Certification

At Elite Security Services we take pride in our work and we do it to the best of our abilities. This hard work is internationally recognized and certified by our ISO Certificates for the provision of security guard services and supply, installation, operation and maintenance of building security surveillance cameras and devices.

ISO Certificates:

- ISO 9001:2015
- ISO 18788:2015
- ISO 45001:2018

In addition, both manned security and security system departments are licensed and approved by the Ministry of Interior of the State of Qatar.

- Surveillance Operations
- Events Security
- Traffic Management
- Alarm Response
- Key Management
- VIP Escort Services
- Security Consultancy

System Security

- Annual Maintenance Contracts
- Extra Low Voltage Installations
- Security Consultancy for Network and Infrastructure

About Manned Guarding Services

Manned guarding is a highly effective way of eliminating criminal damage and theft, making it one of the most proactive security measures that you can take against crime. It is a security service that involves placing security guards at your premises; this could be out-of-hours security only or 24/7 security.

Manned guarding decreases the opportunity for theft and vandalism, and our security guards can raise the alarm should an arson, or similar, take place at your premises out of hours. It is a brilliant proactive solution to your security strategy, ensuring your assets are protected and your insurance cover is not compromised. We aim to prevent damage, disorder, or theft and strive to protect individuals against assault or injury.

At Elite Security Services, we work hard to deploy the right security guards to suit your specific requirements. All site instructions and trainings are given by specific training centers to the criteria set by the Ministry of Interior in Qatar (MOI).

Types of Manned Guarding Services that we offer include:

- Security Guards
- CCTV Operations
- Fire Wardens
- Lifeguards
- Bouncers

Static Security Guards

The responsibilities of a static security guard include traffic control, gatekeeping, patrolling, and basic CCTV monitoring, they prevent trespassing, vandalism, and a large range of other offenses in and around businesses and work sites.

Some of these sites include but are not limited to shopping centers, car parks, construction developments, office buildings, theme parks and, museums.

Patrolling Security

Security patrolling is one of the primary duties of our security personnel.

Our security patrol officers remain proactive and vigilant. Effective patrols ensure enhanced security of your site. These officers carry out the patrolling both on foot and on vehicles if required based on the size of land which needs to be covered.

The prime purpose of a patrolling agent is to maintain the security of the area and act as a crime deterrent. The presence of our guards is enough to secure your site and reduce the risk of vandalism or theft at your property.

Surveillance Operations

CCTV systems are recognized in business as a highly effective measure against crime and anti-social behavior. However, they are ultimately only as good as security guards monitoring them.

Our experienced security operatives can determine whether any or all alerts are genuine security threats or just simply false alarms. Should action need to be taken, we can deal with the matter at hand. The operatives log any activity and provide you with detailed reports of any incidents, giving you that extra peace of mind that the security of your business is in very capable hands.

Events Security

We provide innovative and integrated security solutions for all types of events, whether it is private/corporate or council-funded, through the deployment of highly trained event officers and stewards.

Elite Security Services provides event security for a wide range of events. Our event security teams have vast knowledge and experience with matters related to events.

Traffic Management

Our security experts will establish some security protocols and foresee the point(s) of weakness which could in the future be a real danger or threat for your property and the users of your parking lot.

A complete security solution will be put in place to ensure that your users are parked in the right manner without blocking road views from other automobilists or incoming traffic from pedestrians.

Alarm Response

The majority of businesses now have their premises protected by audible alarms with key features such as text message alerts and CCTV links to a monitoring station. In both cases, Elite Security Services can help.

We then deploy a security guard in a highly visible and branded vehicle to any site and any location. We will confront and remove any unauthorized person(s), report any criminal damage and theft, and contact authorities on your behalf.

Key Management

With Elite Security Services, your keys are secured safely off-site and not available to anyone without the consent of the manager on shift. We will deploy our alarm response team in a highly visible, branded vehicle to your site on receipt of the alert to a security breach at your premises.

Our security officer can deal with authorities and any other issue that may arise, using the keys to gain access should this be necessary. This removes the potential threat of harm from yourself and your employees.

VIP Escort Services

Our close protection services for Qatar consider life in Doha and its demands. Our services in the country can be tailored from the hire of a team of bodyguards up to a full close protection team including female bodyguards, along with our supplemented Security Services.

Manned Security Consultancy

With the fast-moving world that we live in today, it is very easy to oversee some very clear threats which are inevitable to a trained eye. Therefore, Elite Security Services makes its best security consultant available to you in order to give you a detailed plan and explanation about how to maintain a very high level of security for your property, assets and, personnel.

This program includes a minimum of 2 site visits – 1 during the day, and 1 during the night – where our experts will scrupulously look for defects in your current security system.

About Systems Security

System security is a means or method by which something is secured through a system of interworking components and devices.

Through our services, you can be sure to have a secure network of both hardware and software to keep your staff, premises and, assets safe from any intrusion. Our role is to map all entry points from incoming communication and secure the areas which may cause a threat to your safety and security.

Approved by the Ministry of Interior of Qatar.

Annual Maintenance Contracts (AMCs)

Having the latest security systems equipment is always good and having it maintained is even better.

We carry out preventative tasks, including routine servicing of a vast array of security products. This ensures that you remain compliant with government regulations and lowers the cost of having to change your entire security system if not taken care of in the correct manner.

Security Consultancy for Network and Infrastructure Consultancy

In line with our values, we offer a non-binding security consultancy for your network(s) and infrastructure(s).

This gives you the reassurance that you are correctly being protected, or that you can do what it takes, to keep your staff, property, and assets safe.

Our consultancy program also gives you freedom of choice when it comes to choosing your security system provider.

ELV Installation

Extra Low Voltage (ELV) systems deployed in residential and commercial buildings with the purpose of increased control and security.

These systems include:

- Closed Circuit Televisions (CCTV) Cameras
- X-Ray Baggage & Investigation Systems (XBIS)
- Access Control Systems
- Lighting Control System
- Public Address System
- Fire Alarm Systems
- Master Clock Systems
- Wi-Fi - Access Point System
- Lan & Telecom System

Extra Low Voltage system brands we work with
