AGILOX OCF
Heavy Lifting

SWARM Intelligence

Omnidirectional

Energy Efficient

Open Interfaces

Analytics

The AGILOX OCF is a counterbalanced AMR designed for heavy-load transport on open and closed pallets, effortlessly navigating narrow aisles with its omnidirectional drive.

Available in various configurations, including lift capacity, fork length, and lift height. It handles both simple and complex material handling tasks with precision and efficiency.

Standard 1.6 m Lifting Heights

Fork Lengths 1200 | 1400 mm

Performance Data

1.600 mm	**750 | 1.500 kg**	**1,4 m/s**
Max. Lifting Height	Max. Lifting Weight	Max. Speed

1.200 mm

Max. Lifting Height

Dimensions

2.784 x 1.200 x 2.566 mm (L x W x H)

2.784 x 1.200 x 2.340 mm (L x W x H)

Specifications

3 Omnidirectional Drivers	**3.500 mm**
Drive System	Turning Circle
Dual Electric Spindles	**3.600 kg**
Lift System	Unit Weight

LiFePO4 with BMS 3 min charging = 1 h operation

Battery

| Specification	Details
📝 Pallet	800 / 1.000 / 1.200 EUR format
📝 IBC Liquid Tank	
📝 Boxes	Plastic / wood / metal
📝 Palletboxes	Plastic / wood / metal
📝 Dimensions Max	xxx12 = Length: 1.200 mm xxx12= Width: 4.000 mm xxx14 = Length: 1.400 mm xxx14 = Width: 4.000 mm

ⓘ Other types of carriers - inquiry to supplier

ⓘ NB: The vehicle is not limited by plastic wrap on the pallet's foot

Carrier Types

System Overview
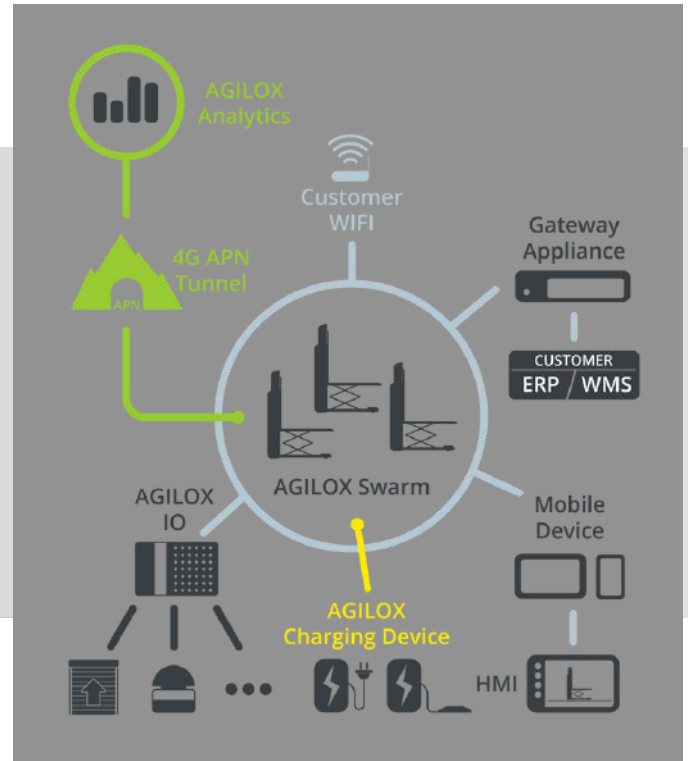

Efficient Charging
Operates 24/7 without battery replacement. 60 minutes of operation with just 3 minutes of charging.

Wi-Fi Connectivity
Requires customer-provided Wi-Fi for seamless communication between vehicles.

System Integration
Easily connects to customer ERP, WMS, or MES via AGILOX JSON API.

Swarm Intelligence
Decentralized navigation optimizes fleet coordination and efficiency.

Mobile Control
The AMRs are managed via smartphone, tablet, or any browser-enabled device.

User-Friendly HMI
The interface is accessible through a web browser, ensuring easy interaction at any time.

Seamless Infrastructure Integration
The IO Box enables connection with existing systems, such as roller doors and fire alarms.

Advanced Analytics
Real-time access to key performance data from anywhere.

HMI
Customer-friendly Interface

The control system features a user-friendly and flexible HMI, providing full control, real-time monitoring, and the ability to adjust autonomous mobile robots and system settings on any device.

Key Features

Open Interface
Seamless integration with existing systems.

Zoom function
Improved screen visibility for detailed operation.

Realtime Vehicle Overview
Instant status updates on all AGILOX units.

Direct Workflow Adjustments
Modify layouts and parameters instantly.

Heatmaps
Visualize movement patterns and optimize efficiency.

Comprehensive Tools
All necessary tools included, with error notifications via email or SMS.

Integrated Documentation
Always accessible and directly embedded.

AGILOX seamlessly integrates with customer management systems. Orders from WMS, ERP, PMS, or MES are automatically converted into transport requests. The integration is provided as a gateway solution with an API (REST) for communication, utilizing JSON scripts combined with OPC I/O.

Flexible Order Trigger Options

Easy Button
Operators can initiate transport orders via screen-configured buttons.

Scheduled Orders
Predefined transport tasks executed at specific times or intervals.

Sensor Activation
Automatic triggering based on PLC signals.

Software Integration
Seamless connectivity with customer management systems.

SCANLOX
SCANDINAVIAN LOGISTICS

AGILOX Analytics

Performance Data

Easy Access
Analyze logistics data effortlessly via a browser.

Optimized Operations
Leverage real-time insights to improve fleet efficiency.
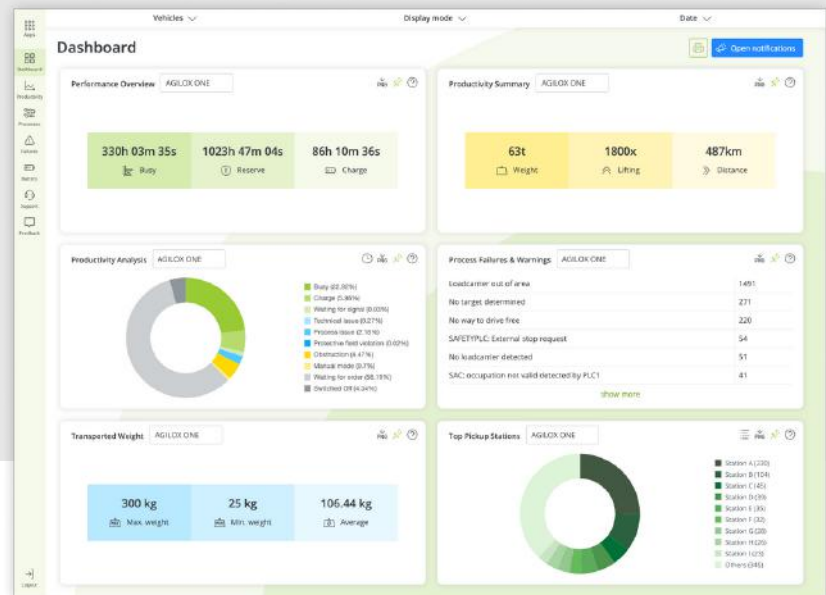

Maximum Security
Certified data center with highest security encryption.

Detailed Reports
3.5 billion + data points per vehicle for precise analysis.

Anywhere, Anytime
Access data from any device for continuous optimization.

Embracing the Power of Simplicity

X-SWARM Technology

One for all. All for one. All for you

All Agilox AMRs communicate in real time, exchanging data on their position and status several times per second. They autonomously allocate tasks, manage the supply and removal of goods, efficiently navigate by identifying free routes, and effortlessly adapt to changes in their environment.

Plug & Perform

it's as easy as that

Plug & Perform technology allows for AMR deployment in under 12 hours, with workflows adaptable in minutes. Skip the long implementation times and high commissioning costs while easily integrating third-party modules, such as (high-)speed doors and IT systems. Built for open communication, the AMRs use Wi-Fi connectivity for smooth interaction and control.

Unique Simplicity

Because it's about ease of use

Engineered with a user-first approach, the technology is designed for intuitive and seamless operation. Hardware, controls, software, and cloud architecture are developed in-house and fully integrated to streamline every phase, from commissioning and operation to maintenance, control, and workflow adjustments.

Flexibility

Being flexible is a guarentee of success

The AMRs instantly adjust to changing requirements with a single click. Stations, map layouts, and entire workflows can be created, modified, or relocated effortlessly, without extra costs or external assistance.

Safety

It's also absolutely safe

The AMRs operate safely alongside employees, navigating shared travel and transport routes without incidents. Advanced safety sensors and a dynamic 360° protective field enable smooth and efficient performance in mixed traffic environments. They are certified to meet key industry safety standards, including CE, UL, and ISO 3691-4.

Supply Chain

Simply no more Standstill. 24/7

Maintain a seamless material flow with absolute flexibility, even in dynamic environments. In the event of a robot failure, the remaining AMRs in the swarm automatically take over to ensure uninterrupted operations. Prevent supply shortages and optimize transport throughput times with fully automated efficiency. Thanks to ultra-fast charging, AMRs are ready for use again within minutes, ensuring a perfectly synchronized material flow.

Features and Add-Ons

Obstacle Avoidance

3D sensor system improves safety in human-machine environments.

Signal Lighting

Multi-color signals (blue, green, red) for increased visibility, with additional fork-tip lights (white, yellow).

Charging Devices

Available as mobile or stationary units

ESD Protection

Prevents electrostatic charging in ESD-sensitive areas.

Rubber Guards

Front and fork-tip protection to deflect dirt.

Barcode Reader

Reads barcodes and QR codes for identification.

Lifting Aids

Specialized lifting equipment designed to ensure safe and efficient handling.
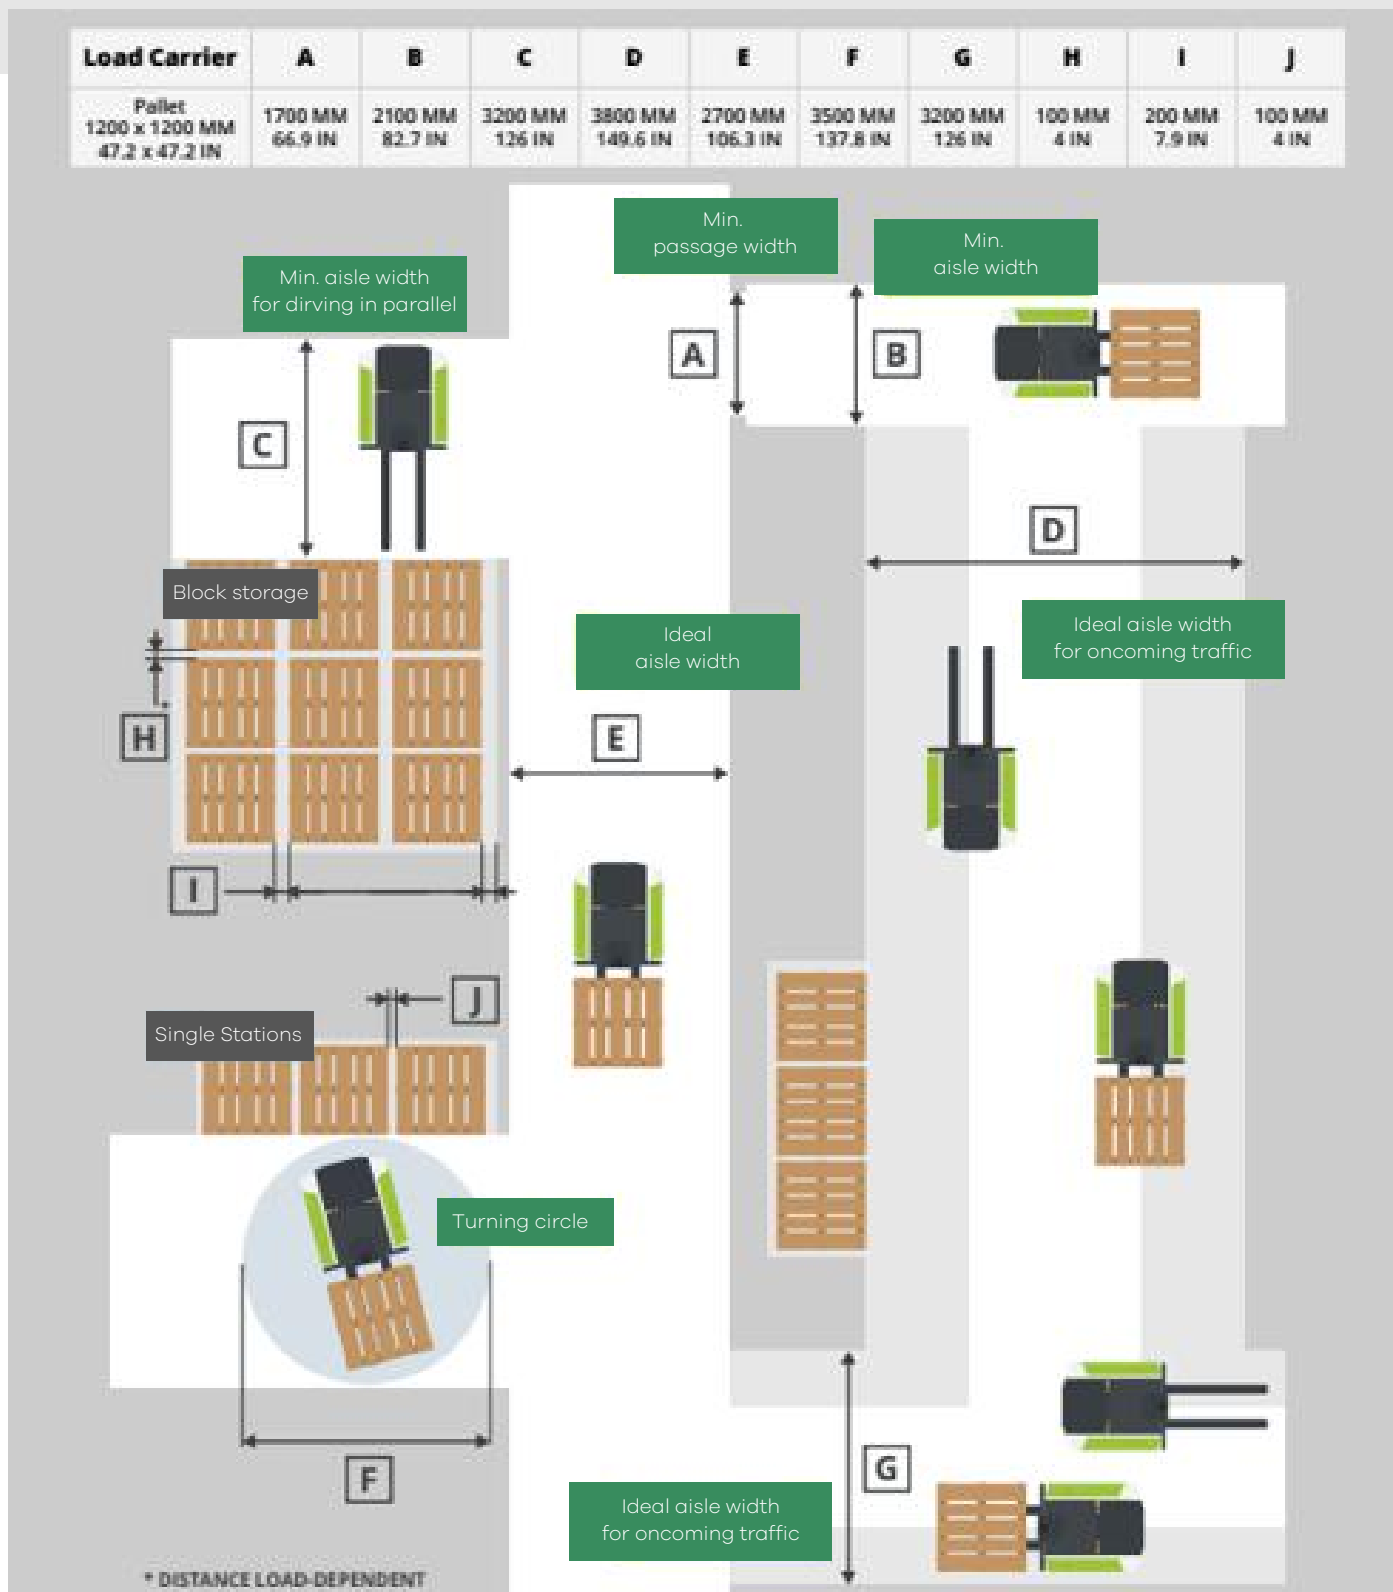

Safety & Scanners

Load Sensor

"Collision Avoidance"

Navigation Scanner

Ultrasound Scanner

SICK Nanoscan

The AMRs are equipped with advanced safety systems designed to protect employees, infrastructure, and the robots themselves.

Compliance with international standards such as **ISO 3691-4 and EN1525.**
