Dekoria Trendbook 2026

The secrets of our interiors

Discover a Trendbook filled with fresh ideas and inspiration. Explore remarkable arrangements brought to life with Dekoria.

The year 2026 marks a shift in the way we think about our living spaces. Materials that create a warm, welcoming and authentic atmosphere take centre stage. Fabrics become a key element of interior design – a carrier of style, comfort and personal character. Instead of one dominant style, we embrace the freedom to combine textures and patterns. Linen, cotton and other natural materials with a distinctive structure add depth and cosiness to interiors. More and more often, we reach for textiles with “soul” – noble, durable and suited to the rhythm of everyday life. Roman blinds, curtains and decorative cushions are valued not only for their aesthetics, but also for the emotions they evoke. They help make a house feel truly our own.

We wish you an inspiring read,

The Dekoria Team
