

A photograph of a dining area featuring a round wooden table with four chairs, a teal-colored built-in shelving unit with glassware and dishes, and a wooden floor. The word "Tealbury" is overlaid in white serif font.

Tealbury

Tealbury

At Tealbury, we believe every home deserves to be both beautiful and functional. As a family-owned business based in Nottinghamshire, we take pride in crafting high-quality, bespoke furniture designed around your lifestyle.

Our expert craftsmanship ensures every detail is finished to perfection, using premium materials sourced for their durability and elegance. Whether you prefer classic charm or modern sophistication, our customisable designs offer a wide range of styles, finishes, and colours to suit your taste. Plus, with innovative storage solutions and space-saving features, we create spaces that are as practical as they are stunning.

Inspired by the beauty of the UK, each of our door styles is named after a cherished British location, adding a touch of homegrown heritage to every design. We are also committed to sustainability, using environmentally friendly materials and responsible practices wherever possible.

With an experienced team dedicated to guiding you through a seamless, stress-free process from concept to completion, we guarantee exceptional quality and service. Your dream home starts here - let Tealbury bring it to life.

Uniquely yours!

When you are making an investment in your home, you want to know you're purchasing from an expert who cares about your project from your initial appointment right through to aftercare.

From modern to classic, we offer a stunning range of styles and finishes in a selection of on-trend colours, allowing you to customise your space with fitted and freestanding furniture.

Our beautifully crafted furniture collection can be tailored to your lifestyle, taste and budget to achieve a stunning yet functional design that will add value to your home and everyday living.

Range options

Express colours

Popular colours within selected ranges that are pre-finished and therefore available in a shorter time frame.

Paint to order

A large number of our ranges are suitable for painting, simply select any colour from our standard colour palette.

See page 127 for standard colour palette

Colour match

All our paintable ranges can be matched to a specified colour using BS (British Standard) or RAL (European Standard) colour references.

Stain to order

Selected ranges are suitable for staining, choose any shade from our standard stain palette.

See page 127 for stain options

Made to order

Alternative sizes or designer features are available to create a bespoke space.

Abbotsbury

The stunning simplicity of the Abbotsbury shaker door is accentuated by its narrow frame. Its authentic painted woodgrain finish and wealth of accessories makes Abbotsbury an ideal choice for both contemporary and traditional settings.

Lighting

A carefully considered kitchen lighting scheme can completely transform the look and feel of your space. From meal prepping to entertaining friends around the table, your choice of lighting not only sets the mood, but it can also enhance key design features. We offer a range of LED lighting solutions for various furniture applications to meet both your practical and aesthetic needs.

Task lighting

Sufficient lighting is a must in task based areas where hobs, sinks and even worktops are in use, as this aids safe cooking, washing and prepping. A range of LED options are available in aluminium and an on-trend matte black finish.

Mood lighting

Lighting that creates ambience in a kitchen setting can provide the most stunning effect and can transform a kitchen space better than anything else. Opt for recessed LED lighting under worktops, concealed above wall cabinets or even along the bottom of base units.

Convenience lighting

Combine beautiful, functional lighting with everyday practicality through a range of switches and control modules for ultimate convenience. Choose from a range of wireless touch switches or control lighting from your smartphone via a Wi-Fi app, or through voice control systems such as Amazon Echo or Google Home.

DOMUS Line®

Colour palette

Available in all our Paint to Order ranges. Foil ranges are only available in a selection of colours.

Looking for a specific shade? Ask us about our Colour Match Service, available in selected ranges.

Oak stains

Oak stains can be applied to Rezana, Tavola and Versa.
Grain type and direction vary across each range.

Ferro paints

Metal paints can be applied to Ferro only.

This document is intended only as a guide and, as no picture can accurately convey colour representation it is suggested you examine our products personally before purchase. Only then can you appreciate the detail of each and every component, the finishes applied and the superior quality. If your chosen finish is not on display, we recommend that you order a sample.

Care & maintenance

With appropriate care and maintenance, our furniture is designed to provide years of reliable service. To keep it in the best possible condition, please follow the simple guidelines below.

Designed for domestic use, we recommend that each area / cabinet in the room is maintained within domestic temperature and humidity levels. We recommend a temperature range of 16°C - 24°C and a relative humidity range of 40% to 60%.

Please note your guarantee may be adversely affected if used for non-general domestic environments and care and maintenance guidance is not adhered to. Details of guarantee available upon request.

INSTALLATION ADVICE

Ensure that all new-builds or newly plastered rooms have been left to environmentally stabilise prior to the installation of new furniture. Furniture must not be installed in a damp, or moisture-rich environment as it will cause undesirable movement in the joints and panels of the door. A hygrometer should be used to assess conditions.

To help minimise any potential damage to the furniture whilst you are installing it, please read and adhere to the following instructions:

- We would advise that you make an initial check to confirm that you have the correct quantity and size of fascias; you can do this by referring to the labels attached to the outer packaging.
- Ensure that you fully inspect each individual fascia prior to attaching the hinges. Claims for damage to the fascia will not be accepted after the hinges have been attached.
- If doors are supplied with a protective film on the face they must not be directly exposed to sunlight. You should remove this only after they are installed as the curing process continues for around 72 hours after the film is removed. This means the doors will be liable to scratching and other marks. You should avoid cleaning the doors for at least a few days to prevent any marks appearing on the surface.
- Do not stack the doors on their ends on any hard surface; this can cause chipping and scratching along the edge of the fascia, especially on the handle edge of ranges with an integral handle. Prior to fitting, the fascias should be stored flat, ensuring that they are not resting on any dirt or debris that may damage or mark the finish.
- Take extreme care when stacking the fascias with hinges attached to ensure that the hinges do not mark other fascias. Do not lean the fascias against one another, or against any surface without proper protection in-between.
- You should take extreme care not to put the door down with excessive force on any edge, especially the handle edge, as this will cause crushing/impact damage on these edges.
- If the fascias are attached to the carcass, then you should carefully remove the fascias by unclipping the hinges and storing these flat in a clean safe environment away from your working area, utilising the packing materials from the units.
- Take extreme care when unpacking the fascias and do not use sharp blades to cut away the packaging.
- Where cutting/scribing décor panels and trim, you must use a sharp quality saw blade of the appropriate grade for fine-cutting, or a suitable router. Small chips can appear along the cut-edge, and so extra care must be taken to minimise the risk of chipping. Using a blunt or inappropriate saw blade will produce a poor finish, and this will not be covered by the guarantee.
- All cut edges should be sealed against moisture ingress using a suitable water-resistant sealant/adhesive prior to installation.
- When attaching the hinges, place the fascia face down on a soft, clean surface, ensuring that there is no grit, sawdust or other matter underneath that can damage the surface of the fascia whilst the hinges are attached. It is good practice to place a sheet of clean cardboard between the fascia and the flat surface prior to attaching the hinges.
- If the hinges are 'knock-in' type. Use a rubber mallet to knock the hinges into the fascia without using excessive force.
- Once the hinges have been attached to a door, hang the door on the unit straight away to avoid damage. Do not stack the doors with the hinges touching other doors, as this can cause scratches or marks to the other fascias.
- On Painted Products - Any fine chips along the cut edge should be smoothed with a fine grade sandpaper prior to fitting.
- All trims are supplied in long lengths and need to be cut down on site, using the appropriate tools.
- When fitting the plinth, ensure that you check the dimensions of any adjacent appliances. On occasion, the plinth may need to be pulled forward to ensure that it clears the front of the appliance. This can be achieved by fitting blocks using off-cuts to the rear of the plinth prior to attaching the plinth clips, to step the plinth forward from its normal position.

GENERAL CARE

Heat & moisture

As with all furniture the most common problems occur due to excessive or prolonged exposure to heat and/or moisture.

- Spills and condensation on fascia should be cleaned and dried immediately. Particular attention must be paid to sink areas and wet appliances as damage caused as a result is not covered by warranty.
- Dishwasher doors should not be opened mid cycle or immediately at the end of a cycle. Damage caused by the excess steam will not be covered by warranty.
- Appliances that create steam (e.g., steamer, coffee maker, kettle, steam mop, etc) should not be placed underneath cabinets or near units where condensation may form.
- Care must be taken when washing floors and work surfaces to prevent liquid accumulating on or adjacent to plinth and panels. These areas should be dried thoroughly after cleaning.
- Appliances that generate excessive heat such as toasters, air fryers, microwave ovens, etc, should be correctly ventilated and not placed under or near kitchen units.
- Please be careful not to puncture the foil/melamine lacquered surface of your furniture. These should be kept dry to prevent moisture ingress.

Light & colour

The colour of doors and drawer fronts may appear mismatched in colour. This apparent mismatch is sometimes the effect of differing light conditions within the room, (known as metamerism). To check your doors and fascia you should place them side by side in natural daylight for comparison.

Please note that after a period of time, it is normal for the colouring of furniture to mellow in colour. In particular, timber & light lacquered surfaces change colour have a certain tendency to "yellow with age." This is not a manufacturing fault and is due to exposure to light. The product material, finish and the intensity of exposure will affect the rate of change. Due to this, we advise that colour change is taken into consideration when replacing or fitting new doors sometime after the original furniture has been installed, as replacements may not be an exact colour match. This also should be taken into consideration when choosing colours from samples and swatches and it is therefore recommended that samples/ swatches are changed regularly.

Cleaning advice

- Periodically clean the interior and exterior surfaces of the door using a soft, damp cloth. Wipe dry all surfaces after cleaning.
- Do not use wax-furniture polish, abrasive or aggressive cleaners, bleach, or other hypochlorite (chlorine) based cleaners, multipurpose cleaners, dilutes, acetone, alcohol, solvent, or similar products on the door, as this will damage the surface; Additionally wax and polishes leave a residue build up that is difficult to remove. Only use a 5% soap, 95% water (liquid soap) solution, wiping with a damp (not wet) cloth, finally drying with a soft, clean cloth only.
- There are a number of products available which are designed for cleaning high gloss doors, but plain water can be used for regular cleans. Always use a lint free soft cloth and use a circular motion to achieve a high buff. Micro-fibre cloths are perfect for achieving a high shine with little effort. High gloss doors may show fingerprints, which can be easily cleaned with a soft cloth.
- Do not expose the furniture to temperature in excess of 60°C (140°F) (Approximately the temperature of washing up water).
- Dust with a soft cloth only.
- Never use any abrasive pads or abrasive cleaners of the furniture.
- If using glass cleaner on your glazed/mirrored doors be careful not to damage the finish of the door and cabinet parts while cleaning. Do not spray cleaner directly on to the surface as this may discolour the finish of your units. Instead, spray a small amount of cleaner on to a lint free cloth or paper towel then wipe the glass/mirror.
- Ensure all cooking splashes, spills and condensation on the furniture are wiped immediately with a damp cloth; and dried immediately.
- If the surface of the product is exposed to any oil-based substance (for example olive oil, butter, margarine or cooking oil), the spillage must be wiped away immediately to prevent staining.

This document is intended only as a guide and, as no picture can accurately convey colour representation it is suggested you examine our products personally before purchase. Only then can you appreciate the detail of each and every component, the finishes applied and the superior quality. If your chosen finish is not on display, we recommend that you order a sample.
