LEO Peripheral and Centrifugal Pumps

Can be used to transfer clean water or other liquids similar to water in physical and chemical properties with a focus on achieving a higher pumping head or a higher flow rate depending on your preference and application.

<https://bit.ly/40oQx7T> - Peripheral

<https://bit.ly/3LHBjXK> - Centrifugal

LEO Peripheral and Centrifugal Pumps

Suitable for pressure-boosting applications for households, water sprinklers, supporting equipment, etc. Available in various sizes.

LEO Submersible Pumps

Used for wastewater drainage in factories, construction sites, and commercial facilities, drainage systems in municipal sewage treatment plants, field and garden irrigation and drainage, water supply and drainage for construction, etc.

<https://bit.ly/3Z53SRR>

<https://bit.ly/3na74hM>

LEO Hybrid AC/DC Borehole Pumps

Suitable for agriculture irrigation, livestock feeding, domestic water lifting, clear water supply from wells or reservoirs, and off-grid solar pumping systems in remote areas where grid power supply is non-existent or unstable.

Myers Centrifugal Pumps

The Myers self-priming centrifugal pumps are designed for demanding jobs where a lot of water is required over a long period of time. For lawn and garden sprinkling, car washing, or other big cleaning and maintenance jobs, it's built for one purpose only - continuous high-performance service.

<https://bit.ly/3JVCZeU>

Myers Jet Pumps

Myers jet pumps are one of the most popular pump series on the market today. The HR Series (green) is known for its superior performance and dependability in home, farm, business, and industrial pressure-boosting applications around the world. Additionally, the MPN Series (black) having a fiber-glass reinforced thermoplastic body can be used for similar applications while being totally corrosion resistant.

Pentair Constant Pressure Pump Kits

The Pentair Pentek Intellidrive Constant Pressure Controller automatically adjusts motor speeds to meet changes in water demand. Instantaneous feedback from an electronic pressure transducer instructs the drive to change the submersible well pump motor speed to maintain constant pressure throughout the system. Available in various sizes.

Myers and Berkeley Multistage Pumps

Boasting a rugged construction, the multi-stage centrifugal pumps are designed for commercial water transfer and pressure-boosting applications where high pressure and flow need to be generated at high heads for e.g., multi-story apartment complexes.

Global Water Solutions Ltd (GWS) is one of the world's largest pressure tank and water treatment product manufacturers. With a broad product offering and innovative product development, GWS aspires to become a leading solutions provider for the worldwide need of accessing, processing and delivering potable, clean water to improve lives.

<https://bit.ly/40vjwXF>

Global Water Solutions Pressure Tanks

The PressureWave™ series are superior quality, versatile pressure tanks. Models are available from 6 to 21 gallons, with a maximum working pressure of 145 psi, making them ideal for a range of applications.

<https://bit.ly/40lcRiO>

The Challenger™ range of carbon steel tanks are available from 15 to 120 gallons, with a maximum pressure of 145 psi. Ideally suited to a wide range of applications including booster systems, thermal expansion, heating expansion, irrigation systems, and hydraulic hammer arresting.

<https://bit.ly/3JY68WI>

The C2Lite CAD™ series tanks are lightweight and high quality, offering maximum working pressures of 125 psi. With no corrosive parts, the C2Lite CAD™ series tanks are appropriate for demanding environments, and ideally suited for coastal, marine, and other locations where metal tanks are not suitable. Available from 35 to 120 gallons.
