

# 3 Minute Pitch E-Catalogue 2025 – 3.1. Edition

**Women  
Entrepreneurship  
Thematic Group**

## Introduction

The Women Entrepreneurship Thematic Group	12
Activities of the WETG	13
About this edition of the catalogue...	14

## The Pitches

	16
--	----

### Agrofood

	18
--	----

1. Montenegro Company Crafts Traditional Olive Oil Soaps
2. Bulgarian Company Produces Healthy High-Quality Oils From Organic Seeds And Nuts By The Method Of Cold-pressing
3. Traditional Wine Production Company From Bosnia And Herzegovina
4. Leading Distillery In North-west Part Of Bosnia And Herzegovina
5. Portuguese Company Aims To Reduce The Dependency On Toxic Chemicals In The Agro-industry Market
6. B2B Plant-Milk Cheese Technology: Dutch Solutions for the Food Industry
7. Transforming Food Waste into Innovation: Turkey's Green Banana Revolution
8. Cyprus-Based AI-Driven Fermentation Innovation: Revolutionizing Food, AgriTech, and Sustainability with Precision-Controlled Solutions
9. UK-Based Next-Generation Demand Forecasting: Empowering the Food-to-Go Sector for a Fresher, More Sustainable Future
10. UK-Based Innovators: Transforming Health and Sustainability with Seaweed-Based Ingredients for People, Pets, and the Planet
11. UK-Based Innovators: Accelerating Sustainable Nutrition and Plant-Based Food Development from R&D to Market Launch
12. Lithuanian Superfood Innovators: Expertise in Organic Hemp & Pumpkin Seed Products, Custom Solutions, and Private Labeling

## The Pitches

### Agrofood

44

13. Upcycling Food Side-Streams: Dutch Foodtech Pioneering Sustainable & Functional Ingredients
14. Innovative Italian Solutions: R&D, Sustainable Valorization, Packaging, and Quality Assurance for Fisheries & Aquaculture
15. Driving Sustainable Agriculture: Turkey's Innovation in Biotech and Pest Management Solutions
16. Serbia's Agri-Tech Revolution: Smart Urban Farming for a Sustainable Future
17. Portuguese company designs and produces innovative concrete wine tanks to ferment and store quality wines
18. Dutch Innovation Cooks Up Energy Savings: Biobased Cooking Solution Seeks European Partners
19. Organic Italy, Timeless Vines: Carignano grape from the Heart of Sant'Antioco
20. From Hungary's Vineyards to Global Wellness: Premium Wines, Natural Cosmetics & Supplements Rooted in Tradition
21. Clean-Label Sea Delights from Germany – Powered by Algae, Driven by Passion
22. From Hungary's Heart: Villány Winery's Legacy of Award-Winning Wines and Sustainable Craftsmanship
23. Hungarian Innovation: Plant-Based, Allergen-Free Foods for a Healthier, Sustainable Future
24. Crafting Pure Portuguese Honey with Passion, Innovation, Tradition, and a Global Vision

### Health

67

25. Greek Developer Of Laser Bioprinting Systems And Specialized Regenerative Medicine Applications
26. Danish Startup Within Medtech/Healthtech Dedicated To Helping People Living With Cluster Headache
27. Danish Medtech Company Developing Solutions For Improved Neonatal Care
28. Portuguese Healthcare Technology Startup, Operating In The Digital Health Sector
29. Portuguese Healthcare Technology Company, Revolutionizing Cancer Care With Innovative Radiation Treatment Solutions
30. Portuguese Medtech Company Dedicated To Improving The Healthcare Field With Sustainable Products

## The Pitches

### Health

81

31. Portuguese Spin-off Focused On R&D In Health, Biotechnology, & Digital Tech
32. Danish Mental Health Company Provides Counselling Support For Expatriates Worldwide
33. Portuguese Digital Health Start-up Building A Platform Using Ai & Photonics
34. Fungal Defense: Pioneering Biotech Solutions from Madrid for a Healthier Future
35. Spanish Pioneer in Psychotechnology: Transforming Mental Health with AI and Innovation
36. Spanish AI-Driven Solutions for Mental & Physical Health Assessment
37. Spanish Biotech Pioneering Precision Medicine for Transplants & Autoimmune Diseases
38. Spanish E-Health Innovation: AI-Powered Remote Diagnostics for Europe
39. Spanish Biotech Advancing Early Detection of Neurodegenerative Diseases
40. Spain-Based Regulatory Specialists Driving Medical Device Compliance
41. Spanish Biotech Company Specialized In Design Of Enzymes As Sustainable Solutions For The Industry
42. Spanish Deep-Tech Innovation: AI-Powered Rapid Diagnostics for Life-Saving Sepsis Detection
43. Collagen Innovation: Pioneering Biotechnology and Medical Solutions from Turkey
44. Portuguese Tech for Good: AI-Powered Solutions Advancing Active Ageing and Sustainable Healthcare
45. Redefining Protein from Denmark: Award-Winning Mycelium Innovation for the Future of Food

## The Pitches

### Lifestyle

110

46. Finnish Company's Sustainable Unique Tableware Helps Infants To Learn To Eat Independently And Safely
47. Austrian Circular Baby Accessories
48. Portuguese Company Specialized In Product Design And Glass Bottle Design
49. Innovative And Versatile Bag Design Solutions To Carry Your Goods
50. Portuguese Clothing Brand Uses Textile Waste To Create Timeless Pieces In Limited Editions
51. Portuguese Brand Of Textile Accessories Combines Social Innovation With Environmental Innovation
52. Portuguese Fashion Designer Uses Traditional Craftsmanship To Create Unique Designs
53. Sustainable Fashion Design Brand Converts Used Umbrellas Into Raincoats And Accessories
54. Sustainable Fashion Brand Creates Clothing Designs For Sustainability And Circularity
55. Portuguese Company Manually Produces Ecological Air Fresheners
56. Danish Sustainable Sanitary Pads
57. Austrian Startup Developed An Online Platform For Sustainable Living
58. Czech Company Provides Innovative And Functional Sustainable Design Solutions
59. Czech-based Manufacturer Of Cloth Diapers And Reusable Period Products
60. Portuguese Interior Design Company Dedicated To Sustainability
61. Dutch Company Is Looking For Distributors In Europe For Their Innovative Waste Separator
62. Transylvanian Sustainable Hub for Cosmetics Innovation, Education, and Rural Regeneration
63. Innovative Natural Cosmetics: A Romanian Company's Commitment to Sustainable Beauty & Zero Waste
64. Spanish Eco-Design: Revolutionizing Furniture with Recycled & Modular Innovation
65. Scent of Legacy: Crafting Artisan Perfumery and Fragrance Innovation from Bodrum, Turkey

## The Pitches

### Lifestyle

110

- 66. Spanish Brand Revolutionizing Wellness with Innovative Healthy Delights
- 67. Timeless Elegance, Handcrafted in Hungary: Premium Leather Gloves for a Sustainable Style Statement
- 68. Silk Stories: The Fusion of Fine Art, Fashion, and Nature by a Hungarian Silk Painting Artist
- 69. Threads of Serbia: Handcrafted Wool Creations Empowering Women and Celebrating Tradition

### Manufacturing | Instalation

160

- 70. Company From Bosnia And Herzegovina Offering CNC Metal Processing, Turning And Milling
- 71. Innovative Company From Bosnia And Herzegovina Offering In Electrical Installations For Smart City Concepts
- 72. Serbian Company Specializing In Signage & Industrial Marking
- 73. Spanish Startup Revolutionizing Ocean Cleanup: Turning Plastic Waste into Sustainable Materials for Business Innovation
- 74. Turkish Excellence: Leading Innovation in Masterbatches and Additives for Global Markets
- 75. Empowering the Future: Turkey's Deep-Tech Innovation in Advanced Battery Technologies
- 76. Precision & Innovation: Turkey's Engineering Excellence in CNC Machinery for Advanced Manufacturing
- 77. Portuguese Hemp Fashion with Purpose, Building a Regenerative and Just Future
- 78. Cork Crafted in Portugal: Premium Sustainable Solutions for the Global Wine & Spirits Industry
- 79. Portuguese Marble, Reimagined: Circular Design for a Sustainable Future

## The Pitches

### Media | Audiovisual

181

- 80. Creative Agency Company Based In The Heart Of Portugal, With The Most Recent Audiovisual Tools To Make Original Content
- 81. Audiovisual Company Based In Portugal Is Developing A Streaming Platform
- 82. Danish Startup Developed A New Solution For Quality Assuring Short Media Formats
- 83. Croatian Digital Platform For Film Industry
- 84. Danish E-learning Platform About Legal Topics
- 85. Spanish Tech Innovators: Pioneering AI, XR, and Cloud Solutions for a Smarter Future

### Services | Digital

194

86. Language Service Provider Based In Greece
87. Danish Tech Platform For The Event Industry
88. Welsh based company providing Core Operations Platform to support digital commerce
89. Serbian Company Providing Procurement Online Platform
90. Serbian Company Offers A Solution For Enhancing The Online Reputation Of Hospitality Establishments
91. Greek Non-profit Organization That Promotes Women Entrepreneurship
92. Female Entrepreneur Developed A Digital Platform With Economic And Financial Content And Services For Women
93. Company Specializing In Board Work, Executive Advising And Knowledge Dissemination
94. Danish Start-up Created A Tech Platform And Search Portal Connecting Organizations With Female/Non-binary Talents
95. Innovative Software For Working With Talent Development
96. Spanish Tech Company Focused On The Development Of Innovative Solutions For The Digitalization Of The Social Sector
97. Institute for contemporary arts and ecology offering curatorial services and production of contemporary art projects in public and private spaces
98. Italian company offers more than 20 years of experience in simplified Innovation and IT customized solution for the market
99. Innovating Global Trade: Germany's Digital Solution for Secure Trade Finance, Real-Time Shipment Monitoring, and Supply Chain Intelligence
100. Romanian leading platform for women entrepreneurs is fostering growth, collaboration, and community building
101. Spanish Tech Innovator Driving Smarter Growth with AI
102. Spain's Next-Gen Logistics: AI & Blockchain Powering Smarter Global Trade
103. Spanish Chemical Revolution: Sustainable Innovation through Artificial Intelligence and Organic Chemistry
104. Spanish Innovation: AI and Satellite Radar Transforming Civil Engineering
105. Spanish Pioneers in Sales Growth: AI-Driven Strategies for Global Expansion
106. Shaping Sustainable Cities: Spanish Women Architects Designing a Greener Future
107. Advanced Training for Global Builders: England's Leading Provider in Construction, Infrastructure & Engineering Education
108. Empowering Active Ageing: Portugal's AI-Powered Solutions for Remote Patient Monitoring and Sustainable Healthcare
109. Spain's Circular Furniture Revolution: Connecting Second-Life Design with Sustainable Innovation

## The Pitches

### Tourism

244

- 110. International Educational Facility For Tourism And Hotel Management
- 111. Danish Market Platform That Connects Museum Guides With Museum Visitors
- 112. Austrian AI-Driven Travel Planning Platform
- 113. Connecting Cultures: Revolutionizing Experiential Tourism in Sicily for Digital Nomads and Global Travelers
- 114. Empowering Success: Transforming Emotional Intelligence with Innovative Digital Coaching from Montenegro
- 115. Pioneering Idiomatic Tourism in Portugal: Global Cooperation in Cultural Immersion, Heritage Education, and Community Engagement

# Introduction

# The Women Entrepreneurship Thematic Group

The Women Entrepreneurship Group Thematic Group (WETG) supports and empowers women in business, building their network across sectors and across borders in Europe and the world.

Woman entrepreneurship is an under-exploited economic and social asset of the European Union. It has therefore been identified as a political priority for the EU in the Small Business Act and a number of activities have been launched to encourage women entrepreneurs to start their own business and to support start-ups with mentoring schemes.

The WETG's role is to make an active contribution by providing concrete support services and creating links with existing initiatives promoting woman entrepreneurship and the Network's business and innovation support activities.

# Activities of the WETG

## **The objectives of the group include:**

- Provision of business partnering and innovation services in the context of Women Entrepreneurship (WE).
- Mainstreaming the concept of woman entrepreneurship in other EEN activities.
- Identification and broadening of existing expertise in the area of WE.
- Assistance to women entrepreneurs in joining existing networks or support programmes for woman entrepreneurship (access to support / funding).

## **The WETG may also play an important intermediary role to:**

- Increase of participation in communication campaigns organized by the European Commission (EC) in this area.
- Maintain links with relevant services in the EC.

# About this edition of the catalogue...

This 3.1 edition of the WEG e-catalogue features three-minute pitches from female-led businesses across Europe, showcasing their success stories.

These profiles were gathered from EEN members during the last quarter of 2024 and the beginning of 2025, representing a vibrant mix of sectors and countries. Launched between International Women's Day (8 March) and Europe Day (9 May), this special 3.1 edition pays tribute to the remarkable achievements of women entrepreneurs and their vital contribution to Europe's economic and social progress.

It celebrates not only gender equality as a fundamental human right but also European unity, innovation, sustainability, and inclusive development.

By sharing these inspiring journeys, we aim to encourage more women to transform their ideas into successful enterprises, promote meaningful collaboration and business growth, strengthen strategic partnerships, and contribute to a resilient and forward-looking European economy.

This edition was organized and edited by Cristina Barbosa, with the collaboration of all the WETG members and fellow EEN Advisors across Thematic and Sector Groups. Our sincere gratitude to all WEG members and EEN Advisors across Thematic and Sector Groups for their valuable contributions to this edition 😊

# The Pitches

# Agrofood

## 1. Montenegro Company Crafts Traditional Olive Oil Soaps

Company was established in 2009 as small craft store for production of olive oil soaps made in traditional way. Women in Montenegro 200 years ago were making olive oil soaps using oil from autochthonous olives variety called "zutica" and owner of the company wanted to return to that tradition.

Company is producing cold processing soaps which are completely natural handmade herb soaps. Soaps contain 70% of cold processed olive oil. They also contain natural basic oils and essential oils. Because they are handmade all the natural elements are preserved creating benefits for skin.

These special soaps nourish, hydrate and rejuvenate the skin. They also help against dermatitis, fungal diseases, dandruff and they have aroma therapeutic characteristics. These soaps are specified for face care, skin care and hair care. In the meantime, company expanded, registered as LLC company and started to export in the region.

In addition to soap, they are producing etherical oils which are used for further production, aromatherapy or in massage and spa centers. Most famous is bay laurel plant oil. Also, they have natural face creams. All product are based on local and natural ingredients.

# 1. Montenegro Company Crafts Traditional Olive Oil Soaps

Company is seeking for distributors of natural product for Italy and EU. Her export ready products are olive oil soaps and etherical oils from Bay laurel plant. Company is searching for distributors for retails as well as for hotels, spa centers and similar. Company is also seeking for consultants and advisory service providers on how to export to Italy for her specific natural products.

## 2. Bulgarian Company Produces Healthy High-Quality Oils From Organic Seeds And Nuts By The Method Of Cold-pressing

This Bulgarian company produces healthy high-quality oils from organic seeds and nuts by the method of cold-pressing. This method of production makes it possible to maintain all the beneficial properties of the substances they have been extracted from. Oils are a mixture of useful and irreplaceable fats.

Cold-pressed oils have a wide range of applications and could be used in the: - food industry - as ingredient of salad dressing or sauces, etc.; - cosmetics - as basic raw materials in the production of hygiene and beauty products (soaps, shampoos, body creams, hair dyes, etc.); - pharmaceuticals - as ingredient of medicines or as food supplements.

The company has a wide range of oils, extracted from the seeds and nuts of various plants, such as sunflower, pumpkin, apricot, linseed, hemp, black cumin, white thistle, sesame, chia, safflower, hazelnut, watermelon, etc. The company also produces specific types of customized oils as per the client's requests. They can produce oils on request and with customers' raw materials from organically certified seeds and nuts. The company can also offer only bottling and packaging of organic certified oils, which were not produced by them.

## 2. Bulgarian Company Produces Healthy High-Quality Oils From Organic Seeds And Nuts By The Method Of Cold-pressing

The company is looking for partners under commercial agency or distribution services agreement to sell its bio-certified products abroad. Potential partners might be distributors, agents or representatives for companies that sell/distribute foods, food supplements and other healthy and natural products.

The Bulgarian company is also open to production and distribution of its products under the partner's label and the partner's brand name. International cooperation under a manufacturing agreement is sought also among companies – producers from the food, confectionery, medical and cosmetics sectors, which include the cold-pressed oils as an ingredient in their own manufacturing processes.

### 3. Traditional Wine Production Company From Bosnia And Herzegovina

The Anđelić family from Trebinje has a tradition of over a hundred years in the cultivation of vines, wine production and grape brandy. Currently, the fifth generation of the Anđelić family is employed in the winery.

The production capacity of the winery is 150 000 liters per year, while the total capacity is 350 000 liters. Grapes for the needs of Anđelić winery are harvested by hand, with only the best grapes being selected. Part of the vineyard was planted in 1984. The specificity of our vineyards is their position, as well as low yields per vine which provide us with excellent quality grapes, and thus top quality.

### 3. Traditional Wine Production Company From Bosnia And Herzegovina

The winery has the most modern equipment for grape processing and controlled fermentation. The wine cellar is buried in the rock at a depth of 6 meters. In this way, they manage to provide excellent conditions for the care and aging of wine before entering the market. In addition to stainless steel barrels, they use exclusively Slavonian oak for the production of top quality red wines.

The specifics of the Anđelić winery are not only in the top quality of wine, the application of modern technologies, the synergy of tradition, many years of experience, but also the fact that this is the only winery in BiH headed by a woman.

## 4. Leading Distillery In North-West Part Of Bosnia And Herzegovina

The company is located in the northwestern part of Bosnia and Herzegovina since 1972, where natural conditions are ideal for fruit production. Today, depending on the desired final product, it processes on three separate production lines:

- 1) line for deep freezing,
- 2) line for the production of concentrated fruit juices and
- 3) line for distillation of fruit distillates, filling and bottling.

The product range includes:

- Fruit distillates produced from plums, William-pear, quinces, pears, apricots, cherries, apples, raspberries, called, junipers, blueberries, peaches Concentrated fruit juices from apple, cherry or other selected fruits;
- Deep-frozen fruits - raspberries, strawberries, cherries
- High quality fruit brandies and liqueurs

## 4. Leading Distillery In North-West Part Of Bosnia And Herzegovina

The company produces 27 000 tons of fruit in one production cycle and has a storage capacity of 1 500 000 liters which provides consistency and continuity in deliveries throughout the year. Today, over 90% of the products are exported, and the main markets are the EU, CEFTA and the USA.

The launch of new product lines is in the making. Protection of the environment is key, as the company uses as many biodegradable substances as possible. Product quality, safety and customer satisfaction are the main goals of the company which follows HACCP and ISO 9000:2015 standards and has Kosher certificates for all products.

The company is looking to further expand its international client base and offers distribution agreements across the world.

[draganak@komorars.ba](mailto:draganak@komorars.ba)

## 5. Portuguese Company Aims To Reduce The Dependency On Toxic Chemicals In The Agro-industry Market

**Problem:** The emergence and spread of resistant pathogens in agriculture are an urgent concern, which can have significant implications for the sustainability and safety of our food supply and public health. Also, the agro-industry market points towards green solutions to contribute positively to the environment and decrease costs.

**Solution:** This company offers a solution that can protect the environment by reducing the dependency on toxic chemicals, helping to reduce water pollution, soil contamination, and the negative impact of harmful compounds to kill pathogens on beneficial organisms/animals.

Their main service is to provide a customized system and a range of products to face the needs of the distinct industries that they can integrate. One example is the development of a robot that is automated and the needs of use of Far-UVC and electrolysis salted-based water can adapt to the facilities and needs. Another example is the development of static models with the same hybrid system that can be used in a wide range of facilities and public areas. The company has all the facilities, 3D printers and expertise needed with a team of engineers, financial advisors and researchers who are experienced and work together to answer all the challenges to build this hybrid system and all apparatus. Time, efficiency, sustainability and automation are the four main variables they consider to make disinfection procedures automated, quicker, effective and greener.

## 5. Portuguese Company Aims To Reduce The Dependency On Toxic Chemicals In The Agro-industry Market

**Company stage:** This year they expect to develop collaborations with food industry partners in Europe, finding some early adopters who will be willing to try and to apply our technologies. Also, they aim to form strategic partnerships with suppliers, distributors, or other businesses that can help accelerate growth and entrance in the food market. This will help them to develop case studies and to validate their products in the real context of the market, exploring needed customizations in the solutions for the food safety industry, given its high regulation requirements. Therefore, they will be able to refine all the partners requirements or needs and enhance the final solution to the end costumer. Having a wider range of customer feedback will allow them to improve their solutions, build a loyal customer base and increase their awareness as an expert in this field. The company strongly believes that, by achieving these milestones, they can establish a solid foundation for future growth and success.

**Funding:** They are looking for a capital partner, someone who believes in the team, in the project, and who can support market development. In the robotic disinfection sector alone (a part of the business they aim to serve), a CAGR of approximately 24% is predicted over the next 5 years. They thus offer their investors integration into a differentiating project with an impact on the entire ecosystem, from public health to the environment. According to forecasts, this is an opportunity to execute a project that, in addition to being differentiating, is also very profitable and adds value.

## 6. B2B Plant-Milk Cheese Technology: Dutch Solutions for the Food Industry

This company, based in the Netherlands, focuses on developing and licensing plant-milk cheese technologies for the food industry. As a B2B Technology Licensor and Implementer, as well as a Co-development Partner, it offers customized solutions to clients aiming to create a wide range of cheese applications, from long-texture Mozzarella to Gouda and Maasdam with distinctive eye formation, to short-body Feta and Blue-style cheeses. The company specializes in developing cheeses with a high protein content (>16% PRO) and a highly nutritious cheese profile. This Netherlands-based company focuses on developing and licensing plant-milk cheese technologies for the food industry. Serving as a B2B Technology Licensor and Implementer, as well as a Co-development Partner, the company offers tailored solutions for creating a range of cheese applications—from long-texture Mozzarella to Gouda and Maasdam with distinctive eye-formation, as well as short-body Feta and Blue-style cheeses—all with high protein content (>16%) and a highly nutritious profile.

## 6. B2B Plant-Milk Cheese Technology: Dutch Solutions for the Food Industry

### Technology customers:

- Cheese manufacturers
- Cheese brand owners
- Equipment / ingredient suppliers
- Seed & bean farmers

### Type of cooperation sought:

- Technology licensing & tech transfer
- Investment in technology scale-up

## 7. Transforming Food Waste into Innovation: Turkey's Green Banana Revolution

The company is a brand of woman led Minaturel Food Manufacturing and Trade Ltd. Co. founded in 2022 in Istanbul, Turkey. The company owns 100.000 m2 banana greenhouse in Antalya, Turkey with a cultivation of 4000 tons of banana annually. However, out of this cultivation 200 tons of bananas are rejected due to shape and size irregularities which does not meet the standards of supermarkets, and these 200 tons of unwanted bananas goes to waste which creates landfill and food waste. To tackle this problem, with a vision of upcycling the company carried an R&D and started producing gluten free, nutritious green banana flour and green banana chips.

The company also has collaborations with Hacettepe and Ege University in Turkey and Foodvalley at Wageningen University in Netherlands. With these universities, the company is exploring potential use of green banana flour, peel and banana tree waste in food, packaging, cosmetics, and natural additive industries.

At the same time being a member of EWA, EIT and Erasmus for Young Entrepreneurs, the company is looking for further collaborations to expand its products and operations globally.

## 7. Transforming Food Waste into Innovation: Turkey's Green Banana Revolution

The company is looking for international partners who are active in natural additive (food), ingredient (food) and biodegradable packaging sectors to collaborate with various products, solutions.

## 8. Cyprus-Based AI-Driven Fermentation Innovation: Revolutionizing Food, AgriTech, and Sustainability with Precision-Controlled Solutions

Based in Cyprus, this **deeptech foodtech start-up** specialises in **AI-powered fermentation solutions**, integrating technology with sustainable food and agriculture. It develops **precision-controlled fermentation** software, optimising processes for hobbyists, small-scale producers, and industrial users. Its key innovation, an **AI-driven fermentation platform**, enhances efficiency, reduces waste, and improves resource utilisation. The company also pioneers **Solid-State Fermentation (SSF)** for **bioavailable fertiliser production**, contributing to circular bioeconomy models.

With a strong R&D foundation, it integrates **machine learning, real-time monitoring, and automation** to advance fermentation-based industries. Operating across **food, biotech, and agritech**, it aligns with sustainability goals, fostering a **net-zero food system**.

Its impact spans from **fermented food production** to **smart fermentation infrastructure**, enabling scalable, **data-driven solutions** for a greener future.

## 8. Cyprus-Based AI-Driven Fermentation Innovation: Revolutionizing Food, AgriTech, and Sustainability with Precision-Controlled Solutions

The start-up seeks **strategic partnerships** for R&D, technology integration, and market expansion. It aims to **collaborate with industry players, research institutions, and distributors** to scale its **AI-driven fermentation solutions** globally.

## 9. UK-Based Next-Generation Demand Forecasting: Empowering the Food-to-Go Sector for a Fresher, More Sustainable Future

As former food sector operators, we've developed the next-generation demand forecasting solution, specifically for food-to-go.

Through developing our SaaS platform, we're on a mission to reduce waste and unlock revenue for businesses. The end goal is a fresher, more sustainable food system for consumers and businesses alike.

Through the power of data science, our models centrally combine the most important contextual data (from the weather, to transport patterns, to consumer trends) with customers' sales data to deliver them higher predictive accuracy than has been achievable before.

We were founded in the UK, but we're already working with other partners across Europe, with global ambitions for scale.

## 9. UK-Based Next-Generation Demand Forecasting: Empowering the Food-to-Go Sector for a Fresher, More Sustainable Future

### The company is looking for:

- Connections to prospective customers in the food-to-go sector (concessions, convenience stores, transport hubs coffee shops, leisure)
- Connections to potential partners (for introductions, support and learning)

## 10. UK-Based Innovators: Transforming Health and Sustainability with Seaweed-Based Ingredients for People, Pets, and the Planet

The company, a United Kingdom-based company founded by Karen Scofield Seal (CEO) and Dr. Charlie Bavington (CTO), develops innovative, functional seaweed-based ingredients and materials to enhance People Health and Ocean Health.

Through its proprietary green processing technology, the company extracts maximum value from sustainably farmed seaweed to produce high-purity bioactives for health and skincare (OCEAN ACTIVES®), superfood ingredients for humans and pets (OCEAN HEALTH NUTRA™ and the company® PET), and innovative materials including OCEAN INK®, a fully biodegradable seaweed-based ink for packaging and textiles.

The company's business-to-business (B2B) model supplies sustainably sourced, traceable ingredients to help companies meet UN Sustainable Development Goals (SDG) targets and consumer demand. By driving demand for seaweed – a low-resource crop requiring no land, freshwater, or fertilizers – the company supports ocean health, biodiversity, and food security, plus contributes to six UN SDGs.

## 10. UK-Based Innovators: Transforming Health and Sustainability with Seaweed-Based Ingredients for People, Pets, and the Planet

The company is looking for:

- **Introductions to investors** – We're raising Series A funding to build the world's first seaweed processing facility, generate revenue, establish a customer base for growth, strengthen IP, develop new regions and provide runway to 2027.
- **Introductions to customers/strategic partners** – Introductions across the nutraceutical, cosmeceutical, food, pet food, materials, textiles sectors
- **Securing Top Talent** – Support recruiting top talent as we grow across R&D, marketing, Business Development, Managerial, Operations etc.

Giulia Sirigu

[giulia.sirigu@iukbg.ukri.org](mailto:giulia.sirigu@iukbg.ukri.org)

## 11. UK-Based Innovators: Accelerating Sustainable Nutrition and Plant-Based Food Development from R&D to Market Launch

Founded in 2015, the company sits at the intersection of academia, innovators and industry. We accelerate the development of food-based ideas into revenue-generating businesses, supporting the entire commercial journey of a product from R&D through to market launch.

- Based in Nottingham, UK.
- Focus on sustainable nutrition.
- Multi-disciplinary team – science and commercial expertise.
- Apply food science to the development of plant-based food products.
- Accelerating customer ideas and concepts from R&D through to market launch.
- Food grade development kitchen and analytical laboratory.
- Pilot facility with extrusion and compression popping technology.
- Small MOQs to support client with product development and market customer testing.
- Currently obtaining Salsa accreditation.

### **Key expertise:**

- Plant-based food.
- Texturising proteins.
- Proteins, fibres, starches.
- Sustainable and diverse ingredients.
- expanded products (e.g., snacks, cereal, rice cakes, textured meat alternatives).

## 11. UK-Based Innovators: Accelerating Sustainable Nutrition and Plant-Based Food Development from R&D to Market Launch

The company is looking for:

- Agrifood companies struggling to reach market due to lack of pilot scale facilities with expansion knowledge, high MOQ on orders with manufacturing partner & lack of ownership of recipes.
- Food brands lacking food science expertise to solve product development issues especially with sustainable ingredients.
- Ingredient suppliers.
- Large manufacturers with low R&D capacity.

## 12. Lithuanian Superfood Innovators: Expertise in Organic Hemp & Pumpkin Seed Products, Custom Solutions, and Private Labeling

A Lithuanian company - is a leading superfood manufacturing company specializing in premium-quality products derived from organic hemp and pumpkin seeds. A united family farm ensures sustainable, eco-friendly cultivation, bringing nutrient-rich foods straight to consumers. The company proudly offers a diverse selection, including hulled hemp seeds, cold-pressed hemp seed oil, raw pumpkin kernels, plant-based hemp and pumpkin protein powders, fiber-rich cake, and finely milled flour.

The company's expertise extends to private and white-label solutions, customized packaging, and raw material processing services. Committed to excellence, it collaborates with global partners, delivering high nutritional value and exceptional taste. With a passion for innovation, the producer continuously expands its offerings and refines production processes to meet evolving market demands. Additionally, the company proudly represents delicious, two health-focused superfood brands.

## 12. Lithuanian Superfood Innovators: Expertise in Organic Hemp & Pumpkin Seed Products, Custom Solutions, and Private Labeling

### The company is looking for:

- Businesses based in Europe who have or would like to have their own superfood brand.
- European companies that are looking for reliable hemp and pumpkin seed raw material partners.

## 13. Upcycling Food Side-Streams: Dutch Foodtech Pioneering Sustainable & Functional Ingredients

A Dutch foodtech SME is valorizing food industry side streams into functional, tasty, healthy, and sustainable food ingredients.

The Dutch company has created a patented technology to upcycle side-streams from the food industry. The ingredients are targeted to be natural, circular, price-competitive and with a low carbon footprint. The company works on extracting flavor ingredients; on ingredients with a preservative function such as fiber and protein fractions with anti-oxidant capacity; and on ingredients with specific techno-functional properties.

The company obtains different flavor fractions, all with a unique taste profile, from Parmesan cheese rinds. One of the fractions gives a natural Parmesan taste profile to, for example, cream cheese or cheese sauces/ fillings. Another fraction can be used as a natural carry-through flavor to enhance the dairy/butter taste depth in margarine-based pastry applications.

From okara, the side stream of tofu and soy drink production, the company obtains a protein concentrate and fiber concentrate. The neutral-tasting okara protein concentrate is a great emulsifier; creating a smooth, non-powdery emulsion. Perfect for bakery, (plant-based) beverages and, omelet /scrambled egg alternatives. The fiber stands out in holding water and giving texture to products such as meat alternatives, sauces and condiments, and nutritional beverages.

## 13. Upcycling Food Side-Streams: Dutch Foodtech Pioneering Sustainable & Functional Ingredients

Dutch SME is looking for innovative food producers in search of new sustainable ingredients.

- Looking for innovative food producers that care about the world we live in.
- Food producers that can use the ingredients in their products.
- We are open to discuss possible Eurostars applications.

## 15. Driving Sustainable Agriculture: Turkey's Innovation in Biotech and Pest Management Solutions

The Turkish company is founded in 2009 in METU Technology Development Area.

Main sectors of the company's R&D Project services for the Agricultural Sector and Biotechnology.

Company also has import and export license.

Company specialized in integrated pest management Technologies and applications like *Bacillus thuringiensis* biopesticide field assays, ecotoxicology assays, socio-economic field surveys with farmers and agricultural workers.

The company is partner of EU funded projects since 2016. The first project was IPM-4-CITRUS completed in 2022. Now, company is partner of SAFWA Project under PRIMA programme.

The company is looking for being partner of R&D projects. It has the ability to organize field assays, biocompatibility assays, ecotoxicology assays, psycho-sociologic assays for agricultural biotechnology products (especially integrated pest management) in Turkey.

## 16. Serbia's Agri-Tech Revolution: Smart Urban Farming for a Sustainable Future

### About Us:

- Serbia-based company in the agri-tech and food industry, specializing in urban farming and sustainable nutrition.
- Our vision is to empower individuals and communities to grow nutrient-rich microgreens at home by using our App, while providing ready-to-eat products.

### What We Do:

- Produce fresh, nutrient-rich microgreens, packaged in biodegradable materials.
- Deliver directly to consumers.
- Organize educational workshops for schools, corporations, and communities to promote urban farming.

### Innovation & Growth:

- Developing an AI- and IoT-integrated app for home microgreens cultivation.
- Connecting urban farmers with end-users.
- Seeking a tech partner for app development and scalability.

## 16. Serbia's Agri-Tech Revolution: Smart Urban Farming for a Sustainable Future

We seek a **tech partner** for developing the Company App, integrating AI and IoT for urban farming.

Open to **equity-based** cooperation or **grant-supported** collaboration to scale our impact globally.

## 17. Portuguese company designs and produces innovative concrete wine tanks to ferment and store quality wines

Unlike stainless steel vats, which are completely sealed, their tanks are "breathable," allowing controlled micro-oxygenation similar to oak barrels. The process enhances the distinct characteristics of each grape variety and terroir while preserving the purity and intensity of fruit flavors.

The **proprietary concrete formula**, developed through the company's CEO Tatiana Sá Marques's doctoral research, was engineered for both **structural robustness and wine quality**.

Since the concrete is in direct contact with the wine, ensuring no harmful substance migration while optimizing porosity was a major challenge.

The carefully selected combination of siliceous aggregates and cement achieves a porosity similar to oak, facilitating gradual oxygen exchange that supports fermentation.

As a result, wines fermented in the firm's tanks acquire a round mouthfeel akin to those aged in oak but without added flavors.

Consequently, **winemakers** can **craft wines** that fully express their terroir while benefiting from enhanced texture, aroma complexity, and color vibrancy.

The company's concrete wine vats have been successfully used by some of Portugal's most prestigious wine houses, producers, and oenologists.

**Materials used in these revolutionary tanks are 100% recyclable.**

The tanks' colors are not a result of any painting intervention - when a new tank is produced, the natural pigments are mixed with the liquid concrete.

## 17. Portuguese company designs and produces innovative concrete wine tanks to ferment and store quality wines

The highly appealing concrete vats are also an excellent addition to **wine tourism developers** and **wine cellar owners** for their modern classic design, which contrasts with the industrial-looking steel tanks.

The firm has already been successfully working with limited international partners to broaden the sales force out of Portugal.

The Portuguese company seeks **distributors and partners** to actively promote and market the innovative concrete wine tanks in **Europe, the Americas, Australia, and South Africa.**

## 18. Dutch Innovation Cooks Up Energy Savings: Biobased Cooking Solution Seeks European Partners

The women led SME from the Netherlands is specializing in energy saving cooking solutions. The innovative and sustainable cooking aid, made from biobased materials and recycled textile fibers, uses the age-old haybox technique and ensures that food cooks effortlessly on low temperatures. In 2019, the two Dutch female entrepreneurs developed their sustainable and energy-saving cooking solution. Already 12,000 units are sold and their solution has been recognised as the best energy-saving cooking product by the German authority 'Stiftung Warentest'. How it works: By putting ingredients in a pot, bringing it to the boil and place the whole thing in the insulated product. The meal stews in its insulated wrapping until it's done, maintaining all its flavours, without the use of energy and without burning. All ingredients retain their bite and taste.

The company is looking for a licensee, agent or distributor, who would like to sell their solution under license in DACH countries (Germany, Austria and Switzerland) or in other European countries.

Annemarie Destrée  
[Annemarie.Destree@rvo.nl](mailto:Annemarie.Destree@rvo.nl)

## 19. Organic Italy, Timeless Vines: Carignano grape from the Heart of Sant'Antioco

The company is an **organic factory and winery**. Her vineyards consist of approximately 8.000 piede franco (ungrafted) head-trained bush vines (vite ad alberello) growing on sandy soils. The traditional practice of cultivating piede franco and alberello vines is transmitted through generations of vine growers at the Island of Sant'Antioco. By still teaching and at the same time cultivating old Carignano vines, a high-quality wine can be produced. The winery produces three different labels only from its own grapes in its wine cellar, following an artisanal winemaking method, whose processes are mostly manual but also controlled and analyzed.

The first aim of La Casa di Sophia is to reach the European market. The second aim is to teach the traditional and organic viticulture (on sandy soils) of Carignano grape in lands at risk of oblivion.

## 20. From Hungary's Vineyards to Global Wellness: Premium Wines, Natural Cosmetics & Supplements Rooted in Tradition

The **hungarian winery** is one of the country's most distinguished wine estates, built upon generations of tradition and a strong dedication to quality. Over the years, their expertise in viticulture has evolved into a diversified product portfolio that now includes premium wines, grape seed-based luxury cosmetics and health-focused dietary supplements.

Their cosmetics line harnesses the antioxidant-rich power of grape seeds, incorporating cold-pressed grape seed oil and facial creams, serums, and body care products. These products are designed for wellness-conscious consumers seeking natural, effective, and luxurious skincare solutions. The dietary supplements also utilize grape seed extracts known for their positive effects on cardiovascular health, immune support, and anti-aging.

Wines produced at the estate range from elegant whites and rosés to iconic full-bodied reds, including internationally acclaimed varieties such as Cabernet Franc and Merlot, showcasing the Villány wine region's unique terroir.

The company is looking for **committed distribution partners worldwide**, particularly wine importers with a wellness or luxury product portfolio.

Beauty or cosmetics distributors who are interested in nature-based luxury brands or pharmacy chains focused on high-end natural products might be ideal partners.

## 24. Crafting Pure Portuguese Honey with Passion, Innovation, Tradition, and a Global Vision

Beesweet sells 100% Portuguese hive products, certified organic, and handcrafted by two young cousins passionate about bees, innovation, and honey. We are talking about organic honey, obtained through artisanal processes with healthy temperatures, preserving all the characteristics of 100% natural honey!

Based on the family heritage of their grandfather, and inspired by him, the founders of the company (Ana Pais and Carla Pereira) created natural honey aromas capable of pairing each flavor with different culinary suggestions. Powered by Beesweet, with added benefits for well-being and health, comes the Nectar N° 88 Fire, spicy, or N° 10 Seasalt, salty, among many others...

The company offers free lectures on the importance of bees in schools and kindergartens. Beesweet aims to establish itself as the leading supplier of the best honey in the world, always preserving its pure principles as it grows.  
Beesweet... more than honey!

## 24. Crafting Pure Portuguese Honey with Passion, Innovation, Tradition, and a Global Vision

Beesweet is committed to expanding its business through international e-commerce platforms and specialized marketplaces, enabling exponential growth without additional physical infrastructure.

This digital model facilitates entry into new markets and accelerates customer acquisition through digital marketing and growth hacking strategies. The company measures its corporate carbon footprint, optimizing production, transportation, and packaging to reduce emissions and improve energy efficiency.

Known for its premium organic honey, Beesweet differentiates itself by offering flavored nectars, combining honey with aromatic plants for unique gastronomic experiences. The company is positioned as a leader in sustainability, with sophisticated, eco-friendly packaging that appeals to high-quality, conscious consumers.

The organic honey market in Portugal and globally is experiencing growth, with a projected annual growth rate of 5.20% from 2024 to 2029.

Beesweet's innovative business model integrates sustainability, circular economy practices, and digitalization, making it well-positioned for international expansion and sustainable growth.

## 25. Greek Developer Of Laser Bioprinting Systems And Specialized Regenerative Medicine Applications

This Greek company is a developer of laser bioprinting systems and specialized regenerative medicine applications founded in 2019 in Greece, as a spinoff of the Institute of Communication and Computer Systems of the National Technical University of Athens.

The company developed an innovative dual beam laser bioprinting device adopted for on-site in vivo printing of cells during surgery. This is a highly disruptive technology, with numerous clinical applications that can transform healthcare and provide innovative and permanent solutions for patients. The 1st clinical application is in-vivo printing of urothelial cells in orthotopic neobladder surgery.

To optimize HW & SW and complete the first-in-human testing of the first application, PhosPrint received a €2mm Grant from the EIC Accelerator that secures funding for 70% of the required budget of €2.8mm and is currently raising the 30% (€0.8mm).

After the successful outcome of the first in-humans trial by end of 2025, required clinical trials and certifications will be completed as to commercialize its innovation by 2028. To fund these steps, the company already has a conditional commitment by the EIB to participate by 50%.

## 25. Greek Developer Of Laser Bioprinting Systems And Specialized Regenerative Medicine Applications

The company is seeking partnerships with regenerative medicine Units of Research institutions and Hospitals both Academic and non-Academic to test their solution on the current focus areas of neobladder surgery, cartilage repair and ObGyn.

## 26. Danish Startup Within Medtech/Healthtech Dedicated To Helping People Living With Cluster Headache

Cluster Headache, or "Horton's", has been rated as the most intense pain known to humans, worse than labor pain and gun shot wounds, and affects 1:1000 people directly, plus their families - as it is a life-long disease without cure. These people don't sleep at night, often they can't hold a full-time job and they have conditions such as depression, anxiety etc. They are 15 times more likely to visit a medical specialist than non-cluster headache patients. Unfortunately, there are no adequate treatment options. Current treatments are medicine, oxygen, nerveblocks and for the very worst cases a surgery. However, the medicine comes with a lot of side-effects and is also expensive, oxygen has low usability and is hard to bring with you. The nerveblocks require that you go to a specialist and can not be performed too often.

The company is developing a wearable, classified as a medical device, to prevent these intense headache attacks from taking place. It stimulates a nerve on the head with a small electric current outside the skull. It can be worn during night to prevent attacks during nighttime. The stimulation pattern and the volume can be adjusted for each individual. It will be designed so it is easy to use without consulting a specialist and it doesn't require frequent check ups. It is currently under development. They have proof of concept and are preparing to do some early studies in collaboration with some of the leading researchers and clinicians on the field. The aim is to help these patients take control over the pain to get their normal life back.

## 26. Danish Startup Within Medtech/Healthtech Dedicated To Helping People Living With Cluster Headache

To move the product and business forward the company is looking for international collaborations. They are in contact with two research centres, who they would like to engage with for studies and clinical trials. Others could also be relevant.

For product development it would be relevant to look for collaborators for the MVP and the first small scale production. Currently they are working with a supplier in Portugal for the prototypes.

Finally, they would like to engage with companies/institutions that can help on reimbursement, refining our business model and go-to-market strategy. So far they are looking into DK, Sweden, Norway, UK and the US as potentially market. They want to validate these markets further and explore other relevant markets.

## 27. Danish Medtech Company Developing Solutions For Improved Neonatal Care

This Danish company is currently developing a device for safely and single-handedly lifting neonates for kangaroo mother care, compliant to WHO recommendations.

Finalist in the Danish Tech Challenge and funded by among others the Novo Nordisk Foundation, Innofounder, and Innobooster. The challenges of lifting neonates derives from invasive tubes and catheters monitoring and keeping the child alive.

Due to the risk of pulling tubes potentially harming the fragile neonate, three specially trained NICU nurses are required for each lifting procedure, making recommended kangaroo mother care difficult to implement.

## 27. Danish Medtech Company Developing Solutions For Improved Neonatal Care

This device is a solution to this problem, enhancing KMC and neonatal development while saving precious NICU resources. Founder and CEO Kristine Kuni Buccoliero holds a M.A. in Biomedical Design, having contracted the idea as her final project. For more than a decade, Mrs. Buccoliero has worked as a senior advisor for Danish and international startups within innovation and MedTech.

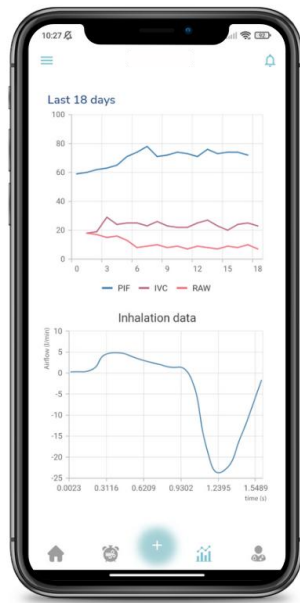

Currently partnering up with international hospitals for clinical testing etc, the company is looking for SME-partnerships for market rollout e.g. collaboration with neonatal equipment manufacturers with global reach.

## 28. Portuguese Healthcare Technology Startup, Operating In The Digital Health Sector

Healthcare technology startup, operating in the digital health sector, has the mission of revolutionizing respiratory care, addressing challenges such as improper inhaler use and the lack of real-time monitoring of asthma patients. They developed a smart inhaler device with AI-driven features, providing instant feedback on usage.

Their comprehensive digital health platform includes a user-friendly app and clinical platform, enhancing communication between patients and healthcare providers. With a commitment to sustainability, they are actively working towards becoming carbon-neutral. Their innovative approach extends to predictive capabilities, detecting asthma attacks before symptoms manifest. By focusing on personalized, proactive solutions, this company aims to reshape the landscape of respiratory health.

## 28. Portuguese Healthcare Technology Startup, Operating In The Digital Health Sector

They aim to collaborate with international medical device distributors for product distribution, facilitating widespread access. Additionally, the company is actively pursuing partnerships with healthcare providers (hospitals, clinics) for clinical testing, aligning with their commitment to advancing respiratory care solutions globally.

## 36. Spanish AI-Driven Solutions for Mental & Physical Health Assessment

We develop solutions to assess individuals' mental and physical health using Artificial Intelligence (AI), mobile technologies (such as smartphones, smartwatches, and other wearable devices), and cloud infrastructure.

The company is a deep-tech startup based in the EU that originated from Universidad Carlos III de Madrid (UC3M) after over a decade of collaborative research between engineers and psychiatrists. Their work focused on using advanced data analysis and artificial intelligence to monitor and provide care for psychiatric patients.

The company is bringing to the market a technology-intensive product to automate the assessment of patients' mental health and prevent relapses or suicide attempts. We transform the patients' digital fingerprint into objective, actionable information for healthcare professionals and caregivers.

The company has four products on the market:

- The company MindCare: Platform for mental health and well-being, chronic diseases and occupational health.
- The company Behavioral Analytics: Behavioral assessment service which is integrated into the pre-existing eHealth applications and systems
- The company Research: Platform for academic and clinical research. Automatic monitoring daily of the person with aggregated behavior indicators based on Artificial Intelligence.
- The company Monitor&Predict: Algorithms on demand. All the knowledge of The company a SaaS of Artificial Intelligence algorithms suite: Stability by The company; Sleep by The company; Radar by The company; Screening by The company; Iris by The company; Guardian by The company.

## 36. Spanish AI-Driven Solutions for Mental & Physical Health Assessment

Entry and Scaling in Europe:

A) Partner with public and private healthcare providers and insurers to run pilot programs demonstrating cost-effectiveness and clinical value in Germany, France, Italy, Spain, and the Nordic countries; B) negotiate inclusion in reimbursement schemes in targeted countries to ensure coverage by public and private healthcare systems; and C) develop a commercial and distribution network in Europe.

Entry into the U.S. Market

A) Partner with leading healthcare systems and private insurers; B) marketing and sales efforts in priority states (NY, CA, TX, MA); and C) establishing U.S.-based offices and recruiting sales and technical staff.

### Unlocking the power of AI for mental healthcare

## 41. Spanish Biotech Company Specialized In Design Of Enzymes As Sustainable Solutions For The Industry

Our company is an Institute of Catalysis and Petrochemistry-CSIC spin-off based in Madrid, Spain, focused on R&D in Biotechnology. We are specialized in Directed Enzyme Evolution, one of the most powerful tools for Protein Engineering.

With over 20 years of research, we are experts in designing any kind of enzyme, offering customized biocatalysts for industries like healthcare, pharmaceutical, sustainable chemical and renewable energy (plastic treatment, biofuels).

We offer a portfolio of services and products supported by innovative technologies:

- Tailor Made Projects: production of novel or improved enzymes tailored to the needs of a specific project, combining wet lab and computational methods.
- Unique Repertoire of Evolved Enzymes: among the main types are the well-known UPOs (Unspecific Peroxygenases) and Laccases, as well as Cutinases, Versatile Peroxidases and Aryl Alcohol Oxidases.
- Exclusive Screening Kits: with a selection of the best variants of UPOs and Laccases enzymes to optimize work and results.

We bring solutions to improve process specificity, efficiency and sustainability providing environmentally friendly alternatives.

## 41. Spanish Biotech Company Specialized In Design Of Enzymes As Sustainable Solutions For The Industry

To drive our product and business growth, we are actively seeking international partners and collaborations.

We are looking for distribution partners or service agreements to expand the global reach of our products. Ideal partners include distributors specializing in enzymes, biological, or chemical products.

For product development, we aim to collaborate with partners who have expertise in upscaling production.

Currently, we engage with clients in Europe, the USA, China, and India, but we are eager to broaden our international customer base.

Additionally, we welcome cooperation with diverse industries—such as textile, food, agriculture, and cosmetics—to integrate our enzymes into their manufacturing processes and develop innovative solutions.

## 42. Spanish Deep-Tech Innovation: AI-Powered Rapid Diagnostics for Life-Saving Sepsis Detection

Spain-based deep-tech startup in the Medical Devices sector, specializing in In Vitro Diagnostics (IVD) for sepsis through ultra-fast bacterial identification. It is currently developing an innovative diagnostic platform based on AI-powered optomechanical biosensing, designed for rapid, label-free pathogen identification directly from whole blood in under 30 minutes, eliminating the need for lengthy blood cultures and enabling faster, life-saving treatments. In sepsis, each hour without effective treatment increases the risk of death by 10%, while administering targeted antibiotics within the first hour boosts survival rates by up to 80%. By identifying pathogens in minutes, this technology has the potential to revolutionize sepsis management and significantly improve patient outcomes.

Built on over a decade of pioneering research, the company holds exclusive licenses for two patents. With strong expertise in deep-tech innovation, it is actively advancing regulatory and market-access strategies to bring this cutting-edge solution to critical care units worldwide, with plans to expand into other diagnostic areas in the future.

Seeking leading hospitals and clinicians for an ambitious clinical validation, industrial partners for scalable manufacturing, and global medtech and IVD distributors to drive international expansion after regulatory approval.

## 45. Redefining Protein from Denmark: Award-Winning Mycelium Innovation for the Future of Food

We are a Danish food innovation company creating delicious and sustainable foods of the future. Our food products are based on alternative proteins, primarily mycelium, which are sold to food service companies and restaurants across the country.

We created a completely new category of products that target excellent taste and nutrition rather than simply trying to imitate meat. We won several innovation awards, including startup of the year award from a prestigious national institution.

### The company is looking for:

- Commercial partnerships: collaborations with foodservice distributors and large food companies (restaurants, catering companies, retailers) that want to innovate their menu/offering.
- Soft-funding projects: partners for innovative projects within development of new protein-rich food products that can be funded through EU soft-funding programs.

## 46. Finnish Company's Sustainable Unique Tableware Helps Infants To Learn To Eat Independently And Safely

A Finnish company has created sustainable unique tableware that help infants to learn to eat independently and safely. The products are inspired by Nordic values, and developed in collaboration with speech therapists, occupational therapists, designers, and engineers. The company has an official license to use Moomin and CupOfTherapy brands in their products. The tableware including a plate, a cup, and a spoon, - supports the development of natural swallowing, - promotes the skill of drinking from a cup, - supports self-feeding and - is ideal for small hands and mouths. The products are 100% safe for children, secure, durable and dishwasher & microwave safe, BPA-free (bisphenol A) without toxic chemicals and comply the safety requirements of standards EN 14350 and EN 14372. The tableware is made of bio-based composite material, which is a blend of sugarcane and wood fiber sourced from certified Nordic forests, offering a reduced carbon footprint compared to traditional plastics.

## 46. Finnish Company's Sustainable Unique Tableware Helps Infants To Learn To Eat Independently And Safely

The CEO and founder of the company is a mother of two children, who realized how the baby world was filled with plastic. Also, as a specialist of linguistic accessibility, she knew about the problems with the children's spouted sippy cup. After years of searching and testing, biomaterial suitable for infants was finally found, and together with speech language pathologists and occupational therapists, a design cup was created, without fear of motor problems in the child's mouth. A design plate and spoon were created to complete the tableware.

The company is looking for distribution partners in the Nordic countries, Germany and Japan that look for new sustainable mid to higher segment brands for children. It would be beneficial, if the partner had a showroom, where the products would be on display and where they could be touched. The partner could be an importer or wholesaler, that has the well-established contacts in the children's products sector.

## 47. Austrian Circular Baby Accessories

This Austrian startup offers stylish, eco-friendly, and multifunctional baby products for extended use. Its vision is to fill homes with chic, timeless and functional household items, rather than landfills with tons of wasted (plastic) baby products. By repurposing these accessories, parents can hold onto those sweet childhood memories while preserving the earth for future generations – to make the world a little more sustainable.

The startup brings a new twist to baby products, blending multifunctionality and eco-chic design to create items that seamlessly transition from baby essentials to cherished household treasures for long-term use. It's about embracing a lifestyle where every product has a story and a continued, yet different purpose.

Their first innovation and flagship product, a baby potty, is more than just for babies; it transforms into a stylish flowerpot when the children grow up and the potty becomes out of use. Sustainable and organic materials, plant-based and recycled plastics ensure product durability. Beyond the product, the packaging goes the extra mile, turning into interactive games for children. This is just one of many more multifunctional baby products to be developed in the future. With more than 45 product ideas, the startup aims for a waste-free, circular, and regenerative economy, rooted in conscious design.

## 47. Austrian Circular Baby Accessories

The Austrian startup seeks to revolutionize baby product longevity, replace fossil-based materials with CO2-neutral plant-based and recycled alternatives to minimize waste and plastic pollution, aligning with Global Sustainable Development Goals. Their idea tackles the climate crisis holistically, embracing a regenerative system - from creation to consumption, inspiring a world where every action contributes to our planet's rejuvenation.

The innovators behind the products are a family with small children, collaborating with emerging talents worldwide. They engage in 1-on-1 projects or crowdsourcing contests to find designs that resonate with both the startup's concept and them as parents. They are currently looking for partnerships in joint product development, manufacturing, and brand collaborations. As a small startup with great ambitions they believe in joining forces to create a stylish, sustainable future for baby products.

## 50. Portuguese Clothing Brand Uses Textile Waste To Create Timeless Pieces In Limited Editions

Clothing brand, headquartered in Porto, Portugal, only uses textile waste to create timeless pieces in limited editions, signed by different designers and made by experienced, senior sewers, to deliver quality, exclusivity and sustainability to consumers, with a positive social and environmental impact.

The first step is to find excess fabrics and leftovers in factories and warehouses that the brand can reuse. Then, the brand invites fashion designers to create versatile, comfortable, stylish, long-lasting, unique neutral, timeless, complementary models based on the stock available for reuse. Those drawings are then handed over to experienced, unemployed seamstresses over the age of 50 who know how to deal with the limitations of reusing waste to bring quality models to life. The seamstresses, on the other hand, are happy workers who manage their time and get some income in return.

## 50. Portuguese Clothing Brand Uses Textile Waste To Create Timeless Pieces In Limited Editions

Social inclusion embraces the promotion of free “Granny to Trendy” workshops, also designed for unemployed women over the age of 50 and photo shoots with common (not professional) people.

The company was founded in 2013 by an entrepreneur, herself is the daughter of a seamstress in Portugal, who grew up wearing upcycled clothes. Therefore, she has always seen sustainable fashion not only as a means of personal expression, but more as a reflection of the changes we want to see in the world.

EEN Advisor  
Céu Filipe  
[ceu.filipe@aeportugal.pt](mailto:ceu.filipe@aeportugal.pt)

The company is aligned with the United Nations' Sustainable Development Goal 9 - Industry, Innovation and Infrastructure, 10 - Reduced Inequalities and 12 - Responsible Consumption and Production due to the capacity of the brand to reduce the ecological footprint of the Portuguese textile industry across the entire value chain by recycling textile waste, raising awareness of the importance of sustainable fashion and sharing upcycling techniques among consumers.

Rewarded by The Green Project Awards in 2017 and with solid public and private partners, this circular design brand wants to continually reduce the negative impact of fashion industry, by calling different designers, brands, fashion companies and organisations to partnerships regarding collaborations for sustainable and circular production models, such as small scale, upcycling and textile waste/deadstock incorporation.

## 51. Portuguese Brand Of Textile Accessories Combines Social Innovation With Environmental Innovation

A Portuguese brand of textile accessories combines social innovation with environmental innovation and pedagogy actions to change current consumption habits.

It's a recent brand, but in 2,5 years they have already managed to pay € 52,372.65 to their social partners and upcycle 5.3 tons of fabric and textile accessories.

With their action, they promote social inclusion and recognition because all their products are made by unique people in their difference (social institutions, refugees, social associations, active aging and others), duly paid for this work. They also contribute to the reduction of the textile industry ecological footprint because all their products are made with textile waste, leftovers, samples and accessories which they upcycle.

The brand's motto is to increase their positive impact on People and the Planet, transforming many small worlds, one at a time, every day!

By purchasing their products, consumers are contributing to the social sustainability of various institutions/social associations, because these products are fully made by its users, thus valuing and remunerating their work and their self-esteem, promoting their social inclusion.

## 51. Portuguese Brand Of Textile Accessories Combines Social Innovation With Environmental Innovation

The products' fabric is reused from the production processes of home textile companies resulting from its waste or leftovers.

The brand label is weaved with recycled polyester yarns. The message the brand wants to convey is printed with water ink through a sublimation technique.

The totebag straps are made from 100% organic cotton. The concept label is made from cotton waste and plant seeds.

Impact so far:

+ 5,300 kg of reused fabric

31 social partners

52 372.65 € paid to social partners

1,941 re.store tribe membres

EEN Advisor

Céu Filipe

[ceu.filipe@aeportugal.pt](mailto:ceu.filipe@aeportugal.pt)

The company's CEO is a businesswoman and a social entrepreneur, responsible for volunteer projects, a determined, creative, passionate, truly fascinating woman, determined to enable people to become agents of positive and creative change.

The brand is now seeking market penetration by forming partnerships with distributors and retailers in Europe. The company is also available to provide bespoke services by way of a manufacturing agreement.

## 52. Portuguese Fashion Designer Uses Traditional Craftsmanship To Create Unique Designs

Luxury designer based in Portugal proposes a contemporary vision of traditional Portuguese craftsmanship, through the sale of clothing and accessories with a focus on the international market. The brand has a very specific mission, always making sure they are creating a positive impact.

Born in 2020, this brand has a mission that transcends fashion. It is dedicated to celebrating and protecting traditional Portuguese craftsmanship. Joana, the Founder and Designer, plays a central role in this endeavor. At 28 years old, she pursued her Master's degree at Kingston University in London after graduating from the Faculty of Architecture in Lisbon.

Her passion for ethical production and collaboration with artisan communities led her to Jaipur in India, where she worked with traditional techniques. Upon her return to Portugal, after her time in India and completing her Masters in London, Joana was inspired by her family's stories, which fueled the creation of her brand. This marked the beginning of her mission to protect Portuguese Heritage.

The journey involves collaborating closely with artisans all over Portugal, ensuring that their skills and techniques are not only preserved but also passed on to future generations. They prioritize the use of conscious and ethically sourced materials in our creations, emphasizing quality, longevity, and environmental responsibility.

## 52. Portuguese Fashion Designer Uses Traditional Craftsmanship To Create Unique Designs

All the collections and projects are developed in collaboration with artisans throughout the country, giving voice and visibility to various techniques, from textiles to tinwork. Today, the brand boasts a network of hundreds of artisans, symbolizing the intersection between tradition, contemporaneity, and technological innovation, all aimed at ensuring the longevity of Portuguese craftsmanship.

The company is currently looking for investment for human resources. They know the project works and is scalable but they need more people as part of the team. Also, they are looking for distribution partners in several markets.

Vanda Narciso

[vanda.narciso@iapmei.pt](mailto:vanda.narciso@iapmei.pt)

## 53. Sustainable Fashion Design Brand Converts Used Umbrellas Into Raincoats And Accessories

This is a community-based fashion brand that repurposes broken umbrellas into eco-designed garments handmade in Portugal for people who want to wear stylish garments while reducing their environmental footprint. They believe that fashion is happier when it respects people and the environment, following SDGs 12 and 13.

They believe all resources are valuable and they are committed to show that fashion brands can and should be active agents in environmental and social well-being, while contributing to local economies. Waste is a design problem. The company is committed to use design as a sustainable tool to create a better future.

Their product development considers environmental aspects at all stages, striving for products which make the lowest possible environmental impact throughout their life cycle.

## 53. Sustainable Fashion Design Brand Converts Used Umbrellas Into Raincoats And Accessories

In their circular creation, they assume that there are two audiences to be satisfied: the final consumer, who seeks brands with ethical and truly sustainable practices, and the environment, which is no longer able to support the intensive extraction of resources needed to meet our current rhythms of consumption. In the heart of their product design process you find sustainability and waste reduction; they use creativity to create pieces that are functional, durable and that reduce the community's environmental impact.

The company is currently looking for distribution partners in several markets, as well as circular fashion partners to develop new circular projects.

Vanda Narciso

[vanda.narciso@iapmei.pt](mailto:vanda.narciso@iapmei.pt)

## 54. Sustainable Fashion Brand Creates Clothing Designs For Sustainability And Circularity

This is a sustainable fashion brand from Portugal that aims to show that producing sustainability and locally is possible. Their priorities are creating a strong product and a reliable supply chain while testing your product and gather feedback.

This brand has developed a clothing line that's, not only 100% local (as in 50kms radius) but also respects the know-how of the region (wool) while creating a more eco-friendly alternative (recycled wool).

They are also developing a traceability system within the brand and a systems that creates alternatives for discarding the garments.

## 54. Sustainable Fashion Brand Creates Clothing Designs For Sustainability And Circularity

### **Sustainable Materials**

The brand is committed to prioritise the environment and society in the way they do business. When they make decisions about the products they make, fabrics are a huge factor, their comfort, durability and impact in the environment.

### **Transparency**

The brand is committed to transparency across all our supply chain. The majority of their production partners are small (and impeccable) companies.

### **Made in Portugal**

They pledged to produce everything they can in Portugal since day one, to ensure fair and safe working conditions for every worker. To make sure everything is going as it should and to support their partners, they visit them from 2 to 8 times a year.

The brand is currently looking for business partnerships, namely distribution partners.

Vanda Narciso

[vanda.narciso@iapmei.pt](mailto:vanda.narciso@iapmei.pt)

## 55. Portuguese Company Manually Produces Ecological Air Fresheners

This company has a registered trademark that manually produces ecological air fresheners, affirming itself in the "slow decor" and "passive diffusion" segments.

The base of the pieces is ceramic powder (it is a high-quality plaster constituted by the mineral gypsum), to which is added a floral essence, mineral pigments, preserved natural flowers and packaging.

The project emerged in 2020, as the result of the forced pause by the covid-19 pandemic, at the hands of a female artisan, a communication consultant and event organizer, who was joined by her husband, a chemist and project manager in the industrial area.

Each air freshener is handmade, in small scale, avoiding waste of resources. Attention to detail and quality is present in the entire production process. The "perfuming" is done manually, piece by piece, ensuring total coverage and an excellent power of diffusion of the fragrance, for an effective aromatization of spaces.

Products have small imperfections, making each piece unique and irreplicable.

Throughout a three-year history, the brand has already been present in some of the main international exhibitions dedicated to interior design such as Maison&Objet (March 2022 edition and January 2023 edition) and Tortona Design Week - Milan (June 2022).

## 55. Portuguese Company Manually Produces Ecological Air Fresheners

This entrepreneur invests heavily in three features:

Handmade signature – the pieces are handmade, with the entire production process carried out by the brand.

Sustainability – the products have a minimalist design and are developed with organic and environmentally friendly raw materials. All packaging and anti-breakage systems used are biodegradable and based on recycled and recyclable paper. The production process follows and implements good environmental and labor practices.

Quality – The company uses raw materials of excellence and consciously choose each supplier according to their position in terms of work ethics, regulation and sustainability. Their signature of quality and originality is reflected in the consistency and durability of the final product.

[ceu.filipe@aeportugal.pt](mailto:ceu.filipe@aeportugal.pt)

## 56. Danish Sustainable Sanitary Pads

This company has two female founders of Mewalii, Denmark. They developed sustainable sanitary pads made of hemp and biofilm instead of cotton and/or plastic like the majority that is in the market today. Both materials are very harmful for the climate and environment, and that is why they set their goal of changing the materials in the most used menstruation product.

Their goal is to make it easy to be sustainable. Therefore they will sell through their webshop with and without subscription. They will also sell to supermarkets, to private companies, festivals and schools. Production is set to start in Q1 2024.

## 56. Danish Sustainable Sanitary Pads

They have already sold more than 12.000 sanitary pads to Danish customers through crowdfunding without having the final products. They're very high interest in Denmark and they know the market well. One of the biggest chains in Denmark will have this product in their shop when production starts. Several customers from other countries has contacted the company but they need a sales person who knows the market to go international.

We do not have the competences and knowledge about how to go to market international. They will start in Denmark and hereafter other European countries (Sweden, Norway, Finland, Holland and Germany) in the beginning. They need competences to go international in 2024.

## 57. Austrian Startup Developed An Online Platform For Sustainable Living

An Austrian Startup developed an online platform that seamlessly merges lifestyle tips, trendy and innovative eco-friendly products and experiences to make it easier to live sustainably.

The platform focuses on modern homesteading, and principles of respect, independence and collaboration to empower eco-conscious urban audiences to define their own lifestyle and embrace more planet-friendly habits.

Value proposition:

- Simplicity: do not get overwhelmed! The platform offers a selection of products and resources for all levels that promote small, easy, but lasting everyday changes.
- Empowerment: by focusing on DIY and self-sufficiency, customers regain the power to define their own lifestyle.
- Innovation: The Startup blends traditional wisdom with cutting-edge technology, to fit the demands of a modern urban audience.
- Transparency: by laying out the sustainability features for each product listing and the company's own strategy.
- Time saving: the company does the heavy lifting, researching products and companies, so users can save valuable time for what is important for them.

## 57. Austrian Startup Developed An Online Platform For Sustainable Living

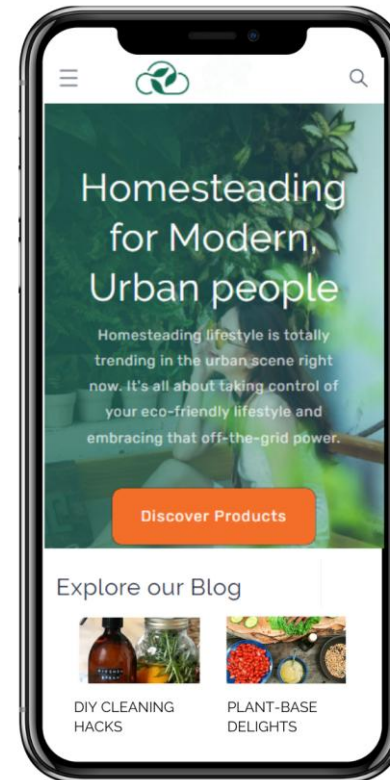

The founder and CEO of the Austrian Startup has 25 years of corporate experience and she was recognized as one of the Top Women from the Austrian VC & Startup Ecosystem in 2023.

After the recent launch of the new platform in November 2023, the Startup is currently looking for suppliers of sustainable products to partner with (on affiliate marketing and/or dropshipping basis). Also, investments are sought to grow the team and scale internationally.

## 58. Czech Company Provides Innovative And Functional Sustainable Design Solutions

This is a creative studio founded by Pavla Podsedníková & Markéta Šohajová. They create innovative and functional design solutions while maintaining the traditional values of craftsmanship; pioneering a sustainable approach to fashion production and design.

In their current project Airbo they brought up the way to tackle the issue of waste in the automotive industry. They are using airbags from old cars collected from wreckage. The airbag fabric NYLON 6-6 is the most durable, puncture resistant and water resistant: this fabric is commonly used in bulletproof vests. This makes it a magical material for bags, luggage or accessories of any kind.

They rebuild them with much respect to the original shape, producing them in eco responsible factories with an eye on the longevity and functionality of the products.

## 58. Czech Company Provides Innovative And Functional Sustainable Design Solutions

The environmental and social goals are ever evolving, so the company makes use of the highest both ethical and technical standards lying within our reach.

They are currently preparing the Airbō brand to enter the European market. At the same time they are also working on networking opportunities in other EU countries.

## 59. Czech-based Manufacturer Of Cloth Diapers And Reusable Period Products

This company was established in 2012. It has swiftly become a leader on the cloth diaper market in Czechia and a brand to count with on the European scale. The company's core values are **environmental consciousness** & **social responsibility**. For the latter, they have repeatedly won the **Trendsetter** prize, awarded by the Czech Business for Society Association.

Cloth diapers are an eco-friendly alternative to disposable diapers – for every child whose parents convert to cloth, roughly **1.5 tons of non-biodegradable waste** are not produced. Cloth diapers are more gentle in many ways – towards the environment, towards the sensitive baby skin, and also towards the parents' budget. In addition to cloth diapers, the company produces **reusable sanitary pads** and **panty liners** for an eco-friendly period.

## 59. Czech-based Manufacturer Of Cloth Diapers And Reusable Period Products

Not only does the company produce and sell sustainable products, their **focus on sustainability** is apparent throughout the entire production chain. They buy their fabrics in Europe and manufacture their products in Czechia. Textile industry has once been big in their region – the company has been contributing to its revival.

Founded and directed by a woman, the company is known to be extremely flexible when it comes to **part-time employment** – it has enabled **mothers to work from home** long before it became fashionable. They actively promote this approach, still not so common in Czechia.

## 60. Portuguese Interior Design Company Dedicated To Sustainability

This company invests in Innovation and Research, prioritizing endogenous products and enhancing Circular Economy, Blue Economy and Upcycling.

The main focus of the company is to guide its customers through the parameters of sustainable management, gathering several business sectors, from eco-construction to eco-architecture, eco-products, textile eco-design, collection and evaluation of inert waste from various Regions.

The brand respects the principles of sustainable development.

The company's CEO believes that through interior design one can also convey a message, in this case that waste can be sophisticated, when given proper attention.

Her innovation skills reside in her expertise and creativity, sustained by the desire to create and reinterpret trends through the use or reuse of raw materials considered waste in different sectors, specifically in textiles, but never excluding so many others that together bring immense potential.

## 60. Portuguese Interior Design Company Dedicated To Sustainability

Throughout her career, this entrepreneur collaborated with several renowned national enterprises of interior design. She participated in several international fairs, such as Formex (Stockholm) and Maison&Objet (Paris), being referenced for several occasions as a trend.

In 2022, the company started a joint project called, funded by the EEA Grants and the Directorate-General for Maritime Policy. Committed to developing new textile yarns and fibers from marine litter, this project explores the concept of Circular and Blue Economy with a strong component of innovation applied to the development of new by-products and raw materials, from plastic waste and surplus from the sea and fishing sector. This pilot project kickstarted on the Azores islands, specifically in São Miguel, Terceira and Faial islands and has already expanded to other islands and beyond borders.

## 62. Transylvanian Sustainable Hub for Cosmetics Innovation, Education, and Rural Regeneration

Originating from Transylvania, this Romanian company specializes in natural cosmetics. Founded by a female entrepreneur with a background in restoration and studies in traditional medicine, medical folklore, and phytopharmacy in both Romania and Germany, the company innovatively combines scientific research on aromatic plants with traditional recipes to create highly effective products.

Their 100% natural offerings include balms and ointments for skin regeneration, oils and elixirs for skincare, traditional soaps, and other potions, all derived entirely from Romanian medicinal plants.

Most extracts are sourced in-house from medicinal plants cultivated sustainably in organic gardens located in the Transylvanian hills and mountains. For ingredients they cannot produce themselves, they collaborate exclusively with local producers, supporting the community and respecting the environment. All products are packaged in recyclable materials.

The product portfolio caters to various needs, offering lotions, oils, and soaps for:

- **Outdoor & Camping:** Ideal for camping enthusiasts, athletes, and travelers.
- **Gentlemen:** Products designed for beard, body, face, and hair care.
- **Ladies & Children:** Tailored for body, face, and hair care.

Where tradition meets innovation to create premium, natural skincare and wellness products rooted in Transylvania.

## 62. Transylvanian Sustainable Hub for Cosmetics Innovation, Education, and Rural Regeneration

The [product portfolio](#) caters to various needs, offering lotions, oils, and soaps for:

## 63. Innovative Natural Cosmetics: A Romanian Company's Commitment to Sustainable Beauty & Zero Waste

Established by a passionate young Romanian biotechnology engineer, the company specializes in crafting and manufacturing natural cosmetic products for both women and men. Drawing on extensive expertise in biotechnology and chemistry, the company collaborates with a network of raw material suppliers to develop innovative formulas and ensure comprehensive product certification.

Product Portfolio:

- **Creams:** Hand, face, and body creams designed for hydration, daily, and night care.
- **Serums:** Hydrating and daily care serums.
- **Body Butters:** Rich, nourishing body butters.
- **Cosmetic Oils:** Hydrating and daily care oils.

All products are crafted using natural ingredients, including butters, oils, and active components such as hyaluronic acid and surfactants derived from natural sources like coconut or olive oil. Fragrances are exclusively obtained from essential oils, with no chemical perfumes used.

Fragrance Profiles:

- **Floral:** Lavender, neroli, ylang-ylang.
- **Citrus:** Orange, lemon, lemongrass, grapefruit.
- **Woody:** Pine, sandalwood.

## 63. Innovative Natural Cosmetics: A Romanian Company's Commitment to Sustainable Beauty & Zero Waste

The products are available in 20 ml, 30 ml, 50 ml, and 120 ml containers. 3 types of packaging are used for the products: 1. SULAPAC 100% biodegradable/0-waste jars – for face, hands and multi purpose premium creams; 2. Tapioca starch compostable containers – for solid shampoos, body washes and soaps & 3. Glass containers – for shower gels, hand wash liquid soaps, oils and candles.

The company is committed to sustainability, operating under a zero-waste philosophy.

The clientele includes individuals seeking a healthy lifestyle and natural body care solutions, as well as cosmetic salons, natural shops, and clinics requiring massage oils for various medical treatments.

The Romanian company is looking for **sales partners of cosmetic products** – the company's brand – such as agents and importers, multi-brand stores, natural stores, hotels, gift shops, beauty salons, spas etc.

## 64. Spanish Eco-Design: Revolutionizing Furniture with Recycled & Modular Innovation

Based in Spain, the company is a pre-seed company revolutionizing the sustainable furniture sector. The company designs and manufactures eco-friendly, modular furniture made from recycled and recyclable plastic. By embracing circular economy principles, the company ensures that its products are reintegrated into production at the end of their lifecycle, effectively reducing waste and environmental impact.

The company offers an innovative digital platform that empowers customers to customize their furniture designs with flexible options for both purchase and rental. The company's mission is to provide accessible, stylish, and durable products for modern urban living while championing local production and social inclusion, ultimately transforming traditional consumption models.

The company seeks partnerships with raw material collectors/processors, European injection molding firms for local production licensing, and funding support to drive international expansion.

## 65. Scent of Legacy: Crafting Artisan Perfumery and Fragrance Innovation from Bodrum, Turkey

**The Turkish company has two business units: Fragrance Consultancy and Artisan Perfumery.**

The **Fragrance Consultancy unit**, founded in 2024, specializes in tailor-made fragrance strategies for brands, optimizing project management for a superior fragrance experience. The founder, a Chemical Engineer from Istanbul Technical University, holds an ISIPCA Perfume & Cosmetics Master's degree (France & Italy) and has 14 years of corporate experience in fragrance design and commercial fragrance roles at global firms. She has worked across Europe, the Middle East, Turkey, Russia, and North Africa, with expertise in Fine Fragrance, Home Care, and Personal Care. Now, she collaborates with brands and fragrance houses to enhance process efficiency.

Now, she collaborates with brands & fragrance houses on: Tailor-made olfactive strategies, Efficient fragrance project management, Consumer insights & market analysis, Fragrance portfolio & process optimization.

The **Artisan Perfumery** unit, founded in 2022, draws inspiration from the ancient Mediterranean and Aegean. Using local Bodrum naturals, it creates signature scents in artisan Cologne, Eau de Parfum, and Reed Diffusers. The collection features nine unique fragrances, sold in design stores, concept stores, and prestigious hotel boutiques, with plans for expansion while maintaining exclusivity.

Connection with **concept/design stores worldwide.**

## 66. Spanish Brand Revolutionizing Wellness with Innovative Healthy Delights

From Spain, this company is leading the healthy product revolution, offering a premium alternative that redefines what it means to enjoy while taking care of your body.

Its flagship line combines innovative food technology with xylitol, creating a functional product that not only delights the palate but also promotes dental health and overall wellness.

Designed for consumers seeking quality, conscious lifestyle and a sophisticated experience, its proposal combines modern design and sustainable commitment.

With an international vision, it seeks to establish strategic alliances that allow it to transform the global wellness market, promoting products with a real impact on everyday life. Led by a visionary woman, this brand reflects the strength of innovation and inclusive leadership in the competitive healthy wellness sector.

## 66. Spanish Brand Revolutionizing Wellness with Innovative Healthy Delights

From Madrid, The Natural Healthy and Honest FC, develops **innovative solutions in preventive oral health and wellness**, combining scientific rigor, advanced technology and social commitment. Its star line CRACX, formulated with Finnish xylitol, is backed by scientific evidence, which supports its efficacy in the prevention of caries, the balance of the oral microbiome, as well as the increase of salivary flow. Aimed at consumers and healthcare professionals, it offers a functional alternative that integrates nutrition and oral health prevention into daily life. We will soon be launching a new product that will undoubtedly also be revolutionary in the oral health sector. With a strong commitment to sustainability and accessibility, the company collaborates with the health and education sectors to promote healthy habits around the world. Led by a woman with a vision for impact, it seeks strategic partners in the clinical and pharmaceutical fields to expand its reach and consolidate its position as a benchmark in preventive oral health and functional nutrition.

We are looking for **pharmaceutical and healthcare distributors**, pharmacy networks, dental clinics, oral prevention experts and health-focused investors to expand access to innovative wellness solutions

## 68. Silk Stories: The Fusion of Fine Art, Fashion, and Nature by a Hungarian Silk Painting Artist

The hungarian **silk painting artist's work combines fine art with fashion and design**. Based in the city of Pécs, she has been hand-painting silk for over 15 years, creating a wide range of products such as scarves, handbags, jewellery, and home decor items.

Her collections are inspired by nature, underwater worlds, and her personal travel experiences. Each piece is a one-of-a-kind creation, offering its wearer a unique emotional and aesthetic experience. She refers to her work as "wearable art". She also conducts silk painting workshops for both beginners and advanced participants, sharing her techniques and passion for traditional craftsmanship with an international audience.

The artist is open to partnerships with concept stores, boutiques, galleries, museum shops and online retailers focusing on design. Fashion and lifestyle brands who are open to collaboration and cultural institutions who are interested in hosting workshops or exhibitions might be ideal partners.

## 69. Threads of Serbia: Handcrafted Wool Creations Empowering Women and Celebrating Tradition

The company is from Serbia. We are engaged in the production of exclusively **handmade products using knitting, embroidery and crocheting techniques**. The yarn we use is 100% wool. The products we can offer are socks, hats, scarves, cardigans, sweaters... It is also possible to create a special line (design) for the customer. The production process involves the engagement of women from rural areas who are thus empowered on a social and economic level. We especially point out that the products are exclusively of Serbian origin, and that they are of controlled manufacturing quality, each piece is unique in itself because it is handmade.

We can offer the products to retailers whose concept fits this type of product. We think that the products may be interesting in ski centers, mountains, tourist places, countries where the climate is colder, foreign countries where is a larger Serbian community etc. Since manual production is limited, mass distribution is not possible, but the production is enough for dozens of retailers.

## 70. Company From Bosnia And Herzegovina Offering CNC Metal Processing, Turning And Milling

This company was founded in 1997 and has been successfully operating for 24 years. The company was founded by two women Ljiljana Subotic and Vitka Malesevic, both economist by profession, and it is still governed by the women, with 16 employees in the company.

The company began its activities with custom clearance services and book-keeping, and today it is one of the leaders on local market with the market share of 24% in the industry. Since 2012 the company diversified its activities to CNC machining services (CNC metal processing by turning and milling).

## 70. Company From Bosnia And Herzegovina Offering CNC Metal Processing, Turning And Milling

EEN Advisor  
Dragana Kokot  
[draganak@komorars.ba](mailto:draganak@komorars.ba)

The activities are performing in the 1000 m<sup>2</sup> facility and close-by administration building (220 m<sup>2</sup>), so the company can offer full service for the business partners comprising from CNC turning and milling of the metals to the transport services as well as custom clearance services.

Another advantages, on top of the services offered by the company, is the fact that it is located in the city of Derventa which is 25 km far from the crossing border with the European Union that is Croatia

## 71. Innovative Company From Bosnia And Herzegovina Offering In Electrical Installations For Smart City Concepts

This is a company operating in the field of electrical installations for nineteen years. It is constantly working at the acceptance and practical use of new technologies. While evolving, a company created and developed its products.

They are the only producer of smart urban furniture in B&H. If you compare their products with the competition, the main distinction from the rest is our modular design.

Modular design in benches means we are creating new spaces of gathering by combining more Modules into functional shapes. The modularity of solar bus stations is shown in their adaptation to the place of installation.

They could be 4, 6 or even 8 meters long. Also, just the damaged parts could be replaced (now the whole station should be replaced).

## 71. Innovative Company From Bosnia And Herzegovina Offering In Electrical Installations For Smart City Concepts

We created smart benches, a solar bus station, and the City Gecko smart city concept that will benefit the public. The concept involves our products smart benches (Modul Solar, Modul Wood, and Modul Wheel), smart solar bus stations, and partner companies

Successfully implemented projects, market monitoring, and constant desire for positive change created the idea for a brand – City Gecko.

## 75. Empowering the Future: Turkey's Deep-Tech Innovation in Advanced Battery Technologies

We are a Turkey-based deep-tech startup established in 2024, originated from two of Turkey's leading universities, and specializes in advanced battery technologies, focusing on scaling up novel electrode and battery materials for next-generation energy storage applications.

The company operates at the intersection of electrochemical energy storage, advanced battery manufacturing, and machine learning. The team consists of experts in both scale-up engineering and scientific research, combining large-scale manufacturing capabilities with deep scientific knowledge.

**Key competencies** include:

- Lithium-Sulfur Battery Research & Development, addressing the need for high energy density ( $>500$  Wh/kg) storage solutions.
- Battery Materials Development, particularly for anodes, separators, and electrolytes, using a patent-based technology.
- Pilot-scale Battery Production, leveraging expertise in multi-nozzle electrospinning coating systems.
- AI-Driven Optimization, applying machine learning to model and enhance battery performance.

## 75. Empowering the Future: Turkey's Deep-Tech Innovation in Advanced Battery Technologies

We seek collaborations to accelerate the commercialization of high-performance battery technologies, specifically to optimize battery architectures and materials and develop upscaling strategies for lithium-sulfur and solid-state batteries.

## 77. Portuguese Hemp Fashion with Purpose, Building a Regenerative and Just Future

Sensihemp is a Portuguese brand transforming the European fashion scene by blending innovative design with a strong commitment to sustainability. Founded in 2021 by Marta Vinhas, who brings over 20 years of experience in the textile industry—including in fast fashion—the brand was born out of a desire to create stylish, high-quality garments that respect the planet. Marta also serves as an Ambassador for the European Climate Pact in Portugal.

Hemp is at the core of Sensihemp's mission. This natural fiber has a low environmental impact: it absorbs more CO<sub>2</sub> than trees, needs minimal water and no pesticides, and is fully biodegradable. Combined with natural dyes from plants and minerals, the brand avoids toxic chemicals and significantly reduces pollution. Sensihemp reduces its carbon footprint, supports sustainable agriculture, and values local production by collaborating with Portuguese artisans. Fair working conditions are central to its practices.

The fabrics used offer durability, breathability, and UV protection. Each piece is crafted with care to balance elegance and sustainability.

Recognized by the WORTH Project and aligned with the New European Bauhaus values, Sensihemp has presented its collections at Milan Design Week, affirming its place in Europe's sustainable fashion movement.

By supporting local craftsmanship, Sensihemp contributes to the circular economy and helps preserve cultural heritage.

## 77. Portuguese Hemp Fashion with Purpose, Building a Regenerative and Just Future

### SensiHemp Offers:

- High-quality hemp clothing and accessories.
- Sustainable and natural dyeing.
- Timeless and elegant design.
- Commitment to environmental and social responsibility.
- Support for local craftsmanship and ethical production.
- European recognition for innovation and sustainability.

### Looking for:

- The project is currently looking for funding for human resources, the project has proven to be both viable and scalable, however, it has never received any external funding and currently relies solely on its founder, Marta Vinhas.
- SensiHemp aims to expand its presence in the European market through strategic partnerships with retailers, distributors, and other stakeholders in the sustainable fashion sector.
- We also seek co-creations and collaborations with individuals and projects that share our values regarding environmental and social impact.
- We believe in the power of collective action to drive meaningful change.

## 78. Cork Crafted in Portugal: Premium Sustainable Solutions for the Global Wine & Spirits Industry

Based in Portugal, this company operates in the **cork industry, specializing in the manufacture of high-quality cork stoppers**. Serving the global wine and spirits sector, it offers a wide range of natural, technical, and customized cork solutions. The company is committed to sustainability, precision, and innovation, integrating traditional expertise with advanced technology. It holds several certifications, including ISO 22000 for food safety management—an essential standard in this industry—ensuring the highest quality and safety standards throughout its production process. Led by a female CEO, the company exemplifies excellence, responsibility, and leadership in the cork sector.

Although already present in **key wine-producing countries**, especially in Europe, the company seeks new partnerships—agents, distributors, or reps—connected to wineries, bottlers, vineyards, or wine supply warehouses.

## 79. Portuguese Marble, Reimagined: Circular Design for a Sustainable Future

FORMAS DE PEDRA was founded with the purpose to extract marble from a quarry located in Pardais, in Vila Viçosa.

On the extraction process, 70% of marble is rejected raw material. So, we intended to contribute to changing that situation. They shouldn't be rejected.

In 2013, we were proposing to add value by introducing design together with our manufacturing capacity, to produce works of art and equipment, with functionalities in the hospitality and housing sector.

Aiming at manufacturing designed equipment, we did produce limited edition collections, and a lot of pieces. With those projects we did participate in several events. Mean time the process, we did a trademark, FORMAS DE PEDRA. Our aim is to find solutions to use as much as possible the marble extracted and deposited in a heap, rescuing that raw material.

So, we proceed with our studies, our efforts, and planning how we can give that material a use, always a new life, using only the extracted marble respecting what nature gives us, looking at it with careful eyes.

## 79. Portuguese Marble, Reimagined: Circular Design for a Sustainable Future

Formas de Pedra created SMARBLE, a new product. Our mission is to add value and introduce circularity, maximizing the use of raw materials in the value chain.

We consider the good management of mineral resources, the reassessment of business models and the introduction of circular product design and the use of natural materials is urgent. With SMARBLE, we reintegrate raw materials into the value chain.

The **SMARBLE bathtub** project presents an innovative, **value-adding solution to the waste generated from marble extraction.**

Whereas the reference product is made of solid blocks, the SMARBLE bathtub is made of small waste marble blocks collected from the heaps, which are assembled, glued and machined.

The value proposition is therefore based on sustainability concerns, upcycling the marble extraction waste.

Furthermore, the SMARBLE solution represents a significant reduction in CNC machining time leading to a reduction in energy and water consumption as well as in sludge generation.

## 81. Audiovisual Company Based In Portugal Is Developing A Streaming Platform

Company based in Portugal (Lisbon), whose directors have been active in the film, film festival, educational and environmental sectors for over 15 years. We provide a platform that aims at building a community of fans of films about sustainability and social justice focused on a positive view of the future.

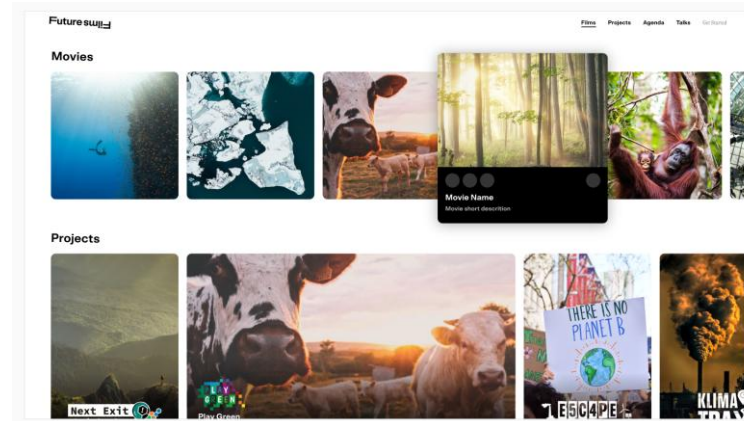

Besides the unique selection of the films, we promote social and environmental projects in line with the SDGs and offer the possibility of engagement with a network of like-minded people, interested in taking-action for a better future. Many films can be seen for free, others are offered on a pay-per-view basis.

It is important that the films and the projects represent different experiences all over Europe as well as in other non-European countries. Our platform seeks to raise awareness about the 2030 Agenda especially among young adults and connect them to a global community that cares about the future. We do not have any sponsors yet. It is all being self-financed so far.

## 81. Audiovisual Company Based In Portugal Is Developing A Streaming Platform

They are looking for partnership with film festivals, film directors, producers, and NGOs or institutions that develop games, educational, sustainable and social projects in Europe, aligned with the concept of the platform and who would be willing to place their content on the platform for free. In exchange they will promote your institution or brand in all our online advertising material.

## 82. Danish Startup Developed A New Solution For Quality Assuring Short Media Formats

Danish startup is a university spin-out, that has developed a new solution for quality assuring (QA) short media formats.

The solution is based on quantitative biometric measurements paired with qualitative ethnographic data, offering a more comprehensive, efficient, and valuable way of conducting tests. The target groups are media producers, distributors, and marketing departments.

Their long-term vision, however, is to develop an Interactive Adaptive Media System. Including the patent-pending Adaptive Media Player, which works by recording and analysing biometric data to detect the users' psychophysical responses to different types of stimuli. Based on the user's response, the system automatically adapts the media to better fit the user's immediate needs.

## 82. Danish Startup Developed A New Solution For Quality Assuring Short Media Formats

The technology has been already tested and proved in the media sector through cooperation with various sparring partners from the movie ( trailer and commercials producers and streaming services companies) and gaming industry (videogames, VR, AR etc.) and already, both at the Danish and international levels.

A two-folded validation of their concept and product proved that the solution can improve and optimize the digital content, hereby directly contribute to the audience development and turnover. They have already received funding from Erasmus+ in cooperation with film school in Norway and first shortfilm applying their quality assuring solution have won 1st place in Cannes Film Festival of 2023.

Besides the media sector, the technology have high application potential within other sectors as digital experiences within culture sector, MOOC and educational sector and healthcare and specifically quality of the e-health.

## 83. Croatian Digital Platform For Film Industry

This is a Croatian online platform for promotion, networking and job ads in the film and TV industry. Their goal is to have all the production companies and professionals listed in one place, and to have a network of professionals and clients where they can search for the right person to implement a project or for a job in the creative audio- visual industry.

Their aim is to become a global tool number one, for searching and hiring people in the film and TV industry.

The digital platforms market in the film industry is growing. Backed by number of institutions and big productions, this platform brings together people who work on high level news and film festival reports, film, TV and theatre reviews, interviews. It provides a large searchable database of creative people and a job management system integration.

## 83. Croatian Digital Platform For Film Industry

The platform started in 2016 as a first online database of actors. After engaging 70 people and taking part in 10 foreign world class productions such as Ibiza (Netflix), The Dark Tower (Amazon), The Hitman's Wife's Bodyguard (Lionsgate), the company decided to spread the work fields also on other film professions.

So, in 2020 they launched a new version of the digital platform where you can find producers, cinematographers, editors, writers, - i.e. all people working in the film and TV industry.

Through this platform, you can find your next videographer or photographer. You can work on innovative video solutions or your next business promotional video to increase visibility and sales - through a great database of creative people and content creators.

## 84. Danish E-learning Platform About Legal Topics

Streaming channel based in Denmark has developed an e-learning platform that provides subscription-based legal learning series and features personal and legal talks, company portraits, documentaries and webseries on legal topics. Through streaming, media production, conferences, seminars and networks this company provides lifelong learning opportunities for everyone in the field of law. Learning should encourage and inspire to excel.

Many students and professionals lose their passion for learning as a result of a competitive atmosphere and experiences of poor mental health at the universities and in the workplace. Knowledge is for everyone and because we're all different, we learn in different ways.

This platform is the learning universe that aims to bring back the joy, curiosity and excitement to learning.

## 84. Danish E-learning Platform About Legal Topics

MISSION STATEMENT: Their mission is to turn legal knowledge into intelligent entertainment and provide lifelong learning opportunities for all. VISION: They bring legal knowledge to new heights. VALUE PROPOSITION: With this platform, legal learning becomes entertaining and easy to understand without compromising the quality standards.

The company wants to expand and we are seeking to convert and develop their platform on the European/American market. They are on the lookout for a like-minded investor, who is committed to making an impact in the legal field. They have produced 300+ videos, organized 100+ events and developed 3 networks. The products have been 'tested' on the target group in Denmark, and have proven successful. The platform has its own media production team that produces the content for the online streaming platform. They use results from well-being reports to create and adapt our digital features and events.

## 87. Danish Tech Platform For The Event Industry

Based in Denmark, Lisa Dalsgaard has become a successful Scandinavian Tech Entrepreneur. Since 2015 she has build and own a digital store of features.

The platform makes it easy for organizers, venues and businesses in general to pack relevant features into a link or a QR, and in that way inform and activate guests, sponsors, staff etc.

The platform's feature store is used by well respected brands in the industry.

## 87. Danish Tech Platform For The Event Industry

The company is scaling across Europe, and the founder has recently received an award in the EU-Parliament as Most Outstanding in Europe.

SME Europe wrote: "The company has inspired the world with an innovative alternative to apps and emails, but the founder Lisa Bønsdorff Dalsgaard also stands out as one of the most successful women in tech in Scandinavia, having bootstrapped the company without investors, build the product with customers, attracted a strong team and created a well-respected brand in the industry."

## 88. Welsh based company providing Core Operations Platform to support digital commerce

The Company's Core Operations Platform breaks down the silos and fragmented data over eCommerce, POS, ERP, and WMS systems, enabling all your systems to speak one language. It allows all systems to easily accommodate changes, eliminate errors, reduce manual intervention and prevent customer frustration. It streamlines simple processes, like customer delivery address changes, reducing manual work, customer frustration and inefficiencies.

The plug-and-play solution, featuring expert-led onboarding, is compatible with Shopify, Brightpearl, and Peoplevox, along with other E-commerce, ERP, WMS and POS systems. Mid-market enterprises credit the Company's solution with immediate operational results and accelerating growth:

- 3% operational expense reduction
- 5% customer returns rate reduction
- 80% customer services returns labour reduction
- 15% customer satisfaction CSAT improvement

## 88. Welsh based company providing Core Operations Platform to support digital commerce

The Company is looking for D2C mid-market/midsize enterprises in France, Italy, Germany and America who are focused on improving e-commerce customer experience in the following industries:

- Fashion & Leather Goods
- Watches & Jewellery
- Perfumes & Cosmetics
- Sportswear Fashion
- Retail

## 91. Greek Non-profit Organization That Promotes Women Entrepreneurship

The company is a non-profit organization that promotes women's entrepreneurship and the elimination of stereotypes, primarily across the region of Crete and in the course of time across the entire Greece and abroad, in countries where women have fewer privileges.

The organization was established in July 2020. It strongly believes that women need holistic and multidisciplinary support in order to be completely ready to come up with entering the world of entrepreneurship, thinking of their multiple roles in life. Four pillars of support for women:

1. Women empowerment: Through inspiration and motivation events, which include female speakers sharing their stories of business successes and failures, in a simple and authentic way, in order to enable the audience to feel connected with them.
2. Education: online or in person, through workshops, seminars, or other events, with a variety of topics that include entrepreneurship, skills development, update and guidance.
3. Mentoring-Guidance: Experienced mentors support women with 1 on 1 mentoring and counseling.
4. Networking: Cooperating with individuals, organizations, actions and initiatives ( speed dates, networking events)

## 91. Greek Non-profit Organization That Promotes Women Entrepreneurship

The last 2 years the organization has expanded its action throughout European projects (CERV, Erasmus+) that has allowed the organization to collaborate with partners from different countries.

Our aim is to expand more on this sector in order to gain international visibility and collaborate for a common goal.

We need to broaden our network of organizations and companies from all over Europe (and outside of Europe) in order to build strong partnerships and learn new practices and approaches in our sector.

## 92. Female Entrepreneur Developed A Digital Platform With Economic And Financial Content And Services For Women

There is a gender gap in access to financial instruments: In 2021, 37% of women in Italy did not have a bank account and male companies are 2.3 times more likely to have access to credit than a female one. Starting from this point, a, Italian female entrepreneur based in Trentino (Italy) ideated a digital Platform dedicated to economic and financial content and services for women.

This digital Platform was initially created with dissemination purposes as a social webpage to which more than 38,200 women are already connected. The Platform is a native channel upgrade of the services that was born on social and, thanks to the collaboration with some professionals in the sector, offers:

- Consultancy products with a button-up approach that first analyse the subject's personal situation.
- Creation of ad-hoc financial solutions that can be realised with the product /services agreed with the Platform or with instruments that can be spent in the Italian financial system.
- Courses on a financial issue aimed at creating women's economic awareness and independence as well as preventing economic violence.

## 92. Female Entrepreneur Developed A Digital Platform With Economic And Financial Content And Services For Women

In addition, the Platform is also involved in the creation of content for third parties (third sector, financial institutions, and others) aimed at inclusive information and the eradication of economic violence.

The goal is to give women access to top-notch consulting products with a philosophy that core closely matches the female mind-set in money management and meets the needs of low budget clients, based on the theory that many small clients give the same volume and earnings as a few large clients.

Since women have less money, digital products are created and sold by exploiting technology and scalability as much as possible in the order to keep prices low but still profitable.

The Platform is independent and services, where necessary in the order to comply with Italian regulations on finance advice, are provided in partnership with entities that have guaranteed the platform's independence of thought.

The digital Platform is looking for investors who believe that money management is of a paramount importance in achieving the goals of female independence and empowerment.

The aim is to make financial instrument accessible to all women to ensure the same economic and financial development of both female savers and female businesses.

## 94. Danish Start-up Created A Tech Platform And Search Portal Connecting Organizations With Female/Non-binary Talents

Danish based start-up behind a leading tech platform and search portal that connects organizations and media with female and non-binary talents. In addition to showcasing these talents they also offer support to them through an online community and education platform. This addresses the gap in representation in the media, on board and in leadership positions by providing a quality pool of diverse experts and role models.

Their business model consists of five key revenue streams, each aligning with their mission to promote diversity and empower women and non-binary talents:

1. Partnerships: In this initial phase, the start-up is collaborating with companies and organizations committed to advancing diversity. These partnerships involve co-branding opportunities, allowing these entities to showcase their commitment to diversity and inclusion.
2. Community: They will also soon be introducing an online community for talents and experts in the portal.
3. Media subscription: Recognizing the need for diverse voices in media, they offer subscription services to news outlets. This provides them with easy access to a broad range of female and non-binary experts for their stories and features. (under development)
4. Recruitment subscription (still to be developed)
5. DE&I Service Listings (still to be developed)

## 94. Danish Start-up Created A Tech Platform And Search Portal Connecting Organizations With Female/Non-binary Talents

This is an SDG-focused start-up, with part of its ownership held by two NGOs championing DE&I. While these NGOs do not hold decision-making power in the operations, they stand to benefit from any profits generated.

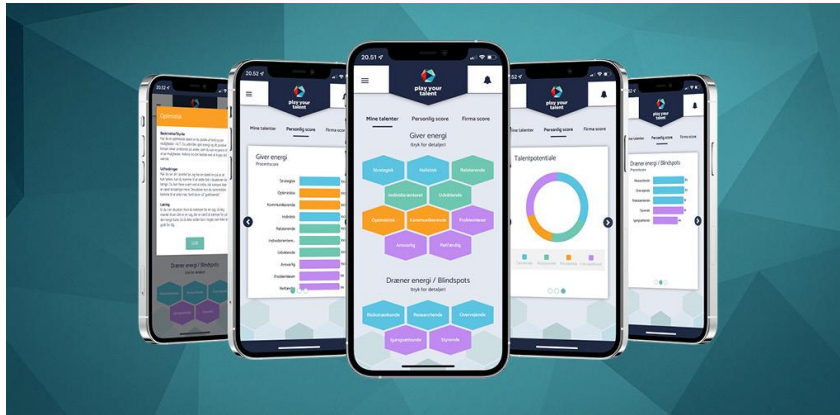

This unique ownership model reflects the company's commitment to giving back to society, aligning their business success with broader social and environmental objectives.

The company is on the look out for media partners that are interested in adopting and testing this diversity tech tool in their market. They are also on the look out for AI partners and tech partners.

## 95. Innovative Software For Working With Talent Development

This company developed an innovative software for working with talent development in an easy and efficient way. Rooted in gamification as well as the newest research, the app provides insights to discover which talents give or drain the individuals of energy.

Data and results from the system can be used to validate and measure the talent culture and efficiency in the company and give the company the opportunity to embrace the talents much smarter.

The benefit of working with talent development through the platform is that motivation, efficiency, collaboration and job satisfaction can be significantly increased.

The software system is innovative and fun to use, as it is based on gamification and makes it possible to work with talent development, goals and results in an entertaining way.

The insights in talents changes the way an organization works with development and goals and creates a new "language" in the companies.

Companies with motivated employees perform 202% better

## 95. Innovative Software For Working With Talent Development

The company needs Market Research and Partner Identification: Continuously assess and analyse potential markets for our software expansion, identifying regions with high demand and growth potential.

Partner Profiling and Selection: Employ predefined criteria to select partners aligned with the company's values and objectives, focusing on localization expertise, market penetration, compliance adherence, technical proficiency, and scalability capabilities.

Engagement and Evaluation: Actively engage with potential partners, initiating discussions to understand their strengths, align goals, and evaluate their suitability for collaboration.

## 96. Spanish Tech Company Focused On The Development Of Innovative Solutions For The Digitalization Of The Social Sector

This is a technological company focused on the development of innovative solutions with social impact.

It is a start-up with a SaaS business model that aims at facilitating the digitalization of the social sector (basically NGOs) and SMEs through Blockchain technologies so that these institutions with a social goal can raise funds for their activities in a fully transparent way.

Given that one of the main limitations for donations is trust, Lazzaro builds up this trust thanks to the use of Blockchain technologies, which guarantees the transparency of transactions. The project has been awarded with several prizes in Spain (Red Cross Humanitarian Technologies, Product Hawkers Awards, UNICEF Lab).

## 96. Spanish Tech Company Focused On The Development Of Innovative Solutions For The Digitalization Of The Social Sector

The company is looking for different types of partnerships:

- Potential clients: the company can be a key technological partner for the development of a fundraising platform.
- Distributors and/or commercial agents: the company is looking forward to international expansion, so they are looking for partners to sell their services abroad
- Buyers: the company can also sell their in-house developed technologies

## 97. Institute for contemporary arts and ecology offering curatorial services and production of contemporary art projects in public and private spaces

This female organisation deals with contemporary art projects that respond to questions of the present, conceiving of nature and culture together and regarding the human with its environment as part of an ecological cycle. Its activities are concentrated in three areas: Residency, Alliances and Agency.

The Residency programme has been running since the organisation was founded in 2015, inviting selected artists and collectives to design projects which respond to the specific situation of the rural Südtirol – Alto Adige and to implement them in collaboration with our local partners from the field of culture, science, and commercial companies. The Alliances programme consists of project-specific partnerships with cultural institutions or private entities where resources, knowledge and networks are shared with the common purpose of realising projects. The third mainstay of our activities is Agency, a platform for the provision of services to cultural institutions, the education sector and private enterprise.

## 97. Institute for contemporary arts and ecology offering curatorial services and production of contemporary art projects in public and private spaces

The purpose of these services is to facilitate the implementation of trans-disciplinary art projects where international contemporary art forms enter dialogue with local people, knowledge, and things. The organisation is constantly in flux, expanding its network with each new project. It is an assemblage of international artists and local experts who forge temporary constellations within the rich infrastructure and landscape of Südtirol – Alto Adige province. In our multiple roles of curator, cultural producer, and mediator, we facilitate artistic production that strives to overcome a strict divide between the local and the international, experimenting instead with forms of gathering in which the landscape, the human and the more-than-human are important sources of knowledge.

The female company is looking for investors and partners, who believe in environmental and social initiatives as key to future sustainable development.

They also want to scale their network in EU seeking to partnerships and collaborate with European Art Institutions, socially engaged cooperatives, European funds and private enterprises that would like to work on arts projects that foster their ecological and sustainable activities.

## 110. International Educational Facility For Tourism And Hotel Management

This INTERNATIONAL TOURISM AND HOTEL MANAGEMENT facility is a private faculty situated in Milocer (Montenegro), the most prestigious tourism destination in the country, which enables students to take their internship in luxury hotels and resorts in the school's surroundings. It is the only gastronomy and hotel management program that is currently being delivered in Montenegro, where emphasis is on practical skills and knowledge for future chefs, food & beverage managers and hotel directors.

The Faculty is located in a hotel, and therefore students can gain practical experience and improve their skills during their study. This hotel-school concept is organized at the example of the best known educational approached from Canada, Switzerland and United States. Since labor market in Montenegro is in continuous deficit of highly qualified employees in hospitality industry, with applied higher education and short-time VET programs tailored according to actual employers' needs, faculty is trying to minimize that gap and contribute to better quality of service in tourism, as this area of economy is participating with almost 30% in national GDP. A female entrepreneur is the dean and manager of the company.

## 110. International Educational Facility For Tourism And Hotel Management

This private faculty is looking for a similar higher education institution that is also implementing a basic or master study program in the field of gastronomy / hospitality / hotel management.

They are interested in signing Memorandum of understanding, based on which they can work together on exchange of students' and teaching staff, organization of thematic workshops or seminars, joint participation in EU projects for education and human resources development in their field of work.

## 112. Austrian AI-Driven Travel Planning Platform

This AI-driven travel planning platform is a pioneering force in the travel industry, offering an innovative AI-powered travel planning platform. It's designed for travelers seeking personalized travel experiences and looking to explore the world with ease.

This digital travel companion makes personalized travel experiences accessible to everyone. The AI-driven platform crafts unique experiences and places in seconds, saving you the time and hassle of planning. No more sifting through endless travel resources or the headache of organizing your perfect trip – the travel planning platform does the work for you.

### Key Benefits

- *Personalization*: the platform understands your travel style, interests, and needs, offering custom recommendations.
- *Time Efficiency*: Say goodbye to hours of manual travel planning, this solution does it in seconds.
- *Global Network*: The platform connects you with fellow travelers and locals, enhancing your travel experience.
- *Sustainability*: the startup is committed to promoting sustainable travel choices for a greener future.
- *Business Solution*: For tourism businesses, the platform helps to get your offer across, get more bookings and track your outreach insights and statistics.

The startup behind this solution is proud to have won the Travel Start-Up Night in Munich, a prestigious award from TIC & VIR. This recognition attests to their commitment to innovation and excellence in the travel tech space.

## 112. Austrian AI-Driven Travel Planning Platform

Looking ahead to scale this digital innovation, the startup is currently actively seeking partnerships with travel agencies interested in managing bookings facilitated by their platform.

The next steps on their journey involves securing investments for team expansion, marketing initiatives, and ongoing platform development. They are inviting passionate travel enthusiasts and industry professionals to join them in reshaping the future of travel.

If you're as excited about the potential as we are, let's embark on this journey together.

## 113. Connecting Cultures: Revolutionizing Experiential Tourism in Sicily for Digital Nomads and Global Travelers

I am a tourism promoter and consultant with my own start-up, primarily focused on international experiential and relational tourism. My vision stems from my personal experience: I was born in Germany and lived for many years in Munich, where I had the privilege of promoting Sicily in an innovative way. I have always strived to highlight the authentic, lesser-known beauties of our land, challenging the stereotypes associated with mass tourism and aiming for a more genuine and profound image of Sicily. Throughout my journey, my goal has been to break away from the traditional perception of Sicily and promote tourism that reflects its cultural roots and local traditions.

The core business of my company is the creation of authentic and engaging travel experiences that allow tourists to connect directly with the local culture and live personalized experiences, well beyond a simple stay. I focus on innovative territorial marketing projects, developing unique itineraries and activities for an international audience seeking experiences that foster deep interaction with local communities.

I specialize in promoting Sicily as the ideal destination for digital nomads and international tourists who seek authentic and personalized experiences. I offer events, activities, and tailor-made itineraries designed to meet the needs of this new type of traveler. The goal of my start-up is to create authentic connections between visitors and the region, promoting sustainable, relational, and experiential tourism that goes beyond a typical tourist visit.

My mission is to contribute to the transformation of international tourism by creating opportunities that make every trip a meaningful, enriching, and unforgettable experience.

## 113. Connecting Cultures: Revolutionizing Experiential Tourism in Sicily for Digital Nomads and Global Travelers

**Partnerships with Local Communities and Artisans:** Work closely with local businesses, artists, and cultural institutions to provide authentic experiences that foster deep connections with the region.

**Tour Operators and Guides:** Collaborate with professional local guides and niche tour operators to design personalized, immersive itineraries that reflect the uniqueness of Sicily.

**Global Travel Agencies and Affiliates:** Establish relationships with international travel agencies and affiliates to promote Sicily as a key destination for experiential tourism, especially for digital nomads.

**Influencers and Travel Bloggers:** Partner with influencers and travel bloggers who specialize in experiential and sustainable tourism to reach a wider audience globally.

**Digital Platforms for Tourism Promotion:** Integrate with platforms that specialize in niche tourism, offering customized travel experiences or local activities.

**Tech Companies for Digital Nomads:** Form alliances with co-working spaces, remote work solutions, and travel tech startups to enhance your digital nomad offerings.

## 114. Empowering Success: Transforming Emotional Intelligence with Innovative Digital Coaching from Montenegro

According to the World Economic Forum and UNICEF, emotional intelligence (EQ) is among the top 3 competencies for success in the digital age and needs to be improved by 26% by 2030. EQ is connected with employability, salary level and well-being of individuals, and profitability of companies. Ms Jasna Pejovic and Ms Valentina Radulovic from Montenegro recognized this problem and developed digital coach application for EQ development that measures, improves, and maintains users' EQ affordably via interactive, personalized, gamified exercises. It consists of a mobile app for employees and a dashboard for management to track the team's progress. The journey from the idea to the first version of their application took almost two years. They applied for the pre-acceleration program in the idea and they were able to develop and test prototype, connect with other businesses and protect their intellectual property. Scientific study conducted by University of Montenegro, Faculty of Philosophy, Department of Psychology, proved that their application effectively develops EQ if used twice weekly, each time less than 10 minutes, after 30 days of usage.

For this reason company was awarded as the Most Innovative Company in Montenegro by the Chamber of Economy of Montenegro at the end of 2023 and also received the prestigious "Butterfly Innovation Award 2023" for the most innovative regional startup, awarded by the Regional Cooperation Council (RCC). The fact that the University of Denver in the United States was one of the first users of the their application indicates that its success transcends regional boundaries. Since September 2022, the application has been included in the UNDP catalog of recommended solutions that change the world for the better, as the only solution from Southeast Europe, which speaks volumes about their global impact. Today, their product is used by banks, telecommunications companies, hotels... all those companies that want to invest in employee development and want fast and measurable results that will positively impact both employees and the company's business results.

The company is searching for collaboration: distributors who would sell this product with the agreed commission.

## 114. Explore Montenegro's Beauty: A Unique Eco-Tourism Retreat in the Heart of Bar

Nestled in the heart of Bar, Montenegro, entrepreneur Ana Unkasevic opened her own business – tourism camp that promotes the region's natural beauty and rich cultural heritage. Located at 550 meters above sea level, between two magical coasts, the camp offers stunning views of Bar, the Adriatic Sea, and the historic Crni Krš fortress.

The camp aims to showcase Bar as a must-visit destination, boasting beautiful landscapes and numerous historical sites. Visitors can enjoy authentic national cuisine made from local products, prepared in nearby households and farms. The camp also offers a variety of activities, including hiking, jeep tours, and canyoning, designed to immerse guests in the natural beauty of the area.

From the camp, guests can enjoy panoramic views that include rolling hills, the shimmering Adriatic Sea, and the ancient Crni Krš fortress. The elevated location captures the essence of Bar's diverse and picturesque surroundings.

With its peaceful environment and stunning views, this camp is perfect for intimate events such as romantic weddings, birthday celebrations, and team-building activities. Whether you're seeking adventure or relaxation, the camp promises an unforgettable experience, highlighting the unique charm of Bar.

This company seeks partnerships with international companies and NGOs interested in showcasing Montenegro. The goal is to attract visitors to the camp, offering local cuisine, nature tours, and breathtaking views of Bar and Crni Krš fortress.

## 115. Pioneering Idiomatic Tourism in Portugal: Global Cooperation in Cultural Immersion, Heritage Education, and Community Engagement

Stay to Talk Instituto de Imersão Cultural was established in 2018 as a **socially impactful project** dedicated to pioneering a novel concept of tourism in Portugal known as **idiomatic tourism**.

To date, he has developed his work in the areas of research, cultural tourism and heritage education. In the educational aspect, we work with and for the local community through heritage education activities, where the value of local identity is the main theme.

We propose and organize educational programs that aim at an inclusive and dynamic education of traditions, customs and the legacy left by prominent local figures. Within the tourism area, we develop cultural immersion experiences based on the collection and processing of evidence of local culture.

Through this research work, we acquire the knowledge necessary for co-mediation, in partnership with the local inhabitants, thus generating an interaction in which both parties win. Thus, through scientific research, we propose to know, study and collect cultural evidence in order to work with a social purpose, namely, to involve communities and contribute to local development, inclusion and social cohesion.

# 115. Pioneering Idiomatic Tourism in Portugal: Global Cooperation in Cultural Immersion, Heritage Education, and Community Engagement

To this end, we dedicate ourselves to various cultural services, including the treatment of collections, the development of local cultural studies in various areas (crafts, traditions, gastronomy, life stories...), the collection of evidence for the construction of narratives of associations, companies, houses with history and/or the structuring of tourist products..

The Stay to Talk Institute seeks partners in the areas of: **Cultural Tourism, Cultural Research, Heritage Education, Language Teaching, and Arts.**
