AVOCADO DAO

Hi Avocadians

We are already at the end of September and well into the third quarter of the year. As always, it's been an exciting month at Avocado.

We've had our regular weekly tournament, and we're attending lots of events, both in real life and on Twitter, where we reach global communities.

Find out all about this month's activities in the following pages to get the latest on our scholarships and much more!

Happy reading :)

AVOCADO X HASHED - A WEB3 GAME NIGHT IN SINGAPORE

On September 27, Avocado DAO co-hosted a side event for Token2049 with Hashed and several other collaborators. The event will take place in Singapore ahead of the main events. We are excited to be part of this, meet some of our community there, and introduce GameFi and Avocado DAO to new people.

AVOCADIAN SCOOP

by: AG.Melzzie

Avocado DAO at Indonesia's Independence Day

On the 17th of August, Avocado DAO proudly participated in Indonesian Independence Day celebrations in Bogor, West Java. This event, organized by our Indonesian Avocadians served to introduce Avocado to the local community through fun games and educational activities bringing awareness to the opportunities of web3 gaming to new people who may not know about the metaverse and the life-changing possibilities of the gaming guild.

The event went, not only smoothly, but was a great success, bringing together our scholars and building relations with more people to onboard them to empower themselves through the fun of gaming. We planned some enjoyable and educational activities to introduce web3 and presented a talk on Avocado DAO so that people can find out more.

People from the community were eager to find out and learn more, and some signed up to join the guild to become CyBall scholars. This is very encouraging for the future of building relations and empowering more people to change their lives through blockchain gaming with Avocado DAO.

WHAT ELSE IS NEW?

ALL YOUR GAMING CREDENTIALS IN ONE PLACE!

Avocado DAO partners with Carv DAO who is building an exciting community-driven social platform that collates all your gaming moments and assets in one place. Carv Protocol is a cross-chain, multi-address credential-as-a-service protocol that generates gamer credentials and ranking. This will allow users to show and share their credentials and NFTs in one place and enable guilds and other parties to view player stats and achievements.

AVOCADO DAO PARTNERS WITH DERBY STARS

Avocado is proud to partner with Derby Stars, a strategy-based PvP game launching on the Polygon network. In this racing world, you can indulge your racing dreams, and become a breeder or rancher in the Derbyverse. We hosted the Derby Stars' team in an AMA on our Discord channel to find out more about the game, the tokenomics and what players can enjoy in this high-quality animation NFT game.

WHAT'S BEEN HAPPENING IN THE COMMUNITY

September has been a marathon month for AMAs and Twitter spaces. Avocado DAO's Co-founder, Brendan Wong has participated in a week of live chats with various communities across the globe.

Brendan joined the Carv DAO community in their Discord channel for a fireside chat about Gaming, the guild, and the GameFi space. He went on to participate in Zebu Live's Twitter space called Play, Eat, Sleep, Repeat where they discussed the future of web3 gaming IBC, an American NFT space which saw a lively debate on the future of GameFi, and Sparkworlds, a UK-based community, for a casual chat with other panelists about the past, present, and future of web3 gaming. Brendan rounded off the week by hosting Starheroes, one of Avocado DAO's newest partner games in a live Twitter space to discuss the gaming mechanics, tokenomics, and roadmap ahead. We also gave away 50 whitelist spots worth 1000 USD in ETH to our Avocadian community.

Over in our Discord community, AG.Chip.Penguin and AG.Mxmx hosted Avocado DAO's new gaming partner, Derby Stars, where we gave away 100 USDC for the 10 best questions. With other partnership giveaways and community events this month, we have given away thousands of dollars worth of prizes in crypto and whitelist spots to our beloved Avocadians!

COMMUNITY PHOTOS
by: AG.Skyy

AG. Luna

Joining Avocado guild not only introduced me to the power of web3 gaming but also became the way for me to meet new friends. The guild's most active social platform is discord, and most of the scholars actively chat there, not only about their games but also about their personal lives and become friends with the guild members. I met a lot of people and became friends with them. I learned a lot, from NFT to life choices. They taught me how to manage my time studying and earning. I love my Avocadian friends and I treasure them.

AG.Nuwel

AG.Nuwel recalls the live Axie tournament that took place on the 15th of September, Makati City, Philippines. Nuwel met lots of new people from inside and out of Avocado DAO. From the event organizers to other cool people in the web3 space, Nuwel had the pleasure of chatting to Ma'am Jen from Blockchain space, Leah - a writer from CoinDesk, and Chippu - a well-known streamer. He is thrilled to meet so many people who love web3 gaming and represent Avocado DAO.

TEAM SPOTLIGHT

This month, we're super excited to have our Co-founder, Brendan Wong, in the hot seat! Fondly known as Sir Brendino, this is an excellent opportunity to get an insight into the future plans for Avocado DAO and tips and advice from the man himself!

Q: How did you get into GameFi and would love to know a bit more about your gaming background
A: I started gaming with my Windows 3.14 during the mid-1990s and witnessed the evolution of games from single-player on one pc to cross-platform multiplayer with everyone around the world.

My notable gaming experience is in World of Warcraft (earliest edition), as a guild leader on the BlackRock server. The guild became popular with over 200 members. It was my first experience of pay-by-the-month gaming.

I watched DOTA spawn from Warcraft 3 map mods, giving rise to the whole genre of MOBA (multiplayer online battle arena) and I also witnessed the rise of Fortnite as content creators gained popularity.

I feel that GameFi, the integration of gaming and finance (tokenized economies) is still in its infancy. Blockchain technology can benefit user-created and owned content distribution, as well as facilitate transparent and cross-ecosystem asset transfers. This infrastructure will improve the utilities of NFT ownership. Observing that historically, new technologies have always typically had strong retail applications introduced through playing games, I am confident in the future of web3 gaming.

Q: What is a day in the life of a web3 co-founder like?
A: It's busy! I'm always meeting new people, those who have been in web3 for years, as well as those who have just started building, and I get to see a broad spectrum of ideas, games, and protocols that relate to blockchain gaming.

I'm in meetings all day internally and externally, whether it's building a strong team, building new products, or understanding and guiding the landscape, developing the future of GameFi, while paving the way for other builders to come into the space.

Every day is a new day of learning, I just wish I had more time to absorb all the information and get more things done!

Q: What do you currently want to achieve with Avocado?
A: At Avocado DAO, we want to educate and support new users' integration from web2 into web3 via gaming.
To that aim, we Invest in the future of web3 games by providing guidance, investing capital, and establishing strategic partnerships to onboard users.
We also want to establish the future of the Guild's role in Web3 as a facilitator of technology, community, and gaming.

Q: What advice do you have for beginners looking to enter the Web 3.0 and/or Metaverse industry?
**A:** While the space is still emergent, be open-minded and prepared to shift focus and be agile with decision-making. Metaverses have been around for a long time. Web3 Metaverses are still new and building will take time. Just like any other start-up, it can take a while - and be prepared for sacrifices.

Q: What advice would you give to your younger self?
A:
- Find good mentors early. The key here is all mentors are different, and none of them know everything so it's important to find specialists in their field as well as broad mentors.
- Don't be so stubborn.
- Learning takes time. The more you think you know the less you actually understand.
- Buy Bitcoin and ETH.

By AG.Demdem

GOING BEYOND BORDERS

Avocado DAO Co-founder, Brendan Wong's, Global Presence

Avocado DAO welcomes September by hosting and joining Twitter spaces, roundtable discussions, and AMAs. In September, Avocado DAO founder, Brendan Wong, joined IBC in a Twitter space, hosted Mario Nawfal, for a roundtable discussion together with gaming guilds like PathDAO, and Ancient8_gg, among others, as well as joined a host of other online communities to share the guild's perspective on various web3 gaming related topics.

With the industry's best get-togethers, it's a wonderful chance to gain knowledge from some of the top professionals in the field while also imparting our knowledge to the community. The discussion revolved around web3 gaming. The panelists debated the concept of gaming and earning money, NFTs, the evolution of the play2earn model, and different approaches to blockchain gaming. It's also an opportunity for Avocado to explain why gaming guilds exist and the important role they play in the space.

Moreover, Brendan joined Zebu and SparkWorld's Twitter spaces to give his thoughts on blockers to entry into web3 gaming and solutions for the future. This was followed by AG.Melzzie, our lead editor, joining the Zebu live event, in London, UK, for a GameFi panel discussion. These events serve as a great way to introduce Avocado DAO to global communities to share more about the guild as an environment that allows its scholars not just to play, but also to be educated with the purpose of further sharing their knowledge with more people.

NEW REWARDS FOR GENOPET SCHOLARS

Great news for all Genopets Scholars!

On Monday, September 17, 2022, Avocado awarded a 30% share increase for all Genopet scholars. We know your time is valuable, and we want to make sure that that our scholars can carry on having fun and playing Genopets. Avocado DAO will continue to monitor the market conditions and will make necessary adjustments.

MOD UPDATE

THE NEW DG.PALS SCHOLARSHIP PROGRAM

Avocado DAO introduces its newest scholarship program, D.G.Pals. Join us on an epic adventure, to explore the D.G.Verse, and collect and trade cute blockchain items.

D.G.Pals is a collectible NFT pet, the first interoperable, multi-game, multi-genre GameFi project on Cronos Chain, and Avocado is delighted to offer a scholarship program for this multi-dimensional game.

If you would like to play this fun-filled game, you can fill out the form through Avocado DAO's discord server.

TOP 20 AVP EARNERS

By AG.Mxmx

Rewarding Avocado's Most Active Members

Avocado recognizes and rewards scholars who participate the most within the community on our social channels and show their support by joining events, contributing and helping the Avocadian community.

Scholars gain Avo points (AVP) for their contribution and participation. They can trade these in the Avo Mart to purchase the AvoArmy role which gives them access to even more rewards and opportunities. New Avocado Army scholars are announced in Discord at the start of each month. AVP can also be used for an increased share in scholarships, guaranteed scholarship positions and merch.

CONTESTS, TOURNAMENTS & WINNER ANNOUNCEMENTS

by: AG.AtomArc

September has been a great start to the Autumn season. We hosted 'Avocado week 2' at the end of August, packed with exciting tournaments and topped off by karaoke night. September has seen a host of competitions, from our Avocadian Newsletter giveaway to the GameFi.org and Evio.io tournaments. Check out the latest winners!

Missed the last Avocado week last month? Avocado DAO once again presented the momentous event: Avocado Week 2—something that every Avocadian coveted. The Avocadians loved new and interesting activities and games designed to help them get to know each other, especially our dear Avocadians who recently joined the Avocado DAO family.

Mastery Monday

Twelve (12) MLBB teams battled for the number one spot in Brawl Mode—all of the players showed intense gameplay. While our wonderful Avocadians, who did not participate in the game, watched and enjoyed the streaming from the booth and rooted for each team.

Trivia Tuesday

Avocadians had a great time learning about Axie Infinity Origin through activities such as the Kahoot Quiz, streaming, and betting. It was an awesome way to get familiar with the game and have fun within the community.
COMMUNITY EVENTS

Worldly Wednesday

It was a pleasant way to meet new people, and everyone, including our internal staff and Sir Brendino, had a great time figuring out and judging whether each Avocadian who attended the event was telling the truth or not.

Twitter Thursday

Avocadians took over Twitter during Avocado Week by tweeting their best thoughts about the week. We always love to hear what Avocadians have to say and share about their experiences, so this is always a fun event!

Fun-loving Friday

Glamorous. Melodic. Euphonic. Indeed, Avocado DAO is a place that cultivates talent. The Avocadians and some of the leaders sang in the presence of an audience; some were confident enough and others were nervous, but they all strived to express their vocal abilities and performed amazingly. Well done to everyone who took part!

Winners

GAMEFI.ORG X AVOCADO DAO

by: AG.AtomArc

GameFi.org's very first GameFiversary event brought each player a captivating, thrilling, and diverse experience of multiple gameplays. Our winners and top players were rewarded in $BUSD, a pool set aside for Avocadians who supported and engaged in the event. Here's what some of our scholars said about the event:

"The GameFi anniversary event has been a blast! I discovered games I had never known about before and I enjoyed playing them, at the same time winning Gafish for tons of rewards. This event has been great for advertising promising projects. A big thanks to Avocado DAO for the opportunity!" said AG. Ren.

"I was thrilled and elated. I was among the top ten. I now know about even more NFT gaming projects that I did not know about before," said AG. Kyura.

THE EV.IO TOURNAMENT + SCHOLARSHIP PRIZES

Ev.io is a web3 first-person shooter built on the Solana blockchain. The Ev.io team is proud to assert: "*We do not outsource any development or art whatsoever. We are makers of games first and our entire philosophy revolves around putting gameplay first.*"

The 40 Avocadians, who accepted the challenge, showed how well they knew how to play first-person shooter games by aiming and shooting as efficiently as they could to get to the top and win great NFT scholarships.

"I never imagined that I would become hooked on playing this game and competing in the tournament, but my friends are so much fun to play with, and I believe that the best way to play this game is with friends," said AG. mmarifel.

- Ahyan#0037

Artists of Avocado

September brings more great pieces of art from our community. This month we feature three awesome artists: AG.Ahyan, AG.Natsumo, and AG. Avenss.

We also have a very special poem from the talented AG.Mikeeel about Avocado DAO. We hope you enjoy this month's art section as much as we enjoy curating it!

Thank you Avocadians for sharing your artistic talents, they are always so awesome!

"There is no must

in art because

art is free."

Quote by
— Wassily Kandinsky

- Natsumo#9835

A bunch of individuals gathered together
We chat and hang out in any weather
Producing great memories,
That we can cherish for centuries.

It all started with joining this wonderful guild,
That Sir Brendino and the others build
A place where fun and laughter filled
Supporting and defending each other just like a shield.

They welcome and accept us all as a scholar
Having fun and at the same time earning some dollar
It's the best opportunity for all of us
Just be a responsible scholar and always do your task.

Many exciting activities await
That the mods/leaders decide and create
Having fun is the main objective
And it brings us joy, very effective.

We are all very thankful to Avocado DAO

- Avenss#5177

WHAT'S NEW IN CRYPTO

CRYPTO UPDATES

by: AG. Natsu & AG.Melzzie

The Ultimate Galaxy Fight: Star Heroes

A new multiplayer Third-Person Shooter Game with NFT and blockchain technology infrastructure set to launch on Polygon network, StarHeroes offers a new metaverse experience.

In this game, you can explore the galaxy freely and attack other players in combat. There are several types of NFTs, such as avatars, home bases, and spaceships with various functions and values in the game. By developing the NFT Heroes, you can unlock special skills and improve abilities so that you can fly special starships to whizz through the Starverse.

Crypto Updates cont'd

This game will also introduce a new system named 'Proof of Play' which they claim will be able to change the gameplay on every possible level:

They have come up with an innovative proprietary system that will resemble Bitcoin mechanics including halving and mining:
- Mining in this case relates to receiving more and more rewards by leveling your Hero.
- Halving indicates the way in which the precious rewards will be distributed. It means that the sooner you start playing, the more rewards you'll be able to win.

StarHeroes has some innovative features that we are excited to share with the community!

PLEASE NOTE: The views & opinions expressed in the Avocadian's articles are those of the authors & do not necessarily reflect the views of Avocado DAO.

The Most Hype Horse Racing Game: Derby Stars

Derby Stars is an NFT-based game where you will have to raise a group of beautiful horses. With sophisticated animation, this blockchain-enabled game is built on the Polygon network. In this game, your focus is not only on raising horses but also on local and world-scale horse racing competitions that you can enter to win rewards.

Each horse in this game is an NFT item that is distinguished by status, appearance, skill, and talent. The rarer your horse, the greater the chance of winning.

Derby Stars has its own in-game token called $RUN. The token has 3 main objectives, namely utility, governance, and farming.

- Utility: Players get $RUN as a reward for in-game activities and can also use it for Breeding and Crafting.
- Governance: By means of a DAO, $RUN holders have the right to participate in the determination of any policies related to playing or spending in games.
- Farming: Token holders can win $RUN in return for farming activities, including providing liquidity and staking their $RUN tokens.

Here's a list of NFTs that you can find in the Derby Stars game:

- Horse: Horses can be trained to maximize their abilities. After becoming stronger, the horse could provide a greater advantage.
- Soul: Soul is produced from the breeding process after two horses are bred. The soul will appear before a foal is born.
- Foal: A foal will be born after 120 hours of being in the Soul State. In short, a foal is a baby horse that has passed through the breeding stage.

PLEASE NOTE: The views & opinions expressed in the Avocadian's articles are those of the authors & do not necessarily reflect the views of Avocado DAO.

The long-anticipated Ethereum merge has finally taken place!

On the 15th of September, the highly anticipated Ethereum merge took place. It was streamed by various crypto news channels across YouTube and Twitter, with some discussions taking place leading up to and for the duration of the merge.

But what is the merge? And what does it actually mean for regular users?
Ethereum has made technical history by converting its blockchain from a proof-of-work which requires miners to validate transactions to a proof-of-stake blockchain, which requires node validators who have staked the token to become part of a network that validates the transaction.

On their website, Ethereum.org explained the reason behind the merge:
"The Merge was the joining of the original execution layer of Ethereum (the Mainnet that has existed since Genesis) with its new proof-of-stake consensus layer, the Beacon Chain. It eliminated the need for energy-intensive mining and instead enabled the network to be secured using staked ETH. It was a truly exciting step in realizing the Ethereum vision—more scalability, security, and sustainability." -https://ethereum.org/en/upgrades/merge/

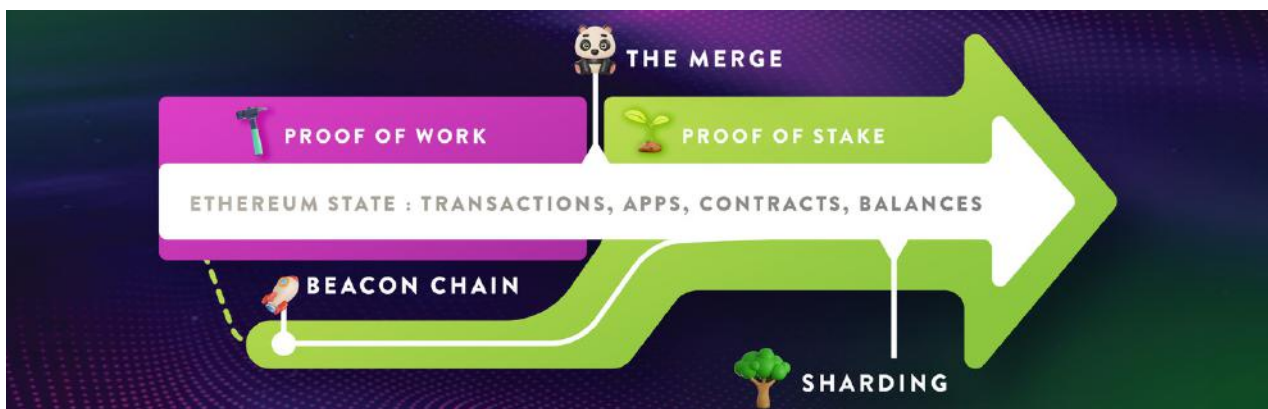

Photo taken from https://ethereum.org/en/upgrades/merge/

This should mean lower transaction/ gas fees which have been notoriously high on Ethereum and most importantly, the merge solves the pressing issue of environmental impact. Ethereum states that the merge will reduce Ethereum's energy consumption by ~99.95% - That is a huge reduction! And still, the merge has been a highly debated topic among Ethereum maximalists, blockchain experts, and enthusiasts alike.

It is worth noting that the Merge does not change anything for ETH holders. The ETH owned prior to proof-of-stake will remain the same. Users do not need to adjust their wallets, and the token's value will remain the same as previously held on proof-of-work, so you don't need to worry about taking any action.

Ethereum went on to add: *"Despite swapping out proof-of-work, the entire history of Ethereum since Genesis remained intact and unaltered by the transition to proof-of-stake. Any funds held in your wallet before The Merge are still accessible after The Merge. No action is required to upgrade on your part."*

League of Kingdoms Guide: Avocado Goals and Scholarship Program

League of Kingdoms is the world's first MMORTS Strategy game owned & powered by its users. On the Genesis continent, all lands are owned and governed by you. You can actively own, develop, launch alliance warfare, and receive rewards by contributing to the development of the continent. You can play this game both on mobile (Play Store & Apple Store) and PC (browser).

PLEASE NOTE: The views and opinions expressed in the Avocadian's articles are those of the authors and do not necessarily reflect the views of Avocado DAO.

The Avocadians have landed on a fierce battlefield - We warmly welcome you to join us in League of Kingdoms:

Build a powerful kingdom and army!

⚔ Battle with other Kingdoms for the hegemony!

Stand a chance to receive a Drago Scholarship in League of Kingdoms!

Join our Avocado DAO discord server and fill out the following application form:
https://form.jotform.com/222212099163046

Avocado DAO Goals:
1. Help Avocadians get their Kingdoms to level 23 - the minimum requirement for a Drago Scholarship.
2. Give helpful tips for your growth.
3. To enjoy the game as an Avocado community and get to play with each other as an alliance.
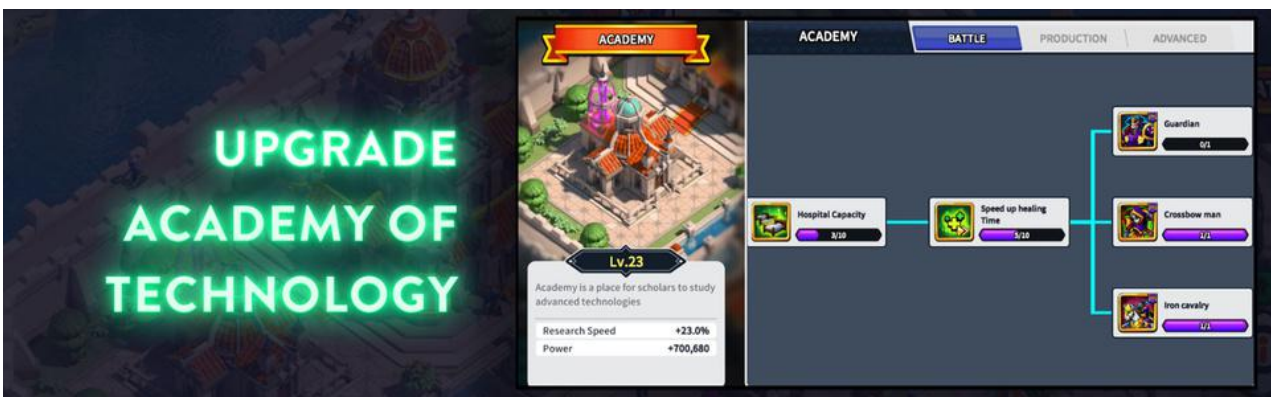

In-Game Tips & Tricks:

1: Make sure to check and complete the daily task and event tasks.

2. Make sure you send your troops to gather resources! Resources serve as fuel for everything in your Kingdom, it is needed for research, construction, and training your army. For maximum production of resources, always upgrade your farm, lumber camp, quarry, and gold mine equal to your Castle level.

3. Upgrade your academy's technology. Your academy is one of the keys for your kingdom to progress. Upgrade the academy and constantly research to unlock everything from better resource gathering to obtaining higher tier troops.

AVOCADO DAO

Avocado DAO is a blockchain gaming guild that aims to unlock life-changing opportunities and rewarding experiences for its community members.
