Deliver

01 *Initial* Consultation

We begin with a meeting to understand your space, needs, lifestyle, and design preferences. This can be done in person or virtually. We also discuss your goals, timeline, and budget.

02 *Site Visit* & Assessment

If required, we conduct a detailed site visit to take measurements, assess the layout, and capture the essence of the space. This helps us tailor the design with accuracy.

03 *Design Concept* Development

Based on your input, we develop a design direction - including mood boards, color schemes, material samples, and layout proposals that reflect your vision and the space's potential.

04 *3D Visuals* Development

Once the concept is approved, our team prepares detailed 3D renderings to help you visualize the space. These visuals bring the design to life and allow for any final refinements before execution.

05 *Procurement* & Sourcing

We manage all furniture, décor, and materials sourcing - ensuring quality, style, and budget alignment. This includes coordination with trusted suppliers and custom-made pieces if needed.

06 *Project* Coordination & Execution

Our team oversees delivery, installation, and setup. We work closely with contractors and vendors to ensure smooth execution and timely completion, down to the finishing touches.

07 *Handover* & Styling

Once everything is in place, we complete the space with curated styling - creating a refined, move-in-ready environment that reflects both the design vision and your lifestyle.

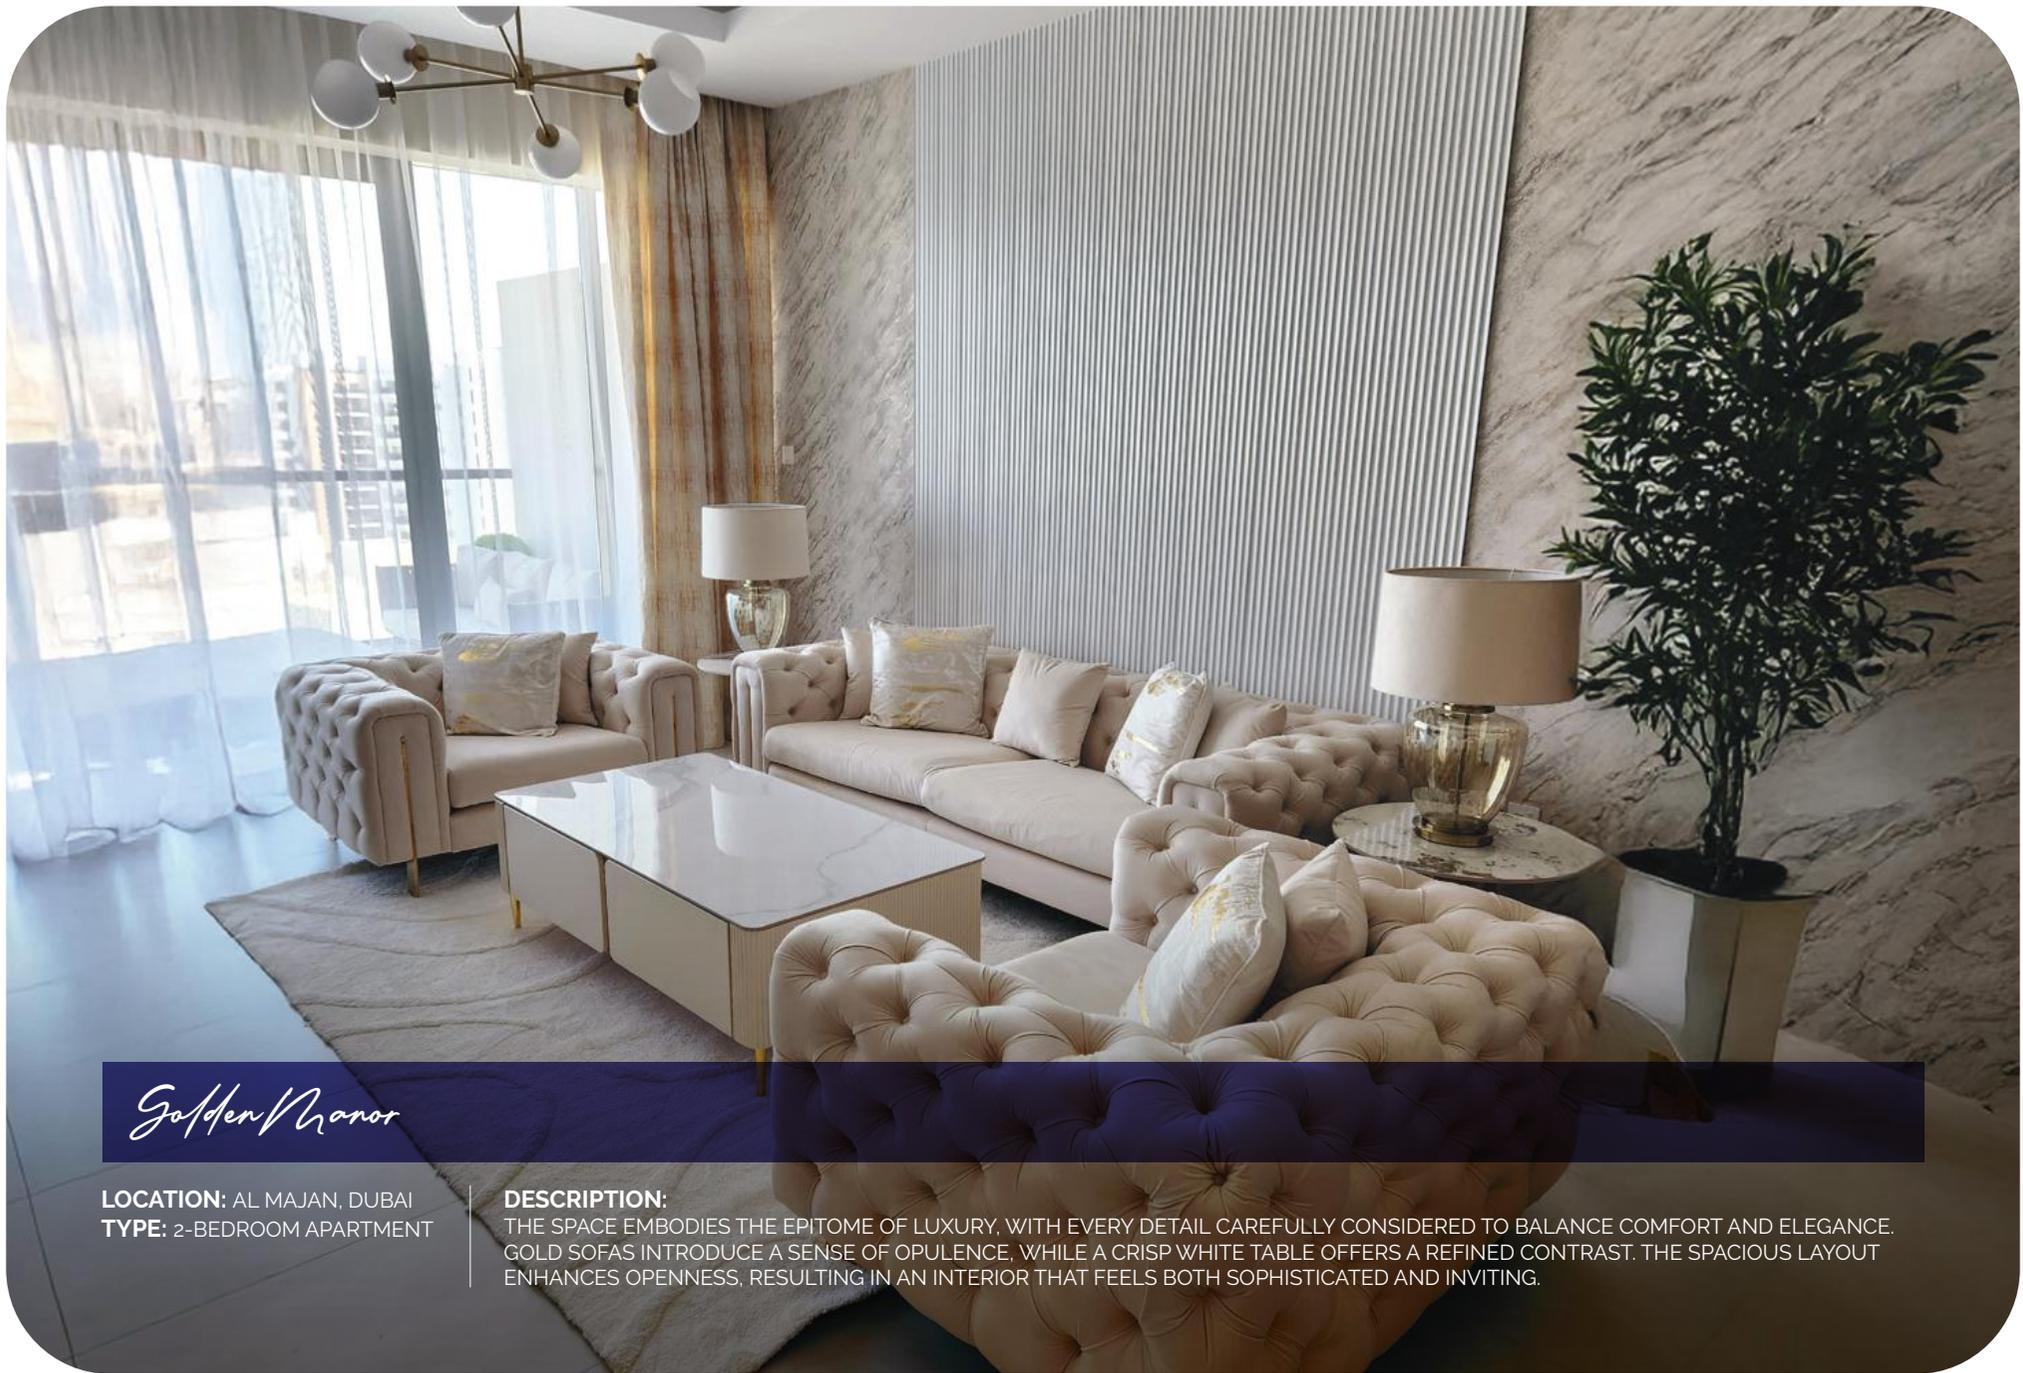

Our Portfolio

Our portfolio showcases a diverse range of high-end projects across the UAE, each reflecting a blend of luxury and functionality.
