TOUGH, DURABLE, AND STRONG

SHIFT ACTUATORS

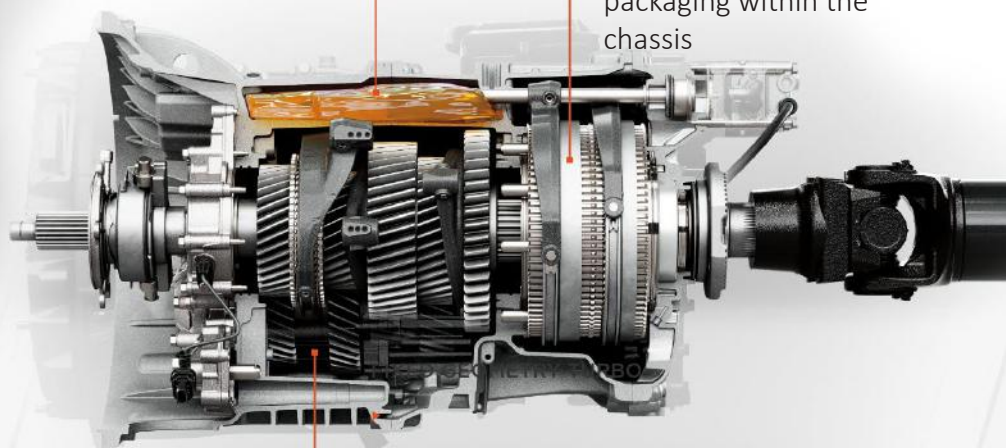

Shift actuator packaging was designed specifically for automated functionality (rather than adapted for a manual) allowing for more compact gearbox housing

VARIABLE OIL LEVEL UPPER RESERVOIR

Oil is pumped to the reservoir under lower loads to reduce parasitic losses, allowing for the continuous lubrication of gears by the oil sprayers

PLANETARY GEARS

The planetary gear set eliminates the need for a dedicated reverse gear, shortening the gearbox and allowing for better packaging within the chassis
