- Small island developing states

ABOUT ME

I am a FWO postdoctoral researcher on climate change adaptation at the Institute of Development Policy (IOB). My research applies a critical lens to adaptation governance and structural vulnerability; and analyses ground rooted cases to identify gaps and opportunities to reform international climate policy responses and finance under the UNFCCC. My postdoc project focuses on adaptation limits, Loss and Damage and habitability in the context of Small Island Developing States.

- Supply chain governance

ABOUT ME

I am a PhD-candidate at IOB, with a background in International Relations and Conflict Studies. My research focusses on the cobalt supply chain and the mining environment in Lualaba and Haut-Katanga provinces in the DRC. More specifically, my research critically questions the power relations at play in the 'responsible sourcing' framework and how this is changing the global supply chain governance formation.

KEYWORDS

- external debt sustainability
- debt relief
- policy support
- finance for development

ABOUT ME

My research focuses on external debt sustainability and the relevance of debt relief initiatives. Furthermore I have always been active in providing policy support research to the Belgian development cooperation, and to other bilateral as well as multilateral donors. I also inquire into broader 'Finance for Development' issues, such as related to innovative development financing and to the application of 'real option' theories to financing mechanisms and decision making within a development context.

ABOUT ME

As a project officer I'm in charge of the financial and administrative execution of some of IOB's (long term) partner cooperation. I work in close collaboration with my colleagues in the Global South and – mainly, but not only – VLIR-UOS. This involves orders, travel, settlement of costs, invoicing, financial planning, control and reporting.

ABOUT ME

I am a development economist with about 35 years of experience in international development. Since 2020, I am a Full Professor at the Institute of Development Policy, University of Antwerp, having previously held senior research management positions at IFPRI, GDN and UNU-WIDER and Faculty of Economics positions at the Universities of Oxford and Manchester, UK. My research areas include development finance, foreign aid effectiveness, food security, and urbanization and development, among others. Find my scholarly work in this [link](#).

ABOUT ME

I am a PhD Student and part of the "InfoCitizen" project. My research explores the transformative role of organizations and social movements in Brazil's data landscape. Specifically, I investigate how various actors within these organizations adopt data practices, routines, and narratives, catalyzing transformations in notions of social impact and citizenship. I am particularly interested in understanding the social and political relations that influence datafication regimes within institutions, including accountability practices, and how data is perceived as a valuable resource to transform realities both within and outside the institutional frame.
