Blockchain Trust™ integrates with your world—so you can lead the future.

Executive Summary

For over 500 years, trusts have been one of the most powerful legal structures ever created for asset protection, succession planning, wealth preservation, and family legacy management.

Yet trust administration has remained largely unchanged.

Traditional trust structures require:

- Expensive legal teams
- Trust officers
- Fiduciary departments
- Complex administration
- Paper-based systems
- Multiple intermediaries
- High setup costs
- Lengthy deployment periods

Blockchain Trust™ changes everything.

<https://www.blockchaintrust.pro/>

Blockchain Trust™ is the world's first deployable **Digital Trust Infrastructure Platform**, combining traditional trust structures with blockchain technology, digital asset registration, real-world asset tokenization, global payment infrastructure, digital identity systems, and automated trust administration.

What once required months or years can now be deployed in less than 30 minutes.

The Problem

The trust industry remains trapped in a legacy operating model.

Trust companies continue to rely upon:

- Manual administration
- Legacy accounting systems
- Fragmented asset records
- Limited transparency
- Jurisdictional restrictions
- Expensive compliance structures

Meanwhile modern families own:

- Real Estate
- Businesses
- Intellectual Property
- Digital Assets
- Cryptocurrency
- International Holdings
- Alternative Investments

Traditional trust systems were never designed for this environment.

The Blockchain Trust Solution

Blockchain Trust™ transforms trust administration into programmable infrastructure.

Every trust receives:

An irrevocable Blockchain Trust™

Digital trust registration and administration.

Dynasty Family Trust™

Multi-generational wealth protection.

Asset Registration Platform

Register and manage assets globally.

Beneficiary Management

Digital beneficiary administration.

Digital Trust Administration

Automated trust operations.

Blockchain Recordkeeping

Immutable audit trails.

Real World Asset Registration

Property, businesses, intellectual property, commodities and private assets.

Tokenization Infrastructure

ERC-1155 Real World Asset tokenization capabilities.

Included Infrastructure

Every Blockchain Trust deployment includes:

DomainLink™ <https://www.domainlink.world/>

Digital identity infrastructure.

Provides:

- Digital trust identity
 - Digital asset verification
 - Ownership validation
 - Blockchain-based authentication
-

WorldBankPay™ <https://worldbankpay.io/>

Global settlement infrastructure.

Provides:

- Cross-border payments
 - FIAT settlement
 - Digital asset settlement
 - Global payment routing
 - Merchant integration
-

Real World Asset Tokenization Platform <https://www.worldassets.pro/>

Tokenization and digital asset registration system.

Supports 24 asset classes including but not limited to:

- Real Estate
- Precious Metals
- Businesses
- Intellectual Property
- Trust Assets
- Family Holdings
- Alternative Assets

Launch Your Own Blockchain Trust Company

Blockchain Trust™ provides a complete white-label platform.

Your Brand.

Your Clients.

Your Revenue.

Your Trust Company.

Without:

- Trust officer hiring
- Expensive trust software
- Trust charter applications
- Multi-year deployment cycles

Deployment time:

Less Than 30 Minutes

Key Benefits

Asset Protection

Advanced trust structures combined with blockchain registration.

Privacy

Digital trust administration with controlled access.

Succession Planning

Instant beneficiary and successor trustee visibility.

Digital Estate Management

Manage traditional and digital assets from a single platform.

Global Accessibility

Operate across jurisdictions using digital infrastructure.

Intergenerational Wealth Transfer

Preserve and transfer family wealth efficiently.

Asset Tokenization

Convert real-world assets into blockchain-enabled digital representations.

Revenue Generation

Create new income opportunities through trust services and asset infrastructure.

Why Blockchain Trust™

Traditional Trust Company

- Months to launch
- Expensive staffing
- Legacy systems
- Paper records
- Limited transparency

Blockchain Trust™

- 30-minute deployment
 - Digital administration
 - Blockchain records
 - Global infrastructure
 - Integrated payment systems
 - Digital identity systems
 - Real-world asset registration
 - Tokenization infrastructure
-

The Future of Trust Infrastructure

The future belongs to organizations that unify:

Trust + Identity + Payments + Assets + Tokenization + Settlement + Legacy

The Blockchain Trust Infrastructure Stack™ is the first platform to integrate all seven layers into a single deployable ecosystem.

This is not simply a trust.

This is Digital Trust Infrastructure.

Layer 1 — Trust

Blockchain Trust™

Layer 2 — Identity

DomainLink™

Layer 3 — Payments

WorldBankPay™

Layer 4 — Assets

WorldAssets™

Layer 5 — Tokenization

RWA Platform™

Layer 6 — Settlement

Cross-Border Infrastructure™

Layer 7 — Legacy

Dynasty Family Trust™

Together, these seven layers create a complete digital infrastructure for trust administration, asset ownership, global payments, succession planning, and multi-generational wealth preservation.

This is not simply a trust.

This is not simply software.

This is not simply tokenization.

This Is The Blockchain Trust Infrastructure Stack™
