STORAGE, MATERIALS HANDLING AND ACCESS EQUIPMENT

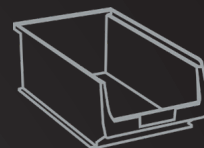

Topstore® – Catalogue 2020

CONTENTS

3

SMALL PARTS STORAGE SYSTEMS

A range of simple but effective small parts storage systems designed to cater for a wide range of materials and applications.

66

STORAGE/SHELVING EQUIPMENT

A comprehensive range of floor-mounted light-, medium- and heavy-duty shelving and racking to suit medium- and heavy-duty applications.

100

LOCKERS/CLOAKROOM EQUIPMENT/CANTEEN FURNITURE

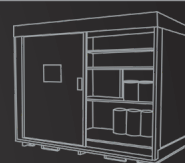

Lockers, cloakroom equipment and canteen furniture to suit all requirements.

113

SECURITY, FIRE & SAFE STORAGE

A range of security, safety, hazardous area and fire-resistant cabinets.

137

MATERIALS HANDLING EQUIPMENT

A comprehensive range of sack trucks, trolleys, cylinder-/drum-handling products and storage racks.

223

STEPS/ACCESS EQUIPMENT

A versatile range of mobile steps and access equipment.

239

WORKBENCHES

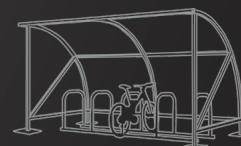

Static, mobile and semi-mobile workbenches, tool trolleys and assembly benches, fully welded construction, supplied assembled and ready to use.

263

WAREHOUSE/SAFETY/SITE/MANAGEMENT

Mezzanine floors, pallet racking, partitioning, guards and barriers for creating secure storage and safety zones.

Topstore® – TC® Semi-Open Fronted Containers

A simple and effective small parts storage system for a wide range of materials. Space saving, manufactured from polypropylene, can be stacked or for increased flexibility, used with Topstore Louvred Panels, Cabinets and Shelving.

Containers can be manufactured in own brand and colours for high volume users (please enquire).

Features:

- Strong, heavy duty with reinforced base, sides and stacking rim.
- Durable, resistant to most industrial solvents.
- Material is capable of withstanding a temperature range from -15°C to 50°C, however this may not apply when under load or stress dependent on use or application.
- Hygienic, clean, smooth inside faces guard against build up of grease etc.
- Index card slot for instant product identification (labels not supplied as standard please order separately).
- Available in 7 sizes and 5 colours as standard.
- Specialist options available to comply with anti-bacterial and anti-static applications.

Topstore® – TC® Semi-Open Fronted Containers

Technical Details

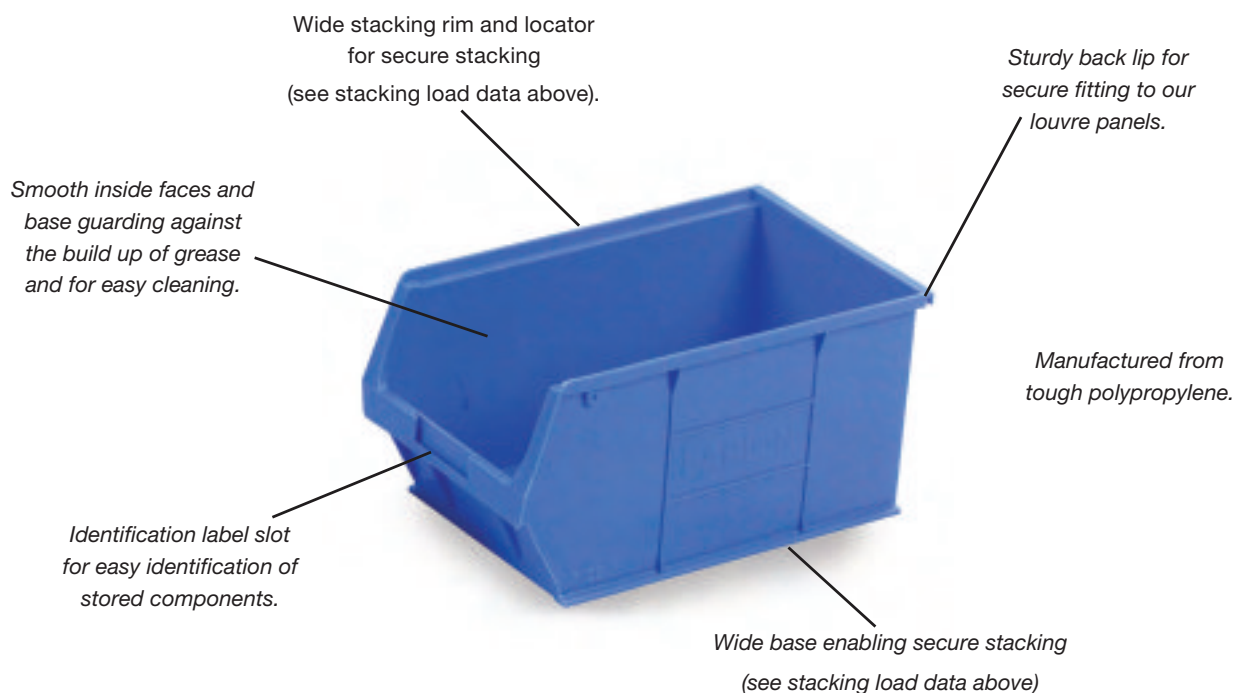

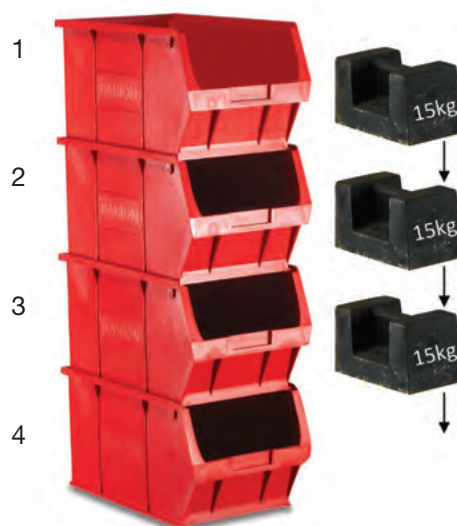

Container Stacking Loads:

Please note that when stacking containers, the entire stack load is dispersed onto the base container therefore neither the individual load or the total load of the stacked containers (up to the max. stack height) should exceed the max. stack load.

Eg. The diagram below shows TC5 containers stacked to their max. of 4 high. As the max. stack load for TC5 is 45Kg, if containers 1, 2 & 3 are equally loaded they can each carry 15Kg. If they were stacked 3 high and equally loaded each container could carry 22.5Kg, or 2 high 45Kg.

Topstore® – White Antibacterial TC® Semi-Open Fronted Containers

Manufactured using a silver ion based antibacterial additive for specialist use in hygiene sensitive areas such as schools, hospitals, surgeries, mobile health units and food preparation areas. The additive prevents the growth of bacteria by up to 99.99%, lasts for the lifetime of the product and is effective against MRSA, E-Coli & Salmonella. Containers can be manufactured in own brand for high volume users (please enquire).

Features:

- Strong, heavy duty with reinforced base, sides and stacking rim.
- Index card slot for instant product identification (labels not supplied as standard please order separately).
- Available in 6 sizes.
- Designed for use with our wall mounted and freestanding louvre panels, trolleys, cabinets and shelving.

Topstore® – Black Anti-Static TC® Semi-Open Fronted Containers

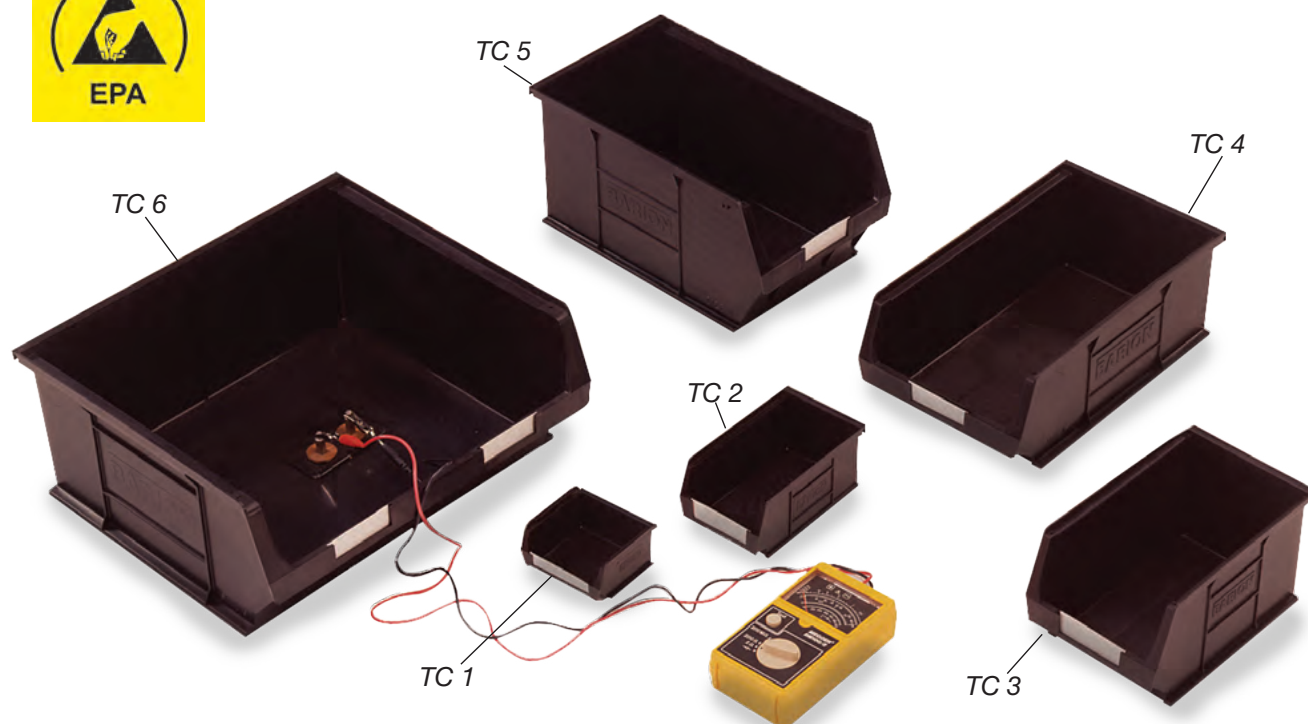

Manufactured using antistatic, carbon, conductive particles/fibres which results in a low charging (antistatic) container which is less likely to damage static sensitive items.

This makes them ideal for use as part of a complete ESD control programme, as defined by BS IEC 61340-5-1:2007

Containers can be manufactured in own brand for high volume users (please enquire).

Features:

- Strong, heavy duty with reinforced base, sides and stacking rim.
- Index card slot for instant product identification (labels not supplied as standard please order separately).
- Available in 6 sizes.

Topstore® – NXT-GEN Semi-Open Fronted Stack & Nest Containers

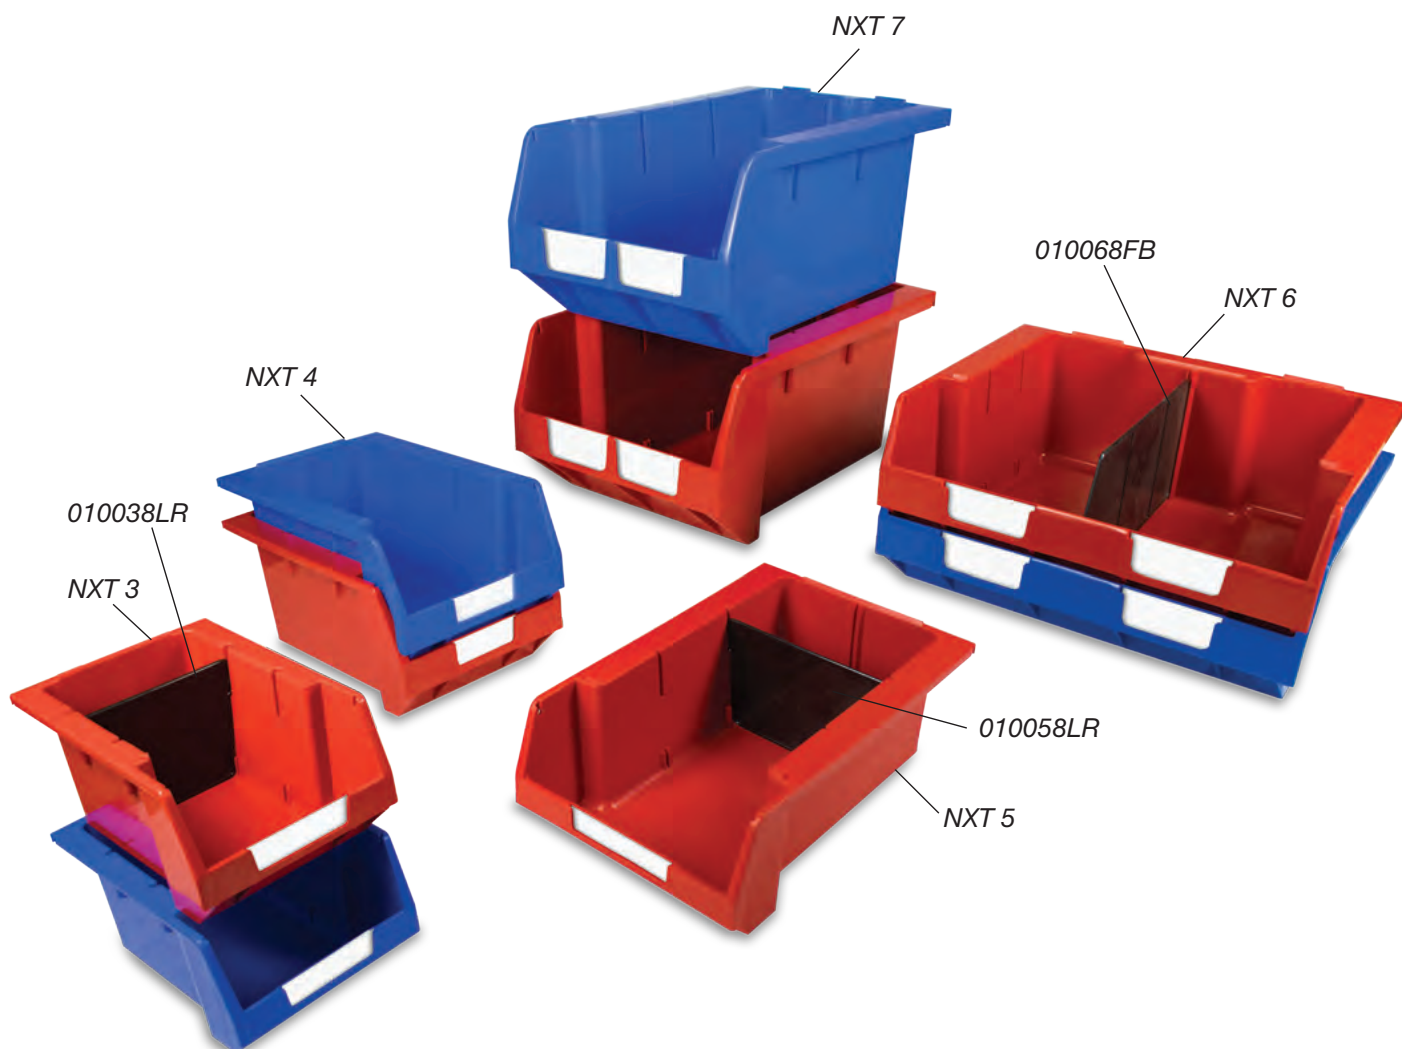

The next generation storage containers are designed to help you make the most of the space in your business.

Manufactured from polypropylene these containers combine the quality that you have come to expect with its revolutionary design enabling the bin to stack and nest, with the facility to be mounted onto louvred panels and to hold dividers to make the best possible use of the space available. NXT-GEN containers are also designed to be used with our cabinets and shelving systems to make this one of the most flexible bins available.

Available in five sizes and two colours as standard. Containers can be manufactured in own brand and colours for high volume users (please enquire).

Features:

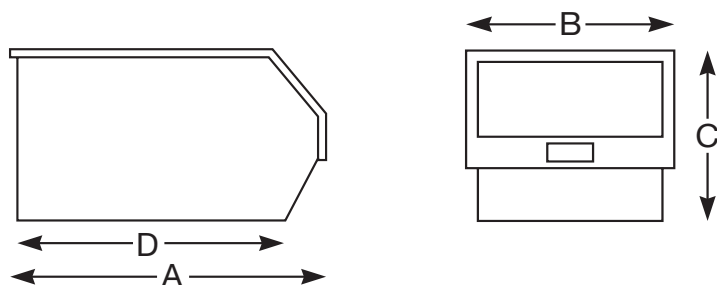

- Dividers available to run front to back or left to right dependent on bin size.
- When not in use, the bins will nest reducing the amount of storage space required.
- Resistant to most chemicals, including oil and acids.
- Material is capable of withstanding a temperature range from -15°C to 50°C, however this may not apply when under load or stress dependent on use or application.
- Increased clear access facilitates for easy selection.
- Ergonomic design generates greater durability and strength.
- Lifting handle on larger bins.
- Index card slot for instant product identification (labels not supplied as standard please order separately).

Technical Details

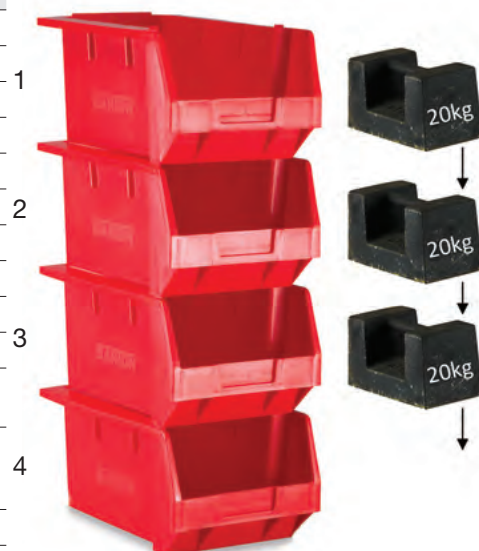

Container Stacking Loads:

Please note that when stacking containers, the entire stack load is dispersed onto the base container therefore neither the individual load or the total load of the stacked containers (up to the max. stack height) should exceed the max. stack load.

Eg. The diagram below shows NXT5 containers stacked to their max. of 4 high. As the max. stack load for TC5 is 60Kg, if containers 1, 2 & 3 are equally loaded they can each carry 20Kg. If they were stacked 3 high and equally loaded each container could carry 30Kg, or 2 high 60Kg.

Topstore® – Wall Mounted Louvred Panels

Featuring the unique double indented louvre for extra strength, this system offers the ideal solution for wall mounting and many other applications for NXT-GEN and Topstore TC containers and accessories.

Three Imperial and four metric sizes available. Precision formed and finished epoxy powder coated in two colours.

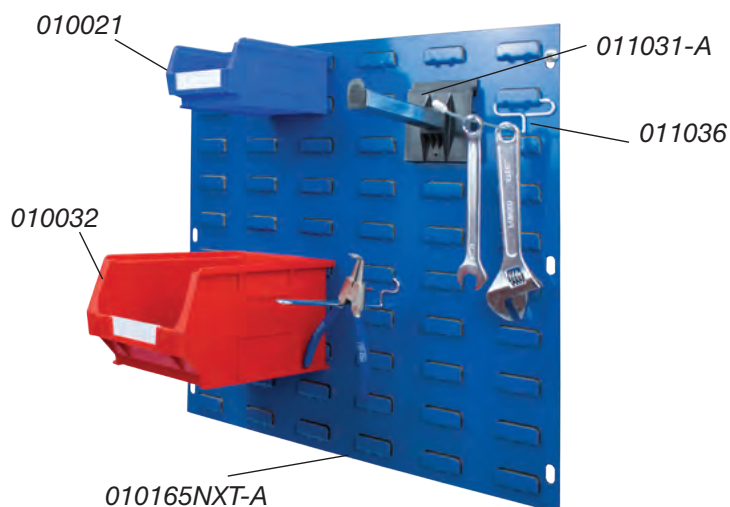

Other colours available.

TC Containers are suitable for both the metric blue and imperial grey louvred panels, however the NXT-GEN Containers are better suited to the metric blue louvred panels.

Excludes wall fixings

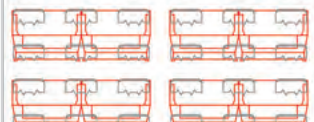

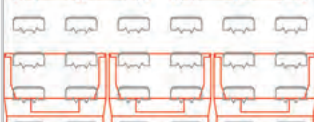

Unique double indent louvre for extra strength

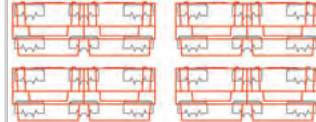

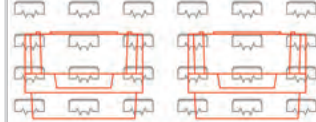

Louvre Value Configuration

1. To calculate approximately the amount of NXT-GEN or TC Containers or accessories that can be accommodated on a Topstore Louvred Panel, or part thereof, take the LV (Louvre Value) of the container or accessory and divide it in to the NL (Number of Louvres) per panel. To determine the number/size of Louvred Panels required to locate specific quantities of containers, simply reverse the above process.
2. To calculate the exact configuration, see diagrams below.

Topstore® – Louvred Panel Spigots

Designed to fit onto Topstore Louvred Panels our range of Topstore Spigots are ideal for storing items such as coils that will not store easily on a shelf.

Available in 19mm square and 13mm round tube with a durable ABS plastic back plate for heavier applications.

Wire spigots are available in single and double options, manufactured from 3.6mm wire, the single spigots come complete with a rubber end cap for safety.

Topstore® – Louvred Panel Spacemasters

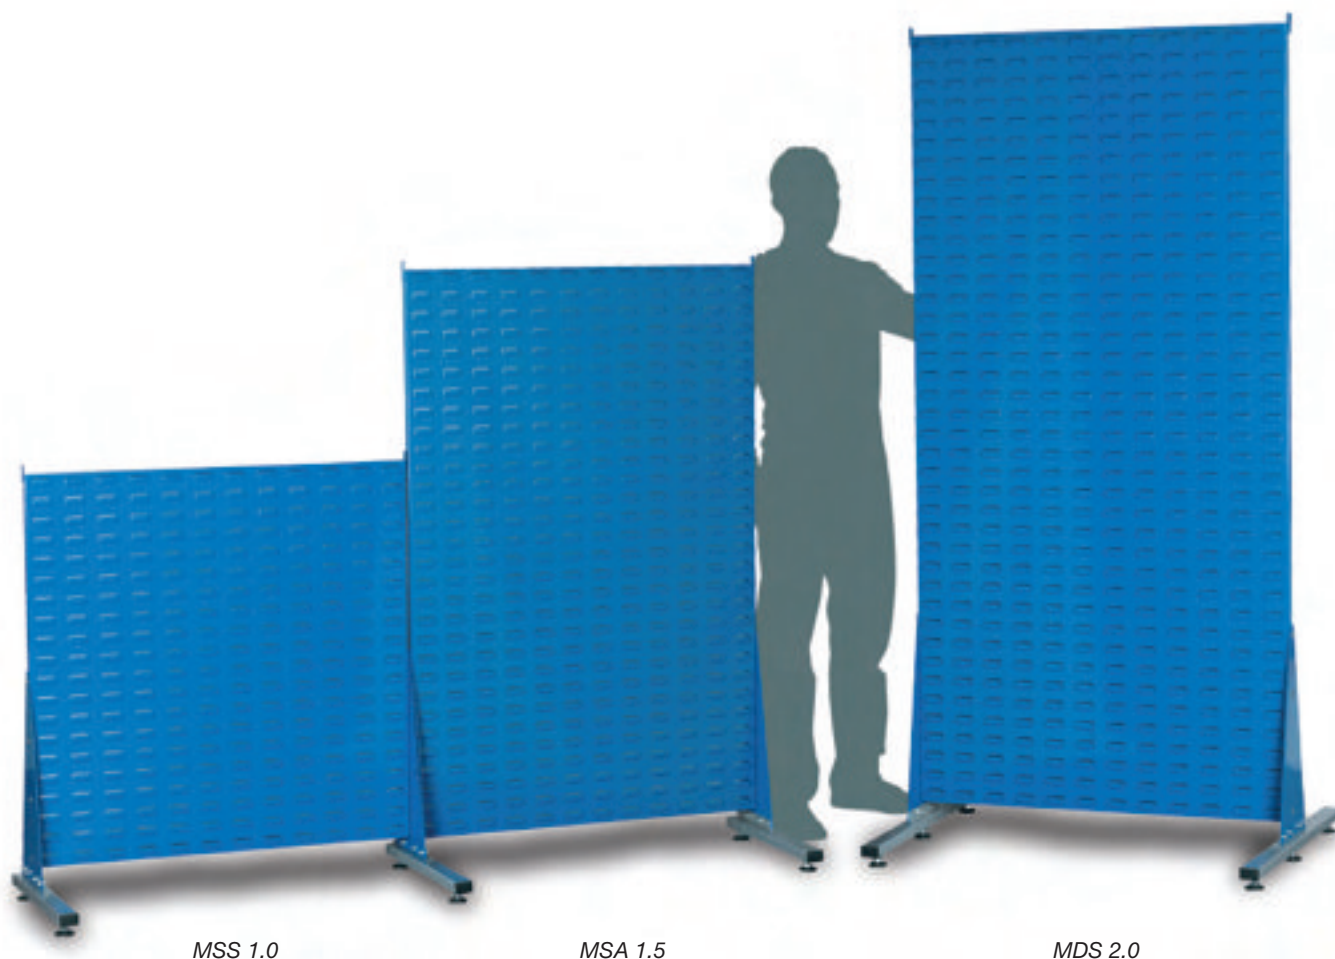

Single or double sided freestanding storage units available in 3 heights for increased storage capacity when using both Topstore TC and NXT-GEN containers (see pages 4 to 11) and accessories.

Units are finished epoxy powder coated blue with silver/grey feet.

For larger applications order one “starter” and the appropriate number of “addas” to make this a complete solution to suit individual requirements.

Heavy duty adjusters permit levelling on uneven surfaces.

Other colours available.

Topstore® - Visibins

Visibins represent a new concept in flexible modular storage and display of small parts, manufactured in blue polypropylene. Visibin Containers are available with or without a hinged clip-shut clear styrene lids. They provide a lightweight method of displaying and storing a variety of small parts in a dust-free environment.

Visibins are designed to lock onto their own zinc-plated wire mesh grid system creating a strong, lightweight unit with maximum product visibility.

BinFlag and SpinFlag Stock Indicators

The perfect visual stock control system for warehouse or workshop. The BinFlag and SpinFlag use a traffic light system to simplify stock control. Just set to Red for 'out of stock', Yellow for 'stock ordered' and Green for 'in stock' – for quick and easy inventory management.

Whatever size or style of operation, BinFlag and SpinFlag are your answer:

- Manufactured in hi-impact resistant ABS plastic, making them durable and robust - perfect for any tough environment.
- Easy to use and compliments your current system - can be used in conjunction with Topstore TC Semi-Open Fronted Containers or Topstore Clearbox Units.
- A visual system that creates a reduction in stock-checking time.
- BinFlags can be printed with your company logo to improve branding visibility.
- BinFlags are RFID (Radio-Frequency Identification) compatible so you can be future ready.

SpinFlag

BinFlag (S)

BinFlag (L)

For ease of integration the BinFlag and SpinFlag have a removable back plate which can be affixed to any type of storage bin using screws, glue or ultra strong double sided tape.

Description	H x W x D (mm) (including Backplate)	Order Ref	Pack Qty	Price (Per Pack)
SpinFlag (non RFID compatible)	37 x 37 x 20	SpinFlag	25	£87.50
BinFlag Small (RFID compatible)	45 x 80 x 10	BinFlag(S)	25	£123.75
BinFlag Large (RFID compatible)	50 x 112 x 10	BinFlag(L)	25	£137.50

TwinBin

The perfect visual stock control system for warehouse or workshop. Made in the UK, the TwinBin is a two-bin KanBan system to help you control your inventory. **Contact us for details.**

Advantages of the TwinBin KanBan System:

- Reduces stock outs.
- First In First Out (FIFO) stock rotation.
- Provides traceability of parts.
- Reduces stock held.
- Fully modular – Easy to change and adapt to changes in workflow.
- Quick and easy to install.

Both chambers are full of product. Only the first batch is accessible from the lower bin.

Pull slider to release reserve batch. The red flag indicates the top chamber is empty and replenishment is required

The yellow strip on top of the flag indicates that the bin has been scanned for replenishment.

The third batch is loaded into the upper chamber.

Top chamber has now been replenished and the flag has been reset.

TwinBin Range and Accessories*

The Locking Bar prohibits access to the top bin on the shop floor, which means pulling the slider is the most user friendly action to obtain the product, ensuring the system works efficiently.

The Flag device allows you to easily see which TwinBins need refilling.

The Flag devices can also be made RFID compatible to make your site even more efficient when combined with RFID tags, readers and software.

Topstore® – Clearbox Units

The ideal dust-free storage and display system for the warehouse, workshop, retail and trade. Each unit contains a number of removable transparent inner compartments suitable for a wide range of items with a beige outer body.

To provide the ultimate in flexibility of application, Clearbox can be fixed directly to the wall.

Whatever the format, Clearbox provides the answer.

- Flexible – suitable for a variety of uses and applications.
- Non-toxic – suitable for use with food stuffs.
- Strong – outer body manufactured from high-impact polystyrene plastic and inner compartments from ABS plastic.
- Order picking – tilting transparent compartments allow easy retrieval of items with maximum display potential.
- A retaining bar is available (for all Clearbox sizes) to secure individual compartments in place and prevent accidental displacement when in transit. Finished zinc plated.

All units have a common width of 600mm and are available in 6 sizes, each providing a different number of compartments suitable for a range of small components.

Topdrawer

A selection of free-standing units and trolley ideal for most environments. The range provides medium to high volume storage for small parts and is ideal for both office and factory use. The cabinets can also be bench or worktop mounted, or if required can be wall fitted (wall fixings are not included). A 48 drawer cabinet complete with doors is also available for secure storage.

A unique slide design ensures the drawers run smoothly. With an anti-drop structure the drawers are safely secured when in use. All cabinets are manufactured from pre-galvanised steel and powder coated in grey.

052002

052005

052003

Cabinets are supplied fully built. The trolley is supplied in knock down form (assembly required).

The drawers are manufactured from high impact ABS/Styrene and include inner dividers and I.D labels. They are fitted with clear front windows for easier visibility of stored items. Drawers are also oil corrosion resistant and have high impact strength. All of the drawers can be completely removed.

Additional dividers and index labels can be ordered separately.

Topstore® – Shelf Bins

Available in 17 sizes, these tough, blue polypropylene bins offer a practical alternative solution to cardboard or steel (other colours are available - please contact our sales department for details).

Shelf bins are impervious to most oils, greases and chemicals and make the best use of available shelf space, particularly when used with shelving systems.

The bin design includes a semi-open front, a facility for transparent dividers and a bin stop. For identification, durable plastic label holders (complete with labels) are available.

When not in use the bins will nest, reducing the amount of storage space required.

Bin Stop

Storemaster Box

The Storemaster Box is perfect for storing various items for the home, office or warehouse. Each container comes complete with two robust clips and a hinged folding lid for easy access, which also enables boxes to be stacked.

- Manufactured from a strong and durable co-polymer.
- Fully detachable hinged folding lids for easy access.
- Robust clip shut locking feature.
- Nestable when lids are not in use.
- Stackable when lids are fitted.
- Transparent container makes product selection easier.

See page 71 for containers kitted with shelving.

Eco-Rax

Eco-Rax is a robust boltless heavy-duty hand loaded shelving system consisting of powder coated blue uprights, galvanised frame beams and ties, chipboard shelves and black plastic feet.

Its design allows for quick assembly without the need for any special tools as the precision manufactured components are simply knocked into place with a soft-faced mallet.

The upright is pierced at 35mm pitches in the height.

Eco-Rax is suitable for a wide range of applications in the office, workshop, warehouse and home.

Heavy duty shelves have a capacity of 265Kg (UDL)

Complete bays are supplied with 5 shelves per bay.

Supershelf Bin Shelving

Storage bin shelving is the perfect way to store and organize small goods or components in stockroom, manufacturing or assembly environments. As part of the Supershelf range these shelving bays have the same zinc finish and light yet strong build.

Choose from complete bays of bin shelves or a combination of bin shelves and flat shelves.

- Shelves easily adjustable on 33mm pitch
- Bolt free and easy to build - simply slots together
- Fully assembled upright frames
- Smooth zinc finish - attractive and easy to clean
- Bin Shelf levels can accommodate up to 180kg
- Maximum bay weight loading is 1500kg
- 900mm width has 4 dividers
- 1200mm width has 5 dividers

Supershelf Archive Storage Shelving

The robust Supershelf Archive Shelving is ideally suited for archive boxes of standard size and weight. The configurations of the galvanized steel shelving system can accommodate from 30 to 60 archive boxes per bay making them perfect for storing medical records, accounting records, legal files, school or university archives and more.

- Shelves easily adjustable on 33mm pitch
- Bolt free and easy to build - simply slots together
- Fully assembled upright frames
- Smooth zinc finish - attractive and easy to clean
- Each shelf has a max loading of 300kg
- Maximum bay weight loading is 1500kg
- Available 1877mm wide x 500mm deep in a range of heights.
- Can be supplied with or without boxes

Toprax - Bolt Free Adjustable Shelving

Toprax is a high quality, fully adjustable bolt-free shelving system, requiring no special fixings. It combines the strength necessary to meet the specifications for commercial and industrial storage applications, whilst the unpierced face of the uprights and beams provide the style and elegance required for the office environment.

Clean, fully tooled components ensure the complete absence of sharp edges to safeguard you and your goods from damage.

The unique design of Toprax allows clear, unlimited entry, as there are no cross braces or gussets to restrict the loading of shelves or the selection of products.

The system can incorporate Topstore bins and is capable of being fitted with accessories to make the system suitable for garment hanging. The bays can be clad on the sides and rear with mesh or steel panels to make this one of the most flexible systems available.

A wide choice of frames and shelves are available. Shelves are fully adjustable on 50mm (2") centres and bays can be extended as required to cater for fluctuating stock and change in products.

For added convenience and faster installation, all units are supplied with full instructions for self-assembly.

Uprights are finished epoxy powder coated blue, beams and ties are epoxy powder coated silver/grey and shelves are galvanised as standard (other colours are available upon request, refer to choice on page 79).

Standard Single Bay + Extension Bay

Double Bay

Toprax - Bolt Free Adjustable Shelving

Flexibility

The flexibility, strength and stability of Toprax enables the system to be fitted with a range of accessories for varying storage requirements.

Garment Hanging

Using standard frame ties with specially designed brackets, and two diameters of hanging rail for differing sizes of hangers. It is an ideal way for the storage of clothing and other garments.

The system is totally flexible and can be fully adjusted to accommodate additional levels for fluctuating storage requirements.

Cable Reel Dispensing

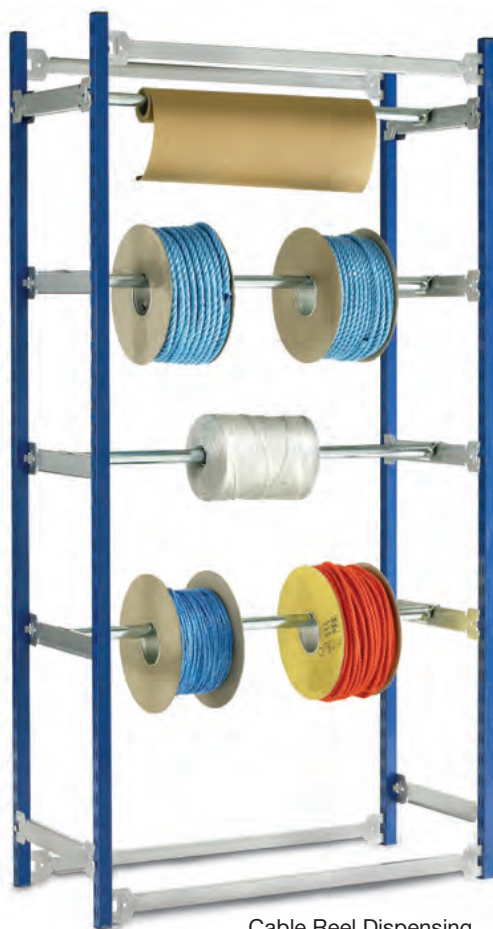

Using the same principle as Garment Hanging, the Toprax Cable Reel System is an extremely effective way of storing cable reels and offers quick dispensing with minimum of effort. Replacing empty cable reels is quick and easy as the cable reel support can simply be lifted from the bracket enabling quick changeover.

The special design of the hanging rail bracket allows full adjustment when unloaded. When loaded, the support bar can be firmly secured in place preventing unnecessary movement.

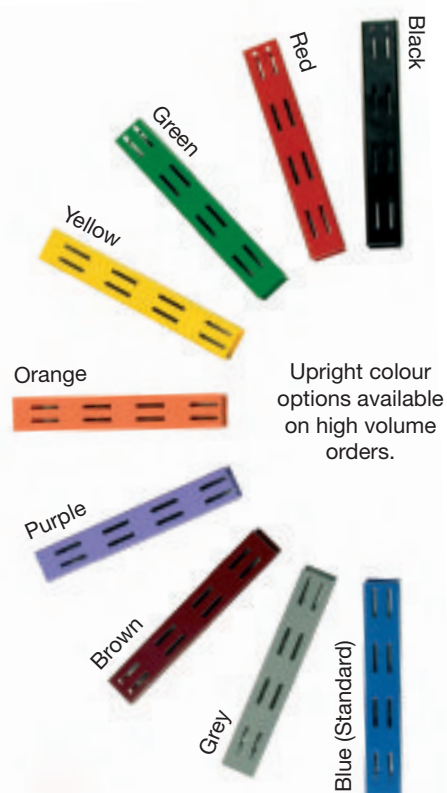

The system is totally flexible and can be fully adjusted to accommodate additional levels for fluctuating storage requirements.

Toprax - Garment Hanging

An ideal way for the storage of clothing and other garments. Two options (as shown below) are available, the first option is using standard frame ties with specially designed brackets and 2 hanging rails (32mm diameter), the second option simply uses the frame beams. Compatible with different sized hangers.

The system is totally flexible and can be fully adjusted to accommodate different levels for fluctuating storage requirements.

Max load capacity: For hanging rail (Option 1) - 60Kg(UDL)per rail

For beam hanging (Option 2) - 100Kg(UDL)per beam

(Ensure loads are evenly distributed along the width and depths of bays)

Floor fixing is required where shelving bays exceed a height to depth ratio of 4:1

Shelf Tray Shelving Kits

A range of high density Shelf Tray Shelving kits which fully utilise each bay giving ideal storage for small parts in warehouses, storerooms or workshops.

The Shelf Trays are designed for strength and ease of use. These Shelf Trays feature a spring loaded shelf stop at the rear of the tray. this means that the tray can be withdrawn from a shelf and suspended offering around 90% clear picking.

The Shelf Trays can be sub-divided from right to left and all trays and dividers are supplied with labels.

The Shelving Bays/Shelf Trays are available in three depths and there are 8 different bay configuration options. Bays can be extended using Extension bays to create a continuous run.

Loadings:

Maximum Bay Load: 3000Kg

Shelf Loadings (UDL):

300mm Depth: 110Kg

400mm Depth: 100Kg

500mm Depth: 90Kg

Toprax - Longspan Bay Shelving

Toprax can also be used as a Longspan shelving system for the storage of longer/larger goods where a standard shelving system would not be suitable.

Based upon the standard Toprax design, it is a cost saving alternative to conventional fully braced longspan systems with a comparable load capacity.

Toprax longspan can be supplied with galvanised steel or chipboard shelves.

- Shelving bays available H 1500mm / H 2000mm.
- Shelf sizes W 1740mm x D 290mm / D 440mm.
- Available with either 3 or 4 shelf versions.

Longspan Bay

For added stability of the beams a Beam Tie is also available.

Beam Tie, Shelf Stop + Steel Shelf

Toprax also offers unrivalled versatility as you can mix standard bays with longspan bays as shown, to offer multiple options dependant upon the type of goods to be stored.

Heavy Duty Rivet Racking

Heavy duty industrial racking that meets the demands of any warehouse, storeroom and workshop.

Rivet Racking offers incredible value for money with amazing strength and rigidity. The quality of the materials used and robust construction ensures it will meet the rigors of the toughest workplace.

The vast range of bay sizes allows for a solution to meet your storage needs and the available space. Flexibility of wide open bays and large shelf capacities enable products of varying weights and dimensions to be easily stored within a single system.

Longspan Shelving

Longspan shelving is perfectly designed to meet all types of requirements for storing medium weight items of different sizes. It is very quick and easy to assemble.

A wide range of frames, beams and components make this longspan shelving system highly versatile, suitable for storing most types of products from small components to heavy cartons.

Frames are a fully bolted construction consisting of epoxy powder coated blue uprights with galvanised bracings and beams are epoxy powder coated orange as standard, however, other colours are available.

All chipboard shelves are 25mm thick, quality P2 grade to increase the weight loading capabilities.

Kinetic Mobile System

KINETIC MOBILE SHELVING

A completely freestanding mobile shelving system, no drilling, no fixing down, no messy ground or civil works. It will not damage or disturb your carpet or floor covering in any way.

HEIGHT ADJUSTABLE ANTI TILT TRACK

The unique easy access adjustment ensures a level track on uneven floors and allows easy adjustment over the life of the product. This track offers an ultra safe anti-tilt mechanism and concealed end stop for safety.

KINETIC SHELVING

Below are two examples of shelving in the same area. The New Kinetic Mobile Shelving System increases shelving by as much as 100%.

UPTO **100%**
SPACE
SAVING

The mobile shelving system has been totally re engineered from the ground up making it easier to use and quicker to install. The brand new system incorporates safety features including a 'true' non slip floor and illuminated hand wheels indicating when the unit is in operation.

INTEGRAL FLOOR

Floor panels are now in modular sections and are wear resistant providing a secure, rigid and safe platform to walk on.

NEW ILLUMINATED HANDWHEEL

Super bright LEDs illuminate when the motion sensors detect the wheel is in use. They stay lit for a period after the wheel has stopped, this safety feature allows others to see that the unit is being used.

TRACK SPECIFICATION

Tracks in 1500mm and 2000mm modules enabling any track to be sized to the nearest 500mm minimising waste. A 30 x 30 x 3mm inwardly lipped C-Section high tensile running track is set in the outer track which houses the jacking mechanism and supports the boards.

FLOOR SPECIFICATION

Floor panels are now in modular sections for ease of installation and are wear resistant.

DRIVE SPECIFICATION

We offer various gear ratios to suit all needs, not only to control hand wheel effort but also acceleration. As a guide, using our standard 3:1 mechanical advantage, we would expect a 1000kg load to be require 0.30kg hand wheel effort.

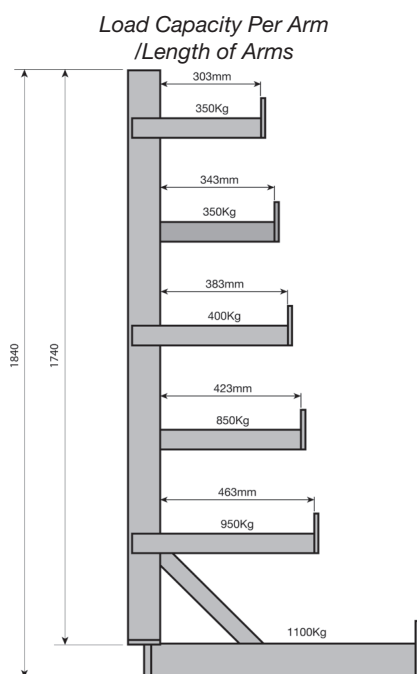

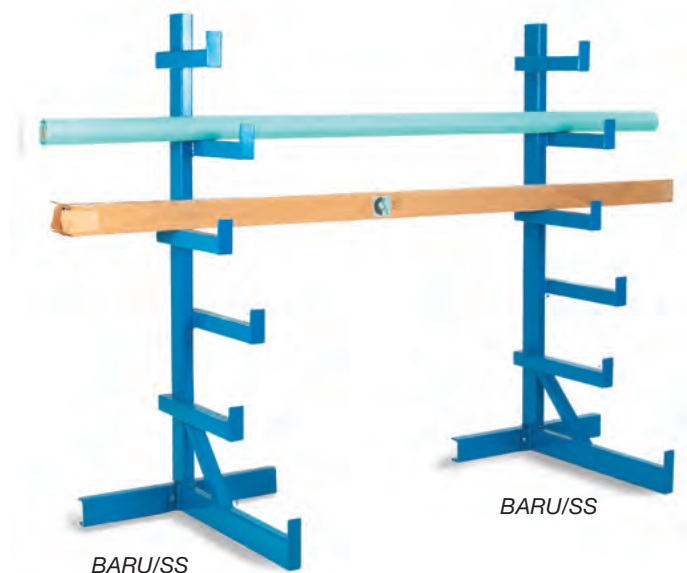

Racking

Bar Racks

Heavy-duty horizontal bar racks are freestanding units for the storage of bars, pipes and tubes etc. End stops retain products in position. Pre-drilled for floor fixing (fixings not included). These units are powder coated in blue and require no bracing, therefore can be positioned as required.

Racks can be positioned back to back to provide double-sided units.

Maximum capacity per rack - 4000Kg

Description	H x W x D (mm)	Order Ref	Price
Bar Rack Single Unit	1840 x 840 x 890	BARU/SS	£465.00
Bar Rack Double Unit (as shown above)	2 x Single Unit	BARU/SS/2	£930.00

Sheet Rack

Sheet racks simplify the storage and access problems of all sheet material, panels and boards. Minimum base frame height makes loading very easy. It is recommended that the racks are secured to the floor (fixings not included).

Supplied in knock down form.

Racks are powder coated in blue and have three storage divisions spaced nominally 155mm apart.

Description	H x W x D (mm)	Order Ref	Price (Each)
Sheet Rack	900 x 600 x 600	SR/0.6	£261.56

Racking

Vertical Bar/Sheet Racks

Fully welded steel construction with steel base suitable for vertical storage of bars, pipes and sheet materials.

- Pre-drilled base for floor fixing (fixings not supplied).
- Individual storage bays (D) 600 x (W) 250mm.
- Epoxy powder coated blue finish.

No. of Bays	H x W x D (mm)	Order Ref	Price (Each)
4	1500 x 1200 x 600	937-VBR4	£329.00
6	1500 x 1800 x 600	937-VBR6	£427.00
8	1500 x 2400 x 600	937-VBR8	£504.00

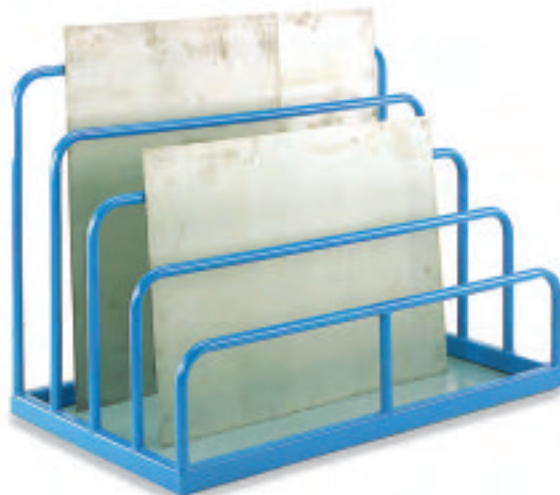

937-VBR4

Multi Height Sheet Rack

Ideal for off-cuts and other variable sizes of sheet and plate materials.

- Support bar heights: 400 / 550 / 700 / 850 and 1000mm.
- Distance between bars is 160mm.
- Fully welded steel construction with pre-drilled holes for floor fixing (fixings not supplied).
- Epoxy powder coated blue finish.

Description	H x W x D (mm)	Order Ref	Price (Each)
Multi Height Sheet Rack	1000 x 1400 x 800	937-MPR	£321.00

Full Height Sheet Rack

Multi-Purpose, fully welded steel sheet rack with formed steel base

- Height from base to central support beam is 575mm.
- Distance between uprights is 305mm.
- Pre-drilled holes for floor fixing (fixings not supplied).
- Epoxy powder coated blue finish.

Description	H x W x D (mm)	Order Ref	Price (Each)
Full Height Sheet Rack	1220 x 1080 x 1015	937-FHSR	£352.00

Vertical Storage Racking

A cost effective way of storing all those long and awkward items. The system comes as a starter and extension bay format meaning long runs are more cost effective.

The bays come with 3 dividers, all necessary frames and base plates, two front beams and one back beam and base rail. Other size racks available (please enquire).

- Ideal storage for long awkward items
- Quickly gets your storage organized
- Simple to build and reconfigure
- Fully adjustable hoop dividers
- Starter and extension bay system
- Can be secured to the floor (fixings not supplied)

Plastic Lockers

Our revolutionary tough polyethylene plastic lockers offer an alternative to conventional metal lockers. They are robust, hygienic and secure.

Features and benefits:

- Will not rust, dent or corrode.
- 7 Year Guarantee.
- Suitable for indoor and outdoor use.
- Ideal in damp, humid and corrosive environments.
- Three heights (450, 600, 900mm), all units 320mm wide x 460mm deep.
- Tough polyethylene material - highly vandal resistant.
- Retro-fit sloping top - to deter litter (sloping tops to be purchased separately).
- Grey bodies with blue, red, yellow or green doors.
- Very strong hinge that can withstand 240Kg before breaking.
- Easily stacked and nested with marked fixing points.
- Coin return and coin retain locks are also available, please enquire.

Three lock types available:

1. Camlock with 2 keys.
2. Swivel catch for use with padlock (padlock not supplied).
3. Programmable combination lock with a code finder and master override key.

Wire Mesh Lockers

Wire mesh lockers are becoming very popular within the storage industry. Manufactured from wire mesh they allow maximum visibility and ventilation whilst maintaining security.

All lockers are manufactured from 8mm and 6mm round bar. Mesh is 25 x 25 x 2.5mm. All lockers are fitted with hasp and staple for locking doors using a padlock (not supplied). Lockers can be manufactured to any size or dimension, they will bolt to the floor, side by side, back to back or to a wall. All lockers are finished in bright zinc.

ToolStor Wall Cabinets

ToolStor workshop wall cabinets are the perfect solution for organising your hand tools, accessories and small component storage at eye height, making the best use of your workshop space. They can be used either as stand-alone units or as part of a complete workshop integrated design. Each internal galvanised shelf is capable of holding 100Kg capacity uniformly distributed load (UDL) while the perforated lined doors are ideal for tools and tool accessory storage using a variety of hanging pegs and hooks.

- Shelf Capacity: 100Kg UDL.
 - Wall hanging capability.
 - 2 point cam lock mechanism.
 - 25mm internal pitch.
 - Reinforced perforated door liner.
 - Galvanised shelves.
 - 4 door colours available.
- (Add the following Suffixes to the order ref for the colours shown below).

ToolStor Kitted Workshop Cupboards

ToolStor Kitted Workshop Cupboards provide secure and organised storage through 80kg capacity drawers and 100kg capacity galvanised shelves. The fully welded steel carcass with 20.3mm front mouldings and a 1000kg uniformly distributed load (UDL) top load capacity sits on a fully-welded reinforced base with four heavy duty adjustable feet enabling you to level the cupboard with ease using a hex key. The heavy duty doors provide additional storage using a variety of tool hanging accessories. A variety of cupboard sizes are available to suit your individual storage needs.

- Shelf Capacity: 100Kg UDL.
- Drawer Capacity: 80Kg UDL.
- Push-to-shut paddle handle.
- 3 point slam bolt lock.
- 25mm internal pitch.
- 4 x adjustable feet.
- Galvanised shelves.
- 4 door colours available (Add the following Suffixes to the order ref for the colours shown below).

Safestore - Premium Hazardous Substance Cabinets and Bins

Our range of Hazardous Substance Storage Cabinets are designed to provide safe storage of Flammable Liquids, Chemicals, Paints, Pesticide and other Hazardous Substances.

Cabinets and bins comply with the requirements of:

- The guidelines set out in the Health and Safety Executive Guide HSG51 for the Storage of Flammable Liquids in Containers.
- The Highly Flammable Liquids and Liquid Gases Regulations, Section 5 (1,D) and the guide to regulation No. 5 (17)
- The factory inspectorates Certificate of Approval No. 1 parts 3 and 4.
- The Dangerous Substance and Explosive Atmospheres Regulations (DSEAR) Approved Code of Practice (ACoP) L136 paragraphs 94-96 along with Appendices A & B and paragraph 104 which details the performance requirements for fire resisting cupboards and bins. It is however important to emphasise that they do not specify an absolute test or standard for the cabinets or bins, rather they relate to the nominal construction principles.

Cabinet Specification:

- Constructed in 1.2mm thick mild steel, with welded seams.
- Door is reinforced to prevent distortion.
- Chrome plated 'L' style lever handle and two point steel locking mechanism (supplied with two keys) on double door cabinets and thumb turn on single door cabinets.
- Supplied with fully adjustable shelf trays (adjustable on 25mm pitches). Perforated drainage holes in shelf tray to allow spillages to drain into sump. Shelf capacity 35kg (U.D.L) to a maximum of 250Kg per cabinet.
- Integral, non-removable, spillage sump in the base of the cabinet/bin to contain major spills.
- Epoxy powder coated in yellow.
- Supplied with the relevant warning labels displayed on the doors.

External Drum Stores

- Manufactured from 2mm sheet steel.
- Incorporates a built-in leakproof sump.
- The up and over lids are assisted by gas springs for ease of opening and closure (available on VL and HL models).
- Provision for locking is made via a hasp and staple on VL and HL models (padlock not supplied).
- Designed with fully opening door/doors with secure two point locking mechanism. VLD and HLD models include gas spring assisted lids.
- Suitable for pallet truck and/or fork-lift truck conveyance.
- Available for housing one, two or four drums.

Economy Galvanised Store

The perfect solution where a bunded storage facility is required on a tight budget. This store is extremely durable and will withstand all weather conditions. The walls and doors are manufactured from profiled galvanised steel panels, doors are complete with a two point flush fitting integral locking system. The pitched roof which is designed for effective rain water dispersal is manufactured from galvanised steel roof cladding.

Each unit contains high and low natural ventilation and a 1140 litre capacity leakproof sump and comes complete with two levels of fixed galvanised shelving along both sides of the store.

Please Note: The Economy Galvanised Bunded Store is not designed to store temperature sensitive liquids, such as low flash point flammables or paint. Please refer to the One Hour Fire Rated Safety Store (page 135), a unit that is specifically designed for such liquids.

General Purpose Safety Store

Designed for the storage of flammable, chemical and other hazardous liquids. The General Purpose Safety Store is constructed from 2mm profiled mild steel sheet over 50 x 50 x 3mm RHS. The store design also incorporates a fully welded leakproof sump over the entire base area of the unit to a depth of 190mm. The store has high and low level flame arrested ventilation, comes with removable galvanised grid flooring, as well as full length fixed galvanised shelving along both sides of the store. The store also has full width, fully opening, double doors fitted with two point flush fitting integral locking system.

Please Note:

- The General Purpose Safety Store is not designed to store temperature sensitive liquids, such as low flash point flammables or paint. Please refer to the One Hour Fire Rated Safety Store (page 135), a unit that is specifically designed for such liquids.
- The General Purpose Safety Store can be tailor-made to your exact specification.

Dual Purpose Storage Unit

Our Dual Purpose Units are designed to store 205 litre drums and 1000 litre IBCs. All units are welded for added strength and constructed from 2mm profiled mild steel sheet over 100 x 50 x 3mm RHS.

They have a fully welded leakproof sump over the entire base area to a depth of 220mm.

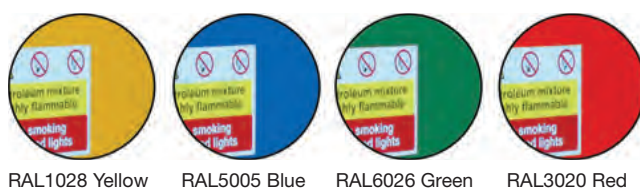

Other features include high and low level vents, padlockable sliding doors (E-DPSU64/16C & E-DPSU96/24C have sliding doors on both long sides) and both levels have support bearers. These units comply with the Control of Pollution (Oil Storage) (England) Regulations 2001, The Water Environment (Oil Storage) (Scotland) Regulations 2001, EA Guidance Note PPG26, The Health & Safety Executives Guidelines for the Storage of Flammable Liquids HSG51 and other UK Health, Safety & Environmental regulations.

Bespoke manufacturing for this product available, please contact for further details.

Optional Extras:

- Removable galvanised grid shelving
- Insulation
- Heating
- Temperature control
- Lighting
- Fire Detection

Dual Purpose Pushback Storage Unit

The Dual Purpose Pushback Units are designed to store 205 litre drums and 1000 litre IBC's. All units are welded for added strength and are constructed from 2mm profiled mild steel sheet over 100 x 50 x 3mm RHS. They have a fully welded leakproof sump over the entire base area to a depth of 220mm. All units have high and low Flame arrested vents and come with pad-lockable sliding doors.

The space saving Pushback System allows you to stack pallets/IBC's, two deep, on one shelf.

How does it work? Place the first pallet on the Pushback cradle, on the shelf, and push back the next pallet against the first one. When you take a pallet off the shelf the next pallet glides forward. Based on a safe, proven, pallet rack system.

All units comply with the Control of Pollution (Oil Storage) (England) Regulations 2001, The Water Environment (Oil Storage) (Scotland) Regulations 2001, EA Guidance Note PPG26, The Health & Safety Executive Guidelines for the Storage Of Flammable Liquids HSG51 and current Health, Safety & Environmental regulations.

Bespoke manufacturing for this product available please contact for further details.

Optional Extras:

- Fire-rated Insulation for the storage of temperature sensitive liquids
- Heating
- Temperature control
- Lighting
- Fire Detection

One Hour Fire Rated Safety Store

This durable unit is designed for the safe storage of highly flammable liquids, petroleum mixtures, pesticides and other hazardous materials. The exterior wall panels and roof are manufactured from Swedish steels MICA pre-coated sheet steel, giving superior performance, colour stability and resistance to degradation. The walls, doors and roof of the unit are insulated with 75mm Rockwool Firebatt. The base of the unit is fully welded and acts as a leakproof sump covering the entire floor area. As standard, the unit comes with high and low flame arrested ventilation and galvanised grid flooring as well as a secure Yale lock with internal override. Optional extras include Zone 1 lighting, heating, extraction systems, sprinkler systems, fire detection and temperature control as well as a variety of shelving options.

Bespoke manufacturing for this product available please contact for further details.

These units carry with them a One Hour Fire Rating as tested and approved by the Warrington Fire Research Centre in compliance with BS476: Part 22 1987 clause 5.

Please Note: The unit shown below is fitted with optional extras.

Multi Purpose Storage Unit

These units are designed to store 205 litre drums, 1000 litre IBCs and are manufactured from 2mm mild steel over 100 x 50 x 3mm RHS. There are two models available and both have compartmentalised sumps for segregation of potential spillages.

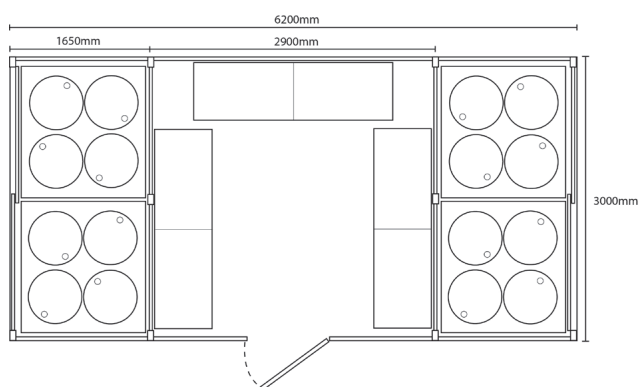

Model E-MPSU1 features

- Two level storage for 16 x 205 litre drums or 4 x IBCs in one end of the unit on support beam bearers.
- Includes a walk-in storage area with shelving in the other end of the unit with two point locking.
- Drum and IBC storage section has padlockable sliding doors.
- Galvanised grid shelving for drums and IBCs are available as an additional cost option

Model E-MPSU2 features

- Two level storage for 32 x 205 litre drums or 8 x IBCs on each end of the unit on support beam bearers.
- Includes a walk-in storage area, with shelving in the middle of the unit, with two point locking.
- Drum and IBC storage sections have padlockable sliding doors.
- Galvanised grid shelving for drums and IBCs are available as an additional cost option.

IT Trolley

Designed to provide an all-in-one storage solution for workplace IT equipment. The design integrates a sliding drawer for keyboard storage and a V.D.U mount bracket to hold a monitor. The lower half of the IT trolley provides tool storage and a large lockable drawer.

- Keyboard shelf made from 1.2 mild steel on telescopic slides.
- V.D.U mount bracket to support monitor.
- 2 x 75mm Nylon swivels castors and 2 x 75mm Nylon swivels castors with brakes.
- Made from 60 x 40 x 1.5mm ERW tube.
- Shelves and channels made from 1.5mm mild steel.
- Holes are supplied on the outside of both vertical frames to enable the trolley to carry a 400mm service duct if required.
- Additional base tray and service ducts sold separately.

IT Trolley shown with additional accessories, sold separately. Computer and Monitor not included.

Drawer Colour Options: Please add letters to the end of the order ref.

Balance Trolleys

Our range of Balance Trolleys are a fully welded, blue enamelled sturdy steel construction giving a 500Kg capacity (U.D.L.) with a choice of either solid rubber cushion or pneumatic wheels for rough terrain. The central axle gives perfect balance and ease of manoeuvrability. Each model has a softwood deck and ends with an optional removable sided trolley.

Double Handle Balance Trolleys

- Steerable from both ends.
- Choice of Ø355mm Rubber Cushion or Ø400mm Pneumatic Wheels.

Bottle Skips & Mobile Tapered Trucks

Specially designed trucks available in a choice of various capacities to suit most environments.

- Both ranges manufactured from tough, food grade medium density blue polyethylene.
- Smooth interiors for easy cleaning.
- Fitted with nylon wheels/castors.
- Available in 100% recycled black (please note, recycled material is not food grade).
- Blue & black recycled available from stock, other colours available (please enquire).

Bottle Skips

- Available in 5 sizes without lids.
- Stackable and nestable.
- Specially produced for hotels, bars or work environments where space is at a premium.
- Both models fitted with 4 no. Ø50mm swivel castors.
- Designed for confined spaces and storage of empty bottles and general waste.
- Handles included on the trucks.

Chrome Laundry & Linen Trolleys

- Finished in hard wearing blue chrome, the open wire design is easy to clean and offers excellent strength-to-weight ratio and air flow.
- Laundry trolley is used for collection and storage of goods.
- Linen trolley is used for distribution of clean linen only.
- Quick and easy to assemble.
- Shelves are adjustable at 25mm pitches.
- Ø125mm rubber cushion swivel castors. (2 supplied as braked).

Dollies

Blue Plastic Dolly

A lightweight polypropylene container dolly fitted with 4 No. black swivel 80mm dia. nylon castors. Ideal for easy transportation of bulky items.

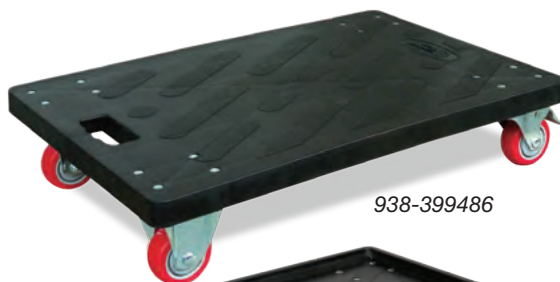

- Injection moulded construction.
- Carrying handle for easy transportation when not in use.

Description	H x W x D (mm)	Capacity (Kgs)	Order Ref	Price (Each)
Blue Plastic Dolly	110 x 400 x 600	100	BPD	£34.00

Plastic Dollies

- Choice of two dollies, one with a raised lip around three sides and towing hook at one end.
- Durable, anti-slip injection moulded plastic platform.
- With built-in ergonomic carrying handhole.
- On two fixed and two braked swivel, 75mm dia. polyurethane tyred non marking castors.
- Fitted with steel reinforcing steel bars to the underside of platform.

938-399486

938-399487

**WARRIOR Manual High Lift Pallet Trucks**

Our Manual High Lift Pallet Truck is ideal for heavy duty applications as a combined pallet truck and lift table.

The truck lifts by pumping the steering handle and lowers by pulling the hand trigger, allowing for stepless easy lowering even under maximum load.

- Lift height 800mm.
- Lowered height 85mm.
- Quicklift below 250Kg.
- Adjustable stabilisers.

Description	Capacity (Kg)	Fork Dimension (mm)	Individual Fork Dimensions	Fork Roller Dimensions	Steer Wheel Dimensions	Order Ref	Price (Each)
Warrior High Lift Pallet Truck	1000	1170 x 540	160 x 50	75 x 50	180 x 50	WR10540	£572.31
Warrior High Lift Pallet Truck	1000	1170 x 685	160 x 50	75 x 50	180 x 50	WR10680	£609.23

**WARRIOR Easy Roller**

The Warrior Easy Roller has been designed to assist the operator by utilising leverage from the handle and transferring the effort to the main steer wheels. This allows the operator to push down on the handle and begin to move the truck with a much lesser effort than would normally be required. The controllability is such that you can even climb over small lips which would cause a normal loaded pallet truck a problem.

Direction is controlled by a foot pedal and movement is actuated utilising a direct mechanical drive system as opposed to a friction system. The system can also be disengaged and then used as a conventional pallet truck. This system can be retro fitted to many of our other non-standard pallet trucks.

WARRIOR MiniStackers

Our Ministackers are excellent for the everyday light duty work area where loads to be lifted far exceed "the manual handling directive" but do not demand a heavy duty industrial stacker. With a capacity of 400Kg and 3 lift height options the ministackers are suitable for many internal jobs.

- Smooth operating foot pump.
- Position lifting.
- Pressure/overload valve.
- Smart chromium plated frame.
- Powder coated platform.
- Smooth running braked steer wheels.
- Very manoeuvrable.
- CE marked and supplied with Certificate of Conformity.

Stackers

WARRIOR Manual Stackers

Our Manual Stackers are a cost effective way of handling goods. High build quality and materials give these stackers durability and value. Various model options for most applications.

Special designs available (please enquire).

- Pulling Handle.
- Brake.
- Steer Wheel Foot Guards.
- Full Guarding.
- Tandem Lift Chains.
- Manual Lift and Travel.
- Adjustable Forks (WRVFS).

Semi Electric Stackers

WARRIOR Semi Electric Stacker With Wrapover Forks

- Heavy duty 1500W electro-hydraulic power pack.
- Steering/Pulling Handle.
- Brake.
- Steer wheel foot guards.
- Full guarding.
- Tandem lift chains.
- Manual Push/ Electric Lift.
- 90° Stacking Aisle (1000mm long x 1200mm wide) 2145mm.
- 12v 150Ah battery.
- Built in automatic charger.
- Available with adjustable forks.

Description	Capacity (Kg)	Load Centre (mm)	Min Fork Height (mm)	Max Fork Height (mm)	Overall Fork Width (mm)	Fork Length (mm)	H x D (mm) (Note: Height is lowered and extended mast height)	Rear Wheel Size (mm)	Front Wheel Size (mm)	Turning Radius (mm)	Order Ref	Price (Each)

Lift Tables

WARRIOR Manual Mobile Lift Tables

Our comprehensive range of mobile lift tables are manufactured to withstand the most arduous working environments normally associated with industrial applications.

- 9 models.
- Robust and reliable.
- High quality hydraulics with a positive feel.
- Infinitely controlled lower.
- Foot brakes fitted to swivel castors.
- Conforms to BSEN 1570-4.

Gas Cylinder Handling

For the safekeeping of gas cylinders around your premises. All are of tubular steel construction powder coated in blue or galvanised. Stands and wall brackets are fitted with a galvanised chain to hold cylinders securely.

CWB/3W

Cylinder Wall Brackets

- For stability and safe storage of cylinders.
- Cylinders secured by galvanised chain.
- Epoxy powder coated in blue.
- Wall fixings not included.

CWB/2W

Description	Max Cylinder (Ømm)	H x W x D (mm)	Order Ref	Price (Each)
Cylinder Wall Bracket for Two Cylinders	280	40 x 650 x 155	CWB/2W	£45.00
Cylinder Wall Bracket for Three Cylinders	280	40 x 965 x 155	CWB/3W	£54.00

Galvanised Cylinder Wall Racks

Two and three cylinder wall racks suitable for internal and external use. Supplied with galvanised steel retention chains and pre-drilled holes for wall fixing (fixings not supplied).

- Two models available for 100 - 180mm and 140 - 270mm diameter gas cylinders.
- Racks must be wall fixed at a height of at least two-thirds of cylinder height.

Description	W x D (mm)	To suit Cylinder Dia. (mm)	Order Ref	Price (Each)
Two Wide	538 x 155	100 - 180	937-SC200G	£82.00
Three Wide	765 x 155	100 - 180	937-SC201G	£85.00
Two Wide	765 x 195	140 - 270	937-SC202G	£85.00
Three Wide	1045 x 195	140 - 270	937-SC203G	£89.00

937-SC202G

937-SC203G

Cylinder Floor Racks

Single and double sided cylinder floor racks for 2, 3, 4 or 6 cylinders. Supplied with pre-drilled holes for floor fixing (fixings not supplied).

- Two models available for 100 - 180mm and 140 - 270mm diameter gas cylinders.
- Racks supplied with galvanised steel retention chains.

Description	W x D (mm)	To suit Cylinder Dia. (mm)	Order Ref	Price (Each)
Single Sided - 2 Cylinder	540 x 370	100 - 180	937-SC300	£122.00
Single Sided - 3 Cylinder	770 x 370	100 - 180	937-SC301	£141.00
Single Sided - 2 Cylinder	725 x 400	140 - 270	937-SC302	£131.00
Single Sided - 3 Cylinder	1040 x 400	140 - 270	937-SC303	£151.00

937-SC305

Cylinder Handling

A range of storage and handling solutions for the safekeeping and movement of gas cylinders around your premises.

Cylinder Stand

- For stability and safe storage of gas cylinders.
- Cylinders secured by hinged bar and winged nuts.
- Epoxy powder coated in blue.
- Heavy duty base plate can be floor fixed (*fixings not supplied*).

Description	Max Cylinder (Ømm)	H x W x D (mm)	Order Ref	Price (Each)
Cylinder Stand	280	600 x 340 x 310	CS/280	£120.00

Single Cylinder Trolleys

- Trolleys are of tubular steel construction powder coated in blue with a pierced base plate to help disperse condensation.
- Trolleys and wall brackets are fitted with a galvanised chain to hold cylinders securely
- Rear wheel models are fitted with 100mm diameter swivel blue vulcanised rubber castors, which offers low rolling resistance

SCT/280

SCT/280/RW

Description	Wheels (Ømm)	Max Cylinder (Ømm)	H x W x D (mm)	Order Ref	Trolley Capacity (kg)	Price (Each)
Single Cylinder Trolley	200	280	1050 x 483 x 520	SCT/280	150	£125.00

Drum Handling

Drum Dollies

A range of heavy duty steel drum dollies.
Powder-coated finish.
Designed for 210 litre drums.

BGD80

DD4

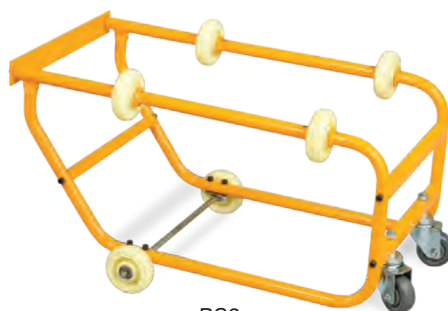

Description	Castor Size (Ømm)	Capacity (Kg)	Order Ref	Price (Each)
Pressed Steel 4 Wheeled Drum Dolly	80	300	BGD80	£46.00
Heavy Duty Steel 4 Wheeled Drum Dolly	76	400	DD4	£79.00

Drum Stands

Our range of heavy duty, powder coated blue steel drum stands are designed for 210 litre drums.
Enables drums to be tilted from vertical to horizontal position for decanting or storage.
Three choices available.

BS

BS2

Description	Height of Drum from Floor (mm)	Capacity (Kg)	Order Ref	Price (Each)
Drum Stand	280	220	BS	£89.00
Drum Stand c/w Two Fixed Wheels and Two Swivel Castors	330	220	BS1	£139.00
Drum Stand c/w Two Fixed Wheels, Two Swivel Castors and Drum Rollers	330	220	BS2	£156.00

Drum Transporters

Our heavy duty steel drum transporter is designed for the safe storage and transportation of 210 litre drums.
Enables drums to be tilted from vertical to horizontal position.

BS4

Description	Height of Drum from Floor (mm)	Capacity (Kg)	Order Ref	Price (Each)
Drum Transporter c/w Twin Extendable Handles (Galvanised)	400	300	BS4	£140.00

Drum Trucks

A range of steel, powder coated, heavy duty drum trucks for use with 100 to 210 litre steel drums.

- DT45 and DT45E are fitted with a drum-retaining hook.
- DT45G has a pincer grab to secure steel drums.
- DT45U can cater for steel, plastic and fibre drums.

DT45

DT45E

DT45G

DT45U

Description	Wheel Type	Wheel Dia. (mm)	Capacity (Kg)	Order Ref	Price (Each)
Drum Truck	Solid Rubber	260	400	DT45	£157.00
Drum Truck c/w Rear Wheel and Brake	Solid Rubber	260	400	DT45E	£180.00
Drum Truck	Pneumatic	260	400	DT45A	£231.00
Drum Truck c/w Pincer Grab	Solid Rubber	260	400	DT45G	£197.00
Multi-Purpose Drum Truck	Solid Rubber	260	400	DT45U	£140.00

Drum Trucks

Fitted with a drum-retaining hook suitable for handling tight head and open top 210 litre steel drums.

- Enables easy mobility of 210 litre steel drums.
- Available with or without rear wheels. The rear wheel attachment considerably reduces operator effort.
- Both drum trucks come with full operating instructions.
- All rear wheel models are fitted with 100mm diameter swivel blue vulcanised rubber castors and 250mm diameter rubber wheels, which offers low rolling resistance, meaning they are easy to manoeuvre, are non marking and a soft yet highly durable compound.

DT/RW

DT

Description	H x W x D (mm)	Order Ref	Capacity (Kg)	Price (Each)
Drum Truck	1520 x 420 x 610	DT	280	£275.00

Drum Truck Rear Wheel Attachment	-	RW/DT		£90.00

Drum Trucks

Universal Drum Truck

This Universal Drum Truck is suitable for steel, plastic or fibre drums.

Welded construction from flat and tubular steel.

Fitted with an adjustable quick-release strap enabling the loaded drum to be transported securely and safely.

Finished in blue epoxy and fitted with 200mm diameter rubber cushion tyres and roller bearing wheels.

Description	H x W x D (mm)	Toeplate W x D (mm)	Order Ref	Price (Each)
Universal Drum Truck	1330 x 660 x 330	530 x 250	937-DT250	£157.00

Pallet Loading Drum Trucks

Designed to assist with loading and unloading 210 litre drums onto pallets or platforms. The trucks are fitted with a drum retention clamp to ensure safety and stability when loading/unloading of drums.

A retro-fittable clamp attachment for handling plastic drums is available.

A maximum pallet height of 190mm is advised for safe use.

Finished in blue epoxy and fitted with 2 no. 250mm diameter and 2 no. 200mm diameter solid rubber tyres with roller bearing wheels.

Clamp Attachment for Plastic Drums Ref. 937-DT61

Clamp Attachment for Plastic Drums	130 x 340 x 725	937-DT61	£76.00

Drum Handling

WARRIOR Drum Porter

Easy to use, lifts the drum hydraulically off the floor for transportation and smoothly lowers it via a spring return knob.

The simple but very effective Drum Porter makes light work when moving 205 litre steel drums around.

Description	Capacity (Kg)	Lifting Height (mm)	Lifting per stroke (mm)	Max Drum Diameter (mm)	Max Drum Length (mm)	Max Height in Lowered Position (mm)	Max Height in Raised Position (mm)	Length (mm)	Width (mm)	Net Weight (Kg)	Order Ref	Price (Each)
Drum Porter	250	200	22	572	915	1000	1215	810	800	42	WRDT250	£461.54

WARRIOR Drum Porter with Wide Straddle

This Drum Porter has a wide straddle and is designed to enable the unit to lift 205 litre drums from euro pallets (800mm wide).

The Drum Porter is easy to manoeuvre and comes with large polyurethane wheels and is fitted with brake.

Description	Capacity (Kg)	Lifting Height (mm)	Lifting per Stroke (mm)	Max Drum Diameter (mm)	Inside Straddle (mm)	Outside O/A Straddle (mm)	Order Ref	Price (Each)
Drum porter (Straddle)	250	200	22	572	850	1015	WRDTW250	£396.92

WARRIOR Drum Porter Override

Our Drum Porter Override has a wide straddle and a cantilevered frame which allows it to pass over a 800mm max. wide pallet allowing drums to be manoeuvred both on and off with ease.

The Drum Porter is easy to manoeuvre and comes with large polyurethane wheels.

Having a combination of wide straddle and cantilevered chassis also enables this Drum Porter to lift drums from corners of spillage containment units.

Description	Capacity (Kg)	Max Drum Height (mm)	Min Drum height (mm)	Drum Diameter (mm)	Inside Straddle (mm)	Outside O/A Straddle (mm)	Order Ref	Price (Each)
Drum Porter Override	250	1180	910	572	850	980	WRDTR250	£452.31

12 months ON SITE parts & labour warranty

WARRIOR Drum Porter Plus

The Drum Porter plus will handle 140 or 205 litre drums on and off bound pallets as well as regular pallets.

Description	Capacity (Kg)	Lifting Height (mm)	Lifting per stroke (mm)	Max Drum Diameter (mm)	Max Drum Length (mm)	Max Height in Lowered Position (mm)	Max Height in Raised Position (mm)	Length (mm)	Width (mm)	Net Weight (Kg)	Order Ref	Price (Each)
Drum Porter Plus	450	500	12	572	915	1250	1380	900	1020	165	WRDTF450	£1,135.38

WARRIOR Drum Positioner

Our Drum Positioner is a versatile drum stacker as it allows the operator to attach the 205ltr steel drum, lift, rotate and discharge the content safely at height.

Lift is performed hydraulically by handle and pedal and rotation mechanically via a hand wheel. Drum rollback is prevented by 30:1 ratio transfer box.

The Drum Positioner will allow stacking of drums up to a maximum height of 1350mm. Due to the design of the jaw mechanism it is possible to release the drum when safely in the horizontal position.

Rotation can be locked in both vertical and horizontal.

Description	Capacity (Kg)	Overall Lifting Height (to underside 210ltr drum) (mm)	Overall Height (mm)	Overall Width (mm)	Overall Length (mm)	Inside Straddle (mm)	Overall Leg Height (mm)	Net Weight (Kg)	Order Ref	Price (Each)
Drum Positioner	450Kg	1500	2100	1000	1400	770	150	185	WRDTP45	£984.62

WARRIOR Gator Grip Forklift Drum Grab

- Carry one or two drums by automatic grip lock, maintains a positive grip over rough floor surface.
- The Gator Grip onto lock feature will not open and ensures safe secure drum transport.
- Grip head has different position to fit different heights.
- Easily operated, extremely secure.

WRDG360A

WARRIOR Automatic Drum Clamps for Fork Lift Trucks

Our Automatic Drum Clamps fit quickly and easily onto the forks and secured via hand screws. Once fitted, the drum clamp will automatically pick up, transport and deposit drums without the driver needing to leave the truck. The drums are held in position by using their own weight to tighten the arms. When deposited the arms of the clamp simply slide away from the drum. Available for steel 205 ltr drums in either single or double drum configuration and now the WRDG50 for single plastic drums.

WARRIOR Fork Mounted Drum Tippler

- For 205 Litre steel drums.
- For tipping, pouring etc.
- Converts your fork lift truck into a drum handler.
- The 10m pull-chain loop allows control from the driver's seat.
- It has 30:1 ratio gear box preventing gravity roll.

Description	Capacity (Kg)	Fork Pocket Size (mm)	Overall Width (mm)	Distance Between Fork Pockets (mm)	Order Ref	Price (Each)
Fork Mounted Drum Tipper	680	65 x 180	980	620	WRHK285B	£824.62

WARRIOR Forklift Maintenance Platform

- For overhead access and maintenance with safety.
- Spring loaded inward opening door with safety latch for safe entry.
- Unit is secured to the fork with heel pins and chain.
- Slip-resistant floor with drainage holes.
- Conforms to health and safety guidance note issue 3 PM28 and GN48 standard.
- Less storage space, portable and easy to assemble.
- Fitted with personal guard and castors for easy manoeuvrability.

Drum Spill Pallets

- Bunded secondary containment product designed for the for the storage of 205 litre drums within the working environment to contain any liquid spills
- Constructed from chemical resistant UV-stabilized PE
- Compatible with most forklift, pallet and stacker trucks
- Removable platform grid for easy cleaning
- Platform with hand inserts and holes for inspection and pump insertion
- Resistant to a wide range of chemicals, will not corrode
- Stackable 4 drum option available for ease of storing and shipping
- Fully compliant with the current UK Oil Storage Regulations
- Capacity meets, exceeds, UK, European and US regulations

Pallet Leveller

The Warrior Pallet leveller is ideal for any warehouse as it creates the ideal working height which prevents the operator from bending. As the pallet is unloaded the pallet leveller increases its height to ensure the ideal working height is never compromised.

The 360° rotating turntable eliminates the need for the operator to walk around the pallet when loading or offloading.

WARRIOR Pallet Leveller

- Robust and solid design.
- Easily change the spring combination for a different load profile.
- Supplied complete with fork pockets which enable the pallet leveller to be transported easily.
- No power source required.
- Levelling feet optional (please enquire)
- Load parameter required upon placing order.
- Capacity: 200-2000Kg (3 springs / 4 combinations)
- Maximum load dimensions: 1422 x 1270 x 1829mm high
- Weight: 173Kg

Description	Maximum Raised Height (mm)	Maximum Closed Height (mm)	Rotating Turntable Diameter (mm)	Order Ref	Price (Each)

Fork Mounted Skips

Combi Tipping Skips

Description

Designed to simplify the holding, movement and disposal of material in confined areas with the unique '4 way entry' base. The skip is supplied as manual operation as standard, but automatic tipping at high level can be achieved by ordering the conversion kit allowing the forklift / tele handler driver to empty the skip without leaving the safety of his seat.

Standard Features

- Low loading height
- Reinforced leading edge and body sides
- 4 way fork pocket entry

- Secondary Locking Mechanism to prevent accidental discharge
- Fully seam welded for retention of fluids
- Manual handle override
- Maximum fork section 150 x 50mm at 675mm centres
- Zinc plated heel pins for safe attachment to truck
- Painted bright orange for safety

Optional Features

- Conversion kit for automatic operation
- 125mm diameter nylon castors
- Colour finish for waste separation or department

Description	L x W x H (mm)	Capacity (kg)	Weight (kg)	Centre of Gravity (mm)	Order Ref	Price (Each)
Combi Tipping Skip	1600** x 1060 x 830*	750	222	785	ICUS-1	£701.43

Combi Tipping Skip	1800** x 1560 x 955*	1500	277	650	ICUS-4	£1,030.00

*Add 205mm to the height to give overall skip height.

**Add 230mm to the length to give overall skip length.

Automatic Bottom Empty Skips

Description

Automatic Bottom Empty Skips allow the simple but effective disposal of light to medium weight waste when being automatically emptied into high sided yard skips via the base release mechanism, without the driver leaving the safety of his seat.

Standard Features

- 125mm diameter nylon castor fitted as standard
- Internally reinforced sides and lap welded corners
- Unique automatic releasing and locking mechanism
- Maximum fork section 150 x 50mm at 683mm centres
- Zinc plated heel pins for safe attachment to truck
- Painted bright orange for safety

Optional Features

- Colour finish for waste separation or department

*Add 270mm to height to give overall skip height.

Fork Lift Attachments

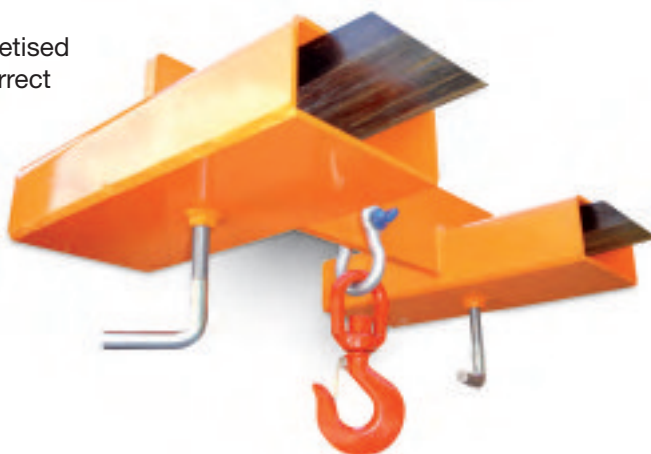

Adjustable Fork Mounted Hooks – Model - IAH

Description

The Adjustable Fork Mounted Hook provides a quick and economical method of the lifting and positioning of unpalletised loads. Multiple lifting positions can be achieved by the correct positioning of the attachment along the fork blade.

Standard Features

- Completely adjustable along the fork blade (except taper).
- Supplied complete with single swivel hook and bow shackle.
- Maximum fork section 150 x 50mm at 355mm centres.
- Zinc plated twist screws for safe attachment to truck.
- Painted bright orange for safety.

Fork Mounted Hooks - Model - IFH

Description

Fork Mounted Hooks provide an economical and safe method of converting a forklift truck into a mini mobile crane. Multiple lifting positions can be achieved along the fork blade.

Standard Features

- Two fixed lifting points along the fork blade.
- Supplied complete with single swivel hook and bow shackles.
- Maximum fork section 150 x 50mm at 481mm centres.
- Zinc plated heel pins for safe attachment to truck.
- Painted bright orange for safety.

Fork Extensions - Model - IFE

Description

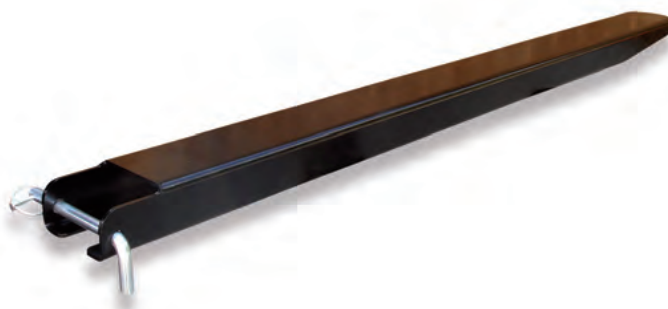

Fork Extensions provide a simple, but effective method of handling the occasional long and awkward load that extends past the tips of the parent fork arm (maximum overhang 66%).

Standard Features

- Tip thickness 6mm for ease of splitting packs.
- Fully pressed profile with rounded corners.
- Zinc plated heel pins for safe attachment to truck.
- Painted black.

Optional Features

- Triangular extensions for lifting paper rolls.
- Conical Extensions for lifting paper rolls.

Fork Mounted Sweepers 'The Basil'

Description

The Fork Mounted Sweeper is a quick and easy solution for reheapng your loose granule products such as sand, top soil, grain or similar. Optional left and right hand sweep gives you the versatility of clearing your yard, roadway, footpaths or warehouse.

Standard Features

- Interchangeable blue nylon brushes.

- Facility to hang to Fork Mounted Magnet from the frame.
- Maximum fork section 150 x 60mm at 683mm centres.
- Zinc plated twist screws for safe attachment to truck.
- Painted bright orange for safety.

Optional Features

- Left and right hand sweep bracket.

Description	Brush Width (mm)	No of brushes	Weight (kg)	Centre of Gravity (mm)	Order Ref	Price (Each)

Access Platform – IAP

Our range of Access Platforms provide a safe environment for a wide range of maintenance and inspections to be carried out from, with the reassurance that they have been manufactured in accordance with HSE document PM28 4th Edition.

Standard Features

- Automatic locking and unlocking gates (IAP-7 & 8 only).
- Hinge back guard for ease of transportation and storage.
- Safety harness attachment rings.
- Self-draining non-slip floor.
- Zinc plated heel pins for safe attachment to truck.
- Maximum fork section 150 x 50mm at 525mm centres.
- Painted bright orange for safety.

Optional Features

- Safety harness.

Folding Access Platform - IAP Folding

Description

The Folding Access Platforms is an effective Forklift Attachment for undertaking inspections and when transportation and storage space are at a premium. The Platform can be assembled and after use folded in a matter of minutes with the reassurance that it has been manufactured in accordance with HSE document PM28 4th Edition.

Standard Features

- Entire Attachment Hinges into Floor Base
- Internal Handrail
- Safety Harness Point

- Self-draining non-slip floor
- Zinc plated heel pins for safe attachment to truck
- Maximum fork section 150 x 50mm at 525mm centres
- Painted bright orange for safety

Optional Features

- Safety harness

Cable Dispensing

Toprax - Adjustable Cable Rack

- Used for storing and dispensing reels of wire/cable.
- Supplied with 4 fully adjustable hanging rails (Ø 31.75 x L 818mm - actual hanging length).
- Powder coated finish in blue & silver/grey.
- A clip together system with no tools required.
- Extension fitting kits are available and must be used if creating a double height rack by stacking two racks (020434) together.
- Rail Capacity: 60Kg (UDL).

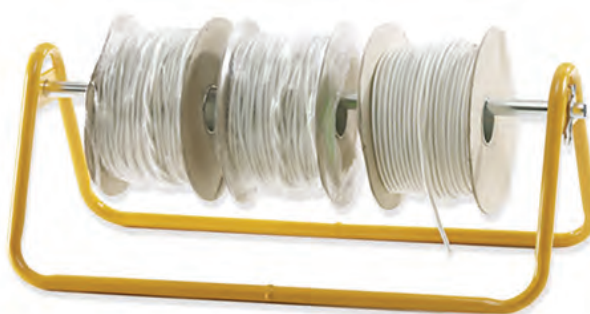

Description	H x W x D (mm)	Order Ref	Price (Each)
Cable Rack	983 x 942 x 328	020434	£185.42
Extension Fitting Kit	-	020162K	£30.06

Bench Top Cable Dispensers

This handy cable dispenser provides a practical and economic way to store and dispense a wide range of wire/cables. Its compact size makes it ideal for bench top mounting and where space is at a premium, can be used with a capacity range up to 350mm diameter reels.

- Robust construction fully welded tubular steel frames, epoxy coated for greater durability.

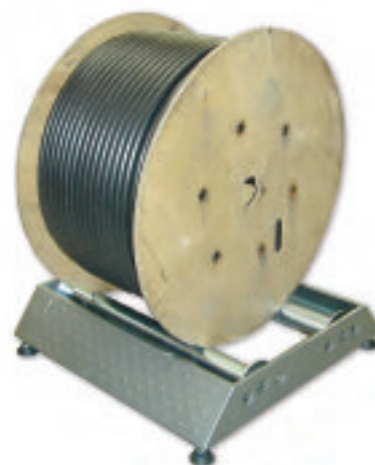

H x W x D (mm)	Max Reel Ø (mm)	Min Reel Core Ø (mm)	Max Storage Width (mm)	Order Ref	Price (Each)

120 x 560 x 560	740	120	520	140	017435	£210.00

Rolling Corners

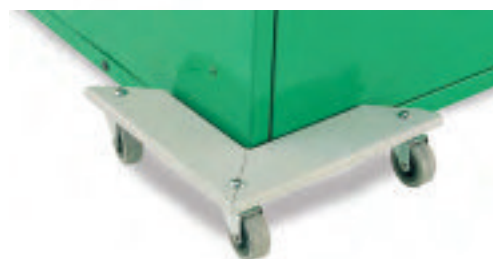

400Kg Capacity Rolling Corners

Supplied as a set of four these rolling corners allow large, bulky items to be moved with minimal effort.

Manufactured from formed and welded sheet steel and finished in a high quality grey epoxy powder coat, each rolling corner is fitted with three all swivel castors and 50mm diameter grey non-marking rubber cushion wheels.

A 3mm thick black ribbed rubber mat on each rolling corner aids with grip when loaded.

Weight of items to be moved must be evenly distributed for safety.

Description	H x W x D (mm)	Order Ref	Price (Each)
400Kg Capacity Rolling Corners	75 x 300 x 300	937-RMD1	£192.00

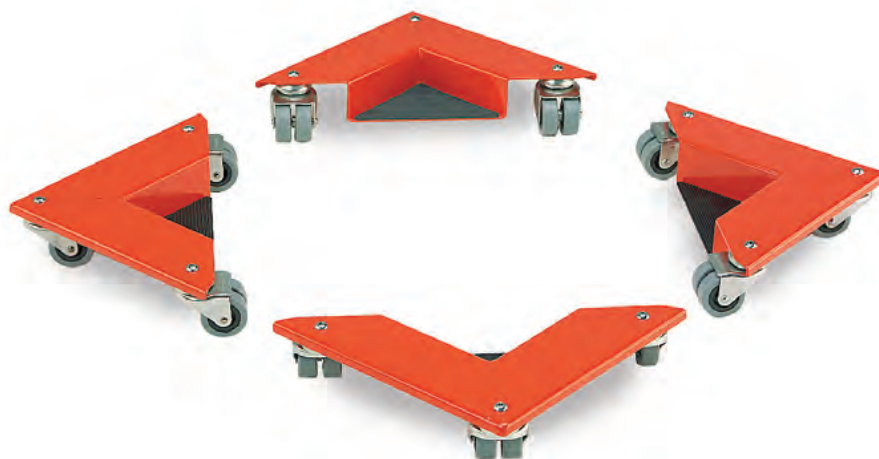

600Kg Capacity Rolling Corners

Supplied as a set of four these rolling corners allow large, bulky items to be moved with minimal effort.

Manufactured from formed and welded sheet steel and finished in a high quality red epoxy powder coat, each rolling corner is fitted with three all swivel castors and 50mm diameter grey non-marking rubber cushion wheels (two per castor).

A 3mm thick black ribbed rubber mat on each rolling corner aids with grip when loaded.

Weight of items to be moved must be evenly distributed for safety.

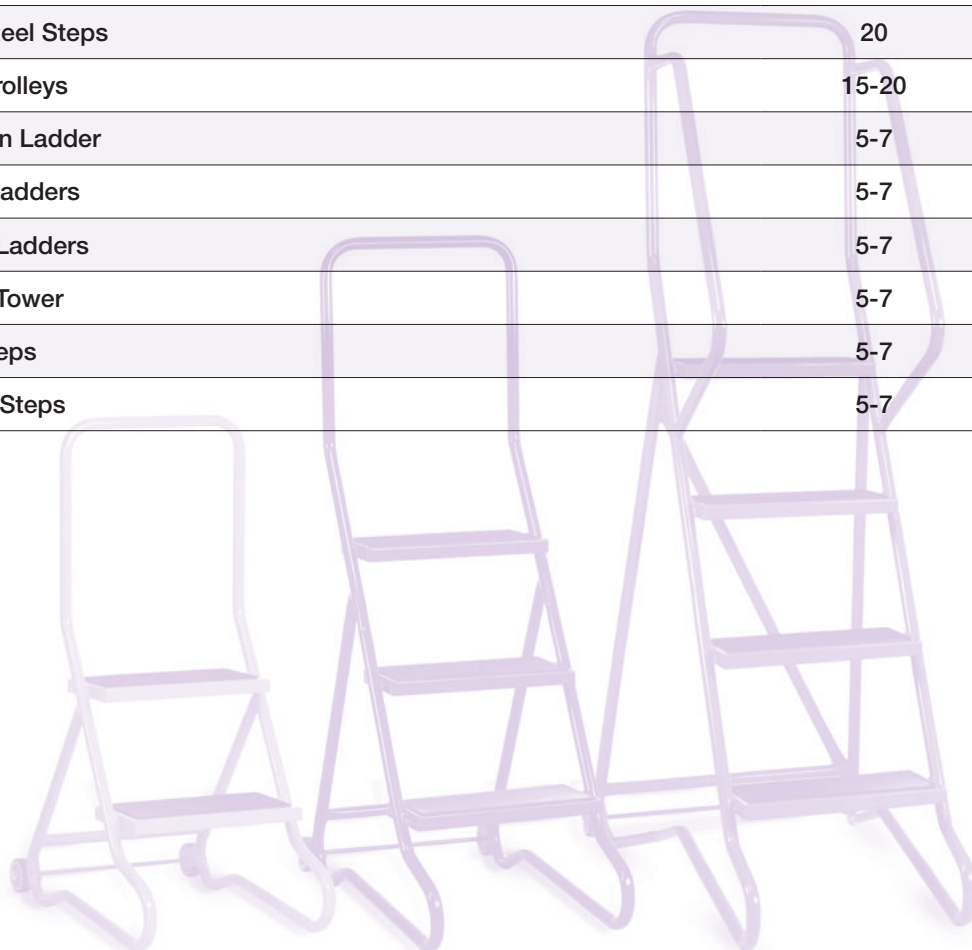

Description	H x W x D (mm)	Order Ref	Price (Each)

Topstep – Steel Kick Steps

Topstep – Steel Kick Step is a premium GS approved quality mobile step finished in a choice of six colours; Black, Red, Blue, Light Grey, Pink and Yellow.

Topstep provides easy step up access preventing excessive stretching.

The Kick Step is supplied knock down form comprising of two sections that permanently 'lock' together via a built-in bolt free mechanism.

- Topstep is the perfect accessory for any storeroom, office or workplace, where safe access is required for items stored at height.
- Mounted on retractable spring mounted castors Topstep can easily be moved into position without bending or lifting and when stepped on Topstep locks into position allowing safe access.
- Sturdy steel construction with anti-slip rubber treads and base surround provides a solid platform from which to work.

Plastic Safety Steps

- Health & safety product – ideal for all industrial and commercial applications.
- Moulded in tough, medium density polyethylene.
- Resistant to most chemicals, suited to wash down applications and wet/corrosive environments.
- Fitted with anti-slip abrasive strips to aid safety, and handles for ease of mobility.
- Each step tested up to 260kg.
- 4 tread: supplied complete with powder coated tubular steel support rail (yellow only).
- Standard colours: Blue, red and yellow available from stock. Other colours are available on special request. (Please specify colour when ordering).

Warehouse Step Range

Manufactured with attention to detail, both in design and construction, to ensure total reliability and many years of arduous operation.

Welded steel tube and bar construction and fitted with a handlock anchor mechanism. When locked the front feet, which are fitted with protective plastic floor pads, rest firmly on the floor.

Outboard, axle mounted rear wheels give extra stability.

Epoxy powder coated red finish and a caution notice is fitted to remind operators of safe working procedure.

Two no. 100mm diameter swivel castors to the front and 2 no. axle mounted 200mm diameter rubber cushion wheels with roller bearings to the rear.

Available with a choice of ribbed rubber or punched steel treads.

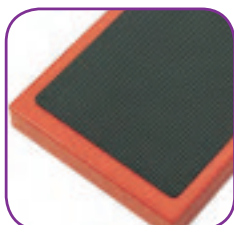

Manufactured in accordance with and conforming to BS EN 131-7.

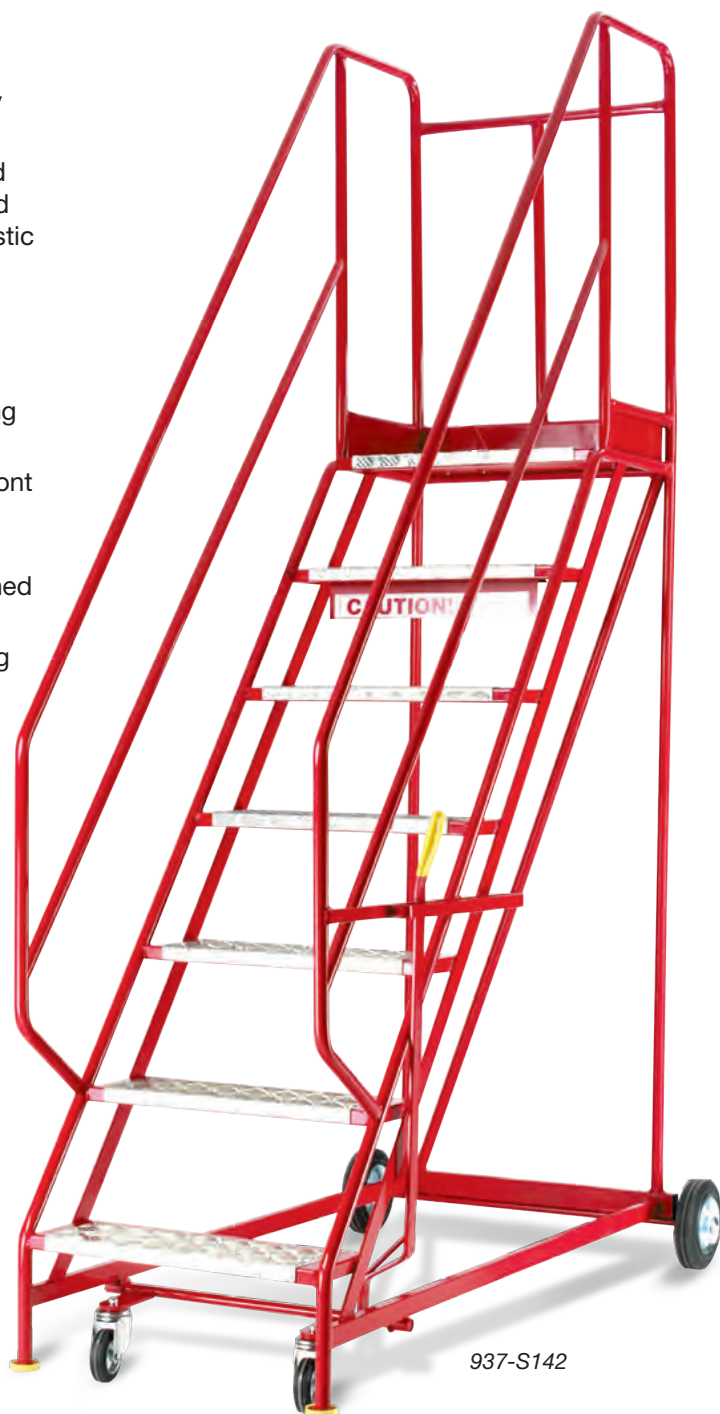

KM 608967
BS EN 131-7

Stainless Steel Steps

Stainless Steel Spring Loaded Steps

A range of high quality mobile step units manufactured from stainless steel formed tube and sheet of quality particularly suitable for catering, medical, chemical industries and clean working environments. The steps are fully welded for maximum strength and rigidity.

All steps models are fitted with 4 no. 80mm diameter spring loaded castors with grey non-marking rubber tyres. A heavy zinc plated housing that retracts when weight is applied to the steps gives firm contact with the floor which in turn is gripped by way of non-marking rubber feet.

The stainless steel treads are supplied with an anti-slip surface that is hard wearing and resistant to water, oil and most chemicals.

Step Tray Trolleys

A range of step tray trolleys that are suitable for stock picking and putting away in stores, warehouses, offices, libraries etc.

Fitted with spring loaded step units with ribbed rubber treads that locate firmly on the floor when foot is placed on the first step, fully immobilising the trolley.

Fully welded construction from steel angle and tube and finished in epoxy powder coat blue.

Fitted with 4 stem fitting swivel castors and 125mm diameter grey non-marking wheels.

Available with 4 tray options:

1. Fixed steel sheet trays with 20mm lip all around (epoxy powder coated blue).
2. Fixed plywood shelves, recessed with a 10mm lip all around.
3. Removable steel trays which are reversible to give either a flush finish or 25mm lip all around (epoxy powder coated white).
4. Removable wire baskets with 160mm high sides (epoxy powder coated white).

Combination Ladder

Skymaster X

- EN 131 Professional 150kg rating.
- Rigid aluminium locking bar for maximum security.
- Top and middle section with rung hook and positive operation locking tab.
- High-strength Perlon straps with sewn-in fixing tab to prevent splaying.
- Replaceable stile guides that encompass the whole stile; with plastic inserts for smooth handling.
- Extremely rigid ladder with strong connection between rungs and stiles.
- Replaceable plastic end caps ensure firm positioning without risk of slipping.
- Stabiliser bar included on bottom section.
- Can be used on stairs (Order ref: 941-41536 to 941-41539)
- Upper ladder can be used separately as single ladder (Order ref: 941-41536 to 941-41539)

* Also known as Free Standing height

Extension Ladders

EN131 D Rung Extension Ladder

- Complies with EN 131 Professional 150Kg rating.
- Large 'D' shaped serrated rungs provide a comfortable horizontal surface during use.
- Box section stiles for extra strength and smooth handling.
- Easy, precise rung-by-rung adjustment in increments of 280mm.
- Rung hooks and locking tabs secure the section together during use and transport.
- Replaceable plastic end caps ensure firm positioning without risk of slipping.
- High strength, non-twist connection between rungs and stiles.
- Upper ladder can be used separately as a single ladder (Order Ref 941-49834 & 941-44820).

Telescopic Ladders

Telemaster

- Rung by rung height adjustment.
- Treads lock automatically during extension.
- Extra wide treads for comfort.
- Wear resistant with anodised stiles.
- Fits easily into a car boot or cupboard.
- Load bearing capacity of up to 150kg, meets EN 131-6

Order Ref	Closed height (m)	Full extended length (m)	Width (m)	Weight (kg)	Price (Each)
941-100600	0.78	3.30	0.49	10.7	£182.00
941-100601	0.84	3.80	0.51	13.7	£202.00

Telescopic Tower

Teletower

- Telescopic mechanism allows seven different platform heights from 0.33m to 2.00m.
- Working heights from 2.30m to 4.00m.
- Large folding aluminum work platform (1.4m x 0.7m) with climb through hatch.
- Fully erected in under 3 minutes, saving down time and man hours.
- Can be transported in a small van or estate car.
- Single person operation.
- Minimal product footprint for ease of transportation and storage.
- Operates as a podium with low level fixed height options of 33cm and 61cm.
- Comprises only two parts – tower and platform (no more leaving parts in the yard).
- Integral stabilising legs with 5 optional positions and lockable castors.
- Integral telescopic hand and knee rails.
- Integral platform stabilisers and conforms to EN 1004.

Infinite Modular Workbenches

A range of fabricated steel framework benches that have an infinite number of combinations to suit any application requirements. The framework is constructed from steel section with welded leg supports and bolt in multi-position cross rails.

Starting with a initial "Starter" unit you can then add on "Add-on" workbenches as required to create any type of run or combination.

- Heavy duty modular design (max. load 1000Kg UDL).
- Steel framework finished in epoxy powder coated dark grey.
- Adjustable height from 840 - 940mm in 25mm increments.
- 25mm thick MDF, Vinyl or Laminate worktop options.
- Base shelf supplied as 18mm thick plain cut MDF as standard irrespective of Worktop type.
- Wide range of accessories available.

Team Leader Workstations

A range of robustly constructed workstations designed for Team Leaders, Supervisors or Line Managers. Fully welded steel frame work ideal for tough environments with a range of accessories both above and below the workstation. The compact design recognises the pressure on factory workspace but still allows the team leader to have a workstation with everything they need.

- Two depths available 460mm and 600mm.
- Sloping and Flat top versions available.
- Fully welded robust frame.

- Polyester powder coated with 4 colour combinations for area segregation.
- Ideal for standing at to improve health and fitness, but can be used in conjunction with an industrial stool or chair.
- All workstations with light grey framework and blue drawers/cupboard units are available on a 5 day delivery.

Mezzanine Floors

Expand your business without moving, building or acquiring new premises by making better use of the space overhead. Give yourself the extra room to increase sales floor, add a new office, enlarge the production area or expand storage capacity. Floor plans are optimized by our engineers using the latest 3D detailing software, giving the most cost effective design to suit the proposed ground floor use, to fit a warehouse racking system or to fall within walls for new offices. You can be sure that we will advise you on the best specification for your intended use, from heavy industrial storage, office accommodation and retail space.

Staircases

Custom-made Steel Staircases can be designed to meet any requirement.

Our products are CE approved and we manufacture to exacting British & European standards in our UK factory, using certificated steel. All our products are backed by a full Manufacturer's Warranty.

- Industrial Steel Staircases (Part K or Part M)
- External Fire Escape Staircases
- Bespoke Feature Steel Staircases
- Retail Steel Staircases
- Reception Stairs

Our dedicated team will liaise with you from start to finish and ensure your expectations are met and exceeded throughout the design, manufacture and installation process.

If you have a custom staircase requirement, our in-house designers will work with you closely to produce the perfect solution.

Pallet Gates

Whatever your moving, handling or space management requirements, a pallet gate system should be seriously considered where mezzanine flooring is involved.

We fully understand that nothing is more important than operator safety, so our pallet gate systems have been designed to meet and exceed industry standards, while our manufacturing and installation capability is second to none.

Even the most difficult areas to access can usually be fitted with a pallet gate. Mezzanine floors are the most common application, but various platforms, landing stages and loading bays can also be fitted out.

Pallet gates are installed into mezzanine floors and other loading areas to ensure the smooth and safe transfer of pallets and other bulky goods between different floor levels.

Up-and-over pallet gate systems are available in a range of sizes to suit all warehousing and storage environments. Customers include wholesalers, freight forwarding & storage providers, general industry and other mezzanine floor manufacturers.

Our pallet gates ensure:

- Safety – for all personnel involved in loading or unloading pallets
- Efficiency – tried and tested, simple to operate gate systems

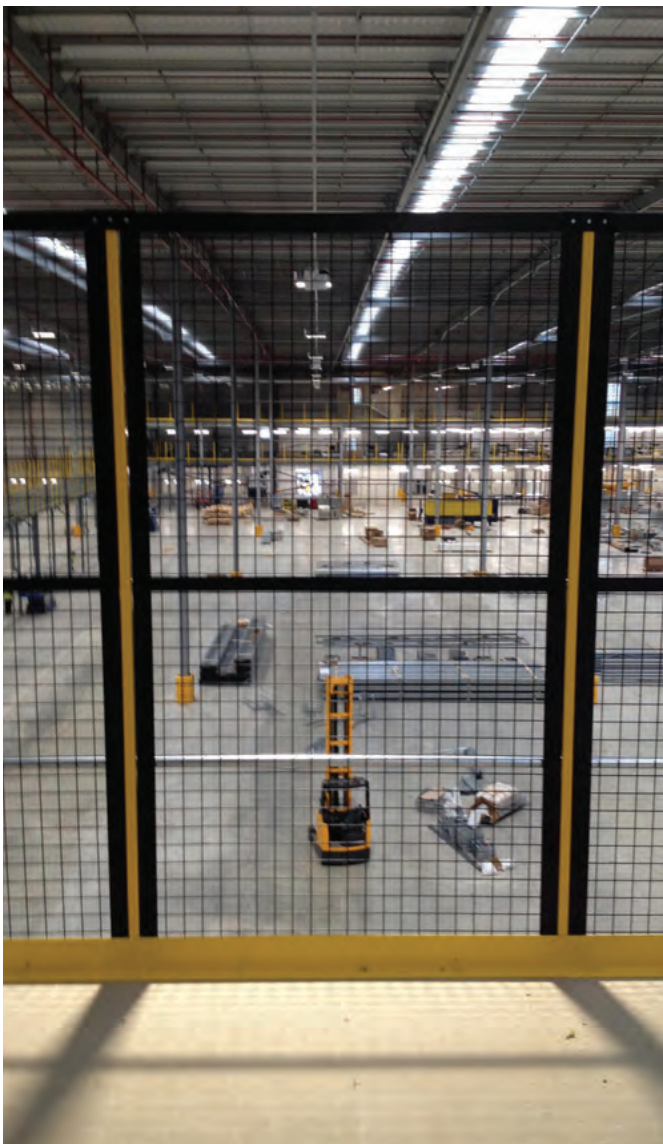

MezzGuard Mezzanine Guarding System

If the MezzGuard system is going in between square uprights, panels can be supplied with fixing holes to suit.

Additionally, the bottom channel can be provided with additional holes drilled through to allow the panels to be bolted to the floor, thus providing additional support.

Increased emphasis on safety in the workplace requires more stringent safety standards.

MezzGuard is an edge-of- mezzanine guarding system intended to fit in between existing handrail uprights, and designed to prevent items from falling from the mezzanine.

This system is manufactured with a robust angle frame and 50 x 50 x 3mm mesh apertures.

Prices below are for guide purposes
Prices for specific projects are available on request

BUDGET PRICE
(per linear metre)

From £39.00

MezzGuard panels are available in a variety of sizes, from 1100 - 2000mm high x 1500mm wide.

This system can be retro fit to virtually any existing handrail system, which allows for more system flexibility and overall cost savings.

Shelving Systems

Shelving requirements are constantly changing within busy warehouse environments. Two safety levels and two distinct designs - Performance Class A and Performance Class B - are available, which allow you to meet a variety of demands and safety requirements.

At present there is no direct European Standard for mesh shelving, however these shelving systems comply with ANSI (American Standard) MH26.2-2007. Furthermore, these systems comply with the European Standard for pallet racks EN 15620:2008 and EN 15512:2009

Each option is available in either a “Z” profile or drop-over design, and bespoke solutions are also available for unique requirements.

Drop Over Shelf

Z Profile Shelf

Prices below are for guide purposes
Prices for specific projects are available on request

BUDGET PRICE
(per shelf)

From £15.00

These mesh shelving systems ensure ease in manually loading items, easy water pass-through from sprinkler systems, better dispersal of light throughout the warehouse, easier assessment of shelf capacity, and better containment of possible spillages.

Please contact us for a quote!

Anti-Collapse Mesh

The Anti-Collapse Pallet Rack Safety System prevents any risk of spillage from pallets in warehouse storage, effectively protecting walkways and pallet rack aisles from unwanted accidents. This is a system that has been created for safe handling and storage of products in a warehouse / logistics environment.

Our new Anti-Collapse system bracket is flexible and easy to install, and is capable of withstanding an impact force of up to 2000 Joules.

Ultima Bracket

Prices below are for guide purposes
Prices for specific projects are available on request

BUDGET PRICE
(per square metre)

From £17.00

Economy Bracket

A wide variety of panel sizes, stand-offs (from 50 - 300mm) bracket types, and fixing kits ensure a uniquely safe and virtually maintenance free secure solution to accompany most pallet racking systems.

Our anti-collapse system is available in either hot dip galvanised, or a variety of powder coat finishes.

Please contact our sales department to further discuss your requirements.

Adjustable Pallet Racking

These pallet racking systems are designed from two basic components, frames and beams. In addition a range of accessories enable the system to meet a wide range of needs.

- Frames are of bolted construction and are supplied fully assembled.
- Beams are available in a range of lengths to suit both standard pallet sizes and bespoke pallets. Additionally the beams come in a range of profiles to meet the load requirements of almost any application.
- Beam safety locking clips are supplied with all beams in accordance with health and safety requirements.
- Frames are manufactured from galvalite steel and beams are epoxy powder coated orange.
- Pallet racking accessories are available such as Pallet Support Bars, Fork Entry Bars, Rough Sawn Open and Closed Timber Decking, Upright Protection Guards, Rack End Barriers, Wire Mesh Decks and Galvanised Steel Shelf Panels (please enquire).
- Manufactured in accordance with FEM standards.

Titan Partitions

Titan is a high-quality, two-line double skinned partitioning system ideal for clean room applications. Its versatility allows it to be used for a variety of other applications including laboratories, hospitals, surgeries, and food preparation, but particularly those applications where appearance is important.

Titan can be multi-tiered and profiled for warehouse and office divisions to create an environment more appropriate for specialised areas; Titan can also be manufactured in a form that can more readily withstand moist atmospheres.

Titan partitioning has a two-line junction to keep dust traps to a minimum and its powder-coated finish is an ideal surface for clean environments. It is completely demountable, enabling panels to be removed without having to dismantle the entire structure.

All hardware accessories come in stainless steel as standard due to its exceptional "clean" properties, and flush glazing eliminates ledges and further improves aesthetics.

All joints can be silicone sealed to stop air loss and reduce particle traps. Additional aesthetic features such as integrated blinds with movable magnetic controls can be provided upon request, and options for extra sound reduction are available. There are also options for several different floor details including coved skirting, bull nosed skirting, and stainless steel kick plates.

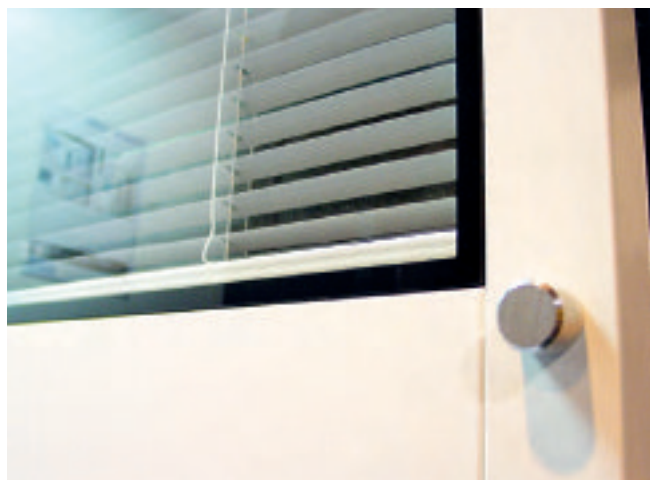

Used in conjunction with the correct air handling and HVAC systems, a Class-5 clean room can be achieved (ISO 14611-1).

Ceilings are formed from a single-line junction panel with an optional facility that enables the ceiling to carry a load of one person - ideal for maintenance purposes.

Please contact our sales department to further discuss your requirements.

Flush Glazing and Stainless Steel Door Hardware as Standard

*Integrated Blind with Control
(Removable Magnetic Control available upon request)*

Elan Partitions

Elan is a high quality double-skin steel partitioning system for offices and warehouse factory applications where an attractive appearance is important. Panels are available in Full Steel and Steel/Glass combinations with double or single glazing.

Fully demountable, the panels can be supplied as fully fire-rated or non-fire rated. Additional noise reduction capabilities are available.

The Elan system can be supplied with a large range of ceilings (suspended or walk-on) and accessories. A wide variety of hinged and sliding doors are also available.

Elan Partitioning with Integrated Blinds

Sigma Partitions

Sigma is a single-skin partitioning system suitable for factory, warehouse and storage requirements.

Fully demountable, it is ideal for enclosing work areas where appearance is important but without the cost of a double-skinned system. Sigma can also be used for machine guarding and for enclosing production lines, for perimeter guarding to automated machinery, robots, conveyors and with other automated processes. When used in a multi-tiered configuration it is effective for factory or warehouse division, providing additional security, dust-proofing and environmental control.

Elan and Sigma panels come in a wide range of sizes and heights allowing for multi-tiered configuration.

Both systems come in a variety of standard finishes (White RAL 9010. Sandstone BS08817. Grey BSDA005. Grey RAL 7037. Blue RAL 5010) and further non-standard, corporate and special finishes are available upon request.

Please contact our sales department to further discuss your requirements.

Sigma panels are available in full steel/glass, steel/mesh and all mesh combinations to suit your requirements, mesh can be provided in several styles and sizes. Furthermore, a full range of hinged and sliding door options are available.

Sigma can be cut to accommodate existing structures providing an aesthetic finish, and a variety of accessories such as drop-down hatches and framed openings can be created.

Caelum Mesh Wall System

Caelum is a flexible system that can be used for a variety of purposes. A wide range of panel sizes with varying frame and mesh configurations ensure the perfect solution.

Caelum modular mesh panels can be used to build enclosures, boxes, storage units, and provide protection in automated warehouses, and are particularly useful in bonded stores, low-level and semi-secure storage areas and as small cage enclosures where high value retail goods (i.e. Smart phones, mobile telephones, tablets and laptops, computers, Power tools, Liquor, Tobacco etc.) – virtually any item that may require restricted accessibility – can be stored.

The Caelum system is available in multi-tiered elevations, enabling the end user the ability to partition off large secure storage areas within warehouse environments, particularly useful for isolating and storing dangerous goods such as aerosols or combustible materials.

The Caelum Mesh Wall system is available in either hot dip galvanised, or a variety of powder coat finishes.

Please contact our sales department to further discuss your requirements.

Caelum Server Cage

GUARDA Chain Posts

GUARDA Chain Posts are the ideal low cost solution for cordoning off areas both internally and temporarily outdoors.

- Quickly and easily deployed.
- Corrosion proof plastic construction.
- Low centre of gravity for stability.
- Choice of three base styles.
- Four integrated chain eyes in cap.
- Highly visible post colours:
Red/White or Black/Yellow.

Applications: Warehouse, production areas, shipping departments, administration depts. etc

Specifications:

Post dia. 40mm

Post height: 870mm

Bases:

Rubber: 265 x 265mm sq.

Weight 1.8kg

Plastic (hollow): 300mm dia.

Weight: Variable

Plastic/concrete*: 300mm SL

Weight: 2.9kg

*Suitable for outdoor use.

GUARDA Chain Post set.

As detailed above but available in handy sets of:

6 no. chain posts and bases.

10m of M-POLY Chain.

10 no. Connecting links.

10 no. 'S' hooks.

Modular Safety Barriers

A highly visible safety barrier system designed for creating pedestrian walkways, dividing manufacturing units, stock areas, warehouse and commercial premises where for safety and other reasons segregation is required.

- Designed to be sited as individual units or in long runs.
- Posts are drilled through four sides to enable barriers to be positioned in straight runs or through 90 degrees as pictured.
- Ready to use with base plates conveniently pre-drilled for easy surface fixing (please note floor fixings are not included).
- Finished in epoxy powder coated bright yellow.
- Supplied in knocked down form complete with fitting instructions.

Four way fixing holes enable the Safety Barrier extensions to be set at 90° to create corners or turns in walkways.

Description	H x L x D (mm)	Order Ref	Price (Each)
Safety Barrier - Initial	1000 x 1000 x 50	MSBSI	£155.00
Safety Barrier - Extension	1000 x 950 x 50	MSBSE	£130.00

Safety Barriers

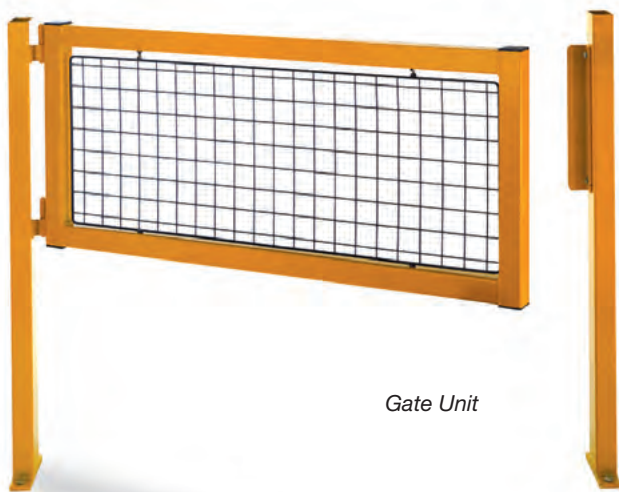

Fully Welded Barriers

These safety barriers are designed for creating protective barriers around machinery and equipment and for defining walkways through industrial, manufacturing and warehousing areas.

- Choice of open or mesh infill panels.
- Fully welded construction.
- Powder coated high visibility yellow.
- Supplied with floor fixings.
- 5 Day Delivery available on straight open barrier units, order quantities may apply.

TRAFFIC-LINE Steel Hoop Guards

Protect and segregate pedestrians, machinery and other zones from works vehicles, falls etc.

- Versatile and effective protection.
- Highly visible finish.
- Additional reinforcing crossbar.
- Easily installed with bolts (available at extra cost).

Permanent and removable versions now available for fixing to vertical surfaces.

Applications: Protection of pedestrian areas (entrances, exits etc.), machinery, dangerous zones, elevation changes, loading docks, hazardous areas, garage pits etc.

Specifications:

Lengths: 1,000, 1,500 and 2,000mm

Height: 1,000mm Surface mount –
1,300mm Wall mounted

Diameter: 48mm Ø x 2mm Wall

Fixing plates: Surface mount –
70 x 60 x 10mm
(2 x mounting plates with
pre-drilled fixing holes)

Wall fixing (permanent)
(2 x mounting plates with
pre-drilled fixing holes)

Wall fixing (Removable)
(Socket with 2 x mounting
plates with pre-drilled fixing
holes)

Finish:

Interior: Powder coated yellow with
black bands.

Exterior: Hot Dip Galvanised.
Powder coated yellow with
black bands.

BLACK BULL Protection Guards

Protect property and machinery with BLACK BULL Protection Guards.

- Superior build quality and strength.
- Highly visible colour scheme.
- Easily installed with floor fixings (available at extra cost)
- Corner protection style also available with 600mm "L" sides.

Applications: Protect stock, traffic routes and work areas, separates different traffic routes (e.g. stacker lanes in warehouses and pedestrian traffic), machinery, supports, columns, shelving, loading ramps, equipment etc.

Specification:

Widths: 375mm, 750mm and 1,000mm.

Heights: 350mm, 600mm and 1,200mm.

Diameter: 76mm with 3mm wall thickness.

Fixing plates: 160 x 140 x 10mm (drilled 4 fixing holes)

Finishes:

Interior: Powder coated yellow with black bands.

Exterior: Hot Dip Galvanised. Powder coated yellow with black bands.

Sub-surface versions, special sizes and colours can be manufactured to order.

BLACK BULL FLEX Protection Guards

BLACK BULL FLEX Protection Guards

A unique development of our standard Protection Guards that features the strength and protective attributes of steel combined with the ability to 'give' up to 10 degrees from the vertical, reducing the incidence of damage and the need for repairs. This is achieved by equipping the guard with flexible shock absorbing polyurethane pads. These pads are UV, weather and temperature resistant, making them suitable for internal and external use.

- Highly visible yellow/black colour scheme.
- Unique flexing action.
- Easily installed.
- Interior and Exterior models.

Applications:

Traffic routes and work areas, segregation of traffic routes, machinery, supports, columns, loading ramps, equipment etc.

Specifications:

Widths: 375, 750, 1,000 and 2,000mm
 Heights: (max. inclination): 390 (55), 640 (95), 1240 (190)mm
 Diameter: 76mm
 Wall thickness: 3mm

Finish:

Interior: Powder coated yellow with black bands
 Exterior: Hot Dip Galvanised, Powder coated yellow with black bands

Upgradable: Existing TRAFFIC-LINE Protection Guard installations can be up-graded, new chemi-anchor fixings will be required.

BLACK BULL Heavy Duty Bollards

A comprehensive range of heavy duty bollards with a wide spread of protective capabilities that meet most eventualities.

- Heavy duty protection.
- Manufactured from high grade steels.
- Highly visible finish.

Applications: Use bollards 'L' to 'XXL' in traffic areas where lorries and forklifts operate, loading bays, site entrances, corners of buildings etc.

The use of bollard 'S' is recommended where space is restricted.

Fixing: Surface: Surface plate drilled 4 fixing holes.

Sub-surface: 400mm depth with ground anchor.

Finish: Hot Dip Galv. powder coated yellow with black bands.

Types 'S' and 'L' also available in hot dip galvanised and powder coated White/Red finish.

Protection Bollard 'S'

Suitability: Medium to heavy impacts.

Protection Bollard 'L'

Suitability: Heavy impacts.

Protection Bollard 'XL'

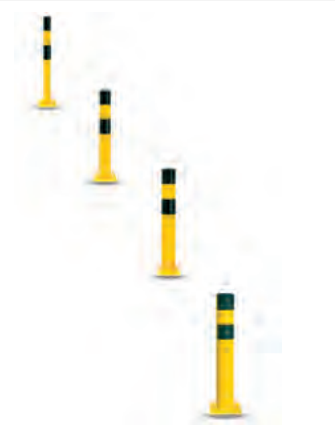

Suitability: Very heavy impacts.

Protection Bollard 'XXL'

Suitability: Extremely heavy impacts.

Additionally the 'XXL' bollard is equipped with a removable cap, which enables the bollard to be filled with concrete when in situ if required.

Steel Bollard, hot dip galvanised and powder coated	Description		Dimensions Ø x Wall Thickness x H (mm)	Colour	Order Ref	Price (Each)
	S	Surface fixing	90 x 3.6 x 1200	Yellow with blacks bands	199.19.943	£137.10
		Sub-surface fixing	90 x 3.6 x 1600	Yellow with blacks bands	199.17.454	£133.50
	L	Surface fixing	159 x 4.5 x 1200	Yellow with blacks bands	199.16.549	£270.10
		Sub-surface fixing	159 x 4.5 x 1600	Yellow with blacks bands	199.15.852	£266.60

		Sub-surface fixing	194 x 4.5 x 1600		199.19.836	£477.60
	XXL	Surface fixing	273 x 5.0 x 1200		199.19.146	£660.20
		Sub-surface fixing	273 x 5.0 x 1600		199.13.769	£660.20
Surface fixing bolts for models S + L (4 required per bollard)				-	109.18.268	£2.60
Surface Fixing bolts for models XL + XXL (4 required per bollard)				-	109.14.550	£6.50

BLACK BULL FLEX Heavy Duty Bollards

The "smart" protection bollard – yields when hit helping to reduce damage to both the bollard and the vehicle. Combination of internal spring and an elastic polyurethane buffer absorbs the impact force (progressive force absorption).

- Heavy duty protection.
- "Gives" up to 25°.
- Returns to original position.
- Superior build quality and strength.
- High grade steel construction.

Applications:

High traffic areas, loading bays, site entrances, etc.

Specification:

Material: Steel/Polyurethane construction.

Height: 655mm

Diameter: 159mm

Wall thickness: 4.5mm

Fixing plate: W 200 x D 200 x 10mm Thick with 4 pre-drilled fixing holes

Finish:

Interior: Powder coated Yellow

Exterior: Hot Dip Galvanised. Powder coated Yellow

Flexible steel bollard 159/4.5mm Surface fixing 200 x 200 x 10mm	Colour	Dimensions (mm) H x Ø	Finish	Order Ref	Price (Each)
	Yellow with black bands	655 x 159	Powder coated	199.29.230	£341.30
			Hot dip galvanized and powder coated	199.28.240	£387.30
Rawl plug bolt	4 per guard	12 / 100	-	109.17.393	£1.50
Throughbolt anchor		12 / 120	-	109.24.665	£3.40
	Root fixing adapter	Size 200 x 200 x 10	Hot dip galvanized	199.25.395	£75.70
		Diam Ø 76			

BLACK BULL Protection Guard with Under-Run Protection

BLACK BULL Protection Guard with Under-Run Protection Same design as **TRAFFIC-LINE** Protection Guards but with steel infill plate.

- Superior build quality and strength.
- Strong, effective protection.
- Protect vulnerable equipment.
- Highly visible colour scheme.
- Easily installed with 8 anchor bolts (available at extra cost).

Applications:

Use in warehouses, distribution depots, storage areas etc.

Specification:

Widths: 750mm and 1000mm
 Heights: 350mm and 600mm
 Diameter: 76mm x 3mm wall thickness.
 Fixing plates: 160 x 140 x 10mm (drilled 4 fixing holes)

Under-run plate:

Height: 150mm and 400mm
 Gauge: 4mm

Finish: Powder coated yellow with black bands.

Sub-surface versions, special sizes and colours can be manufactured to order. Please ask for details.

Steel protection guard 76/30mm with under-run protection plate 4.0mm gauge surface fixing	Height of under-run protection plate (mm)	Dimensions H x W (mm)	Finish	Order Ref	Price (Each)

BLACK BULL Corner Protection Guard with Under-run Protection

This addition to our range of Under-run guards provides the same high level of protection for vulnerable corners.

Applications:

Warehouses, distribution depots, storage areas etc.

Specification:

Material: Steel

Widths: 600mm each arm

Heights: 350mm or 600mm

Diameter: 76mm x 3.0m gauge

Fixing Plates: 160 x 140 x 10mm (drilled 4 fixing holes)

Under-run Plate:

Height: 150mm and 400mm

Gauge: 4mm

Finish: Powder coated yellow with black bands (Indoor use only).

Steel protection guard 76/30mm with under-run protection plate 4.0mm gauge surface fixing	Height of under-run protection plate (mm)	Dimensions H x W (mm)	Finish	Order Ref	Price (Each)

Rawl plug bolt	12 required per guard	12 x 100	-	109.17.393	£1.50
Throughbolt anchor		12 x 120	-	109.24.665	£3.40

BLACK BULL Collision Protection Guard

Low cost protection for plant and machinery from forklift trucks, roller containers, trolleys, pallet trucks etc.

- Easily and quickly installed.
- Low profile design enables easy pedestrian access to protected areas.
- Protect machinery, plant etc.
- Interior use only.

Applications: Protect shelving, cabinets, wall-mounted equipment (instruments, switch cabinets, first aid equipment etc.).

Specification:

Lengths: 400, 800 and 1200mm

Height (Overall): 86mm

Diameter: 76mm with 3mm wall thickness.

Base plates: 10mm thick. Drilled 2 fixing holes

Finish: Powder coated yellow with black bands

Special lengths, colours, and external versions can be manufactured to order. Please ask for details.

Corner Protection Collision guards – 638mm each arm.

Dimensions: 86 x 638 x 638mm.

Throughbolt anchor		12 x 120	-	109.24.665	£3.40

Pallet Racking Protectors with Guide Rollers

Pallet racking protectors which include rollers to facilitate pallet placement to and from floor level location. The incorporation of rollers helps to dampen shock and vibration which can occur when pallets are being located. They are most suitable for use in warehouses, distribution depots, manufacturing units etc.

- For indoor use.
- Powder coated in yellow with black stripes.
- Easily installed
- Virtually indestructible
- Guide roller(s) incorporated

Specifications:

Material: Steel

Roller Material: Polyamid

Roller Dimensions: 110mm high

75mm from bottom edge of roller to floor.

Description	Fixing Bolts Required	H x W x Wall Thickness (mm)	Order Ref	Price (Each)
Pallet Racking Protector - Right-angle	4	400 x 160 x 6	197.22.542	£86.80
Pallet Racking Protector - U-profile	6	400 x 160 x 6	197.22.021	£113.60
Rawl Bolt		12 x 100	109.17.393	£1.50
Through Bolt		12 x 120	109.24.665	£3.40

Heavy Duty Pallet Racking Protectors

Pallet racking protectors are required for fixed racking installations where industrial trucks are used (except where they are guided by rails). Heavy duty pallet racking protectors provide the ideal solution in most situations. They can also be used to protect machinery, partition systems, rectangular columns etc.

- For indoor use.
- Powder coated in yellow with black stripes.
- High quality steel.
- Virtually indestructible.
- Differing heights.

BLACK BULL Racking Frame Protectors

A refinement of our original End Frame Protectors, these new End Frame Protectors are easily installed providing protection to Pallet Racking End Frames from potentially hazardous damage from forklift trucks or other vehicles. These End Frame Protectors now feature additional protection to the sides of the end frames for additional peace of mind.

- Highly visible.
- Strong effective protection.
- Adjustable widths.
- Easily installed with minimum loss of space.

Applications:

Warehouses, distribution depots, manufacturing units etc.

Specification:

End frames: (H) 500 x (W) 300 x (D) 40 x 5mm Gauge.

'C' profile rails: (D) 100 x (W) 40 x 3mm Gauge.

Set 1: Adjustable Width: 900 to 1300mm

Set 2: Adjustable Width: 1700 to 2100mm

Set 3: Adjustable Width: 2300 to 2700mm

Material:

End frames, 'C' Rails – Steel Securing Blocks: – Aluminium

Securing Bolts required: 12 per unit.

Finish:

Powder Coated Yellow with Black striping on End Frames (Indoor use).

Set - 2 Railings, 2 End Sections	H x W x D (mm)	Finish	Order Ref	Price (Each)
	500 x 900-1300 x 240	Powder Coated	198.23.925	£388.10

Throughbolt anchor (12 per guard)	12 x 120		109.24.665	£3.40

TRAFFIC-LINE Economy Belt Barrier

Ideal for use as a barrier or guidance system, and is easily and quickly deployed for use as footpath marking or where traffic areas require cordoning off.

The self-tensioning belt easily and smoothly deploys from the cassette and attaches to the next post. In-built spring mechanism damps the belt during retraction. The unit is usable in both indoor and outdoor environments. The posts are easily detached from the bases for ease of transport and storage.

- Strong plastic build.
- Lightweight construction.
- Excellent stability.
- Low Cost.

Applications:

- Ideal for use in, industrial sites, warehouses, parking facilities, events public spaces etc.

Specification:

- Overall height: 950mm.
- Post dia.: 50mm.
- Base dia.: 360mm.
- Weight: 9kg (filled) 1.8kg (empty).

Description	Belt Colours	Belt length (mm)	Order Ref	Price (Each)
Red/White	Red/White	3000	179.21.658	£149.80
Black/Yellow	Black/Yellow	3000	179.28.568	£149.80

TRAFFIC-LINE Premium Hi-Vis Belt Posts

A supremely flexible system that provides either permanent or temporary demarcation of pedestrian areas from vehicular traffic routes.

- Self tensioning mechanism bi-colour 3m and 4m belts.
- Aluminium posts in powder coated 2 colours.
- Moulded base for temporary or permanent fixing.
- Secure four point fixing for permanent installations. (Fixing bolts available at extra cost.)
- Base can be weighted with water or sand.
- Damped belt mechanism for controlled retraction.
- Extremely stable - low centre of gravity.

Applications:

- Ideal for use in industry, warehouses, car parks, open spaces, public buildings etc.

Specification:

- Overall height: 985mm.
- Post dia.: 60mm.
- Base dia.: 330mm.
- Weight: 13kg (filled) 2.4kg (empty).

Description		Colours	Belt length (mm)	Order Ref	Price (Each)

			4000	179.24.575	£231.10

TRAFFIC-LINE Wall Mounted Belt Cartridge

The TRAFFIC-LINE Wall Mounted Belt Cartridge is available in both conventional fixing and in Magnetic fixing versions, giving them a greater flexibility in use.

The ideal solution for controlling access at fixed locations.

- Easy to install.
- Moulded in black hard wearing ABS.
- Damped belt action for smooth retraction.
- Unique bracket allows belt deployment in three directions.
- Choose from 5 belt colours. The belts are manufactured from a strong and durable fabric.

Applications:

Entrances, internal door-ways, stairs, corridors, aisles etc.

Specifications:

Cartridge height: 130mm

Cartridge depth: 110mm

Belt length: 3000mm or 4000mm

Belt width: 50mm

Accessories: Wall mounted clip, Belt joining clip.

TRAFFIC-LINE Impact Protection – Profiles

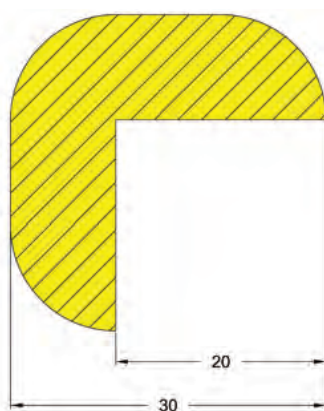

TRAFFIC-LINE Impact Protection profiles provide both visual warning and safety cushioning to hard unyielding objects.

- Prevents injury and protects property.
- Quick and easy to install.
- High quality moulded sections.
- Standard length is 1000mm.
- Easily cut to length with sharp knife or fine saw blade.
- Made from flexible age resistant polyurethane foam.
- UV resistant yellow/black colours according to DIN 4844.
- Temperature resistant from -40 °C to + 90°C.
- Fire resistant to UL 94.
- CFC and silicon free.

TRAFFIC-LINE Vertical Pipe Protectors

Ensures pipes are protected against accidental damage from passing vehicles. Addition to range is entirely wall mounted for added flexibility.

- Effective protection.
- Highly visible.
- Strong steel protection.
- Quickly & easily installed.

Applications:

Factories, warehouses, distribution depots, public buildings, office blocks, residential flats & complexes etc.

Specifications:

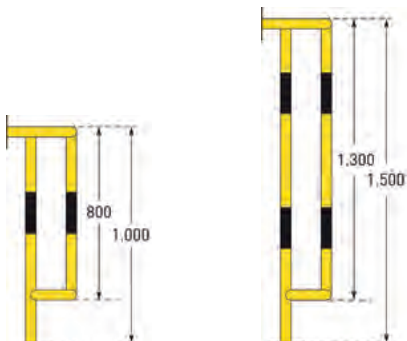

Internal: 250 x 275mm

Diameter: 48mm

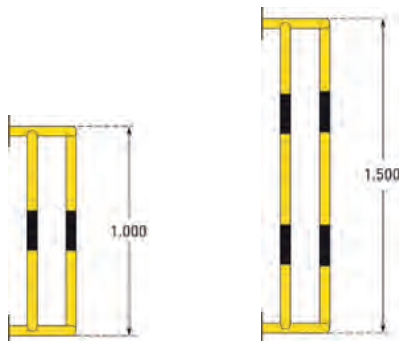

Wall Thickness: 2mm

Wall anchor plates: 150 x 50 x 5mm (drilled 2 holes per plate)

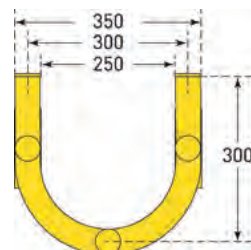

Finish: Hot Dip Galvanised and Powder Coated Yellow with Black bands (Indoor/Outdoor use).

TRAFFIC-LINE Pipe/Cable Guard - Wall Mounted

The TRAFFIC-LINE Pipe/Cable Guard provides protection for exposed down pipes, cables and cable runs against accidental damage from forklift trucks, cars etc.

The 'U' shaped guard with 4 keyhole slots is easily and quickly installed providing protection in areas such as manufacturing sites, warehouses logistics depots, utility sites, public buildings, chemical plant, car parks etc.

- Easily and quickly installed.
- Strong steel profile for maximum protection.
- Highly visible yellow and black marking.

Specifications:

SPION Acrylic Mirrors

The SPION observation mirror is widely accepted as the road side observation mirror among its many other attributes and uses.

- Very light construction.
- Robust, shock resistant.
- Excellent image quality and wide angle viewing.
- Interior and exterior use.
- Easy installation.
- Ideal for confined spaces.
- Economical solution.
- Circular or rectangular options.
- Mirror face protected under a tough, clear acrylic layer.
- 5 year guarantee against manufacturing faults.

Applications:

Entrances, exits, driveways, manufacturing processes,

warehouses, production units, public buildings, hospitals, etc.

Specifications:

Circular Sizes: 300, 400, 500, 600, 700 and 800mm Dia.

Rectangular Sizes: 400 x 600, 600 x 800 and 800 x 1000mm.

Material:

Metalised modified acrylic, under surface coated.

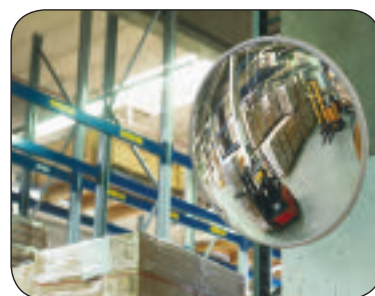

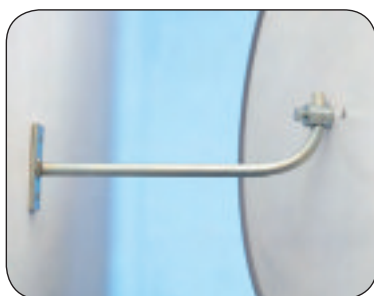

Bracket:

25cm 'J' bracket.

Accessories:

55cm 'J' bracket.

Post fixing clamps.

Tintagel & Dalton Cycle Shelters

Please speak to sales for information & prices on our range of Sheffield hoops & racks.

The Tintagel cycle shelter is a simple yet modern design and has a robust, all weather construction. A unique design feature of the Tintagel is that the leg frames can be used as racks to provide additional cycle parking spaces if required.

- Easily accessed from both sides.
- Zinc coated with a powder coated finish in a range of RAL colours - also available fully galvanised.
- Leg frames can either be bolted to the floor or grouted into the ground.
- Designed for use with our Sheffield loops.
- The standard Tintagel design is off-centre, where one side is lower than the other; other configurations are also available.

PROline-tape Floor Marking System

Self-adhesive floor marking tape

PROline-tape is an extremely tough floor marking tape for quick and effective marking of internal surfaces. Aisles, traffic ways and other demarcation areas can be identified precisely, cleanly and economically.

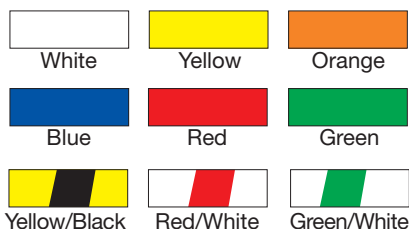

- Available in 50mm and 75mm widths x 33m long.
- Six bold safety colours.
- Three diagonally striped hazard warning colours.
- Striped tapes are laminated to protect print surface.
- Leaves no residue when removed from most surfaces.
- Ideal for short and medium term marking.

Specification:

Widths: 50 and 75mm
 Thickness: Plain: 0.15mm Laminated: 0.18mm
 Length: 33m
 Core: 75mm ID
 Colours: 6 plain
 3 Diagonal striped

PROline-tape is easily and quickly applied with the TAPEliner applicator, and is particularly useful where extensive marking is required.

Also available is our PROline Marker Kit which contains all of the elements required to get started. When ordering please specify

colour(s) and width of tape required.

The TAPEliner Applicator Kit consists of:

- 1 x TAPEliner Applicator
- 2 x Rolls of PROline tape
- 1 x Trimming knife
- 1 x Marker line and chalk

Individual rolls are available.

Please contact for Heavy Duty Vinyl and Steel line markings.

PROline-paint Marking System

PROline-paint is developed for rapid and effortless marking of indoor and outdoor areas.

- Long lasting, durable and cost-effective.
- Easy to use – shake can, insert into applicator and apply.
- Markings are highly visible and are abrasion and chemical resistant.
- Adheres to most surfaces – concrete, asphalt, tarmac, metal, tiles etc.
- Fast drying normally within minutes.
- Economical – one 750ml can will produce 50mm wide line
- 50-90 meters long (Dependant on surface).
- Environmentally friendly - conforms to latest EU regulations.

Applicators:

PROliner:

- Minimal assembly.
- Uses one 750ml can of PROline-paint.
- Easy and rapid line marking – up to 25 meters per minute.
- Quick adjustment between 50 and 75mm.
- Rear wheels easily removed to allow for marking close to walls, machinery, shelves etc.
- Colours can be changed without needing to clean the machine.

Specification:

Paint: Synthetic resin.

Colours: 8 safety colours.

Container: 750ml Aerosol can

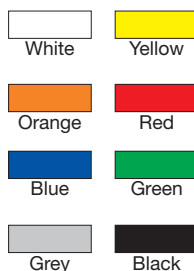

Propellant: Butane

ROADliner:

Enjoys all of the benefits above but creates line widths between 100 and 130mm using two cans of PROline-paint.

HANDliner:

Specially designed for use in hand marking, use with stencils and to highlight objects, obstructions, steps etc. Use with a single can of PROline-paint.

Identification and Labelling

Magnetic & Self Adhesive Ticket Pouches

- Cost effective ticket pouches.
- Clear front enables barcodes to be scanned.
- Supplied complete with white card inserts.
- Available in 5 colour options.

An economical range of flexible p.v.c. ticket pouches, which have a clear p.v.c. front and yellow back designed for use on racking and shelving. The pouch opens at the top and the side for easy access to the insert. The clear front also enables barcodes to be scanned without removing the ticket. The self-adhesive pouch enables it to be permanently fixed, whereas the magnetic versions can be easily relocated without removing the ticket.

Colours available:
Red, black, blue, yellow
and green.

Frames4docs®

New hazard style frames now available in A4

Please confirm colour choice when ordering blue = B / Black = BK / Green = G / Red = R / Yellow = Y. A4 size also available in hazard colours Yellow /Black = YB, Red/White = R/W and Green/White = GW

- Frame any sign, chart or document in seconds.
- Quick and easy to update the stored documents.
- Magnetic or Self-adhesive fixing.
- To fit - A2, A3, A4 & A5.
- Vertical or Horizontal format.
- 5 colours and mixed colour pack available.
- Available in 4 sizes, to fit - A2, A3, A4 & A5.
- Chose from 5 colours or mixed pack (2 of each).

Frames4docs are a unique range of colour coded frames designed for easy and prominent document display.

Perfect for use in offices, shops, libraries and throughout the workplace to display all types of literature, certificates and information.

Colour coded using black, blue, green, red and yellow, ideal for displaying health and safety information, fire notices, charts and any other information that needs to be shown prominently.

Frames4docs are ideal for the portrayal of important information and act as perfect reminders for all staff in 5S and Lean Manufacturing.

The magnetic Frames4docs have a very strong pull force and can be applied to any flat steel surface. The design allows for easy insertion and removal of documents without the necessity of moving the frame. However if required, simply lift and relocate your document at will. The magnetic frame also enables a document to be displayed cleanly without the use of nails and pins that could possibly damage the fixing surface.

The self-adhesive frames4docs have a permanent, aggressive adhesive that has been selected to adhere to most sealed surfaces. This design allows for documents to be easily changed when required.

Rubber Rib - Roll	3 x 915 x 10000	RR391	£111.20
Rubber Rib - Roll	3 x 1220 x 10000	RR3122	£148.40

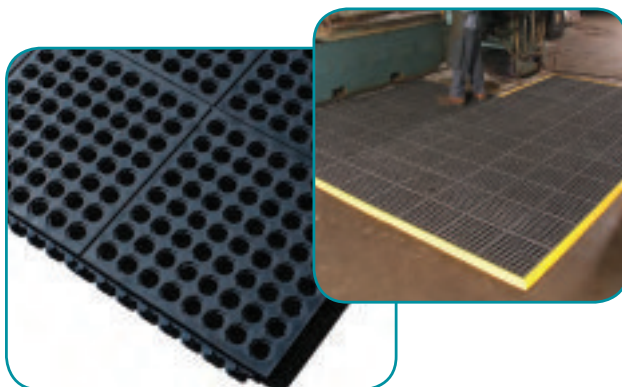

Cushion Link

Modular anti-fatigue system. Solid top design with an anti-slip surface texture, the ultimate for ergonomic comfort and safety in heavy duty industrial applications. This system is the most adaptable for dry manufacturing conditions supplied in 6 finishes to suit most industrial manufacturing environments from static dissipative to fire retardant and grease and oil resistant.

- Mats can be interlocked and edged using the simple bevel system to create any mat size and shape.
- Anti-slip pebble texture surface with unique underside design provides superb anti-fatigue properties.
- Manufactured from high quality resilient rubber compounds, resistant to extreme temperatures and most chemicals.

Description	Thickness x W x D (mm)	Order Ref	Price (Each)
General Purpose Rubber	19 x 910 x 910	CLO36GP	£65.85
Nitrile - Fire Retardant	19 x 910 x 910	CLO36NFR	£226.50
Black Bevel Edge	19 x 50 x 910	CL36BB	£20.55
Yellow Bevel Edge	19 x 50 x 910	CL36YB	£20.55

Industrial Matting

Cellmax

Economical rubber duckboard matting, offering comfort and safety. Industrial long-term use.

- Straight edges allow mats to be joined in both directions using connectors, to cover large areas around machinery.
- Drainage holes and raised studs allow fluid and debris to fall through, leaving a clear surface.
- Designed to withstand industrial use over a long period of time.
- Cellular slip-resistant surface.

Description	Thickness x W x D (mm)	Order Ref	Price (Each)
Cellmax Black	23 x 1000 x 1500	CM3959	£49.00

Interflex

Traditional grid welded PVC roll-out duck-board matting for medium duty industrial and commercial use.

- Oil, grease and chemical resistant recycled PVC with anti-slip surface.
- Connector clips for side or end joining.
- Also available in Blue, Green, Grey or Red (please enquire).

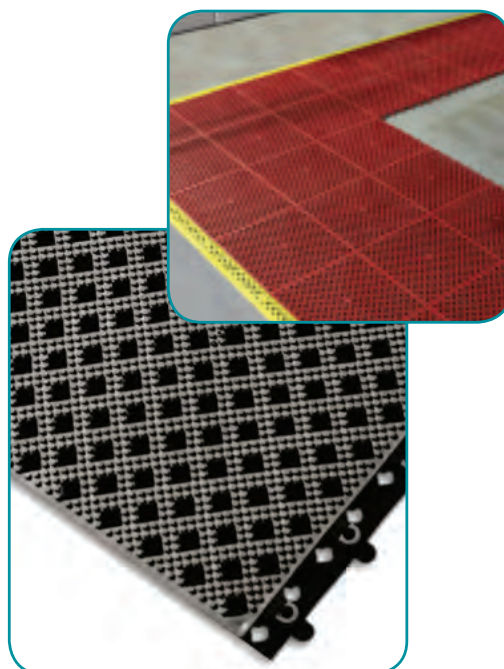

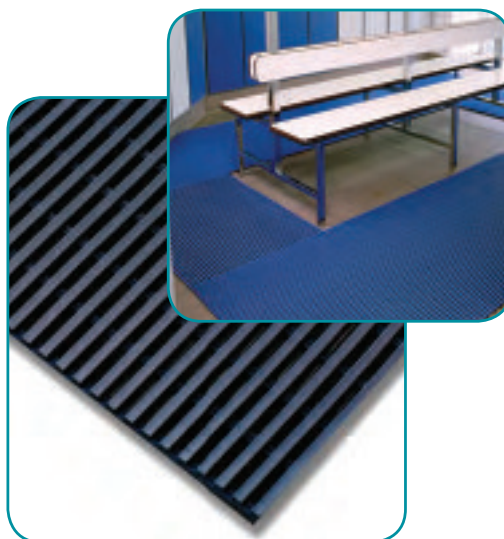

Description	Thickness x W x D (mm)	Order Ref	Price (Each)
Interflex Black - Roll	12.5 x 600 x 10000	IF2433BL	£443.25
Interflex Black - Roll	12.5 x 800 x 10000	IF3233BL	£591.00
Interflex Black - Roll	12.5 x 1000 x 10000	IF3933BL	£738.70
Interflex Black - Cut to length per metre	12.5 x 600 x 1000	IF24BL	£59.85
Interflex Black - Cut to length per metre	12.5 x 800 x 1000	IF32BL	£79.80
Interflex Black - Cut to length per metre	12.5 x 1000 x 1000	IF39BL	£99.75

Kumfi Tile

Versatile interlocking duck-board tile system with high-grip surface suitable for indoor and outdoor dry or wet areas.

- Soft PVC construction provides anti-fatigue comfort but withstands most commercial and industrial applications including hospitals, hotels, exhibitions and light workshop use.
- Free-draining and resistant to a wide range of oils, grease and chemicals.
- Easy to clean - simply unclips into small sections.
- Simple and effective interlocking system ensures a firm, quick joint which can be easily, but not accidentally released.
- Bevelled edge component moulded with corner section which can be simply removed with a sharp knife when not required.
- Can be laid to fit awkward shapes in any colour combination.
- System allows rapid extension or adaption of work areas and individual damaged tiles can be easily replaced.
- Also available in Blue, Green, Grey, Red or Yellow (please enquire).

Description	Thickness x W x D (mm)	Order Ref	Price (Each)
Kumfi Tile Black	12 x 300 x 300	KT1212BL	£5.40
Kumfi Tile Edge Black	12 x 50 x 300	KT1202BL	£2.30

Industrial Matting

Dayton

Practical everyday good value moisture and dirt control entrance mat.

- Economically priced all purpose mat ideal for medium duty applications.
- Polypropylene fibres bonded to a vinyl backing.
- Range of attractive dirt-hiding mottled colours.
- Easy to clean with vacuum or extraction clean.
- Also available in Rust, Blue or Red (please enquire).

Description	Thickness x W x D (mm)	Order Ref	Price (Each)
Dayton Anthracite	7 x 600 x 900	DT2436CH	£13.95
Dayton Anthracite	7 x 900 x 1200	DT3648CH	£27.90
Dayton Anthracite	7 x 900 x 1500	DT3660CH	£34.80
Dayton Anthracite	7 x 1200 x 1800	DT4872CH	£55.65
Dayton Anthracite	7 x 1200 x 2400	DT4896CH	£74.20

Lustre

Internal entrance, walk off mat, specially designed to manage moisture and dirt control in high traffic areas where a high level of cleanliness is demanded. Can be utilised in commercial as well as industrial environments. Available in 4 different shaped mats. Can be printed with a logo or messaging.

- Highly effective wet absorption and dirt trapping action.
- Constructed of nylon twist fibres with nitrile rubber gripper backing and double reinforced borders.
- Gripper backing minimises movement on carpeted areas.
- Machine launderable at 50° C – can also be vacuumed or extraction cleaned, or simply hosed off.
- Also available in Walnut, Blue, Green or Cranberry (please enquire).

Description	Thickness x W x D (mm)	Order Ref	Price (Each)
Lustre Charcoal	9 x 600 x 850	LM2436CH	£29.70
Lustre Charcoal	9 x 850 x 1200	LM3648CH	£59.45
Lustre Charcoal	9 x 850 x 1500	LM3660CH	£74.30
Lustre Charcoal	9 x 850 x 3000	LM310CH	£148.55
Lustre Charcoal	9 x 1150 x 1800	LM4872CH	£121.30
Lustre Charcoal	9 x 1150 x 2400	LM4896CH	£160.85

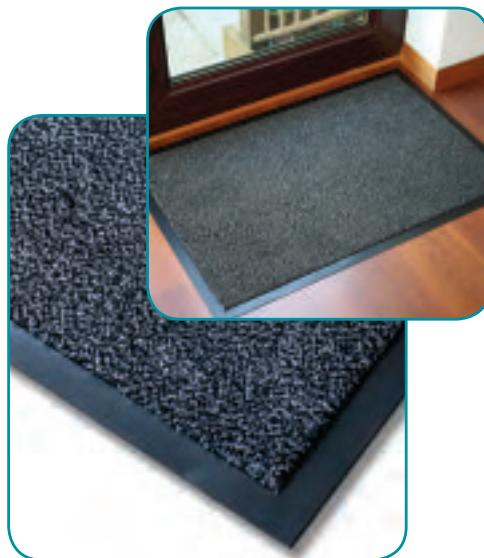

Fingerbrush

External use, heavy duty rubber and dirt removal, withstands weather extremes and heaviest foot traffic

- External heavy duty rubber matting.
- Thousands of flexible rubber bristles clean shoes fast
- Anti-trip bevels and anti-slip underside detail to prevent mat movement.

Description	Thickness x W x D (mm)	Order Ref	Price (Each)
Fingerbrush Black	14 x 600 x 800	FB2432	£29.35
Fingerbrush Black	14 x 800 x 1000	FB3239	£43.60
Fingerbrush Black	14 x 900 x 1800	FB3672	£91.40

- Carriage charges may be applicable (please enquire).

- For all volume enquiries, please contact us.
- Express delivery options are available subject to an additional cost (POA).
- All published lead times are subject to stock availability.
- All capacities are based on uniformly distributed loads (UDL).

Materials Handling Equipment Guide to Safe Working Practices

It is recommended that a full risk assessment is undertaken prior to the use of any Manual Handling Equipment.

This should include:

- Suitability – Choosing the right product for the application
- Load - Weight, Shape and Distribution (UDL) – Point loads subject to user discretion
- Distance, Terrain and Visibility
- Capability of the operator
- Frequency and Duration

A full check/Inspection of the equipment should be carried out prior to use and should include:

- Structural integrity including all welded and mechanical joints
- Handles, Grips and Guards
- Wheels, Tyres and Castors – including wear, pressure and any play
- Toe Plate, Load Plates, Platforms and Shelves
- Axles (Fixed and Moving)
- Mats, covers and Protectors
- Accessories and Restraints

Any wear, faults or damages should be addressed prior to use

Published Frame Load (PFL):

This is the maximum weight at which the frame has been tested under controlled conditions

Safe Working Load (SWL):

This is the maximum weight at which the truck should be used following completion of the onsite and operator Risk Assessments

Uniformly Distributed Load (UDL):

This is the maximum load that can be evenly distributed across shelves, beams, toe plates, load plates, platforms or other load bearing part or parts of a product or assembly

This document is published as a reference guide to best practices only and should always be used in conjunction with your in house Health and Safety Policies, Procedures and Risk Assessments.
