For outdoor furniture and accessories, please talk with your supplier.

GRILL FIREPLACE DUO EXCLUSIVE

Completely made of stainless steel, mounted on 4 wheels, rotatable and mobile.

The classic grill fireplace, the Duo exclusive. For around 20 years, it has inspired with its elegant design, simple and safe handling and versatile use. Due to its features and sophisticated accessories it can be used all year round.

All GIRSE design barbecue fireplaces are hand crafted individual pieces, which are made with the utmost care of high quality and durable V2A, Grade 304, stainless steel in Germany. Better than Cast Iron, more corrosion resistant.

GIRSE design

Your favourite place in the garden

Enjoy the magic moments - a romantic evening for two, the holiday mood in the family gathering or the cheerful barbecue party with friends. When the fire radiates a pleasant warmth and the scent of the grilled food rises in the nose, then leisure time is in order.

Grill fireplaces from GIRSE design are lifestyle products of the highest standard. Hand-crafted piece by piece, made of stainless steel, with a stylish design. Quality that you enjoy for a lifetime. Terrace and garden are resorts for the little vacation of everyday life. Make your favourite place a romantic home.

Takes the smoke away at high level

Upon request, production with V4A, Grade 316, stainless steel is also possible for a surcharge. V4A is recommended for harsh conditions, such as coastal regions and use or storage near to a swimming pool.

Original Accessories

Accessories for your Girse

No matter what you put on the grill, we have the right accessories for you in the range. Our high quality standards for the production and choice of material also apply to our accessories.

We are always open for special requests . For example, floor protection plates, flue extension pipes, special flue bends and roof ducts.

Please note the compatibility of the accessories with the corresponding fireplace types 1-3.

Grill tip:

The steak or wok pan on the grill should be very hot. This can be determined by dripping a drop of water on the pan. When it hisses, the steak or wok pan is hot enough. Now pour in the oil, heat until it is wavy and only then add the meat.

Meat or grill skewer:

Place one piece of meat or fish at the beginning and end of the skewer so that the other ingredients (such as onions or peppers) do not fall off.
