About ENGMA

- ❖ Founded in 2012 by three engineers from Polytechnic University in Ho Chi Minh City, the company embarked on a journey:
- ❖ 2012-2015: Conducted research and implemented modules for technology projects with Japanese companies.
- ❖ 2015-2018: Operated as an outsourcing company, focusing on mobile application projects for Japanese clients.
- ❖ 2018-2022: Expanded into Vietnamese and Southeast Asian markets, serving domestic companies in e-commerce, IoT, and more. Additionally, provided IoT services to Hong Kong firms and platform development services to clients in the USA and Denmark.
- ❖ 2023-now: signed Representative Agreement with Nordlink Solution Company in Denmark.

Reference Projects

Logistic – Taxi Thuan Thanh

✔ Customer: Thuan Thanh Company

✔ Project name: Truck Taxi Thuan Thanh System

✔ Project size: +10 mm

✔ Solution: The truck taxi project aims to revolutionize freight transportation by providing on-demand trucking services akin to ride-hailing. Through a mobile app, users can request trucks for their cargo needs. This model optimizes truck usage, reduces empty runs, and enhances efficiency in the freight industry, promising cost-effective and timely deliveries.

✔ Technology: Fluter, PHP, NodeJS, .Net

✔ Status: operation services

Reference Projects

Logistic – Go Home

✔ Customer: Go Home
✔ Project name: Booking motorbike service
✔ Project size: +12 mm
✔ Solution: The book motorbike service project facilitates convenient motorcycle ride bookings via a mobile app, catering to short-distance commutes and deliveries, offering a swift and cost-effective transportation solution for urban users.
✔ Technology: Fluter, PHP, NodeJS, .Net
✔ Status: operation services

Reference Projects
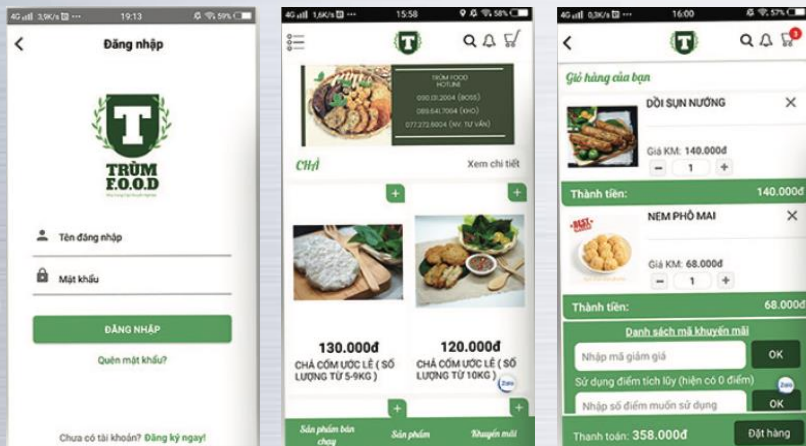

F&B Field: mobile app & middleware development

✔ Customer: KFC Vietnam
✔ Project name: E-voucher System
✔ Project size: +10 mm
✔ Solution: Middleware system creates e-vouchers, links with third parties for sales, and enables redemption in point-of-sale systems for seamless transactions.
✔ Technology: PHP, NodeJS, .Net
✔ Application: +150 restaurants, millions e-vouchers / month
✔ Status: operation services
