Customer Feedback

„When it comes to logistics consulting, we have found a good sparring partner in Xvise.

We have been convinced by the customized reality training concept, which challenged even experienced colleagues.

Our sharpened understanding of the problem and decision environment of our customers will support us in further increasing the effectiveness of our solutions."

Mario Rauch - Vice President Partner & Products

Customer Feedback

„The course "practice-oriented logistics management" has made me fitter to better master the challenges in my everyday professional life.

The project work showed me how important "team playing" is.

The field trip took us to a local showcase company, which I will remember for a long time.

The same applies to the fireside chat, where we were given a comprehensive overview of operational supply chain management.

Anneliese Grilz – WIFI Vorarlberg

Customer Feedback

"Xvise supported us in the conceptual design and introduction of new logistics software most effectively.

From the analysis of existing processes to the planning and subsequent visualization of new processes, Xvise provided us with expert advice and an outside-view from a practical perspective.

The team developed very well during the many workshops."

Sascha Fröhlich – Organizational Development
