## AWARD-WINNING FAMILY BUSINESS

Scan the QR code to see our  
external shading systems  
proudly manufactured  
right here in the UK

## BRITISH CRAFTSMANSHIP

For almost 40 years, we've meticulously designed and crafted the very finest external shading systems for discerning homeowners and businesses, creating cool, comfortable and sustainable spaces, where people love to be.

## WE'VE GOT YOU COVERED

Louvered Pergolas\_\_\_\_\_08

Make the most of your outdoor space whatever the weather

Patio Awnings\_\_\_\_\_34

Enhance, protect and prolong the use of your terrace

External Blinds\_\_\_\_\_52

Say goodbye to unwanted solar heat gain and glare

Hospitality & Commercial\_\_\_\_\_76

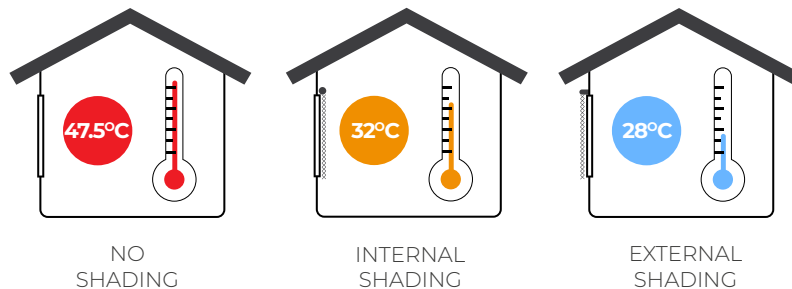

Create unforgettable alfresco experiences 365 days a year

## CREATING BETTER SPACES TO LIVE, WORK & SOCIALISE

External shading systems keep you cool and look great doing it. They block damaging UV rays whilst allowing diffused natural daylight. They offer sufficient glare protection and contribute to the cooling of rooms whilst maintaining the view. Air conditioning use becomes a thing of the past saving money on energy bills and reducing the carbon emissions of a building.

### UPTO 18°C TEMPERATURE REDUCTION

# EXTERNAL BLINDS

SAY GOODBYE TO UNWANTED SOLAR HEAT GAIN AND GLARE

Creating a physical barrier in front of and stopping the sun's energy even reaching the glazing, Caribbean Blinds innovative external blinds are the most effective way to regulate solar heat and light through glazing. By preventing unwanted solar heat gain and diffusing bright light to eliminate glare, you will be able to enjoy a thermally and visually comfortable indoor space, with the view and connection to the outside maintained\*. Additionally your fixtures and furnishings will be protected from bleaching by the sun and privacy will be provided from overlooking buildings.

SOLAR POWERED WINDPROOF UK MADE OUTDOOR ROLLER BLIND

Scan the QR code  
to learn more about  
our Dominica Solar  
External Blind.

Our Dominica Solar blind offers all the same features as our Dominica Blind but utilises a solar powered motor, making it particularly suited to be installed on the exposed openings on verandas and pergolas along with high level windows.

Slim side guides contain ziplock technology which seals the fabric in place at all positions, ensuring the blind can withstand breezes, preventing any light shining through at the edges and also acting as an insect screen. The leadrail features an integrated weight that keeps the fabric taut and closes completely into the full cassette headbox which conceals and protects the blind when not in use.

Remote control or smartphone app provides effortless operation with the option to add sensors for automatic functioning of the blind.

# CAYMAN BLIND

THE ORIGINAL UK MADE TENSIONED OUTDOOR ROOF BLIND

Scan the QR code  
to learn more about  
our Cayman  
External Blind.

Our Cayman outdoor roof blind is able to run on roof glazing of any slope thanks to the integrated spring tensioning system which keeps the fabric taut at every position. The U shaped side guides, which the fabric and leadrail run within, attach through a range of brackets to glazing frames and structures of all types and conceal the tear-resistant dyneema cables that tension the spring assembly in the leadrail. When retracted away, the full cassette headbox that is supported via the side guides conceals and protects the fabric.

Operation is effortless through the integrated tubular motor controlled via a stylish remote control or smartphone app with the option to add weather sensors for automatic functioning.

The fabric and leadrail run within the side guides, that attach through brackets to the glazing frame

The blind is effortlessly operated through a radio controlled remote control or smartphone app

HIGHLIGHTS

# JAMAICAN BLIND

THE TRADITIONAL UK MADE WINDOW CANOPY

Scan the QR code  
to learn more about  
our Jamaican  
External Blind.

Our Jamaican outdoor blind is a simple, classic quarter circle window canopy, that due to the slim framework and design allows the blind to be installed even where space is limited. Featuring side arms that are covered in fabric for additional protection, the blind pivots open with the self weight of the framework keeping the fabric taut. Corner braces provide re-inforcement to the framework and contain the pulleys which allow through pull cords for the canopy to be easily operated.

A wave or straight valance to the bottom edge of the framework provides a decorative finish, whilst an optional coverboard adds the finishing touch, providing protection to the fabric of the canopy when retracted away.

# Ridgeview

## The Rows & Vine

Located in the picturesque South Downs National Park, The Rows & Vine Restaurant at Ridgeview Wine Estate offers an alfresco dining experience like no other. Guests can relax and enjoy award-winning English sparkling wines alongside perfectly paired seasonal plates, with views over the growing vines and beyond.

As an outdoor-only restaurant, it was imperative that the space at The Rows & Vine could be utilised in all weather conditions to ensure maximum revenue year round. Therefore, as part of the design, four double (linked) modules of the Deluxe Pod were incorporated into the zoned terraces, as well as adjacent to the bar area to provide diners with a comfortable space to enjoy the iconic views and the perfect spot to sip, savour and celebrate.

#### DELUXE PODS

Frame: RAL 7016 ST | Louvers: RAL 7016 ST

“ We wanted to design and create an amazing space that blended naturally into the surrounding environment and enabled us to operate 12 months of the year. The Deluxe Pod was selected because of its adaptability and design, with the structures becoming an integral part of the scheme. ”

Matt Gayler | General Manager

The image shows a modern, well-lit interior space, likely a private members club or lounge. The ceiling is a dark, industrial-style structure with exposed pipes and beams, and is decorated with strings of warm-toned Edison-style light bulbs. The walls are a mix of dark grey panels and light-colored brickwork. The floor is dark wood. The space is furnished with numerous tables and chairs. In the foreground, there are several square tables with white, textured tablecloths and white chairs with white cushions. In the background, there are more tables and chairs, some with white cushions. A large, leafy tree in a large, rustic-style pot is a central feature. The overall atmosphere is sophisticated and contemporary.

# The Conduit

## Private Members Club

Based in Covent Garden, London, The Conduit is a collaborative members' club committed to creating a just, prosperous and sustainable future. Having utilised our pergolas previously at their Mayfair location, they were already aware of the benefits of our Prestige Pod and wanted to replicate this design at their new club, albeit on a much larger scale, creating a unique dining experience for members on their 7th floor rooftop with views across many of the city's famous landmarks.

Covering two thirds of the 300sq/m roof terrace, a cluster of eight Prestige Pods were incorporated complete with doorways and screens between modules to allow each structure to be zoned off for private functions and events.

#### PRESTIGE PODS

Frame: RAL 7016 ST | Louvers: RAL 7016 ST

“Installing the Prestige Pods has enabled us to use our roof terrace all year round. In the summer when the weather is good, we can open up the space effortlessly and, in the winter, when the roof is closed, the sides are down and the heaters are on, it gives us much needed outside space.”

Anthony Pollak | Facilities Director

# Pennyhill Park Hotel & Spa

Set over 120 acres of beautiful Surrey woodland, Pennyhill Park is a 19th century country house offering guests the opportunities and experiences to indulge in the best, be at their best and realise their potential, featuring 124 luxurious bedrooms and suites, award-winning restaurant options, including Michelin-starred Latymer and over 45,000 sq.ft. of exceptional spa facilities with 20 spa experiences.

Wanting to create a premium space set within the luxurious spa grounds where guests could fully switch off from the world and experience the ultimate alfresco spa day, four of our Deluxe Pods were incorporated to create dedicated cabanas for the day. With the concept 'a little bit extra' each cabana was equipped with side screens for privacy, loungers, copper roll top bath, fridge and coffee machine.

#### DELUXE PODS

Frame: RAL 7016 ST | Louvers: RAL 7016 ST

“ Our vision was to bring the luxury of a hotel room to the great outdoors. The Deluxe Pod design provides privacy and shade from above and on all sides with remote control blinds, whilst being beautifully adaptable allowing us to build around the space to create the perfect indulgent haven. ”
