

SOLUTIONS FOR CONFINED SPACE, FALL PROTECTION & LOAD ARREST

www.globestocksafety.com

www.glob

Welcome

Established in 1982, Globestock Safety manufacture and supply a wide range of high-quality solutions for confined space access, work at height and load arrest.

We take immense pride in our many years of British manufacturing heritage and to this day we engineer products that we are proud to put our name to. An in-house Design & Development department, backed-up by our manufacturing operation in the same building, alongside our quality test and inspection areas, all ensure we have control over every aspect of our products.

For products we don't manufacture ourselves, we select only the most reputable manufacturers and the very most reliable equipment.

We are equally proud to be ISO9001 certified and part of BSIF's Registered Safety Supplier scheme. You can be confident in our ability to deliver for you and your client.

SAVER

FALL ARRESTER WITH RESCUE MECHANISM / SRL-R

The high-acclaimed SAVER is a retractable type fall arrester with an integrated emergency rescue mechanism (SRL-R 3-way).

May be used in conjunction with appropriate, certified anchorages and harnesses in confined space / fall protection applications.

SAVER fitted to a SENTRY Tripod

- Recovery winch with anti-run brake
- Shock absorbing brake mechanism
- Approx. 3 m per minute retrieval
- Stopping distance 0.6 m to 1 m
- Snaphook karabiner with fall indicator
- Synthetic rope option

Our TF heat-treated aluminium castings are ultra robust and durable, capable of withstanding the harshest conditions and rough treatment.

The rope is secured with a secondary backup feature to ensure full protection even at the rope termination.

SAVER ACCESSORIES

Arrester brackets enable a SAVER or STOP fall arrester (SRL) to be securely fitted to a SENTRY Tripod.

WINCH

WINCH FOR LIFTING PERSONNEL OR MATERIALS

The Globestock WINCH is specifically certified for the lifting of both personnel and materials. It is a personnel winch that may also be used for load lifting.

The anti-run braking mechanism means that, if the winding arm is released during lifting, the winch automatically locks, holding the person / load steady until the handle is rotated again by the operator.

The 1:8.9 gear ratio makes personnel lifting easy, and delivers 50 mm of rope retrieval per rotation.

May be mounted to various anchorages, including the SENTRY Tripod and XTIRPA range.

- **Up to 250 kg MWL**
- **Heavy duty**
- **Anti-run brake**
- **Up to 40 m rope**
- **Galvanised or stainless steel rope**

STOP

CE

FALL ARRESTER / SRL

The STOP is a durable fall arrest block (SRL 2-way) with a steel or synthetic cable. Engineered to remain in service for longer and conform to the latest EN 360:2023.

- Shock absorbing brake
- Stopping distance 0.6 m to 1 m
- Snaphook karabiner with fall indicator
- Steel or synthetic lifeline options
- Built to last
- Includes top karabiner

GE530G				30 m / 98 ft	Zinc plated steel
GSE530P					Synthetic lifeline, zinc plated steel snap hook

SYNTHETIC ROPE OPTION

The SAVER & STOP fall arresters are available with a steel or synthetic lifeline.

The new synthetic models follow the same construction and function of the popular SAVER/STOP fall arrester range, but are fitted with a high performance HMPE fibre lifeline. Using synthetic ropes for fall arrest systems can offer several benefits compared to traditional materials like steel cables:

- **Lightweight:** Synthetic ropes are significantly lighter than steel cables, making them easier to handle and transport.
- **Energy Absorption:** Synthetic ropes have some inherent elasticity, which means they will absorb energy in the event of a fall.
- **Corrosion Resistance:** Unlike steel cables, synthetic ropes are not susceptible to rust or corrosion.
- **Improved Handling:** Synthetic ropes are generally easier to handle than steel cables. They are less prone to causing hand injuries due to fraying or sharp edges.
- **Maintenance:** Synthetic lifelines are less likely to split, deform or kink in the way metal lifelines sometimes do.
- **Reduce Electrocution Risk:** This new product variant was specifically requested by several customers who work with electrical networks.

High grade synthetic rope being fitted to a SAVER rope drum

WEBBING BLOCK / PFL

The AUTOREEL keeps the webbing lifeline taught against the user and eliminates the potential for slack webbing, which reduces freefall distance.

An impact-absorbing casing gives good protection with high durability, and the unit features a shock absorbing element.

The quick acting locking mechanism results in lower forces being exerted on the user's body during a fall, thereby reducing the risk of injury.

Product Code	Conformity	Max. Working Load	Lifeline Length	Top connector

- Integrated shock absorber
- Fall indicator

GUARD LOAD ARREST

LOAD ARRESTORS

Guard load arrestors are heavy-duty fall arrest blocks for protecting equipment that is suspended at height.

- For loads from 150 kg to 1500 kg
- Rope lengths up to 25 m
- Shock absorption minimises damage
- Fall indicator lens for easy monitoring
- Galvanised or stainless steel rope options
- Rope automatically extends / retracts

#GuardAgainstGravity

What is a load arrestor?

Load arrestors provide a secondary safety back-up for overhead loads, used in conjunction with a primary lifting device or support, such as a hoist or fixed anchorage. If the primary support fails, the load arrestor will automatically stop the load from falling, thereby preventing damage to the load and, more importantly, protecting people below.

Guard load arrestors have a high-strength retractable rope that extracts and retracts, following the movement of the load. This means Guards can be fitted to equipment that needs to be moved (dynamic loads), as well as to non-moving (static) loads.

Name	Product Code	Maximum Working Load		Rope Length		Wire Rope Material	Minimum Anchor Strength		Maximum Running Speed

GUARD300-10

GUARD300-25

Load arrestors provide fall protection for equipment. There are a huge number of applications where load arrestors may be deployed, across a range of industries. Do you lift or suspend equipment that cannot be allowed to drop? If so, consider installing a Guard Load Arrest device as a safeguard in case the primary lifting equipment fails.

A Guard's cable automatically extends and retracts, following the movement of the load. This is ideal for loads that need to move, and often means the cable does not need to be disconnected when changing lights or speakers, for example.

INSTALLATION EXAMPLES

Single Hoist Installation

A Guard Load Arrest device running in conjunction with your primary lifting equipment can help you to establish a safe system of work that minimises risk.

XTIRPA™

Modular solutions for confined space.

Globestock Safety are proud XTIRPA partners, distributing their acclaimed product range throughout the UK and Ireland.

XTIRPA are committed to the design of high-quality, light weight, durable, versatile, and most innovative confined space rescue/retrieval systems and fall protection systems on the market.

For years, crews worked in confined spaces that did not have adequate systems to ensure a safe working environment.

XTIRPA's core mission is to guarantee safety by providing solutions that will help industries minimise injuries and maintain a safe workplace environment for confined space crews.

At XTIRPA, the experienced, dedicated staff design and manufacture confined space equipment to create safer, confined space, work environments.

XTIRPA™ GUARDRAIL

IN-8002 / 8011
DAVIT SYSTEM

WITH INTEGRATED MAST AND BARRICADE

The XTIRPA Guardrail davit system is used when an exposed entry point needs to be guarded. This portable system has an integrated mast that is used in conjunction with a davit arm to provide fall protection, entry and retrieval.

Use with davit IN-2210.

Deployed in the V configuration (A2108-20 Stabiliser required)

XTIRPA™

- Protect exposed edges
- Gate opens for simple access
- Barricade extensions available
- Fast and easy to assemble
- Folds flat for storage
- Lightweight aluminium
- Adjustable davit arm length
- Square or V configuration

GUARDRAIL ACCESSORIES

Large Barricade

Barricade Extension
IN-2101
May be deployed in various configurations. One than one can be linked together.

Wheeled Stabiliser
A2108-20
Enables the barricade to be used in the open V configuration. Wheels allow the system to be moved short distances more easily.

XTIRPA™ COUNTERWEIGHT

IN-8007 / 8012

DAVIT SYSTEM WITH COUNTERWEIGHT BASE

A counterweight system is ideal when you need to move and access various confined spaces entry points in the same area. Consisting of a central T-base unit with a number of options for anchoring, positioning, leg adjustment and extension, this is a system designed for versatility.

Use with XTIRPA davit arms except IN-2197.

610 mm and 1200 mm reach options.

XTIRPA™ UNIVERSAL ANCHOR POST

IN-8021 MODULAR FALL ARREST POST SYSTEM

The XTIRPA Universal Anchor Post system is designed to handle a variety of fall protection applications. It can be installed on flat indoor or outdoor surfaces, rocky or dirt ground and can even be mobilised with a vehicle hitch mount system.

Designed as a three person, horizontal lifeline or fall protection and retrieval device, it's truly universal.
