ACTION TO BE TAKEN KEY CODES

Cut out the discontinued colours from your book.

Mark your book as 'Limited Stock - check availability'

IMPORTANT INFORMATION

Most of our fabrics are made from natural yarns and irregularities in weave do occur. These are not faults but are characteristic of such qualities.

COLOUR MATCHING

Due to the nature of fabrics supplied it is not always possible to obtain an exact colour match. We make every effort to ensure that colours correspond to those in the pattern books, however these are an indication of colour only and variations may occur. Should your customer require a close colour match, we recommend that a stock cutting be supplied for customer approval and a reservation made for the appropriate quantity of fabric.

CHENILLE FABRICS

When using chenille fabrics for upholstery we recommend backcoating the fabric with a flame retardant treatment, which will also help prevent the fabric creeping across the cushions.

FABRICS WITH A CHECK DESIGN

It is virtually impossible to supply fabrics with a check design perfectly straight. This should therefore be taken into consideration before recommending these fabrics for blinds.

COLOUR FASTNESS

Our fabrics are not guaranteed against colour fading.

PATTERN REPEATS & WIDTHS

Pattern repeats and widths are approximate. When calculating your quantities, it is advisable that you check the repeat with us before confirming your order.

PILLING

Our fabrics are not guaranteed against pilling.

SEAM SLIPPAGE

Our fabrics are not guaranteed against seam slippage. Where the fabric has a loose weave, we recommend that you allow a minimum of 2cm for your seams, which should be double stitched and taped and the selvages overlocked.

SHRINKAGE

A residual shrinkage/stretch of 2% should be allowed for in the making of loose covers and curtains.

SILKS

All silks tend to be more susceptible to fading than most other fabrics. Lining and interlining is strongly recommended when using these fabrics for curtains and blinds. As an extra precaution, UV window filters and/or blinds should be considered.

CLEANING

Dry cleaning is recommended for most of our fabrics. Samples and pattern books carry the recommended care and cleaning symbols and instructions. Up to 5% shrinkage can be expected during washing or dry-cleaning.

STOCK CUTTING / CFA

Stock cuttings should be requested at point of fabric reservation and are only available on lengths of 5 metres or more.

Fabrics should be carefully inspected prior to cutting. Whilst every effort is made to inspect each order to ensure you receive the fabric in the best possible condition, errors can be made, and damage or creasing may occur in transit. Therefore, it is essential that no length is cut until you are satisfied with the fabric in all respects.

Any claim made must be put in writing or by e-mail within 7 days of receipt of the fabric/trimming.
