

Muscle Groups Focus

Combined Pull-Up Bar 1900

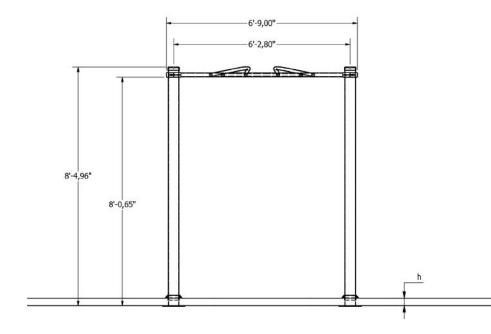

The combined pull-up bar allows you to perform pull-up exercises in different grip styles, which are important exercises for bodyweight training. The various pull-ups performed provide an intense workout for the arm, shoulder, abdominal and back muscles.

Material specification

The element is made of high quality S235 steel, which has been cleaned via sandblasting. A corrosion resistant powder coating finish is then applied. Also available with galvanized surface for even greater protection and longevity!

The clamp system allows for easy assembly and extreme stability.

The connecting elements are fastened with vandal-proof stainless steel screws and nuts.

The ends of the bars and posts are sealed with injection-moulded plastic caps.
