

TASMANIAN TIGER *Reference Guide – Canada*
THE PROS' EQUIPMENT

Tasmanian Tiger® is a leading global supplier of premium professional Military, Tactical, and Police Equipment. Founded by Tatonka GmbH in 1999. Tasmanian Tiger® has redefined the meaning of quality through its commitment to functional design detail, a rigorous pre production testing process, and the determination to produce only the finest products. All Tasmanian Tiger® products are made using the best quality materials that are available, and designed so that every detail adds to the functionality. Beginning with a prototype, the development of the products is based on user's specific needs and requirements. Only when the comprehensive product testing process is complete - and we believe we have created the best possible product with the most functionality possible - do we move to production. Tasmanian Tiger® products are manufactured in our own production facilities. This ensures that the high level of quality construction we require is never in question. There are no sub-contractors, and there are no excuses. Every step in the production process, from purchasing material, to cutting, and throughout manufacturing is precisely defined and checked regularly for quality control. In addition, independent test centers are utilized to make certain that we meet or exceed all international standards. In addition to our high manufacturing standards, we are proud of the excellent social conditions at our factories. Like no other company, we have an OPEN FACTORY program, where you can visit our factory on any Friday, to see our highly skilled production team in action.

You can rely on Tasmanian Tiger® products - anywhere, any time.

COMPETENCIES

TASMANIAN TIGER – **COMPETENCE IN CARRYING**

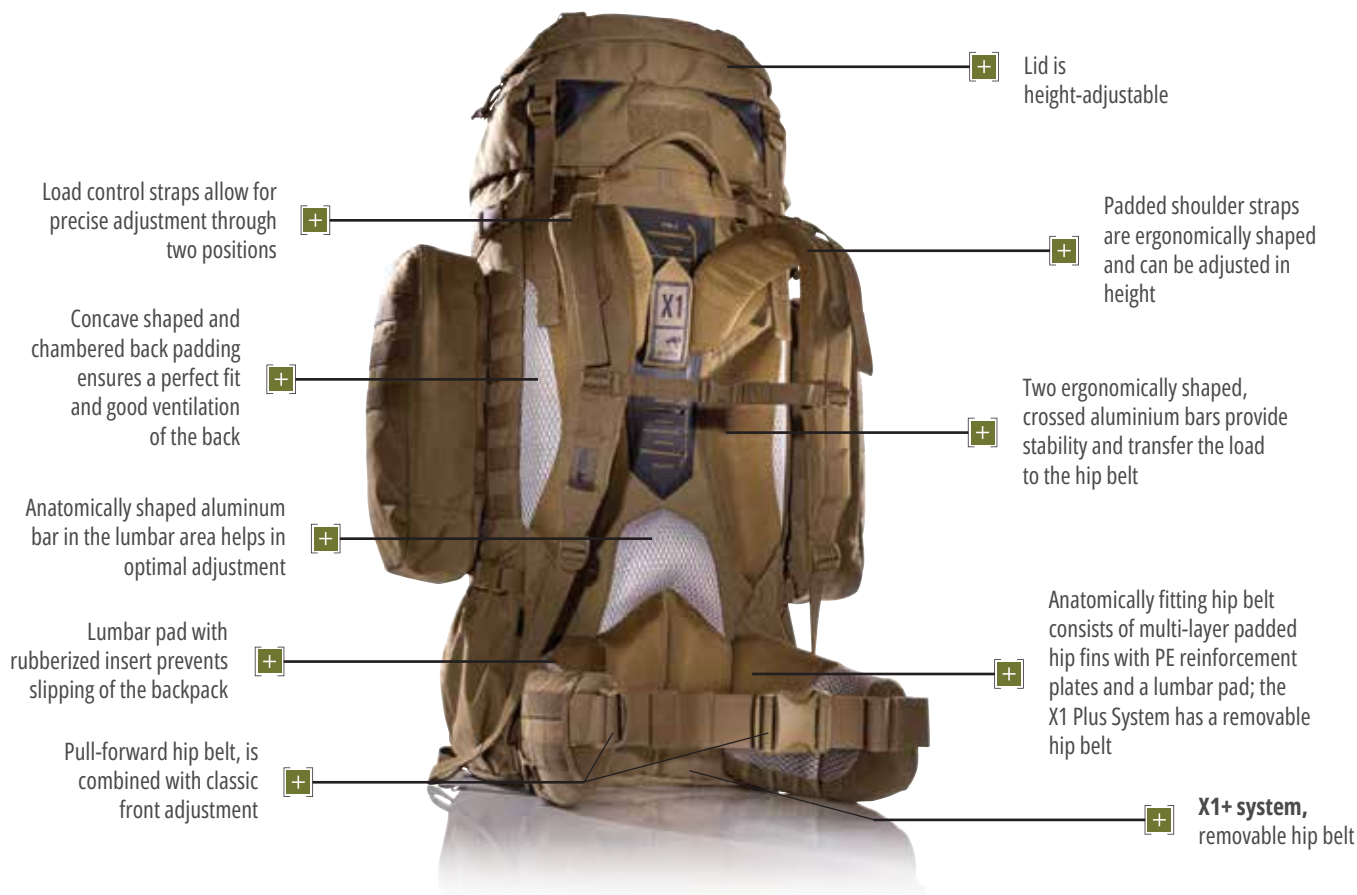

Tasmanian Tiger has a long-standing experience in backpack construction and proven expertise in high-performance backpack carrying systems.

When developing our backpacks, we attach great importance on ergonomic design, durable materials, functionality, and a perfect fit. For long missions with a heavy load, the most important thing is the comfort of the backpack. That is why, in addition to the selection of the right pack sack, the selection of the right carrying system plays a central role. The heart of a Tasmanian Tiger carrying system revolves around an internal frame structure that transfers the weight of the pack sack to the hip via the hip belt. This transfer assures that pressure is relieved from the shoulders and spine. It is a basic fundamental that the heavier the load the more stable the support system must be. However, the load transmission should not be completely stiff, but must remain flexible enough to ensure that even in rough terrain, the user can be agile in his/her movements, especially when traversing large obstacles. For perfect load transfer, the carrying system must also function for various sized individuals. To ensure this, most of Tasmanian Tiger carrying systems are adjustable in size and can be custom fit to a wide range of back lengths.

Because a backpack not only has to fit the application, its respective requirements, and the user, we have developed different carrying systems for different backpack models, shown on the following pages.

Tasmanian Tiger – carrying systems for every mission

Carrying Systems

X1-SYSTEM

The size-adjustable high-end X1 Carrying System was specially developed for high loads over 40 kg. Particular attention was paid to the adjustability, ergonomics and ventilation of the system. Durable materials, multi-layered structures and reinforcements in the right places make the system stable and durable.

V2-SYSTEM

The size-adjustable V2 Carrying System was developed for medium to high loads up to 40 kg. A combination of aluminum and fiberglass bars results in an excellent balance of efficiency and flexibility in load transmission with low own weight. Channels on the back padding ensure good air circulation.

Carrying Systems

V2 PLUS-SYSTEM

The size-adjustable V2 Plus Carrying System was developed for medium to high loads up to 40 kg. Backpacks with this system offer great adjustability of the back length and can be worn even with fully loaded vests and chest rigs due to the detachable hip belt.

Y2-SYSTEM

The size-adjustable Y2 Carrying System was developed for light loads. Thanks to its design, it offers a wide range of back length adjustability and is suitable for both long and very short backs. Backpacks with this system are mastered with SL (=short to long) in the product name.

THERMO MOLD-SYSTEM

The lightweight, thermoformed back is ergonomically divided (1) and snuggles against the body. The technical foam (2) also saves backpack weight and is due to the smooth surface (3) very easy to clean.

PADDED BACK-SYSTEM

The carrying system has an ergonomically shaped back padding (1) with ventilation zones (2) and can feature air-permeable mesh covers. A removable PP back panel with an aluminum rail that can be individually adjusted to the back provides stability and high wearing comfort, especially when the backpack is loaded with more weight. Together with ergonomically padded shoulder straps (3), an adjustable chest strap (4) and a hip belt (5), the system provides a snug fit on the back. The hip belt is designed differently on different backpack models.

PADDED BACK-SYSTEM BASIC

The lightweight, padded back (1), along with ergonomically padded shoulder straps (2) and an adjustable chest strap (3), provides comfortable carrying. The back padding and cover are designed differently for different models.

Weight: 1,14 kg

Material: T-Square Rip FD, CORDURA® 700 den
CORDURA® 500 (MC)

Light, tactical deployment backpack for modular use. The materials used for this deployment backpack are very light, making it super easy to handle. It has a flat main compartment that is hydration system compatible, and the back panel is fitted with MOLLE hook-and-loop for customizable loading of your gear. The upper front pocket of the backpack is a flip-top behind which you can attach a magazine holder (three M4 magazines or 4 pistol / MP7 magazines, included with purchase). Both middle front pockets are removable and behind each is a MOLLE hook-and-loop surface. Both the TT Tac Pouch 12 (item 7862) or the TT 2 SGL Backup Mag Pouch M4 (item 7811) can be attached to the lower front pocket. The backpack has a MOLLE reverse system on the back so you can integrate it into a plate carrier. You can also use an included adapter to attach it to plate carriers.

[1] Hydration system compatible [2] Main compartment opens out completely [3] One narrow main compartment [4] Hook-and-loop strips for name tag [5] Capacity: main compartment 9 l, upper front pocket 2 l, middle front pockets each 1 l, lower front pocket 1 l [6] Removable bungee cord compression [7] Weight backpack without shoulder straps: 735 g [8] Interchangeable magazine inserts for 3 x M4 (PMAG) magazines (50 g), 4 x pistol / MP7 magazines (40 g) [9] MOLLE reverse system [10] Laser-cut MOLLE system [11] MOLLE hook-and-loop on the inside for limitless modularity [12] MOLLE system on the upper front pocket [13] Removable center pockets, underneath MOLLE hook-and-loop [14] Combinable with TT Plate Carrier QR LC as rear section

Weight: 1,36 kg

Material: CORDURA® 700 den
CORDURA® 500 den (MC)

Escape and survival backpack for personal equipment. The TT Survival Pack offers the right size and equipment for the most important survival utensils. The fully expandable main compartment features six pockets of varying sizes with transparent lids, four of which can be removed. The main compartment is also covered with a large MOLLE hook-and-loop area, which allows for individual additions. The bottom compartment contains a double-sided rain cover (one side with stripes in warning orange) and a tac marker. Two shallow zippered compartments on the front are great for storing documents, for example. Additional pockets or panels can also be hooked into the existing hooks on the front. Backpack shoulder straps as well as carrying handles can be stowed when the backpack is stored in vehicles.

[1] Padded back [2] Two stowable shoulder straps [3] Carrying handles can be stowed in side pockets [4] Height-adjustable chest belt [5] Hook-and-loop patch on the frontside (loop) [6] 2 zipped front compartments [7] Internal variable fixation points [8] Daisy chain on the front [9] Includes hook-and-loop strips that can be labeled [10] Integrated reversible rain cover with marker system in the bottom compartment [11] 2 removable, hook-and-loop inner pockets (4 l and 2,5 l) with transparent lid [12] 4 fixed inner pockets (1x 6 l, 1x 2,5 l, 2x 0,5 l) with transparent lid [13] Separate compartment for the use of a hydration system [14] Integrated visual markers [15] Large MOLLE hook-and-loop patch inside [16] 2 hooks for attaching additional pouches or panels on the front side

	TT-7265-331	OLIVE
	TT-7265-346	COYOTE BROWN
	TT-7266-394	MULTICAM

Size / Volume: 50 x 29 x 14 cm / 22 l

Weight: 1,60 kg

Material: CORDURA® 700 den

CORDURA® 500 (MC)

Universal small combat backpack with two front pockets and elastic side pockets. Based on the predecessor model, the Modular Combat Pack has a clean new look, optimized features and MOLLE hook-and-loop in the main compartment for customized modular add-ons. Laser-cut MOLLE on the front and sides mean you can combine it with other gear. With a main compartment that opens completely and the special zipper routing it's possible to use the pack as a top loader. The shoulder straps can be adjusted in length in order to wear the backpack over vests.

[1] Padded Back Carrying System [2] Ergonomically padded back with aluminum support elements [3] Ergonomically formed, padded shoulder straps [4] Padded hip fins with zippered pockets, removable with hook-and-loop [5] Side compression [6] Hydration system compatible [7] Capacity: Main compartment 17 l + upper front pocket 2 l + lower front pocket 3 l [8] Side pockets [9] Small mesh pockets inside, for storage of small parts such as batteries, etc [10] 2 front pockets with zipped compartments [11] Hook-and-loop closure patch on the frontside (loop) [12] Detachable rear panel with aluminium rail (can be shaped individually) [13] MOLLE hook-and-loop on the inside for limitless modularity [14] Front and sides with MOLLE system in laser-cut design for optional attachment of additional pockets [15] Length-adjustable shoulder straps make carrying large body armor possible

TT MODULAR COMBAT PACK 24 SL

TT-7857 | TT-7861 (MC)

Color:	TT-7857-040	BLACK	
	TT-7857-331	OLIVE

	TT-7861-394	MULTICAM	

Size / Volume: 54 x 29 x 18 cm / 24 l

Weight: 1,70 kg

Material: CORDURA® 500 den

Small combat backpack with extremely variable carrying system. The newly developed Y2 Carrying System of the TT Modular Combat Pack 24 SL offers a very wide range of variation in the adjustment of the back length and is suitable for both petite and very tall people. The main compartment of the 24-liter backpack is lined with MOLLE hook-and-loop areas for individual customization. The TT Modular Combat Pack 24 SL also features three front pockets with dividers, the lower one has room for three magazines. The shoulder straps can be adjusted in length to wear the backpack over protective vests.

[1] Ergonomically padded back with aluminum support elements [2] Y2 Carrying System [3] Ergonomically formed, padded shoulder straps [4] Removable hip belt [5] Padded hip fins with zippered pockets, removable with hook-and-loop [6] Side compression [7] Hydration system compatible [8] Volume: main compartment 9 l, upper front pocket 2 l, middle front pocket 1l, lower front pocket 2l [9] Small mesh pockets inside, for storage of small parts such as batteries, etc [10] Hook-and-loop patch on the frontside (loop) [11] 3 front pockets with zippered compartments [12] Strap system to hold additional equipment [13] Detachable rear panel with aluminium rail (can be shaped individually) [14] Laser-cut MOLLE system [15] MOLLE hook-and-loop on the inside for limitless modularity [16] Front and sides with MOLLE system. Sides: Width: 2 Molle loops, length: 3 / 3 Molle loops [17] Length-adjustable shoulder straps make carrying large body armour possible

TT MODULAR TAC PACK 28

TT-7399

Color:	TT-7399-021	TITAN GREY	
	TT-7399-040	BLACK	
	TT-7399-331	OLIVE	
	TT-7399-346	COYOTE BROWN	

Size / Volume: 52 x 30 x 14 cm / 28 l

Weight: 1,35 kg

Material: CORDURA® 700 den

Modular loadable daypack with 28 liters of volume. The TT Modular Tac Pack 28 is also suitable for loading more weight due to the reinforcement of the back system with a PE plate and an aluminum rail. For this purpose, it also has a preparation for attaching the sturdy TT Molle Hip Belt (a simple webbing hip belt is included). The backpack features a fully expandable main compartment with shallow mesh pockets, four small mesh side pockets, and MOLLE hook-and-loop areas for customization. The MOLLE system on the front pocket and sides can be used to attach additional gear. There is also an attachment option for tripods or poles. Two completely circumferential compression straps are used for volume adjustment

[1] Padded Back Carrying System [2] Height-adjustable chest belt [3] Removable webbing hip belt [4] Preparation for hip belt fixation (item 7286 TT MOLLE Hip Belt) [5] Two removable, fully wraparound compression straps [6] Extra-durable handle [7] Hydration system

compatible [8] Side attachment option through bungee cord, e.g. for sticks or tripods [9] Flat mesh pockets inside [10] Front pocket with zipper [11] Detachable rear panel with aluminium rail (can be shaped individually) [12] MOLLE system on both sides and front pocket [13] Laser-cut MOLLE system [14] MOLLE hook-and-loop on the inside for limitless modularity

TT MIL OPS PACK 30

CORDURA® 500 den (MC)

Proven combat backpack with a capacity of 37 liters, two main compartments and several inner pockets. The TT Mission Pack MK II offers several inner pockets and also features MOLLE hook-and-loop lining in the main compartment for individual loading or modular extensions. On the sides and the flat zip front pocket the backpack is equipped with MOLLE in laser-cut design. A side zip pocket, accessible from the outside, is provided for documents. The backpack has three tube or antenna openings in the main compartment, so that a drinking bladder can also be accommodated. A rain cover is stowed in the bottom compartment. The hip wings with zip pockets are removable.

[1] Padded Back Carrying System [2] Padded hip fins with zippered pockets, removable with hook-and-loop [3] Durable, reinforced handle [4] Emergency carrying handle [5] Hydration system compatible [6] Two large main compartments [7] Integrated rain cover inside the bottom compartment [8] Subdivided into 7 separate pockets [9] Detachable rear panel with aluminium rail (can be shaped individually) [10] Three port or antenna outlets on the main and front compartments [11] MOLLE system on both sides and front pocket [12] Laser-cut MOLLE system [13] MOLLE hook-and-loop on the inside for modular expansion

T-Insulation

The TT Tac Muff Hand Warmer is a padded fleece-lined muff which can be fastened on MOLLE or other loops. It is made of 700DEN Cordura on the outside and padded with a fleece on the inside. Between the padding and outer layer is an additional layer that not only keeps your hands warm but it doesn't compromise on durability and longevity. It has an elastic bungee cord where you insert your hands that tighten and prevent heat loss. You can use it with or without gloves.

[1] Padded fleece-lined muff which can be fastened on MOLLE or other loops [2] Made of CORDURA on the outside and padded with a fleece on the inside [3] Between the padding and outer layer is an additional layer that not only keeps your hands warm but it doesn't compromise on durability and longevity [4] Elastic bungee cord where you insert your hands that tighten and prevent heat loss [5] You can use it with or without gloves

Material Overview

CORDURA® 500 DEN (100% polyamide). Made from INVISTA high tenacity, air-jet textured Nylon 6.6 in 500 denier. The CORDURA® brand provides fabrics that are recognized for their long-lasting durability and resistance to abrasions, tears and scuffs; they are more durable than other fabrics. CORDURA® fabric offers a superior strength-to-weight ratio, making it a first-choice for durable fabrics.

CORDURA® 700 DEN (100% polyamide). CORDURA® in fibre thickness 700 den combines the high wear and tear resistance of the classic 1000 den fabric with the lightness of the 500 den fabric.

T-SQUARE RIP FD (100% polyamide). The very tight, special weave of the 210 den fibers makes this fabric extremely stable, but it remains extremely light. By using FD yarn (fulldull) the fabric gets a dull surface.

420 HD NYLON (100% polyamide). The classic 420 den Nylon material has proved itself in the „high density“ (HD) version as a good, very flexible basic material. The 420 den yarn gives it a very high tear resistance. The material is made waterproof by the triple PU coating.

TEXTREME 6.6 (100% polyester). The textured polyester material in 600 den threads is robust, colorfast and versatile. PU-coated to achieve a weatherproof finish.

CRYPTALLOY® (aluminium alloy). Products with the specially developed tear-resistant material CRYPTALLOY® offer the highest level of protection against RFID/NFC attacks. The TÜV tested material blocks radio waves on all the usual RFID frequencies and can be used for all cards.

HEAVY MESH (100% polyester). Robust 250D PES mesh fabric, which is used for tear-resistant covers, inner pockets and water passages.

T-COVER TEX (100% polyester). This very light, waterproof material made out of polyester is pleasantly soft to the touch, and is used mainly for rain ponchos, rain covers and stuff bags.

TPU 420 DEN NYLON (100% polyamide). Extremely tear and abrasion resistant polyamide material, which can be processed open-edged due to its coating properties.

T-Stretch (100% polyester). This robust, abrasion-resistant and highly elastic material is used for small parts.
