## Terms and Conditions (Abbreviated\*)

**Greenplant.** is a member of the Hire Association Europe. All plant and equipment is made available in accordance with the Hire Association Europe model conditions of Hire Identification and Deposits. A deposit is required for each hire and non trade account customers will be required to produce proof of identity such as a driving licence or utility bill.

**Payment Terms** All prices shown are subject to the addition of VAT at the appropriate rate at time of invoice. Greenplant accepts all major credit cards VISA, MasterCard, Debit Card, etc. Payment can also be made via Direct Debit - ask our dedicated team for more information.

**Trade Accounts** Trade Accounts are available subject to status and approval. Please ask for a credit application form or download online at [www.greenplant.ltd.uk](http://www.greenplant.ltd.uk).

**Transport** Greenplant offer an optional delivery and collection service. A charge for this service will be required and determined based on the mileage and handling involved. Please ask our dedicated team for more information. Advance Bookings Greenplant advise customers to book in advance where possible to avoid potential disappointment at busy times.

**Hire Periods**

"Day"	up to 24 consecutive hours
"Week"	from four to seven consecutive days
"Weekend"	from any time after 4pm on Friday to 8am on the following Monday

**Hirer's Responsibilities** are set out in Greenplant's Terms and Conditions\* for the hiring of equipment which are printed on the back of the hire contract and are available in full on the Greenplant website. Generally breakdown or breakage due to a defect in equipment is Greenplant's responsibility; any other loss, breakage or damage, apart from fair wear and tear, is chargeable to the Hirer. Normal maintenance of equipment whilst on hire (e.g. oil, greasing and keeping clean) is the responsibility of the Hirer.

**Insurance and Non Return of Equipment** Greenplant require the hirer to insure all items for the duration for hire for loss or damage, as equipment not returned from hire will be charged at the full replacement cost. This charge will be in addition to any other accrued charges.

**Catalogue** Please note all catalogue item descriptions (including on the Greenplant website) should be treated as a guide only. Specifications and availability may vary. If a specific item you are looking for is not listed please contact our dedicated team as Greenplant are continually updating and extending the range of hire equipment. An item may be available for hire but not yet listed in this catalogue or online.

**Questions** Please feel free to speak to one of our friendly team members with any questions.

*\*To view the full Terms and Conditions please ask for a copy or visit the Greenplant website at [www.greenplant.ltd.uk](http://www.greenplant.ltd.uk)*

# About Us

**Greenplant.** is an independently owned Plant and Tool Hire company with depots in Oxford, Banbury and High Wycombe.

Established in 2001, Greenplant's purpose built 10,000 sq. ft. headquarters is situated on the Oxfordshire/Buckingham border at junction 8A of the M40 Motorway. Featuring an impressive showroom, warehouse, workshop and yard. The Banbury depot, situated off Hennef Way, is just a few hundred yards from junction 11 of the M40 Motorway. The High Wycombe depot is also situated just off the M40 from Junction 4, to Sands Industrial Estate.

**Greenplant.** offer a vast selection of hire equipment ranging from cordless drills to 20-tonne excavators, which means that we can cope with all our customers' needs, whether they be tradespeople, who require specialist tools and plant equipment for their businesses, or, whether they be individuals doing home improvements.

**Greenplant.** only stock equipment from major brands such as JCB, Kubota, Thwaites, Makita, Belle and Dronco - so you can be assured that each piece of equipment is of the highest standard. Everything is stored and maintained on site, ready to serve our customers. Greenplant's helpful and knowledgeable staff are on-hand to assist you six days a week.

## Equipment Sales

**Greenplant.** stock a complete range of consumables and accessories associated with all the equipment that we hire. In addition to this, all of the equipment within our catalogue is also available to purchase.

**Greenplant.** also stock a range of helpful items and accessories to help you with your gardening, construction or DIY projects. Items such as protective clothing, footwear, spades, wheelbarrows, blades, bulbs and woodworking equipment are all available to purchase in-store.

If you would like to discuss purchasing a piece of equipment, please speak to a member of our friendly team.

A full range of plant and tool hire equipment can be viewed online at: [www.greenplant.ltd.uk](http://www.greenplant.ltd.uk).

Follow us on  Facebook and  Instagram for updates and offers.

## Events

**Greenplant.** provide a wide selection of equipment specifically for events of all kinds and sizes.

**Greenplant.** have a long history of supplying high quality and reliable plant for a vast spectrum of events which have included the F1 Grand Prix at Silverstone, the Kop Hill Climb, Fairport's Cropredy Convention and the Beale Park Boat & Outdoor Show, to name a few.

**Greenplant.** have many years of experience, quality plant and a dedicated team of professionals. We are able to assist with every stage of your event hire needs from initial determination of requirements to setup, on-site supervision and decommissioning when it's all over. Phone, email or visit us to discuss your event hire needs!

## Vibration

### HAND ARM VIBRATION SYNDROME (HAVS)

Hand Arm Vibration Syndrome is a widespread industrial disease that can lead to serious, permanent injury and disability. It is caused by regular exposure to vibration, particularly from hand guided tools and vibrating hand tools.

**Policy:** At **Greenplant**, we are committed to advising and assisting all our customers on the impact of vibration. We will ensure that whenever possible we only supply equipment that is 'best in class' with the lowest amount of vibration. This will ensure that the operator is exposed to the smallest possible level of vibration. All of our equipment that is subject to vibration, has been clearly marked with the appropriate sticker (see 'Safety Symbols - Page 8) and confirmation of the exact vibration levels are available via e-mail at [mail@greenplant.ltd.uk](mailto:mail@greenplant.ltd.uk) or by telephone.

Manufacturers identify vibration levels in units of metres per second squared ( $m/s^2$ ), the greater the figure the greater the risk to the user.

The longer the user is exposed to vibration, the greater the risk. The Health and Safety Executive has identified a threshold value of  $5m/s^2$  averaged over an eight hour day as the maximum acceptable amount without preventative measures and health surveillance. The appropriate vibration levels used for high, medium and low levels are:

**RED**

#### High Risk Red

Equipment vibration levels over  $10 m/s^2$

Needs to be assessed

**AMBER**

#### Medium Risk Amber

Equipment vibration medium  $5-10 m/s^2$

2 Hours maximum daily use without assessment

**GREEN**

#### Low Risk Green

Equipment vibration less than  $5 m/s^2$

8 Hours maximum use

**Usage Time v Trigger Time:** Vibration exposure affects the operative when they are actually working under load. Most operatives over-estimate the actual trigger time against working time. For example, if it took four hours to break up an area that may only equate to one hour trigger time and three hours moving materials.

### **Ways of Assessing and Reducing Risk:**

Keep warm and dry, and exercise your fingers to improve blood circulation

Let the machine do the work, don't force it

Don't grip the handle too tightly

Always use sharp or new accessories, vibration may be increased if the accessories are blunt

Always follow the instructions supplied with the equipment and use the right accessory for the tool

Report any change in the equipment's performance immediately

If you have any questions regarding vibration please ask one of our friendly team

## Working at Height

### Regulations

Falls are the biggest cause of workplace death and injuries. The Working at Height Regulations which came into force in 2005 were created to prevent these injuries and deaths. These regulations apply to all work at height where there is a risk of a fall liable to cause personal injury.

**Employers (or Duty Holders and individuals) are required to do all that is reasonably practicable to prevent anyone falling by**

1. Avoiding working at height where possible.
2. Using equipment or other measures to prevent falls where working at height cannot be avoided.
3. Using equipment or other measures to minimise the distance and consequences should a fall occur, where risks of falls cannot be eliminated.

### The regulations require duty holders to ensure

1. All work at height is properly planned and organised.
2. All work at height takes account of the weather conditions that could endanger health and safety.
3. Those involved in working at height are trained and competent.
4. The working area is safe.
5. Equipment for working at height is appropriately inspected.
6. The risks from fragile surfaces are properly controlled and the risks from falling objects are properly controlled.

When planning working at height you need to justify the type of equipment used; this will involve performing a risk assessment. For short duration light work, a stepladder or leaning ladder may be suitable, but where work is for a longer duration and involves heavier work and the need for two free hands, a tower or access platform may be more appropriate.

At **Greenplant.** we are continually reviewing and updating our fleet to enable us to offer our customers the most appropriate access equipment for working at height. Our trained staff will be able to advise you on the benefits of each item within our range.

## Noise Regulations

The Control of Noise Regulations 2005 came into force in 2006. The aim of the regulations is to ensure protection from excessive noise within the workplace, which could result in loss of hearing. Risk must be assessed if noise exceeds 80 decibels. Hearing protection must be worn/provided if noise exceeds 85 decibels. To combat the affect of noise within the workplace **Greenplant** carries a full range of hearing protection and silenced machines.

## Dust Regulations

Where there is a risk of exposure to fumes or dust the individual/employer must minimise or control the risk. Relevant information and, where necessary, training must be provided.

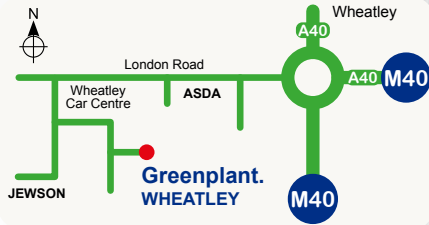

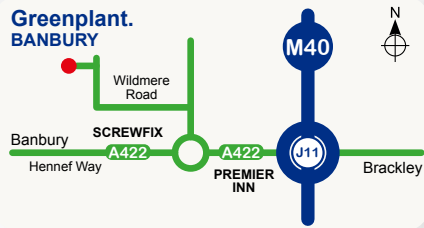

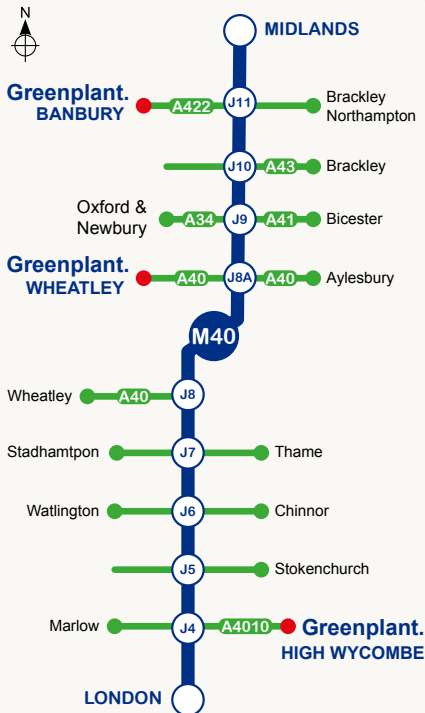

**Greenplant** stock a range of dust extraction equipment for hire to use with power tools and a full range of dust masks are available for sale.

Always ensure you have assessed the risk of dust before you proceed.

- Information on the nature of the dust
- The type of exposure (inhalation, dermal or ingestion)
- Details of the control to be used.

Please contact a member of our friendly team if you require more information.

# Full M40 Coverage for Plant & Tool Hire

## Banbury Depot

Located off Hennef Way, a few yards from Junction 11

Greenplant. Ltd.  
Unit 3, Wildmere Close  
Banbury OX16 3TL
