TUCSON

A circular graphic overlay featuring the LeaseMyAuto.com logo at the top. Below it is a central shield-shaped logo for 'CAR GUYS USA' with '305-CAR-GUYS' written in a curved font at the bottom. The shield contains an illustration of a classic car with a driver. Surrounding the central logo are several car brand emblems, including Porsche, Lexus, BMW, Honda, and Mercedes-Benz.

When you're looking for a leader, all roads lead to Tucson.

Whether you want your adventures on the road motivated by an advanced gas engine, modern hybrid power or a flexible plug-in hybrid, Hyundai Tucson lets you move ahead of the rest in an SUV that's already leading the pack. Take it from the editors of *U.S. News & World Report*, who named both Tucson and Tucson Plug-in Hybrid a 2025 Best Car for the Money while also naming Tucson Hybrid 2025 Best Hybrid SUV.¹

The 2026 Tucson leads with style, versatility and safety. Its exterior expresses our advanced design language with bold surfaces that have the kinetic energy of a cut gemstone. And dynamic angles that extend the look from front to rear, top to bottom.

Could it get more distinctive? Tucson's dazzling cluster of available premium LED Daytime Running Lights answer in unequivocal fashion. Hidden within the front grille, they sparkle to life when illuminated, projecting an unmistakable signature. There's no blending in when you're in the Hyundai Tucson – and Tucson drivers wouldn't have it any other way.

Step inside, and a spacious interior greets you with clean lines and attractive surfaces. The dash features an uncluttered horizontal design reminiscent of modern architecture. It's topped by a 12.3" touchscreen and loaded with connectivity and convenience technologies – like wireless Apple CarPlay[®] and Android Auto[™] standard on all models.²

As you drive, Hyundai SmartSense – our suite of advanced safety and driver-assistance technologies – helps protect you from all sides.³ And when fueling, charging or parking, available Hyundai Pay makes life easy. It lets you pay effortlessly using voice recognition or a simple tap on that striking touchscreen,⁴ while available Remote Smart Parking Assist lets you step outside and remotely guide your Tucson into tight spaces.⁵

When you add all of that to EPA-estimated fuel economy of up to 38 combined MPG on Tucson Hybrid Blue SE⁶ and an all-electric range of up to 32 miles on Tucson Plug-in Hybrid,⁷ it's clear Tucson leads from more angles than ever.

The gas-engine Tucson: Unconventionally confident.

Only its power source is conventional. Running on regular unleaded to help save you money, the gas-engine Tucson powers your journeys with fun-to-drive performance that matches its stand-apart style. A spirited Smartstream 2.5L engine puts out enough punch to tow up to 2,750 lbs.⁸ With a smooth 8-speed automatic transmission and smart features like Idle Stop & Go, Tucson also excels at fuel economy that delivers an EPA-estimated 28 combined MPG with front-wheel drive.⁹

The fine-tuned steering and suspension make your ride feel as poised and refined as it is responsive. And with Drive Mode Select, you can tailor Tucson's dynamics to your personal preference: Normal, Sport, Snow (when equipped with AWD) or a new My Drive setting that lets you dial in the performance to your own driving style.

Like to journey off the expected path? Available HTRAC All Wheel Drive helps confidently pull you through challenging road conditions. To fully express that kind of capability, we've engineered Tucson XRT with a Terrain Mode that confidently tackles mud, snow and sand. Outside, we outfitted it with an exclusive dark chrome front grille, black alloy wheels with machine-burnished outer surfaces and beefier body cladding – then topped it with raised roof rails.

Selectable Drive Settings

Tucson Hybrid and Plug-in Hybrid: Gas convenience. Electrified intelligence.

You value a cleaner, greener world – yet you also appreciate real-world practicality. Hyundai Tucson's hybrid models pair a gas engine with electrified efficiency to give you best-of-both-worlds flexibility. Which means you can simply gas up and go while going farther on every single tank.

Tucson Hybrid is driven by a turbocharged 1.6L engine and 47.7 kW electric motor that combine for 231 net horsepower. You'll feel the excitement with every press of the accelerator – and appreciate the efficiency every time you pass by a gas station. In fact, Tucson Hybrid Blue SE delivers up to an EPA-estimated 38 combined MPG.⁶

Tucson Plug-in Hybrid uses a 7.2 kW onboard charger to let you recharge its robust 13.8 kWh battery pack in as little as two hours¹⁰ for an all-electric range of up to 32 miles.⁷ For optimal range and power, its turbocharged 1.6L engine works in concert with the 72 kW electric motor to generate up to 268 net horsepower and an EPA-estimated combined 77 MPGe.⁷

Tucson's hybrid models aren't just smartly powered – they also deploy their power in highly intelligent ways. The available Green Zone Drive Mode can recognize when you're driving in a restricted emissions zone based on navigation and driving history, then automatically prioritize battery-powered driving. When you're driving with an infant on board, selecting Baby Mode will soften acceleration to help keep the ride smooth and peaceful.

Standard HTRAC All Wheel Drive is enhanced with e-Handling technology that takes advantage of the electric motors' impressive torque to provide improved traction, stability and confidence while cornering. Towing capacity is up to 2,000 pounds.¹¹ And battery packaging is compact for ample cargo room to pack even more into your weekend adventures.

Open the door to modern magic.

The simple act of opening your Hyundai Tucson feels like a special moment thanks to design and technology that think ahead for you. As you approach, your Tucson recognizes the signature of your Proximity Key and lets you enter with the key still in your pocket or purse.

Arms full of groceries? Stand behind your Tucson – within a few seconds, it recognizes your Proximity Key and automatically opens the available hands-free smart liftgate.¹² We've also thought ahead to give you more ways to load its spacious cargo area with an available dual-level cargo floor that adjusts to create more space for taller items. Have cargo that's large or long? Remote-release folding 2nd-row seats provide easy access to its full cargo hauling capacity.

Now that your gear is loaded, slip into the driver's seat. You'll find an interior that is modern design at its best, defined by sleek lines and striking details. The feeling is remarkably open and relaxing, especially when you fill it with available premium features like heated and ventilated front seats, heated 2nd-row seats and a wireless phone charger.

The open feeling enjoyed by those seated up front? It's extended to the rear passengers as well: Tucson and Tucson Hybrid feature class-leading legroom in the 2nd row.¹³

The Limited trim opens things up even more with a panoramic sunroof overhead. Leather-trimmed seats and a heated leather-wrapped steering wheel top it off for those who want the most premium Tucson ever.

Heighten your sense of safety. With Hyundai SmartSense.

Every 2026 Tucson is engineered with Hyundai SmartSense, a remarkable suite of advanced safety and driver assistance technologies.⁹ To help avoid accidents in the first place, SmartSense is flush with innovations designed to alert you to potential hazards – including standard features like an intuitive Driver Attention Warning¹⁴ that monitors for inattentive driving patterns and can alert you to take a break.

As you drive, you'll appreciate the array of cameras onboard that enable the available Blind-Spot View Monitor and Surround-View Monitor to provide a full 360-degree sense of what's happening around your vehicle.¹⁵ So whenever you and your Tucson make your next move, you'll enjoy the peace of mind that comes from SmartSense technologies helping to safeguard your journey.

4 Lane Following Assist

Rear Cross-Traffic Collision-Avoidance Assist **3**

1 Forward Collision-Avoidance Assist

5 Highway Driving Assist

Overall 5-Star Safety Rating
2025 Hyundai TUCSON & TUCSON Hybrid¹⁶

1. Forward Collision-Avoidance Assist

When the front-facing camera and radar detect a vehicle, pedestrian or cyclist in your path, or an oncoming car when turning left in an intersection, your Hyundai warns you of a potential collision. If necessary, the system may automatically apply emergency braking to help avoid a collision.¹⁷

2. Blind-Spot Collision Warning

If your Tucson detects a vehicle in your blind spot while the turn signal is on, it issues an alert before you change lanes to help avoid a collision. It also monitors for vehicles approaching from behind to help prevent collisions when you are exiting a parallel parking spot.¹⁸

3. Rear Cross-Traffic Collision-Avoidance Assist

Backing out of a parking space and wondering whether there is cross traffic coming your way? This feature can warn you of another vehicle approaching from the side. If necessary, your Hyundai may automatically apply braking to help prevent a collision.¹⁹

4. Lane Following Assist

Using your Tucson's front-facing camera to detect lane markers on the road, this feature assists the driver's steering to help keep you centered in your lane. It even helps determine a virtual path based on the movements of the preceding vehicle, utilizing this additional reference point to keep your Tucson tracking smoothly in your lane.²⁰

5. Highway Driving Assist

Acting as your copilot on highways, this available feature can help keep your Tucson centered in your lane while also maintaining a set speed and distance from the vehicle in front. It uses navigation map data to automatically adjust for changing speed limits and can reduce your speed when it detects you're approaching a curve in the road.²¹

6. Safe Exit Warning | Advanced Rear Occupant Alert

After you park, Safe Exit Warning issues an alert when a vehicle is detected to be approaching from behind, letting the driver know it may not be safe for passengers to open the street-side door.²² The available Advanced Rear Occupant Alert feature can help remind the driver to check the 2nd-row seats for kids or pets after turning off the engine.²³

Get comfortable on the cutting edge.

Forward-thinking innovation in the Hyundai Tucson makes you feel like you've gotten to the future faster. That advancement is on full display the moment you look inside the cabin. Atop the dash is a large 12.3" touchscreen infotainment display where you interface with technologies like wireless Apple CarPlay® and Android Auto,™ standard on all models.² When paired with the available 12.3" digital instrument cluster, these screens combine into a single, nearly seamless panoramic display from the driver's side to the center of the dash.

Want to view your vital driving data in even more forward-looking ways? The available full color Head-up Display can project information like speed, cruise control settings – even navigation inputs for your next turn – onto the windshield in fighter-jet fashion, so your eyes stay focused on the road ahead.

Now relax and enjoy Tucson's available Bose® premium audio system that fills the cabin with rich sound. To ensure the music never stops, 27W USB-C ports front and rear help keep everyone's devices charged. Every Tucson Limited also boasts a wireless charging pad to keep you – and your device – energized with ease.²⁴

Tucson's magic doesn't stop upon your arrival. Available Hyundai Pay lets you pay for fueling, charging or parking using your voice or the touchscreen, while Remote Smart Parking Assist on Tucson Limited takes the squeeze out of tight parking spaces. Just hold down a button on your key fob while standing outside of the vehicle, and you can remotely roll your Tucson forward into a tight spot. Hold another button, and you can guide your Tucson safely back out.⁵

Experience Bluelink+: No fees. No trial. No worries.

With the introduction of Bluelink+, Hyundai became the first automotive brand to offer its suite of connected car features to new car purchasers without a subscription. Bluelink+ is complimentary with the purchase of your new 2026 Tucson.

Bluelink features technologies designed to help keep you safe and supported – from automatic collision notifications to automatic emergency assistance if your airbags deploy and enhanced roadside assistance that sends your exact location to a roadside assistance associate. Bluelink also includes helpful maintenance features like remote diagnostics and monthly vehicle health reports to keep your Hyundai running its best. All complimentary with a 2026 Tucson new vehicle purchase.

Our MyHyundai with Bluelink app turns your compatible smartphone, smartwatch or smart home assistant device into a Bluelink remote control that can unlock your Tucson's doors and start the engine and climate controls before you walk out the door.

Enter your Tucson using the available Digital Key 2 Premium for your compatible smartphone or wearable device, and your radio and navigation system presets are restored via your Bluelink personal profile. Apple Wallet, Google Wallet and Samsung Pass let you share your digital key with trusted friends and family members – as the primary driver, you can control when a shared key can be used, and pause or end shared key access at any time.

Bluelink

Automatic Emergency Assistance

Bluelink offers you 24/7 SOS Emergency Assistance as well as Automatic Collision Notification that calls for help if you're in an accident where your vehicle's airbags deploy.

On-Demand Diagnostics

You can run vehicle diagnostics from your touchscreen, report issues at the press of a button and receive monthly vehicle health reports or maintenance reminders by email.

Remote Vehicle Controls

Your compatible smartphone, smart speaker or wearable device lets you remotely start Tucson's engine, set the cabin temperature, unlock the doors and more.

Over-the-Air Software Updates

Convenience is taken to the next level with Over-the-Air software updates that keep the infotainment and available navigation systems up-to-date without requiring a dealership trip.

Remote Vehicle Status

Wondering how much fuel is in your tank? If your vehicle's liftgate is open or the doors are still unlocked? Your MyHyundai app knows the answers to these questions and more.

Hyundai Pay

Using Tucson's available Hyundai Pay feature, you can use your voice or the touchscreen to find fueling and charging stations, make payments or reserve parking with ease.

Our commitment to Hyundai owners does not end with the transfer of keys. Wherever the road takes you, we've got your back with Hyundai Owner Assurance, an umbrella of services and benefits that includes America's Best Warranty, 24/7 Roadside Assistance, innovative safety and car care features... and more.

America's Best Warranty claim based on total package of warranty programs. See your Hyundai dealer for LIMITED WARRANTY details and HyundaiUSA.com/Assurance for Owner Assurance details and limitations. While the information contained in this brochure is based on the latest information available at the time of publication, specifications and equipment can change. Feature comparisons based on competitor information available at the time of publication. Although the information in this brochure is believed to be correct, accuracy cannot be guaranteed. No warranty or guarantee is being extended in this brochure, and Hyundai reserves the right to change product specifications and equipment at any time, without notice, without incurring obligations. Some vehicles are shown with optional equipment. Specifications apply to U.S. vehicles only. Please contact your Hyundai dealer or visit HyundaiUSA.com for current vehicle specifications or details on any of the programs or services listed here.

Footnotes

¹View U.S. News Best Cars at cars.usnews.com. ²Apple® is a registered trademark of Apple Inc. Android Auto™ is compatible with Android™ phones running Android 5.0 or higher. Android Auto may not be available on all devices. Additional apps may be required. Android and Android Auto are trademarks of Google LLC. ³Some features vary by model and trim level. For details, refer to the Features chart in this brochure or visit HyundaiUSA.com. ⁴Hyundai Pay is available on select 2021-2026 model year Hyundai vehicles equipped with Bluelink and touchscreen navigation. Requires an active Hyundai Bluelink mobile app account, subject to the Connected Services and Hyundai Pay Terms and Conditions. Cellular and GPS coverage is required. Only use Bluelink features and corresponding devices when safe to do so. Valid Visa, MasterCard or American Express credit card must be linked to Hyundai Pay. Credit card eligibility and terms are determined by the card issuing bank. Hyundai Pay is currently accepted at select gas stations, charging stations and parking facilities (collectively, "Merchants") in the U.S. Participating Merchants may not operate in all states or locations. Additional Merchant terms and fees may apply. Features, specifications, fees and availability are subject to change. Visit Owners, HyundaiUSA.com for more information. ⁵Remote Smart Parking Assist (RSPA) can help remotely park the vehicle. However, several factors can impact RSPA performance. RSPA may not function correctly if one or more of the parking sensors is damaged, dirty or covered, or if weather conditions (heavy rain, snow or fog) interfere with sensor operation. Always inspect the parking area with your own eyes. See Owner's Manual for details and limitations. ⁶2026 TUCSON Hybrid BLUE SE AWD: 38 City / 38 Hwy / 38 Combined MPG. All figures are EPA estimates and for comparison only. Your actual mileage will vary based on options, driving conditions, driving habits and the vehicle's condition. ⁷2026 TUCSON Plug-in Hybrid 32-mile All-Electric Range based on a fully charged battery pack and 77 Combined MPGe. MPGe is the EPA-equivalent measure of gasoline fuel efficiency for electric-mode operation. 35 Combined MPG (gas). All figures are EPA estimates and for comparison purposes only. Actual range and mileage will vary with options, driving conditions and habits, vehicle and battery condition, battery temperature, outside temperature and other factors. ⁸Towing capability varies by configuration. 2,750 lb. maximum towing capacity requires non-hybrid TUCSON model and installation of aft trailer brake controller and trailer brakes. See Owner's Manual for proper use and additional information. ⁹2026 TUCSON: FWD 25 City/33 Hwy/28 Combined MPG. AWD 24 City/30 Hwy/26 Combined MPG. All figures are EPA estimates and for comparison purposes only. Actual mileage may vary with options, driving conditions and habits, vehicle and battery condition. ¹⁰Charge time based on a 240V Level 2 charger. Actual charging time varies based on a number of factors, including current battery charge level, output of the charging unit, vehicle and battery settings, battery temperature and outside temperature. ¹¹Towing capability varies by configuration. 2,000 lb. maximum towing capacity requires TUCSON Hybrid or TUCSON Plug-in Hybrid and installation of aftermarket trailer brake controller and trailer brakes. See Owner's Manual for proper use and additional information. ¹²The hands-free power liftgate opens when your Proximity Key is within 3 feet of the detection area at least 3 seconds. Radio transmitters and other smart keys may interfere with normal operation. Please consult your Owner's Manual for details and limitations. ¹³Class comparison based on primary compact SUV and compact hybrid SUV competitors as defined by Hyundai Motor America. Competitors within this class are 2026 Honda CR-V, 2025 Toyota RAV4, 2026 Nissan Rogue, 2026 Ford Escape and their hybrid variants. Claim based on comparison of specifications on manufacturer websites. ¹⁴Driver Attention Warning is only a warning to inform the driver of a potential lack of driver attention or drowsiness. It does not detect and provide an alert in every situation. It is the driver's responsibility to remain alert at all times. See Owner's Manual for details and limitations. ¹⁵Blind-Spot View Monitor (BVM) assists the driver in changing lanes by providing a live view of the blind spots on either side of the vehicle and an audible alert if another vehicle is detected. Turn signal will be activated and other system limitations apply. Do not rely exclusively on BVM. It is the driver's responsibility to be aware of the surroundings and ensure it is clear before changing lanes or directions. See Owner's Manual for details and limitations. Surround View Monitor (SVM) is a parking support system. SVM cannot eliminate blind spots, may not detect every object, and does not warn of moving objects. Always check your surroundings before moving your vehicle. See Owner's Manual for details and limitations. ¹⁶Government 5-Star Safety Ratings are part of the National Highway Traffic Safety Administration's (NHTSA's) New Car Safety Program (www.nhtsa.gov). ¹⁷Forward Collision-Avoidance Assist with Pedestrian, Cyclist, and Junction Turning Detection is intended to be a supplement to safe driving practices. The system is not designed to detect certain stationary objects such as trees or poles, and may not detect all vehicles, pedestrians, or cyclists under certain conditions. The system's Junction Turning function operates when the vehicle's left turn signal is activated, the vehicle is traveling between approximately 6-19 mph and the oncoming vehicle's speed is between approximately 19-44 mph. The system is a driver assistance system and is not a substitute for safe driving. The driver is responsible for being attentive and maintaining control of the vehicle, and should not wait for the system's alerts before braking as there may not be sufficient time to brake safely. See Owner's Manual for further details and limitations. ¹⁸Blind-Spot Collision Warning (BCW) can assist the driver by warning of other vehicles in the blind spot region. While your turn signal is on, it can alert you visually, by sound and/or by haptic feedback when equipped. It senses the rear side territory of the vehicle when it is traveling over approximately 12 mph. There are limitations to the function, range, detection and clarity of the system. It will not detect all vehicles in the blind spot. Its operation depends on the size, distance, angle and relative speed difference between your car and other cars. BCW may not operate if sensors are obscured in any way. Do not rely exclusively on BCW. BCW is a supplemental system, and the driver must still be attentive and exercise caution when driving. ¹⁹Rear Cross-Traffic Collision-Avoidance Assist (RCCA) can alert the driver of a potential collision by providing an audible warning and/or applying the brakes. RCCA is active when the vehicle is in reverse and operating at low speeds. Never rely exclusively on RCCA. RCCA cannot prevent all collisions and may not provide alerts or braking in all conditions. Always look over your shoulder and use your mirrors to confirm rear clearance. There are limitations to the function, detection and clarity of the system. See Owner's Manual for details and limitations. ²⁰Lane Following Assist (LFA) helps keep the vehicle centered in its lane only when the lane markings are clearly visible on the road. LFA will not work under all circumstances and will not prevent loss of control. LFA is a supplemental assist and does not replace the need for extreme care and attention by the driver. See Owner's Manual for details and limitations. ²¹Highway Driving Assist (HDA) is for highway use only and can help keep your vehicle centered in its lane while maintaining a safe distance from the vehicle ahead when the lane markings are clearly visible on the road. It is not to be used in poor weather, heavy or varying traffic, or on winding or slippery roads. HDA will not work under all circumstances and will not prevent loss of control. Driver remains responsible to slow or stop the car to avoid a collision. See Owner's Manual for details and limitations. ²²When your vehicle is parked, Safe Exit Assist (SEA) can alert the driver when a vehicle is approaching from behind. SEA does not work in all situations and is not a substitute for driver or passenger attentiveness. Always be aware of your surroundings and be attentive of approaching vehicles. See Owner's Manual for details and limitations. ²³When your vehicle is parked, the engine has been turned off, Advanced Rear Occupant Alert (AROA) can help alert the driver if it detects movement from a child or pet inside the vehicle. Upon exiting and locking the vehicle, AROA may provide visual, audible, and/or Bluelink+ alerts if the interior overhead sensor detects movement. AROA is not a substitute for driver attentiveness. Never leave a child or pet unattended in a vehicle. Bluelink+ notification requires a Bluelink-equipped vehicle with an active Bluelink+ account. See Owner's Manual for details and limitations. ²⁴Qi wireless charging function is based on smartphone compatibility and/or specific accessory cases. ²⁵Bluelink+ is available to original purchasers and lessees of new 2024 or newer Bluelink-equipped Hyundai models. Not available on all models and trims. Bluelink+ requires an active Bluelink account subject to the Connected Services Terms and Conditions. Bluelink features vary by model and trim. Only use Bluelink features and corresponding devices when safe to do so. Cellular and GPS coverage is required. Fees apply for map and multimedia Over-the-Air (OTA) updates after an initial three-year period of complimentary updates. Three-year term starts from the new vehicle date of first use. Features, specifications, and fees are subject to change. Bluelink+ services are provided via digital wireless telecommunications technology outside of Hyundai's control. Bluelink+ is dependent on 4G LTE cellular networks controlled and maintained by third-party wireless carriers. If and when these networks change and/or discontinue service, or the underlying technology required to support Bluelink+ becomes obsolete, then the connected services will not work and Hyundai will be forced to cancel impacted subscription services. ²⁶Bluelink agents will contact existing emergency service responders. ²⁷Requires active Bluelink Advanced subscription (complimentary for the original owner). Remote climate control available on properly equipped models with fully automatic temperature control. Remote stop only available when in remote start mode. ²⁸Digital smartphone key requires a compatible smartphone and an appropriately equipped Hyundai vehicle. Not all smartphones are compatible. Hyundai vehicle must be equipped with smart key with push button start and wireless device charging, and Audio Video Navigation System 5.0 (or newer) or Display Audio 2.0. Tap to lock/unlock function works on front doors only. Requires MyHyundai with Bluelink app and active Bluelink account. Please visit www.MyHyundai.com for information on compatible devices. Features and specifications are subject to change. See your Owner's Manual for additional details and limitations. ²⁹Apple Wallet™ is a registered trademark of Apple Inc. Samsung Pass® is a registered trademark of Samsung Electronics Inc. Google Wallet™ is a trademark of Google LLC. ³⁰Map Over-the-Air (OTA) software updates are available and complimentary for original purchasers and lessees of new 2024 TUCSON Bluelink-equipped Hyundai vehicles ("Eligible Models") for an initial three-year term, after which fees apply. Three-year term starts from new vehicle date of first use. OTA updates require an Eligible Model and an active Bluelink subscription agreement subject to the Connected Services Terms and Conditions. Only use Bluelink features and corresponding devices when safe to do so. Cellular and GPS coverage is required. Features, specifications, and fees are subject to change.

Hope comes standard on every Hyundai.

Each time we sell a Hyundai, a portion goes to Hyundai Hope On Wheels® to help find a cure for childhood cancer. Over the last 27 years, Hyundai Hope On Wheels has donated \$277 million to pediatric cancer research. Hope is our greatest feature. And it comes standard on every Hyundai.
