scences

Flowers are blooming. Birds are singing. Spring is here. We now invite you on an inspirational journey through our joyful universe of carefully designed objects ready to spruce up your home.

Home is more than just our address. It is where we spend time with our loved ones, where we charge our batteries, cry, laugh, love. The framework for happiness and for living our best lives. Because of that, we want to contribute to making your home your favourite place to be - and, of course, to enjoy visually. We hope and believe that will be able to do so with our playful universe of home interiors.

We wish for our products to spread as much joy as possible. Functionality is, of course, important, but with us being estheticians to the bone, we must admit that the design itself always comes first. We put an honour into rethinking the classic shapes of a product and are not afraid to play around with different quirky ideas.

Our warmest welcome to our aesthetic universe of optimistic colours and playful shapes ready to fill you and your home with joy.

Terms and conditions

A passionate *family* business

You are probably curious to know the faces behind Stences. So hello from us, Pia and Thea!

As mother and daughter, who have always been very close and therefore know each other like no one else, it was obvious that we had to create something together. With Pia's structured mind and Thea being a creative esthetician to the bone, we make a pretty good team.

As a brand, we want to challenge the classic, Nordic design with our crooked, playful shapes and joyful colour combinations. Everything is produced with a great respect for our suppliers, and with a keen focus on choosing the right materials in order for every object to last as long as possible.

We wish for our products to go from generation to generation, and we do our best to minimize waste by producing only small collections with high quality products. If you care for them gently, they will spread joy for a very long time.

FUN FACT ABOUT OUR BRAND NAME: Stences is short for "Christence", which is our shared middle name. We are both named after Pia's grandmother.

Magnificent architecture, the waves of the ocean or colourful buildings on a summer vacation. Simply, inspiration is everywhere to be found.

INSPIRATION

The idea for a new product can appear in thousands of ways. As creative people, we observe shapes, colours, and materials everywhere. Sometimes the idea for a new product is crystal clear inside our mind, but other times the idea generation process can be quite long and tricky.

DESIGN PROCESS

Every single one of our products is uniquely drawn and designed by Thea Bækkelund. The design process always starts with a blank piece of paper and a pen. Simple as that. When the idea starts taking shape, the design is digitally drawn in 3D and rendered to get a realistic view on the final design. Then every little detail, such as dimensions, materials and colours are specified in a work drawing, which is sent to our suppliers. The process from first idea to final product easily takes a year.

PRODUCTION

When the work drawings have reached our suppliers, they start making a prototype of each design. Sometimes a lot of adjustments are needed, and sometimes we are lucky that the first one is spot-on. When the prototype has been physically approved by us, the real production is started. Everything is made with great respect for the process and, of course, our supplier.

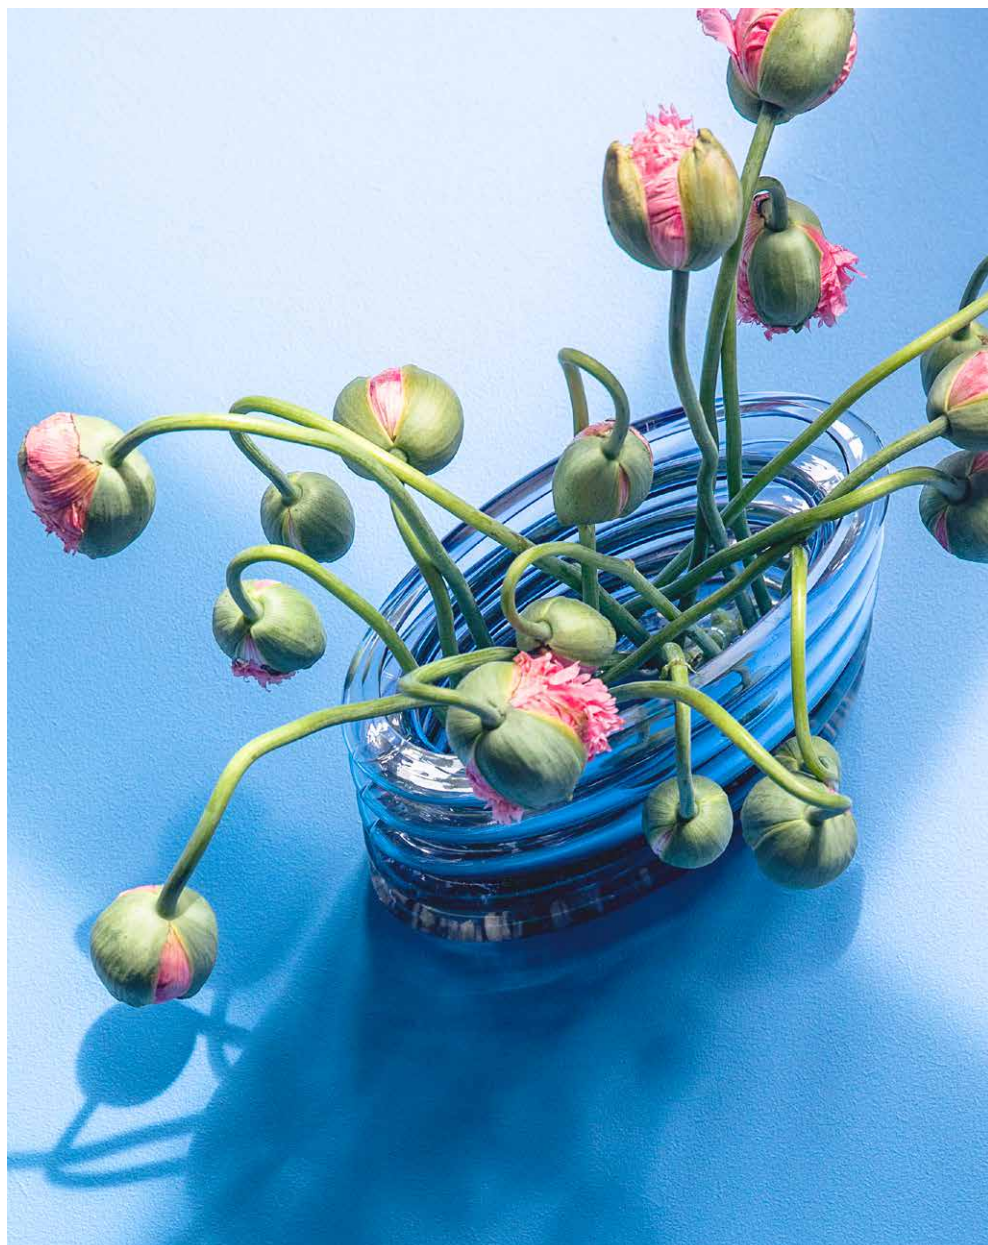

WAITING GAME

We respect that quality takes time. We would rather wait for the perfect result than push something through. Each and every product is fully or partly handmade. For example each of our glass vases are mouthblown into a steel mold, specially made from our drawings. A long, breathtaking process. Therefore minor variations in colour, shape, thickness etc. will occur making sure that every object is unique.

New bubbly colours

In order to make the optimal conditions for a great creative environment, it is a good idea to decorate with colours. This season we introduce our bestseller Bubble Candlestick in three new joyful colours; orange, yellow and blue.

A playful approach

Keep the look of your home unpredictable and interesting by varying the colours and materials of your decor objects.

Playing around with contrasting materials, shapes, and colours will make sure that any corner of your home is both personal and eye-catching.

Colourful upcycling

Made of stainless steel, the Icon candlesticks are a series of three timeless classics. This season we are proud to introduce a lovely minty colour, that will easily add a fresh spring vibe to your home decor.

In collaboration with a local, Danish supplier, candlesticks with minor defects have been powder-coated in order to give them new life.

The simplicity of their sharp, graphic shapes make them easy to mix with the rest of your home interiors. Combine the different variations for a creative, personal look.

Contrast is key

Notice how mixing different surfaces in creative combinations adds visual interest to even the simplest setting. The contrast between the heavy look of ceramics and the lightness of stained glass will forever be an amazing combination.

Express yourself with colours

Colours can be a magic tool when wanting to up the level of personality in your home. Find yourself a lovely colour scheme with a mix of warm, neutral tones and bright contrasting colours and notice how it instantly adds interest to the setting. Whenever you feel bored with the look, simply rearrange your decorative objects to add a new feel to the room.

The heart of your home

The kitchen will always be the heart of the home. Not only is it the place to cook, it is room for deep conversations, laughter and so much more. Decorate your kitchen space with hand-picked favorites to make it extra personal.
