

Chaskee®

Collection 2025
Original neoprene
visor headwear

Chaskee® Headwear

www.chaskee.com - info@chaskee.com

Chaskee takes its inspiration from the outdoor prowess of the sun-worshipping Inca runners called "Chasquis." These royal messengers quickly traversed the dramatic distance between the Andes Mountain heights and the glistening blue waters of the Pacific Ocean.

Chaskee pioneered the use of the neoprene visor as a central component for making comfortable and functional outdoor headwear. Whether for hiking, running, surfing, canoeing or racket sports, Chaskee headwear effectively and comfortably provides protection from the sun and rain and enables one to always look, feel and perform his or her best.

Chaskee products are designed in California and tested in Switzerland, according to the most rigorous standards of quality, style and functionality.

Chaskee is aligned with the Swiss-based non-profit organization called the "Energee Association" which instigates and oversees a variety of human enhancement efforts, ranging from paying for the medical insurance for our workers to funding the digging of water wells in outlying villages. A portion of the Chaskee profits is set aside to promote these projects

Chaskee's UV protection is very high thanks to the double or single Nylon microfiber construction. Our bestsellers 001 Reversible Cap and 016 Visor Snap cap have been tested by Intertek with a UV50+ result, for the other styles we are using the same material as tested.

Advantages of Chaskee Headwear:

*highest quality construction -
20 with up to 80 UV protection
ultra comfortable fit - flexible & bendable
reversible & lightweight multifunctional,
one size fits all - washable*

Our Neoprene visors are made of 100% synthetic rubber

Our Microfiber is made of 100% nylon fiber

Chaskee is socially committed and we are aligned with the Swiss based non-profit organization called the Energiee Association, which initiates and oversees a variety of human enhancement efforts in the states of Maharashtra and Uttar Pradesh in India.

Project range from paying the medical insurance for our workers, to funding the digging of water wells, installations of water pumps and placing playgrounds in outlying villages.

A portion of the Chaskee profits is set aside to promote these projects.

Our efforts are intended to promote human flourishing in a manner that avoids paternalism, ideological litmus test and bureaucratic excesses.

For more information regarding the Energiee Association, please visit the website at www.energiee.org.
