

Firing up
private
market
investing

Welcome to Syndex

We know Founders. They're visionaries. They don't build companies to spend their time in the back office, managing admin such as unit registry and reporting. They want that pain point gone. Their passion is building out their dream while having peace of mind that the rest is taken care of.

As the backbone of our economies we are big supporters of private businesses. We acknowledge the importance of this opportunity to fire up smart, well-positioned, experienced and innovative companies that are primed for growth. If we can raise their status and earnings, then we all stand to benefit from a healthy and productive economy.

What we do

Syndex is an investment management solution that supports the growth and professionalism of private companies, co-operatives, market issuers, their shareholders, investors and intermediaries.

Old legacy, manual systems are replaced with automated operations that bring efficiencies and ease of scalability. The management toolbox has solutions for compliance, governance, corporate actions, investor engagement & registry administration. We then enable your team to retain control of your relationships, rather than handing them over to a third-party provider.

Don't let admin slow your businesses innovation and growth

Starting your business

Start a business, with low overheads:

You likely manage your customers and targets on an Excel spreadsheet

First phase business growth

Your business is growing and associated admin is getting more onerous.

It's time to partner with Syndex and shift your Excel onto an automated platform.

This will support you in:

- Disclosure reporting
- Governance
- Investor communications
- AML/KYC adherence
- Capital raising
- Offering liquidity
- Scaling up

Professionalising your business

You're now in full swing with managing your unit registry and capital table stewardship. Fast growth sees you eyeing a potential IPO.

Running a listed or soon to be listed company requires timely, accurate and well managed communications and reporting to the indices, broader market and your shareholders.

Syndex's platform can help you adhere to and in some cases automate this:

- Set prompts, reminders.
- Dividend payments.
- As a listed company, you have an auditable, clear history of all your corporate actions and communications.

Mature & listed company stewardship

As you expand, raising alternate capital helps you go further; time to use more of Syndex's capability.

Take advantage of the primary exchange in NZ to raise wholesale funds;

Use the unit registry and capital table management functionality:

- Automatically pay dividends.
- Complete client reporting.
- Empower your sales team with a central client and prospects management tool.
- Manage KPIs.
- Offer employee share options and manage them centrally.
- and more...

The Syndex ecosystem

Our ecosystem aggregates capital raising, liquidity solutions, registry share management and investor communications under one unified system, offering a comprehensive and unmatched investment management solution.

“The time-saving is significant – we’ve reduced administration by at least 60%. Since introducing the Syndex platform we’ve taken on nearly double our business, but with minimal impact on our administrative demands.”

Investor portal

Empower your clients and reduce administration demands all in one go. The portal provides investors with a centralised view of all their private investments, offering easy access to documents, communications and market opportunities – available 24/7 for maximum convenience. Investors self-manage their files, statements, certification and trade history, meaning you don't have to!

The screenshot shows the Syndex investor portal interface. At the top, there's a navigation bar with 'syndex.' on the left and 'Dashboard', 'My Investments', 'My Accounts', and 'Markets' in the center. A user profile for 'Richard' is visible on the right. The main content area is divided into several sections:

- My Market Activity:** Includes a 'Live: Click here to Join' button, a 'Trading Event' closing in 5 hours, 39 minutes, and two 'Buy Order' entries for 'Acme Investments' with prices of \$65.00 and quantities of 200 and 800.
- Live Markets:** Features a 'RETAIL' badge and an advertisement for 'Acme Investments Private Equity' with a 'MIN INVESTMENT: NZD 2,500'.
- Central Dashboard:** Greeting 'Hello Richard' with a date of '31 Oct 2024'. It includes a 'Breakdown of Investment Amount' donut chart showing a total of '\$1,841,000.00 NZD'. The chart is divided into three segments: 'Richard & Alex Karetu' (dark purple), 'Karetu Trust' (medium purple), and 'Richard Karetu' (light purple).
- Notifications and Messages:** Lists updates such as 'New Continuous Market' and 'Announcement' messages.

Capital raising and the Syndex marketplace

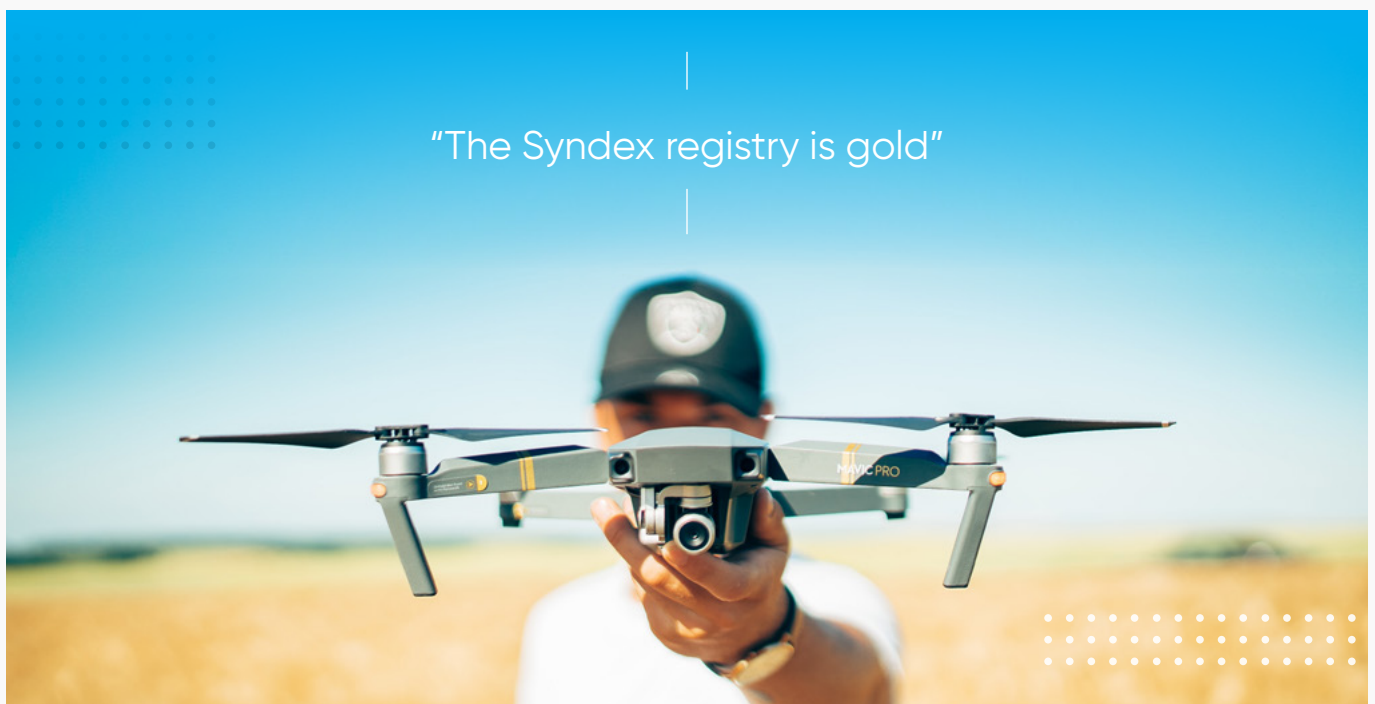

Businesses are connecting with our investment-ready community for an easier way to raise capital on the private markets.

Present and promote your share proposal to a database of interested investors within the Primary Market or Opportunities Market. The Secondary market adds price discovery and enhances liquidity.

Markets

OPPORTUNITIES :: PRIMARY SECONDARY

Company Name	Market Type	Category	Min Investment (NZD)
Vegas Creamery	Primary	Private Equity	45,000
Mission Point Properties LP	Secondary	Commercial Property	100,000
Wairau River Vineyard	Secondary	Horticulture	50,000

Liquidity – the next dimension of the private markets

Incorporating liquidity solutions into your investment structure, addresses the evolving demands of investors and enhances the opportunity and investor-centric nature of your fund.

Syndex offers digital Secondary Market functionality for Private Markets where investors can buy or sell shares in a Continuous or Periodic Secondary Market.

Continuous Market

Peer-to-peer trading via a self-service secure investor portal; participants buy and sell when they like, based on market demand. Investment managers support this facility by providing continuous disclosure information to the market.

Highlights:

- ✓ A singular real-time view of share orders and their rates – informing decisions for buyers and sellers
- ✓ Multiple and Partial order matching – enhancing liquidity
- ✓ Option of allowing proactive buy orders – invite new investment even if no shares are available
- ✓ No cash handling – trades are completed peer-to-peer via a step-by-step online settlement process

Periodic Market

This market operates as a trading event or auction that opens, and closes, within a defined period. Controlled by the Fund Manager, this market is customisable and suitable for ESOPs, shares, units, commodities or other proportional investments.

- *“Our switch to Syndex for our employee share programme is a switch from manual admin-heavy auctions to automated events, with trading in real-time. It’s been a step-change in the level of transparency it provides our employees and we’ve been able to invite a wider pool of employees into the event.”*

Highlights:

- ✓ Fully interactive marketplace via a digital platform and self-service, secure account holder portal
- ✓ A market you control – frequency, participants, price ~ floor/ceiling, proxy orders, timing
- ✓ Low administration – automation of participant communication and documentation
- ✓ Dual-view – switch seamlessly between a simple layout and a more in-depth view

How does Syndex differ from other service providers?

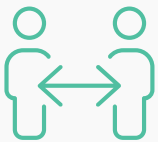

Liquidity mechanisms

We offer a decentralised secondary market where investors can trade directly with one another (peer-to-peer), removing the need for intermediaries or a centralised exchange. Unique in the market, you can choose between our continuous or periodic markets, each featuring real-time algorithmic trading.

The Syndex ecosystem

We are a one-stop-shop. We don't just offer unit registry and/or basic accounting software, and/or communications. We provide a self-service platform that allows you to manage everything from unit registry, employee share options trading, group-wide communications, a first-class CRM system, an investor portal, a capital raising platform, liquidity provisions and more.

Our team

The Syndex team brings extensive industry expertise and experience, having held senior executive roles in commercial banking, technology, governance, business development, professional services, and funds administration. This deep knowledge enhances our platform's design and development, enriches our support and training, and ensures a deep understanding of our customers' needs.

Your market

We've created a platform that puts you in control, providing the tools to manage your own private market. Unlike outsourced models, which can be inefficient and costly, Syndex allows you to keep all your data in-house and operate seamlessly.

Extending growth options for all businesses

Our partnership with NZX

Connecting private enterprises with the right kind of investor is a powerful part of what we do and despite our allegiance to the private markets, sometimes the right kind of investor is in the public markets. We're working with NZX to make sure businesses have all the growth options available to them.

The Syndex platform offers a seamless transition between private and public

markets, supporting businesses through their entire lifecycle— from initial capital raise to public listing— while maintaining continuity in infrastructure. This collaboration enhances the capital markets ecosystem and provides sustainable growth options as debt financing becomes less attractive.

Like what you see, but you only need one or two of our solutions?

We can tailor the platform to suit your business. This means you can select the solutions that allow you to continually offer a high level of client service and we price our offer accordingly.

A bit about us

Syndex is a 100% privately owned and operated business, with origins in New Zealand, and now Australia. Since 2015 we've been connecting investors to private businesses and bringing digital efficiencies to the latter, staying with them as they grow, professionalise and sometimes IPO.

Our technology, together with our ongoing commitment to servicing our clients has helped us secure over \$7.3 billion in assets under administration. We think this is proof that our customers' satisfaction is everything to us.

Please get in touch for more information on how we can help support your business.
