***HOW DO YOU MANAGE  
ASSET PROTECTION FOR  
YOU & YOUR FAMILY?***

[WWW.BLOCKCHAINTRUST.PRO](http://WWW.BLOCKCHAINTRUST.PRO)

The Blockchain International Corporate Registry Authority, or Blockchain Trust for short, is a global organization and corporate registry that provides financial services with state-of-the-art blockchain technology solutions.

Blockchain Trust is an international corporate registrar working with a professional team of 33 years experience in building and designing financial and tax-friendly corporate solutions for international corporations and entrepreneurs in over sixty countries of the world, like the USA, Canada, Brazil, Peru, Switzerland, UK, Germany, The Netherlands, Belgium, Spain, Singapore, Malaysia, Hong Kong, China, and South Africa.

Blockchain Trust has designed state-of-the-art solutions for small and medium-sized organizations like turn-key white-label digital banking solutions, Blockchain Bank Crypto Visa and MasterCard, customizable bank cards for both fiat and cryptocurrencies, asset management and wealth protection and registration of business corporations and trusts worldwide. Blockchain Trust offers full business services with cutting-edge technology, enabling businesses to penetrate the global market and thrive. This document showcases all of Blockchain Trust's products, services and their benefits.

# ABOUT US

In a world where the metrics are always against you, with creditors wanting to split your fortune, asset predators looking for every possible means to exploit your wealth and the Government pretentiously disguising just to rip you heavily in taxes and levies, the Blockchain Trust stands by to shield you and your wealth from the ever reaching hands of those who mean you harm. We scout the financial industry looking for lasting results to current financial queries, using the blockchain and many other technological innovations to provide state-of-the-art solutions to our global clients.

One of our solutions is providing our clientele with their own **Investment Bank & Blockchain Trust** with white-label Banking Software and

private-label Visa and MasterCard programs. Our cutting-edge financial technology solutions are zero-stress compared to building one from scratch. The white labels are 100% customizable to fit your business's needs, design, and corporate branding standards.

We believe small and medium-sized enterprises should compete favourably against large corporations and not be stifled with taxes and levies that make survival difficult. Hence, all Blockchain Trust products are 100% tax-free and secure, and registrations are fast to save you valuable time.

## ***Our Products Are Futuristic And Scalable***

Scalability is an important aspect of our business processes because we understand that businesses that use our products will expand beyond where they are, and our products will be viable when they do.

## ***We are user-centric***

We are also a user-centric organization, building products that give our clients and their customers fast, seamless, state-of-the-art experiences. We understand that one way to keep the customer returning is to ensure the user experience is top-notch! Because we are a user-centric platform, public shareholders do not own our organization; it is owned by those who invest in their blockchain corporations. Our owners can access personalized financial advice, high-quality Blockchain Corporate, Trust and Investment Bank registrations, tax-saving tools, and relevant business insights that help you build a future for those you love.

The Blockchain International Corporate Registry Authority remains the most viable and secure service provider worldwide, managing over 6.2 million Blockchain Corporate & Trust portfolios.

## **Domestic Asset Protection Trust**

### **How Good Are Domestic Asset Protections Trusts?**

Domestic as an independent word in this circumstance refers to the existence or occurrence of certain affairs within the confines of an individual's own country. It is most concerned with domiciliary, home, territorial confines and not related to foreign activities.

[www.blockchaintrust.pro](http://www.blockchaintrust.pro)

# VISION & MISSION

We champion entrepreneurs by delivering the perfect help and tools for their business journey as well as provide security for physical and Digital Assets through Blockchain Company & Trust Registrations! Secure with a 100% accuracy guarantee, no hidden fees, tax-free, affordable and extremely fast!

Our mission is to provide global entrepreneurs with business opportunities through DECENTRALIZED and TAX-EXEMPT Blockchain Corporations, Trusts and Blockchain Banks, empowering you to EARN MORE by spending less on Government taxes.

We are the world's No. 1 Blockchain Corporation services platform for entrepreneurs around the globe, on a mission to empower a worldwide community of 2.5+ billion "unbanked" customers — and entrepreneurs everywhere — by giving them all the help and tools they need to grow their business online.

## Corporate Asset Protection

### What is Corporate Asset Protection?

Many people assume that corporate asset protection planning is just another term for “hiding” your corporate assets from creditors, but that is not the case. Instead, corporate asset protection operates well within the confines of the law. It is smart and completely legal.

[www.blockchaintrust.pro](http://www.blockchaintrust.pro)

# BUSINESS MODEL

1. Asset Management
2. Turn-key White-Label Digital Banking
3. Blockchain Corporate Registry
4. Blockchain Financial Solutions

## Who Needs Asset Protection?

## ENTREPRENEURS LIKE YOU!

In reality, nearly everyone needs their assets protected, especially when acquiring them cost you a fortune. Small organizations, healthcare professionals, business owners, employees, entertainers, artists, individuals, athletes, celebrities, and anyone in possession of revenue generating streams will need to protect assets.

[www.blockchaintrust.pro](http://www.blockchaintrust.pro)

# INTRODUCTION

Blockchain technology has revolutionized the technology and finance sector, providing a secure way to store and transmit data between parties without the interference of certain third parties. The first utilization that gained mainstream attention was its use for Bitcoin transactions; however, Bitcoin is not the blockchain but is built on blockchain technology. Blockchain is an online ledger that records and tracks every transaction without third parties interference. The technology's application is vast, as it is used for peer-to-peer payment services, supply chain tracking and many more.

Financial institutions work with intermediaries; before a transaction can be approved from one bank to another, it must pass through existing governing bodies. These bodies can intercept a transaction, decline or confiscate funds if deemed unworthy. With blockchain, mediation is eradicated, allowing users to transact seamlessly. For this reason, financial systems and solutions built on the blockchain are challenging and disrupting traditional methods because these methods ignore the most important element of their old fashioned banking systems—the customer. If the customer is not pleased, then the product utility is poor.

## BLOCKCHAIN VERSUS TRADITIONAL BANK PAYMENT SYSTEMS

**Digital Payment Solutions**

Modern-day problems require modern-day solutions, and we at Blockchain Trust are on a mission to guide you through all your business and financial hindrances.

[CONTACT US](#)

[WWW.BLOCKCHAINTRUST.PRO](http://WWW.BLOCKCHAINTRUST.PRO)

One of the challenges customers face using traditional banks is the fees they pay on every transaction, especially once these transactions are cross-border. Blockchain technology doesn't adopt this model, as transactions are decentralized. Digitally, traditional fiat has been replaced with its digital equivalent, which can now carry out transactions anywhere worldwide without paying excess transactional charges. All the user needs is the accurate details of the receiver and an internet connection. These transactions have birthed swift borderless transactions, are seamless, secure and support transacting large amounts of money at once without restrictions.

## The Advanced Payment Options You've Been Missing!

Guided by an integrated and dynamic thinking team, our blockchain platform allows users to have access to countless products and services that are indispensable on a daily basis.

[CONTACT US](#)

[WWW.BLOCKCHAINTRUST.PRO](http://WWW.BLOCKCHAINTRUST.PRO)

## BLOCKCHAIN, DEPOSITS AND ACCOUNT BALANCES

Once a customer deposits money into a bank, it is common knowledge that they utilize these funds for other business transactions. Due to this, the funds that appear in one's account balance may not account for the actual funds present in the system. A bank, therefore, can fail when most of its customers withdraw all its funds simultaneously because they are not present. Blockchain is an online ledger that shows account activities. If your funds are lodged on a block, they cannot be tampered with without your permission. This makes depositing funds more secure, accessible and cheaper to maintain.

Blockchain technology can be useful in secondary market trading and clearing, allowing users to change ownership without needing exorbitant clearing fees. The process also can be done seamlessly and quickly. The possibilities for blockchain are endless in the financial industry. Blockchain Trust has positioned itself to utilize all of the benefits of blockchain to build essential financial products that allow its customers to transact, please their customers, and make a profit without the interference of governing bodies.

## TRUST AND BLOCKCHAIN

In simple language, a trust is a legal vehicle that gives authority to a third party called a "trustee" to hold and manage assets on behalf of a beneficiary, hence the name TRUST. Because the grantor trusts the trustee with their assets in good faith, they will fulfil the terms of the agreement and service the beneficiary with necessary remunerations. A typical example of what a trust looks like is the controversial story of the Paris Saint-Germain football player Achraf Hakimi, who registered all of his assets in the name of his mother. During a divorce, it was discovered that he had no assets in his name, and thus his assets could not be split.

## PARTNER PROGRAM FOR BLOCKCHAIN TRUST

With our cutting-edge technology and professional staff, businesses all around the globe have benefited themselves.

[CONTACT US](#)

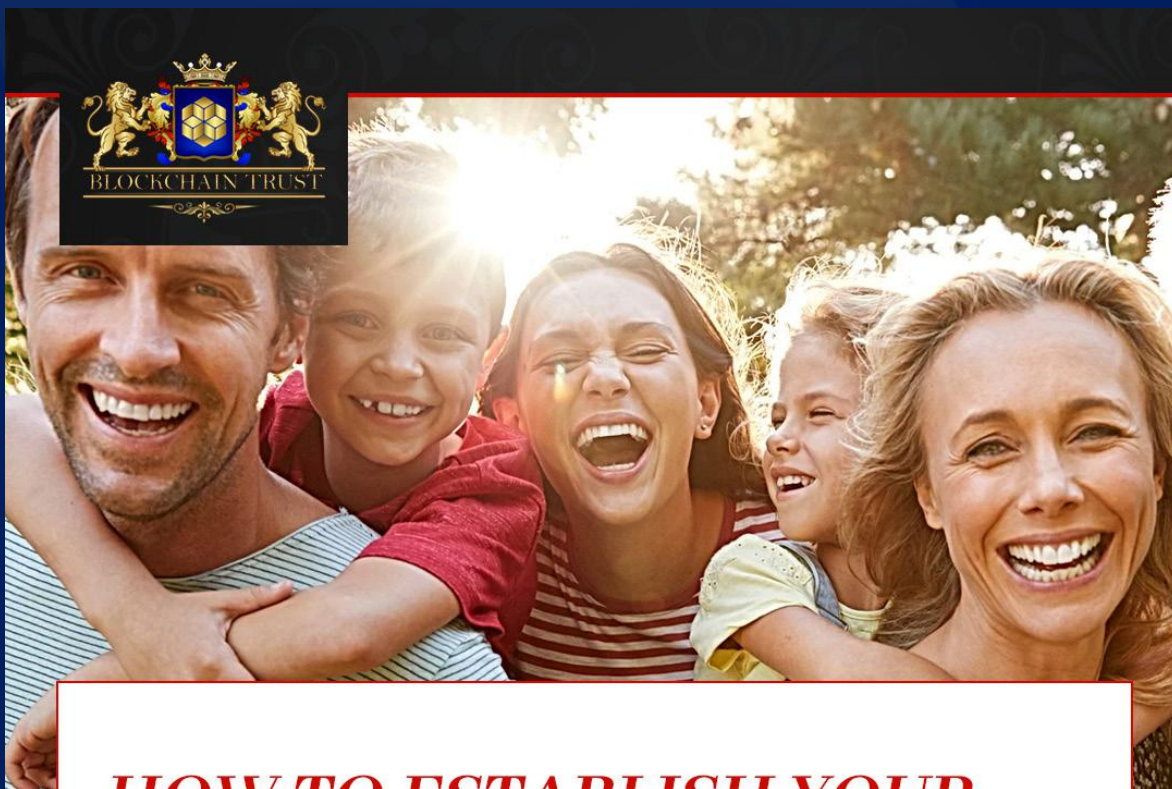

[WWW.BLOCKCHAINTRUST.PRO](http://WWW.BLOCKCHAINTRUST.PRO)

A trust is a great tool for asset management against fraud, excessive taxes, lawsuits, and financial predators waiting to snatch away every asset you've garnered over the years. Since the asset is no longer in your name, it will be impossible for anyone to find you and lay claim to the assets.

***How about a trust that gives you total control?*** Since the blockchain works anonymously, a trust can be set up for you on the blockchain, yet, you have full control. This is what Blockchain Trust is offering. Blockchain Trust is specialized in building decentralized corporations and providing irreversible blockchain trusts on the Ethereum and Polygon Network for our clients across the globe.

Blockchain Trust and Company Establishments are the next generation of DECENTRALIZED corporate registrations based on Ethereum and Polygon Network (previously known as Matic), the layer two protocol of the Ethereum Network. Thus, you can register your Blockchain Trust with zero gas fees and at a breakneck speed, without Government interference and any central authority.

***HOW TO ESTABLISH YOUR  
FAMILY BANK & BLOCKCHAIN  
DYNASTY TRUST?***

 [WWW.BLOCKCHAINTRUST.PRO](http://WWW.BLOCKCHAINTRUST.PRO)

# PROBLEM STATEMENT

*Can you legally avoid taxes and still operate a fully legal financial institution?*

This question has burdened small and medium-sized businesses because running a financial institution exposes you to excessive taxes and penalties. This is why Blockchain Trust offers financial services built on the blockchain with **an irrevocable Blockchain Trust**. This solution is similar to the charitable trust but has an extra factor that makes it more powerful! The irrevocable Blockchain Trust functions on the decentralized Blockchain Trust, providing global solutions where your business can be operated without any circumstantial limits.

The decentralized and irrevocable Blockchain Trust is tax-free, paperless, secure, and transparent since all transactions are recorded on the blockchain. Above all, the Blockchain Trust is completely decentralized and cannot be manipulated or controlled by any institution or Government. This makes it a better option for the charitable remainder trust since it's more cost-effective, faster, more reliable and can be 100% controlled by you.

  
**OUR FORMIDABLE TACTICS**

Each Blockchain Trust® is legally constituted, registered and established on the Blockchain Networks and abides to the laws and regulations of the United Nations.

*How about a product you can tailor to suit your customer's needs without building from scratch?*

Blockchain Trust is not just offering trust services but also fully functional financial services, like white-label banking applications, that can be tailored specifically to the needs and desires of your clients. For a business in our times to survive, it must understand how to design its tools to fit and suit the needs of its clients. That is why at Blockchain Trust, our products and services are painstakingly user-centric, allowing you to modify the tools and features of the product to your taste.

For example: Our private label Visa and MasterCard products are futuristic and scalable, ready to be deployed within 48 hours under your own bank brand.

# THE COMPETITIVE ADVANTAGE

## BORDERLESS TRANSACTIONS AND PAYMENTS

Registered businesses and corporations can now enjoy endless orders and payments while entertaining global transactions. There are no daily, weekly or monthly limits regarding the amount of money one can transact. The blockchain makes all transactions transparent, anonymous, and authentic.

## AUTHENTICATION AND ORIGINALITY

When a business is incorporated, its is public on the blockchain and visible to the global audience. It solves the problem of imitation of companies and scams as original brands can be verified on the blockchain instantly. Most of the time, the first to register a company name wields monopoly and any company willing to use the same name will have to purchase the same from the first in time. Duplicate companies and fakes wont be a problem, therefore making all registered Blockchain Trusts and Corporations 100% trust worthy and authentic like a PREMIUM DOMAIN NAME.

***HOW TO USE A  
BLOCKCHAIN TRUST TO  
PROTECT YOUR FAMILY ASSETS?***

[www.blockchaintrust.pro](http://www.blockchaintrust.pro)

## WORLDWIDE INCORPORATION

Businesses registered on the Blockchain enjoy worldwide recognition as they are not limited to any country as in the case of traditional business incorporation's. Hence every business or entrepreneur with a global agenda is not limited by geographical restrictions and licensing. Doing business through your decentralized Blockchain Corporation, Blockchain Trust or Blockchain Bank, affords you the license of legitimately doing business in any country of the world.

## THE ZERO TAX ADVANTAGE

Every traditionally incorporated business is susceptible to taxes, but the same isn't the case with the decentralized Blockchain Corporation or Blockchain Trust. Every corporate entity registered on the Blockchain enjoys 100% tax freedom everywhere and anywhere. With your business registered on the blockchain, you save more by spending nothing on taxes and government levies.

## TIME FACTOR

While traditional incorporations may last for weeks or months before you are "permitted" by your Government to conduct business, the Blockchain International Corporate Registry Authority gets you ready in less than 30 minutes, including all documentations and smart contracts required to run your business efficiently and tax-exempt.

**WEALTH PRESERVATION FOR  
YOU & YOUR FAMILY.  
HOW DOES ASSET PROTECTION  
WORK?**

 [WWW.BLOCKCHAINTRUST.PRO](http://WWW.BLOCKCHAINTRUST.PRO)

# WHAT ARE WE OFFERING?

## TURN-KEY WHITE-LABEL BANKING APPLICATION

### *FUTURE OF BANKING! White-label digital banking options*

In simple terms, a white-label product has all of the required features to function optimally but can be purchased, and all of the features are adapted to suit the buyer's brand. This means you can have a fully functional digital bank without coding or building an application from scratch. All of the features required for a standard digital bank are present, with the option of re-branding to fit your company's taste. This futurist banking solution is scalable and allows for multi-administrators for ease of function and for integrating third-party software and application.

We offer turn-key white-label banking, where you can brand a fully functional online banking service without building the codes or applications from scratch. Blockchain Trust fully offers all features in traditional online banking, from digital transfers to account statements, account numbers, multi-language settings, multiple admins enable, and multiple currencies to transact with. The solution is also available in phone applications (IOS and Android) and digital watches, allowing users myriad interactions with your banking software. We build, and you just slap your label on it and use a fully functional banking app! We utilize extensive API keys, making our application scalable, modular and future-proof.

Try our friendly white-label Crypto and FIAT Visa and MasterCard program and online banking platform, the best on the market. It's a turn-key solution for Blockchain Banks, Neobanks, Electronic Money Institutions (EMI's), Payment Institutions, Money Service Businesses (MSBs), Asset Managers, Crypto Exchanges, Fund Managers, Sports Clubs and Entrepreneurs with big visions.

ALL FORMS OF TRANSACTIONS CAN BE PERFORMED; FROM CRYPTO EXCHANGES TO FIAT TRANSACTIONS– IN MULTIPLE CURRENCIES ACROSS MULTIPLE COUNTRIES. WITH UP-TO-DATE INFORMATION ABOUT EXCHANGE RATES!!

## DIGITAL PAYMENT SOLUTIONS

We aim to empower 2.5 billion unbanked people and young entrepreneurs worldwide with cutting-edge and low-cost digital payment and trading facilities, secure online banking and serve as a global registration centre for decentralized Blockchain Corporations, Trusts and Blockchain Banks.

The best part of this is that our digital payment solutions can be tailor-made to suit your preferences. Our technology is cutting edge, giving you full autonomy to function without the limitations of the traditional banking system–but still providing you with digital payment solutions of global standards.

## BLOCKCHAIN BANK VISA AND MASTERCARD

You can own your own fiat or crypto Visa and MasterCard white label program in days! Allowing your customers to have multiple prepaid cards in different currencies, such as USD, EURO and crypto cards in UDST, or USDC and BBSC Stable Coins. Our turn-key white-label banking software allows you to customize cards for your clients. And it just takes a FEW DAYS TO BE LIVE!

WE'RE OFFERING PRIVATE LABEL CARD PROGRAMS & ONLINE BANKING COMBINED!!

## THE NFT BLOCKCHAIN BANK CRYPTO VISA AND MASTERCARD

The Blockchain Bank Visa and MasterCard NFT is the world's first commodity-backed Crypto and FIAT card, backed by unlimited amount of Blockchain Corporations, Blockchain Trusts, Blockchain Banks and Real Estate Assets. Each Blockchain Bank Visa or MasterCard NFT is backed 1:1 by an individual Blockchain Corporation with a market value of \$2,999.00, providing a substantial hedge against volatility and portfolio risk diversification for every entrepreneur and international investor worldwide.

Every buyer of a Blockchain Corporation will receive an equivalent of \$299.00 BBSC Stable Coins on his Blockchain Bank Visa or MasterCard, allowing customers to store and send US\$ or EUROS with absolute freedom, unrestricted by the limits of traditional banking systems.

**START PROTECTING YOUR ASSETS**

Enjoy tax freedom and protect your assets by registering your Blockchain Trust Company in less than 30 minutes.

[WWW.BLOCKCHAINTRUST.PRO](http://WWW.BLOCKCHAINTRUST.PRO) [CONTACT US](#)

## ASSET AND WEALTH PROTECTION

Our Executive Team has a track record of 33 years in Offshore Banking and therefore, we fully understand that the most important aspect of any transaction is "trust." That's why our Blockchain Corporate and Trust registration process is decentralized but 100% secured on the blockchain. Good asset protection will provide easy step-by-step guides to implementation, transparent processes, solid structures and strategies that shield against creditor claims and (tax) incidents that could diminish your revenue.

## THE BLOCKCHAIN INTERNATIONAL CORPORATE REGISTRY AUTHORITY PERFORMS E-COMMERCE BLOCKCHAIN BUSINESS REGISTRY!!!

You can now incorporate your business on the Blockchain registry and gain global recognition for only \$2,999.00. The process is fast, reliable, transparent and 100% legal!!!

Whether you want to establish a Blockchain Bank & Trust, register your corporation, or are a Fintech startup or an established brand looking for new financial opportunities, our Blockchain Corporate Registry is engineered to meet your needs. Our high standards remain the same, no matter the product! Our proven financial technology platform can help you launch and build your digital bank, including your private label Visa and MasterCard program within days.

# WHY US?

Our Executive Team has over 33 years of experience researching, designing and implementing cutting-edge finance and tax-friendly corporate solutions for our clients worldwide. This wealth of experience sets us apart from our competitors, as we help our international clients achieve their dreams of living tax-free while having the best form of financial services and asset management at their fingertips. Legal advisors and accountants globally trust us to handle their complex financial systems on behalf of their clientele!

The Blockchain Bank & Trust team has incorporated a decentralized payment system, including BBSC Crypto Credit Cards, to allow people to seamlessly sell their products and services and accept our Crypto and FIAT Credit Cards as payment methods worldwide. The Blockchain Bank Visa and MasterCard payment system allows merchants to accept online payments and Crypto Cards as payment methods. Users and merchants can transact with the Blockchain Bank Visa and MasterCard with near-zero transaction fees and without hidden charges.

Our Blockchain Corporate registration processes are transparent, safe, super-fast and cost-effective, allow you to interact with a global market, have no hidden charges, are easy to use, are free from government interference, and are ultimately tax-exempt, allowing you to earn more by spending less on government taxes.

# CORE VALUES OF OUR PROJECT

- **Honesty:** Our claims and our Asset Portfolios are verifiable on OpenSea and Polygon.
- **Excellence:** Our posture is for global dominance; our technology and products reflect that stance.
- **Scalability:** Our products are futuristic and are built to support your organization's growth.
- **Speed:** You do not have to wait hours to register your company with us or carry out any transaction. The process is done within minutes without the hassle of bogus paperwork or Government bureaucratic “red tape”.
- **User-centric:** Our products and services are user-friendly and built to serve the international entrepreneurs and their clients across the world.

# LEGAL AND REGULATORY POLICY CONSIDERATIONS

As blockchain products and digital assets continue to gain traction and acceptance, managing the legal and regulatory frameworks becomes critical to maintaining a secure and sustainable ecosystem. We intend to create an environment that supports compliance, preserves business and entrepreneurial rights, and facilitates cross-border transactions by addressing critical legal and regulatory policy factors.

## REGULATORY CONCERNS:

Like all emerging technologies, Blockchain Trusts face several regulatory challenges capable of negatively impacting adoption and operations. While these problems can be quite complex, the model being intentional about users has structurally reduced them into the following.

- **No Clear Regulatory Pattern:** a clear regulatory framework is one of the root problems affecting the general industry. Many jurisdictions have failed to establish working laws and regulations tailored to the Blockchain. The same effect Blockchain Trust regarding compliance requirements and legal obligations. Notwithstanding, we have set aside the problems of regulations by adopting international charters guiding the global performance of businesses across multiple territories and the decentralized finance (Defi) model.
- **Jurisdictional Issues:** Blockchain networks operate on a decentralized and global scale, making it difficult to determine the jurisdictional authority in which trust should operate. Diverse legal frameworks across different jurisdictions may lead to conflicting regulations, making it difficult for Blockchain Trust to navigate compliance requirements. However, by adopting the decentralized finance (Defi) business model and offshore practices combined with international corporate laws, the Blockchain Trust Team perfectly walks through these complexities, troubling other trust models leveraging the Blockchain.

- **Data privacy and protection:** Blockchain Trusts involve storing and transferring sensitive data. Compliance with data protection regulations, such as the General Data Protection Regulation (GDPR), can be challenging due to the immutable nature of the Blockchain. Ensuring the privacy and security of personal information while maintaining the transparency and integrity of the Blockchain can be a complex task. To solve this challenge, users are represented with codes while their documents are kept private and never disclosed, no matter the circumstances.
- **Anti-money laundering (AML) and Know Your Customer (KYC) requirements:** Financial regulators often require entities dealing with assets and funds to adhere to strict AML and KYC regulations. However, implementing these requirements in a decentralized and pseudonymous environment like Blockchain can be challenging. Identifying and verifying participants' identities while maintaining the trust's decentralized nature can present regulatory hurdles. That is why private verification is carried out to ensure transparency and fair practice. Details and identity of users are confirmed and will not be released any matter the conditions since Blockchain Trust remains free from all governmental encumbrances.

- **Securities Regulations:** If Blockchain Trusts offer investment opportunities or involve trading digital assets that fall under securities regulations, they must comply with applicable securities laws. Determining whether a particular Blockchain Trust falls within the scope of securities regulations and navigating the associated compliance obligations can be complex, especially when the technology is still evolving. Our stance is clear, as we have a robust network of legal authorities ensuring the safety of users, operating from the DECENTRALIZED BLOCKCHAIN.

- **Smart Contract Legality:** Smart contracts, a key feature of decentralized Blockchain Trust and Corporate registrations, are self-executing contracts with the terms of the agreement directly written into code. Determining smart contracts' legal validity and enforceability can be challenging, as traditional legal systems may not have clear provisions to accommodate this unique form of agreement. This legal uncertainty can hinder the adoption of Blockchain Trusts. For this reason, we provide documentary details to all our users who have successfully registered for our services. It serves as a double check and a rain-comesunshine authenticity, which can be independently verified on OpenSea and Polygon.
- **Regulatory Attitude and Adaptability:** Regulators have varying attitudes towards Blockchain technology and Trusts. Some regulators embrace innovation and actively seek to create accommodating regulations, while others may take a cautious or restrictive approach. The lack of harmonization in regulatory approaches can create compliance challenges for Blockchain Trusts operating across different jurisdictions. Be it as it may, technology has continuously proven to be an integral part of our society, and adoption is unavoidable. DeFi products and services on the Blockchain are here to stay as shown in the following Abstract of the Federal Reserve, The Central Bank of The United States of America)

The Full Paper can be downloaded here:

## LEGAL RHETORIC

### Intellectual Property Rights

Intellectual property rights are at the forefront of the web3 and crypto industry, and our platform emphasizes the respect and protection of intellectual property, ensuring that creatives are protected from unfair treatment and unnecessary exploitation resulting from revenue generation. By promoting responsible usage and obtaining proper authorization, we help creators monetize their work while upholding ethical practices. The BBSC stablecoin becomes an avenue for swift remuneration of creatives without subjecting them to taxes, unnecessary delay, and excessive charges.

#### **Seamless Transactions Through Over Simplified Strategies.**

The regular man on the street might find it difficult to navigate through chains, networks or understanding how gas fee works. The complexities of the general fintech space are simplified through videos and live guides to educate our audience on seamlessly enjoying our platform's benefits without losing your assets.

#### **Compliance with Anti-Money Laundering and Know Customer (KYC) Regulations**

We prioritize compliance with anti-money laundering (AML) and know-your-customer (KYC) regulations to promote a secure and transparent environment. By implementing robust AML and KYC measures, we ensure the legitimacy of transactions, verify participant identities, and detect and prevent any suspicious activities. These safeguards not only protect our users but also contribute to the overall integrity of the web3 ecosystem. Notwithstanding, on no occasion do we infringe on the privacy of our users as disclosed information is used only for the safety of trading parties.

Navigating jurisdictional challenges and facilitating cross-border transactions can be complex in the global landscape of crypto and stablecoins. We work closely with legal experts and regulators to understand the nuances of different jurisdictions, ensuring that our platform complies with relevant laws and regulations. We create a seamless user experience by addressing these challenges and facilitating cross-border transactions while complying with jurisdiction-specific requirements.

Meanwhile, the Blockchain International Corporate Registry Authority is not tied to any government jurisdiction due to its decentralized nature and registration on the Blockchain. No double taxation treaty exists with any government, and no government or central authority controls our activities. Hence, all participants enjoy 100% tax-free business deals while transacting on the platform.

Meanwhile, the legal jurisdiction of each Blockchain Trust® is New York, USA, based on the United Nations Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958) (the "New York Convention"). In other words, every Blockchain registered Trust Company owner agrees to abide by the U.N. as mentioned earlier Convention if any disputes arise and accepts the "SEAT OF ARBITRATION" in New York, USA, or any other Member State of the UN Convention.

Each Blockchain Trust is constituted, registered and established on the Blockchain Networks and abides by the Laws and Regulations of the United Nations Commission on International Trade Law (UNCITRAL) regarding the international sale of goods; international commercial dispute resolution, including both arbitration and conciliation; electronic commerce; insolvency, including cross-border insolvency; international transport of goods; international payments; procurement and infrastructure development; and security interests.

The New York Convention has been signed by 172 Nations, which can be verified on the United Nations website by clicking [here](#).

The United Nations Commission on International Trade Law (UNCITRAL) is a subsidiary body of the General Assembly. It plays a crucial role in improving the legal framework for international trade by preparing international legislative texts for use by States to modernize the law of international trade and non-legislative texts for commercial parties in negotiating transactions.

UNCITRAL legislative texts address the international sale of goods; international commercial dispute resolution, including arbitration and conciliation; electronic commerce; insolvency, including crossborder insolvency; international transport of goods; international payments; procurement and infrastructure development; and security interests. Non-legislative texts include rules for arbitration and conciliation proceedings, notes on organizing and conducting arbitral proceedings, and legal guides on industrial construction contracts and countertrade.

### **INCREASING POPULARITY IN THE USE OF E-COMMERCE**

Taking into account international legal instruments, such as the 1985 UNCITRAL Model Law on International Commercial Arbitration, as subsequently revised, particularly concerning article 7, the UNCITRAL Model Law on Electronic Commerce, the UNCITRAL Model Law on Electronic Signatures, and the United Nations Convention on the Use of Electronic Communications in International Contracts. All these serve as our guide as we navigate the globe emancipating entrepreneurs and helping them win big with flawless solutions.

### **Collaboration and Engagement with Industry Stakeholders, Experts, and Regulatory Bodies**

Collaboration and engagement with industry stakeholders, legal experts, and regulatory bodies are essential for shaping the crypto space's legal and regulatory frameworks. We actively participate in these discussions, contributing our expertise and insights to establish clear guidelines, standards, and best practices. This proactive approach provides legal certainty and demonstrates our commitment to fostering an environment that balances innovation and protection.

# OUR TRACK RECORD

In the 4th quarter of 2023, we added more than 6,200,000 blockchain business entities throughout the franchise. This showed, in Q4, a total of 75.3% growth in new formations of blockchain trusts and 13.3% of new blockchain banks added. This was from 64 registered entities in 2022, showing that entrepreneurs and corporations have come to trust Blockchain Trust. 93% of the new Blockchain registrations in 2022-2023 came from global clients.

## Total Blockchain Business Entity Formations in 2022 - 2023/4Q

Business Entities	Number of Entries
LLCs	196,906
Corporations	515,583
Investment Banks	835,275
Blockchain Trusts	4,730,215
<b>TOTAL</b>	<b>6,277,979</b>

# OUR TARGET MARKET

1. Individuals with high visibility and assets that can be traced.
2. 2.5 Billion "unbanked" people and entrepreneurs worldwide.
3. Professions with a high potential for mistakes and lawsuits, like pharmacists, engineers, lawyers, realtors, doctors etc.

Just like:

1. Entrepreneurs Like You
2. Private Individuals
3. Merchants worldwide
4. Financial Advisers
5. Business Consultants
6. Merger & Acquisition Experts
7. Business Brokers
8. Corporate Registration Specialists
9. Registered Agents
10. Large Membership Groups who want their private label card program
11. Churches
12. Domain Registrars

**You are eligible for our Blockchain Corporate & Online Banking services from anywhere across the world!!**

Our turn-key solutions enable you to unlimited services including the setup of your own Blockchain Corporation or Trust, your Blockchain Bank including private label Visa & MasterCard program to help Entrepreneurs with a big visions to achieve their goals.

Do you run a small and medium size organization looking for global positioning? Do you want to position your business for global dominance with all the necessary tools, expertise, protection, and network?

The Blockchain International Corporate Registry Authority is designed for you!!!!

**Turn-Key Investment Banks Including Your Private Label Visa® & MasterCard® Program Create your Crypto Bank or Blockchain Bank including your online banking platform, your API keys, Visa, MasterCard® private label program and your cryptocurrency payment facilities in a matter of hours, not weeks, months or years!**

# TEAM

Our team is a dynamic and highly skilled group of professionals, managed by our CEO and Founder, Mr. Stephan Schurmann. A German serial entrepreneur with over 33 years of experience in offshore banking, digital banking, investment banking and fintech. We remain dedicated to driving innovation and delivering high-quality technical solutions in every circumstance. With expertise, unique perspectives in various domains, and a passion for problem-solving, our team is committed to collaborating, learning, and staying up-to-date with the latest industry trends.

We strive to exceed expectations, push boundaries, and create exceptional products and services you deserve.

Stay rest assured that your finance and asset protection is in the hands of world trusted experts with a track record of success.

## WHAT MECHANICS ARE BEING USED TO ENSURE THE PRICE STABILITY OF THE BLOCKCHAIN BANK STABLE COIN? (BBSC)

The BBSC coin is pegged against the USD and backed by 29,150,112 (twenty-nine-million-one-hundred-fifty-thousand-one-hundred-twelve) corporate shares of a public traded US company with a share value of \$3.00 each = \$87,450,336 asset value.

For proper elasticity and stability in very volatile market conditions, the BBSC stablecoin also has the commodity backing of more than \$57 Billion worth of **audited and testified corporate portfolios** totaling 6,277,979 in Blockchain Corporations, Blockchain Banks, and trusts.

Harmonized together, they provide stable value for the BBSC coin in the marketplace, maintaining its value peg even in severe volatility.

### COLLATERALIZED RESERVES - MECHANISM TO ENSURE STABLE VALUE?

Kicking off the most secure Stablecoin Enterprise, all initial **FOUNDING MEMBERS** of Blockchain Bank & Trust receive their Blockchain Corporation or Trust, including the Blockchain Bank Visa and MasterCard in Euro, USD, and Cryptocurrency, your Merchant or Private Account, valued at \$2,999 but incredibly discounted to **FOUNDING MEMBERS** at \$299.00 to kick-start their Blockchain businesses.

The founding membership remains limited and available to only the first 250,000 members on the **PRESALE** of the Blockchain Trust package, including \$299.00 **BBSC STABLE COINS**.

In other words, if an unlikely scenario arises and our company becomes insolvent, all our Founder Members would have received their Blockchain Corporation or Trust plus all other benefits, with a resale value of \$2,999, which was initially purchased for only \$299.00

### LEGALLY PROTECTED - AUDITED, FULLY - BACKED DIGITAL ASSETS

BBSC-issued digital assets are backed by 2:1 redemption, held bankruptcy-remote, and controlled by an independent Custodian regulated by the New York Department of Financial Services. [View our audited Asset Portfolio Reports.](#)

## WHAT ARE THE MECHANICS TO CONTROL THE PRICE OF THE BBSC SUPER COIN IN THE OPEN MARKET?

Fiat-backed stablecoins maintain value through fiat reserves held by trusted custodians, usually the stablecoin provider. For example, if a user deposits \$10 to mint \$10 worth of BBSC, the super coin provider Blockchain Bank & Capital Trust keeps that deposited \$10 in reserve. In addition, we have the above-mentioned corporate asset and corporate share portfolios to ensure the value of the BBSC coin is always maintained.

You could never lose any money with the BBSC super coin, but you would always make a profit regardless of the circumstances. It's like receiving the latest Tesla model with a 90% discount or registering a new domain name with a 90% discount to secure all our Founder Members and to show you our appreciation for the trust and confidence you are giving us.

Being an enterprise founded on trust and cooperation, we have implemented a 2:1 security pledge against our corporate assets and a 10:1 security pledge for all our Founder Members who received their Founder Package with a far higher intrinsic value than they actually paid.

Intrinsic value is a core concept investors use to uncover hidden investment opportunities. For example, in options trading, intrinsic value is the difference between an asset's current price and the option's strike price. When an asset's market price is below its intrinsic value, it may be an astute investment.

That's why the BBSC Coin and the Blockchain Trust Combo is an absolute WIN-WIN-WIN for every entrepreneur worldwide, offering you an intrinsic value much higher than what you paid for.

## WHICH TEAM IS BEHIND THE BBSC COIN, THE PRODUCTS & SERVICES?

The Blockchain Bank Super Coin remains a product of the strategic partnership between the Blockchain International Corporate Registry and the Blockchain Bank & Trust. As such, the professional team behind the two independent companies, in collaboration, manages all Blockchain Bank Super Coin activities.

The team consists of highly placed professionals in the banking and finance industry. These experts, with collective professionalism of over three decades of experience in investment banking, asset management, asset protection, business development, and product management, are responsible for overseeing all activities of the BBSC Coin.

## WHAT WE DO?

Our CEO and Founder, Stephan Schurmann, a German serial entrepreneur, allocates his private savings at Blockchain International Corporate Registry Authority and Blockchain Bank & Capital Trust between two related forms of ownership.

First, we invest in businesses we control, usually buying 100% of each. Blockchain Bank directs capital allocation at these subsidiaries and selects the CEO's who make day-by-day operating decisions. When large enterprises are being managed, both trust and rules are essential. Blockchain Bank & Trust and the Blockchain International Corporate Registry Authority emphasize the former to an unusual – some would say extreme – degree.

Disappointments are inevitable. We understand business mistakes; **our tolerance for personal misconduct is zero.**

In our second ownership category, we buy publicly traded stocks through which we passively own pieces of businesses. Holding these investments, we have no say in the management.

Our goal in both forms of ownership is to make meaningful investments in businesses with long-lasting favorable economic characteristics and trustworthy managers. Please note that we own publicly traded stocks based on our expectations about their long-term business performance, not because we view them as vehicles for adroit purchases and sales. That point is crucial: We are not stock-pickers; we are business-pickers.

Consequently, our extensive collection of businesses consists of over 6.2 million Blockchain Corporations, Blockchain Banks, and Trusts that enjoy excellent economic characteristics. Along the way, many other companies worldwide have died, their products unwanted by the public.

Capitalism has two sides: The system creates an ever-growing pile of losers while simultaneously delivering improved goods and services. With the Blockchain Corporate and Trust registrations, we call this phenomenon "disruptive innovation."

One advantage of our publicly traded segment is that – episodically – it becomes easy to buy pieces of beautiful businesses at outstanding prices. It's crucial to understand that stocks often sell at truly foolish, high, and low prices.

"Efficient" markets exist only in textbooks. In truth, marketable stocks and bonds are baffling; their behavior is usually understandable only in retrospect.

Controlled businesses are a different breed. They sometimes command ridiculously higher prices than justified but are rarely available at bargain valuations. Unless under duress, the owner of a controlled business gives no thought to selling at a panic-type valuation.

The math isn't complicated: When the share count decreases, your interest in our many businesses increases. Every tiny bit helps if repurchases are made at value-accretive prices.

Just as surely, when a company overpays for repurchases, the continuing shareholders lose. At such times, gains flow only to the selling shareholders and the friendly but expensive investment banker who recommended the foolish purchases. Gains from value-accretive repurchases should be emphasized to benefit all owners – in every respect.

Imagine, if you will, three fully-informed shareholders of a local auto dealership, one of whom manages the business. Imagine, further, that one of the passive owners wishes to sell his interest back to the company at a price attractive to the two continuing shareholders.

When completed, has this transaction harmed anyone? Is the manager somehow favored over the continuing passive owners? Has the public been hurt? When you are told that all repurchases are harmful to shareholders or the country or particularly beneficial to CEO's, you are listening to either an economic illiterate or a silver-tongued demagogue (characters that are not mutually exclusive).

Based on the above, you will understand and appreciate what we offer you today as **FOUNDING MEMBER** has an incredible intrinsic value favorable for both self and your business.

That's why the BBSC Coin and the Blockchain Trust Partnership is an absolute **WIN-WIN-WIN** for every entrepreneur worldwide.

Are you ready to join us?

Kindly [click here](#) to become a Blockchain Trust Founding Member Now!

**Every great Wealth Started With an Investment, and we are happy to partner with you.**

# CONCLUSION

The Blockchain International Corporate Registry Authority specializes in building decentralized corporations and providing irreversible blockchain trusts on the Ethereum and Polygon Network for our clients across the globe.

Why did we choose Blockchain technology?

Because blockchain technology is borderless, and as a company poised at global relevance, we understand that we must use globally relevant tools to compete globally. We have adopted all our products and services to blockchain technology.

The application is wide, and scalability is possible. So whether it is an asset management and wealth protection; corporate business registry; or turn-key white-label digital banking solutions, we are equipped to provide top-notch services. The team has a history of delivering quality services for over 33 years, giving you the best, safest and most innovative and tax-friendly corporate solutions in the market.

**Register Your Blockchain Trust Company Today**

Our vision is to empower 2.5 billion unbanked people and young entrepreneurs worldwide with cutting edge and low cost digital payment and trading facilities.

The documentation is never a solicitation or offer to buy shares or securities; hence we disclaim every responsibility for any consequential loss or damage arising from reliance on information contained in this document, be it an error, inaccuracy, or omission. It is no recommendation to purchase MOD3L digital assets, nor is it financial advice, as certain risks are associated with cryptocurrencies, including but not limited to complete loss of digital assets, price volatility, and inadequate liquidity.

We urge you to conduct heavy research and execute due diligence without failing to seek assistance from financial professionals, legal advisors, and tax experts, assuming that they are “smart enough” to find anything negative on our Blockchain Corporate Registry or our commodity backed BBSC stable-coins (ironic, isn't it?). The info-graphics in this document are strictly for informational purposes and shouldn't be used for reliance on investments. (Duh? You knew that already, didn't you?).

Our forward-looking statement may be affected by unforeseeable circumstances; hence, you cannot risk what you cannot afford to lose.

## INDIVIDUAL EMPOWERMENT, NOT HAND-HOLDING

This is the beginning of our journey - not the end! We EMPOWER Entrepreneurs Across The World To Gain Global Recognition, Acceptance, And Authentication With The Blockchain International Corporate Registry Authority® and the commodity-backed BBSC Super Coin.

Our International Blockchain Corporate Registrations and Visa & MasterCard Private Label Program's Are Available For Entrepreneurs Across The World.

It's Time to Own Your Decentralized Bank or Blockchain Corporation and Enjoy Unlimited Business Breakthroughs Worldwide – Go Live In less than 30 Minutes.

We share a common goal for all – achieving individual sovereignty and independence from Government tyranny. Owning a decentralized Blockchain Trust with BBSC super-coin cryptocurrency payment facilities not only is the answer to escape economic Government tyranny, but to regain 100% individual sovereignty and personal freedom.

## ENJOY TAX FREEDOM

Ready to be in control of your wealth and financial freedom? Register your Blockchain Trust Company and discover the benefits.

 [WWW.BLOCKCHAINTRUST.PRO](http://WWW.BLOCKCHAINTRUST.PRO)

[CONTACT US](#)

We must start with an incorruptible foundation, which cannot be owned, issued or controlled by any man-made political authority; it must emerge organically as a transparent, voluntary 'constitution in code' decentralized from any Government authority or any Central Bank.

## HERE IS MORE GOOD NEWS

For each Blockchain Corporate or Trust registration we include \$299.00 Blockchain Bank Super Coins which we transfer directly to your e-wallet or on your Blockchain Bank Visa or MasterCard.

Pioneered and created by the world's leading decentralized Corporate Registry Authority running on the Polygon networks.

Members can register their decentralized corporate businesses and Blockchain Trusts in less than 30 minutes from anywhere worldwide.

All Blockchain Corporate registrations are tax-free, providing the smartest tax-exempt strategy to secure, buy, register and control your physical and digital corporate assets.

The powers granted to Blockchain Trust companies, and their freedom from some of the more onerous obligations of the bank regulatory regime, have long made it an attractive charter type for asset and wealth managers and traditional fiduciaries. Today, this old charter is being put to new uses and proving a valuable tool for a variety of cutting-edge financial services business models through cutting edge Blockchain technologies.

The Blockchain International Corporate Registry Authority remains the most viable and secure service provider worldwide, with over 6.2 million Blockchain Corporate & Trust portfolios under management.

Become a partner in our huge success - Embrace Seamless Business Registrations and Authentication on the secure Blockchain. As you know, every Government business registrar is selling your data, with us your details are safe and anonymous. True FREEDOM for every entrepreneur.

## PROTECT YOUR WEALTH

In a world filled with asset predators, asset protection makes you and your assets less interesting by completely removing the economic benefits that attract individuals and their attorneys to engage you in legal battles.
