great white shark

We designed this great white shark based on a real shark. In order to make it closer to a real shark, we added a lot of rotating structures. And our designer gave this shark a realistic color.

PCS
99

Giraffe

Rotable neck and legs. You can either have a standing or drinking pose. You can also replace the tongue of the giraffe to have different facial expression.

PCS
113

Giant Praying mantis

The forelegs of the praying mantis are rotatable and various postures can be presented.
