NATIONAL PARKS & LODGES OF THE OLD WEST

Orbridge

Dickinson

Dear Alumni, Parents and Friends,

The wide-open spaces of the American West have beckoned adventurers for millennia and, having spent years exploring Wyoming and South Dakota myself, I am thrilled to share some of its wonders with you on this incredible alumni trip! Connect with fellow Dickinsonians on a journey that celebrates the American West's magnificent national parks, tracing legends and storied monuments along the way.

From ancient mountains of the Tetons to an active super volcano at Yellowstone, we will look upon some of the most stunning geology and unique landscapes in North America. Journey through Badlands National Park, known as nature's surreal masterpiece, where impressive herds of bison roam, and dazzling, dramatic pinnacles rise over the largest undisturbed mixed-grass prairie in the United States. Immerse yourself in a landscape once home to mammoths and other ice-age creatures. Explore the routes forged by determined early explorers.

From Mount Rushmore to Old Faithful to the Snake River, you will see the best of the Old West and traverse its beautiful vistas in style and comfort. Wonderfully historic hotels and lodges are a highlight of this program, including landmark lodging within the parks themselves.

Consider joining us on this exploration of the American West. Whether you're a seasoned adventurer or simply looking for a chance to connect with nature and fellow Dickinsonians, this trip has something to offer everyone.

Space is limited. With significant savings of more than \$1,000 per couple, we anticipate this tour will fill quickly, so be certain to reserve your spot today.

You may reserve online at dickinson.orbridge.com, by calling (866) 639-0079 or by returning the enclosed reservation form.

I look forward to adventuring with you!

Sincerely,

Jorden Hayes
Associate Professor of Geosciences

**Featuring Faculty Host: Associate Professor of
Geosciences Jordan Hayes**

Jordan is a geophysicist who joined Dickinson in 2016 after completing a Ph.D. at the University of Wyoming. She is passionate about understanding the living, breathing skin of Earth known as the "critical zone." In particular, she is

curious about how rock at depth is transformed into a habitable substrate for life at the surface. Her summers are often filled with fieldwork, researching some of the planet's most spectacular landscapes. Jordan prioritizes student involvement in research and leads NSF-funded efforts to recruit underrepresented groups in the geosciences. Her current projects include the Bedrock Critical Zone Network, GNOMEs (Geophysics of the Near-surface: an Outdoor Motivational Experience for Students) and multiple local projects, including work at the Mt. Tabor Cemetery and the Fort Halifax Rediscovery Project.
