GLASS DILDO

Glass dildos are suitable for both vaginal and anal use. They frighten some people but they have not delved very deep into the subject. They are without doubt top of the tree when it comes to dildos and they feel fantastic.

One reservation that some people have is that they might break inside you. This is not going to happen as they are made out of reinforced glass that will not shatter or break during use.

One advantage of glass dildos is that they can be used when hot or cold giving different sensations either way. This is because heat causes the blood vessels to expand in the vagina or anus. Cold causes them to contract. Which is preferable is a matter of personal preference.

Glass dildos come in various shapes and designs but if you want an easy insertion and ease of masturbation then a straight glass dildo is ideal.

As for design the beaded glass dildo is one of the most popular as the raised nodules are ideal for stimulating the areas that you want to stimulate.

The beads give a texture that stimulates both the female clitoris and G- spot as well as the prostate gland in men.

Most women agreed that they would be happy to have sex with a man who had a 7 inch long cock with a diameter of around 1 inch. So we went for a glass dildo of that size which was straight and had raised nodules.

The fact that this dildo is double-ended means that it can be used by two women at once making for a shared experience.

G-SPOT AND PROSTATE MASSAGER

This vibrator can also be used as a G-spot massager in women but is usually used anal by men.

A prostate massager is often used merely for pleasure but stimulation of the prostate can offer a number of health benefits. The prostate, described by some as the male equivalent of a woman's G-spot, is a walnut-sized semen storage gland located at the base of the penis, just below the bladder. It can be stimulated internally through the rectum. When ignored, semen can build up within the prostate, creating stagnation and bacterial growth which can cause swelling and inflammation (prostatitis). An enlarged prostate can cause urinary and erectile problems. Regular prostate massage can relax tension and stress in the muscles and nerve endings in the prostate area.

When the prostate is massaged, a man can experience extremely powerful, long-lasting, often multiple orgasms, and intense ejaculation. A prostate orgasm also flushes out any stagnant prostate fluid which can cause swelling of the prostate, thus avoiding the need for surgery.

So regular prostate massage can reduce the risk of developing prostate cancer and genital pain by improving blood circulation and cleansing the prostate.

Made of body-safe material this vibrator is around 19 cms in length and uses 3 AAA batteries (Not Supplied).

PRICE - £9.99

This rabbit vibrator is one of the most popular sex toys available. Rabbit vibrators are designed to stimulate both the clitoris and the G-spot at the same time.

It does this by firstly by having the shaft which is inserted into the vagina to affect the vagina internally and the G-spot area in particular.

There are also what are termed bunny ears which vibrate against the Clitoris.

Thus both of the most sensitive areas of the female sex organ are separately stimulated giving even more pleasure.

This particular vibrator is 9 inches in length and has a diameter of 1.7 inches.

It is, of course, made of body safe material.

Two AAA batteries are required – Not provided
