Aoralscan Elite More than an IOS

IntraOral Scanner

IPG Intraoral photogrammetry Technology: is the first of its kind in Digital Dentistry, where Intraoral scanning meets PhotoGrammetry in one device.

IPG + SCAN

**Two-in-one
System**

**High
Precision**

**High
Efficiency**

The Aoralscan Elite is the world's first device to integrate both intraoral scanning and photogrammetry into a single unit. The device functions as a standard intraoral scanner (IOS) for capturing images of dentulous cases, allowing for detailed scans of teeth and oral structures. Additionally, it serves as a photogrammetry system, which is used to accurately record the position of dental implants in edentulous cases. This dual functionality makes it versatile for both traditional dental work and advanced implant procedures. This groundbreaking innovation allows for comprehensive dental imaging and precise implant positioning, setting a new standard in dental technology.

Smooth Scanning for Edentulous Cases

IPG technology ensures a seamless scanning experience for edentulous patients. Aoralscan Elite Adopts the IPG tip, which is larger than standard, to capture every detail of the edentulous patient's oral geometry with unparalleled clarity.

124g Slim and Light

Aoralscan Elite Intraoral scanner combines a compact size and lightweight structure. The ergonomic design allows Elite to fit into a hand comfortably, enhancing usability and convenience.

- ✦ Ultra-lightweight (124g)
- ✦ Compact dimensions (245x30x26mm)

Aoralscan Elite

2-in-1

The Aoralscan Elite is the world's first device to integrate both intraoral scanning and photogrammetry into a single unit. The device functions as a standard intraoral scanner (IOS) for capturing images of dentulous cases, allowing for detailed scans of teeth and oral structures. Additionally, it serves as a photogrammetry system, which is used to accurately record the position of dental implants in edentulous cases. This dual functionality

IPG for All-on-X

IOS for normal cases

makes it versatile for both traditional dental work and advanced implant procedures. This groundbreaking innovation allows for comprehensive dental imaging and precise implant positioning, setting a new standard in dental technology.

Smooth Scanning for Edentulous Cases

IPG technology ensures a seamless scanning experience for edentulous patients. Aoralscan Elite Adopts the IPG tip, which is larger than standard, to capture every detail of the edentulous patient's oral geometry with unparalleled clarity.

ConsulReport: A ConsulReport is a record created by a dentist after an oral examination that includes information on the type of disease, a description, and a treatment plan.

ConsulOS: The ortho-treatment process can be simulated, and patients will be able to preview the post-treatment effect in advance.

MetronTrack: With the measurement and comparison functions, it helps improve dentist-patient communication efficiency and effectiveness by tracking patients' data.

AccuDesign: Orthodontic or restoration models can be easily designed with AI for printing.

CreSplint: A smart tool that allows users to design retainers or night guards automatically with minimum operation.

CreTemp: Temporary crowns can be designed and printed in the clinic, reducing the patient's waiting time.

CreIBT: Designs an indirect bonding tray, which can be directly 3D printed to help orthodontists attach brackets faster and more accurately.

Aoralscan Elite

Lifetime Oral Health Management with SHINING 3D

Elevate your dental practice with Shining3D's cutting-edge solutions for lifelong oral health management. Experience the freedom and precision of the Aoralscan 3 Wireless, seamlessly integrated with the MetiSmile face scanner for comprehensive patient imaging. Enhance your diagnostics and treatment planning with the advanced MetronTrack comparison tool, all while ensuring secure, cloud-based data storage. Keep track of progress and collaborate effectively with your patients, setting a new standard in dental care with Shining3D.

SHINING 3D Dental Cloud

Standard and unlimited – seamless collaboration between dentists and technicians. SHINING 3D dental cloud allows for data transfer and communication between dental clinics and labs.

Technical Specifications	
Scan Field of Single Frame	IPG scanner tip: 19mm × 14mm Standard scanner tip: 16 mm × 12 mm Mini scanner tip: 12 mm × 9 mm
Scan Depth	22 mm from exit surface of tip
Scan Principle	Non-contact scanner with structured light and Intraoral photogrammetry
Dimension (L × W × H)	245 mm x 30 mm x 26 mm
Weight	124 g (without cables)
Output	STL, OBJ, PLY
Connection Port	Type-C

Aoralscan 3

Shining 3D presents his brand-new intraoral scanner, Aoralscan 3. It's a fast scanner with high accuracy and the latest features, which makes your experience with digital scans better. The latest AI technology makes our workflow more accurate. Now, with the new ortho simulation feature, you can encourage your ortho patient for the treatment with the pre- and post-treatment videos and photographs.

ConsulOS

Revolutionize how dentists interact with their patients: Through vivid 3D simulations, dentists can seamlessly illustrate treatment outcomes, enabling patients to visualize and understand anticipated changes.

ConsulReport

Oral Health Report: Oral Health Report, is here to revolutionize dentist-patient communication and oral health management. Designed with user-friendly interaction and a simplified layout, this report enhances the effectiveness of communication between dentists and patients. Featuring multiple measurement tools, it provides comprehensive insights into oral health status.

CreSplint

Whether you need a nightguard or a retainer, CreSplint software provides you with an accurate, custom-fit design via an intuitive and user-friendly interface that requires minimal training.

CreIBT

CreIBT makes the creation of indirect bonding trays easy. With CreIBT, orthodontists can accurately attach brackets to teeth, all while benefiting from the convenience of direct 3D printing.

Aoralscan 3

CreTemp

Temporary crowns can be designed and printed efficiently in the office, reducing patient waiting times and providing high-quality care with minimal effort.

MetronTrack

With features like curve of Spee, overbite and overjet, molar relationship, Bolton ratio, crowding measurement, and Moyers analysis, these multiple measurement tools offer a comprehensive overview of the teeth. The ability to compare various intraoral data enables dentists to monitor and manage the treatment progress.

AccuDesign

AccuDesign enables users to effortlessly create printable models with a single click, streamlining operations and boosting efficiency. The improved support for ABO base significantly enhances its utility in orthodontic applications. Moreover, with the inclusion of articulators, text, and customizable settings, users have the freedom to craft personalized models.

	Aoralscan 3	Aoralscan 3 Neo	Description

	Clearance Check	Margin Line Detection	Lets user check clearance
	Margin Line Detection	Undercut Detection	Lets user detect undercuts in preparation

Aoralscan Lync SHINING 3D Intraoral Scanner

LESS IS MORE

Ergonomic & Effortless

Aoralscan Lync is the latest intraoral scanner from SHINING 3D. Built on the proven Aoralscan series technology platform, it inherits trusted software and hardware while being re-engineered to focus on what truly matters - efficiency and reliability in digital impressions. It is designed to support a wide range of clinical applications, including implantology, orthodontics, and prosthodontics.

Excellent Ergonomics: Designed for comfortable handling with a pen-like grip, allowing for intuitive and relaxed scanning.

Featherlight Form: Weighing just 116g, its lightweight & compact design ensures fatigue-free operation, even during extended procedures.

Simplified Connection: A single Type-C cable enables instant plug-and-play setup, reducing clutter and enhancing usability.

Excellent Scanning Performance: Aoralscan Lync is the latest intraoral scanner from SHINING 3D. Built on the proven Aoralscan series technology platform, it inherits trusted software and hardware while being re-engineered to focus on what truly matters - efficiency and reliability in digital impressions. It is designed to support a wide range of clinical applications, including implantology, orthodontics, and prosthodontics.

AI Enable: When enabled, the AI function automatically identifies and removes unwanted data points from a scan, such as soft tissue, the tongue, or the cheeks.

Extended Scanning Depth

A depth of field up to 22mm allows for easy capture of fairly deep holes and narrow gaps.

Outstanding Accuracy

Delivers high-precision, reliable scan results across diverse clinical applications.

Technical Specifications

Scan Field	Std. scanner tip: 16 mm × 12 mm × 22 mm Small scanner tip: 12 mm × 9 mm × 22 mm
Scan Principle	Non-contact scanner with structured light
Dimension	245 mm (L) × 38 mm (W) × 33 mm (H)
Weight	116g (without cables)
Output	STL, OBJ, PLY
Connection Port	Type-C
Power Input	12V DC/ 3A

Aoralscan Lync

User-friendly Scanning Experience

Designed with the clinician in mind, Aoralscan Lync offers an intuitive and hygienic scanning workflow that fits effortlessly into modern practice settings.

Intuitive Interface

A clean, streamlined UI ensures a more efficient & seamless scanning process.

Motion Sensing

Enables contactless control during scanning, enhancing hygiene & convenience.

Smart Software for Superior Experience

Powered by advanced SHINING 3D software, Aoralscan Lync delivers a smart, streamlined scanning experience backed by powerful algorithms.

Intelligent Scan: I-driven software automatically removes soft tissue interference for clean, accurate data capture.

Scan Quality Indicator:

Highlights areas lacking data in gray, helping you identify where to rescan for optimal quality.

Refined Scan: Captures fine morphology and preparation details with exceptional fidelity.

Reliable with Metal Sur-

faces: Scans effectively on metal restorations and darker shades.

Versatile Features for Clinical Excellence

Scanbody Matching: Built-in libraries of major scanbody brands enable precise one-click alignment during scanning, minimizing rework and streamlining the implant restoration workflow.

Bite Detection

Intuitively visualizes occlusal contacts with a heat map and sectional view, helping clinicians assess bite relationships efficiently.

Open-format Export for Design:

Easily exports data in widely supported formats for seamless integration with CAD software like exocad, ensuring smooth and flexible prosthetic design.

Helios 680

DIGITAL INTRAORAL SCANNER- MORE THAN A SCANNER

- ✦ **User-friendly tip:** Powder-free No heating required LED structured-light imaging
- ✦ **Duct optimization:** Enhanced anti-fogging for improved precision
- ✦ **New body design:** Firm body design with durability Fresh look with ergonomic design for easier using
- ✦ **Plug & scan** with only 1 power cable

FLAGSHIP-LEVEL UPGRADE

Performant:

- ✦ 16µm intraoral full-arch precision, 8µm single tooth precision, 30fps frame rate.
- ✦ Enjoy the smooth precision of scanning

Intelligent Automation:

- ✦ Automatic and adaptive color and accuracy calibration
- ✦ No manual calibration required

Renewed:

- ✦ Graceful curves with refined matte finish

Convenient:

- ✦ Removable & 180° reversible tip

Lighter:

- ✦ 161.5g total weight, lighter than ever and easy to hold

Durable:

- ✦ withstand 100 sterilization cycles

Real:

- ✦ 24bit color bits, feel the real color of teeth.
- ✦ Better patient understanding, easier lab color matching

Oral-friendly:

- ✦ improve patient comfort with a smooth, rounded tip design

Cloud-upgraded:

- ✦ Powered by AWS cloud with worldwide coverage, lower latency & greater reliability
- ✦ Enhanced performance for efficient cloud management

AI Report: Smarter Diagnosis, Better Communication. Helios AI Health Report visually presents oral health conditions and treatment plans, streamlining doctor-patient communication.

Orthodontic Simulation: AI-powered automatic tooth alignment provides clear orthodontic before-and-after comparisons, helping doctors build patient confidence in treatment plans. This feature is only supported by NVIDIA graphics cards

Cloud Storage: Enjoy 100GB of cloud storage for free, enabling easy order sharing through Cloud.

Air Mouse: Your scanner can also be a mouse to easily manage the software and rotate the 3D models.

Model Builder: Add bases to 3D models directly within the software, boosting efficiency for orthodontists and making it easier to save and share models.

INTRAORAL SCANNER

Ultimate Design And Elevated Scanning Efficiency

The Nova 900 Intraoral Scanner delivers fast, precise digital impressions with an easy-to-use, lightweight design. Its advanced scanning technology ensures accurate results across various dental procedures while improving efficiency, sterilization, and patient comfort.

Key Highlights

- ✦ Lightweight & Ergonomic Design
- ✦ High-Speed Scanning Performance
- ✦ Precision-Driven Imaging
- ✦ Smart AI-Powered Workflow
- ✦ Dual Tip Versatility
- ✦ Enhanced Scanning Experience

Effortless And Precise Scanning From Start To End

Full-arch Scanning in 25s, Faster Than Ever: Capture every detail with 20 FPS and advanced algorithms, boosting scanning efficiency and patient care

More Precise on Various Indications: The advanced algorithms significantly reduce stitching errors, achieving finer results

Smart Filter: Automatically identifies and filters out all unnecessary data during scanning

Data Reliability Monitor: Detects data quality in real-time during scanning for more precise results

G-Motion: Prevents cross-infection and brings an easier scanning experience

Anti-Fogging Technology	Actively Heated Tip
Autoclavable Tips	Yes (≥100 cycles at 134°C)
Maintenance Method	High temperature & pressure; Immersion
Cable Length	2.0 m
Connection	USB 3.2
Output Formats	STL, PLY, OBJ

MetiSmile - Dental 3D Face Scanner

Beyond Smile

Fast Scan Speed

In just 10 seconds this highly perceptive scanner can take photos of patients from multiple angles to simultaneously construct a 3D facial data.

High Accuracy

Three 1.3 MP data acquisition cameras and one 5.0 MP HD texture camera produce scan accuracy within 50µm. MetiSmile also captures elevated details of the teeth.

High-fidelity Texture

The exceptional texture camera of the MetiSmile can accurately record and display facial color that appears realistic to the patient.

ADVANCED SOFTWARE:

Auto Alignment Between Facial Scan Data and Intraoral Scan Data

The software will align the facial and intraoral scans which displays the patients' facial and oral information in a comprehensive way. The scans are overlapped to provide a better view and perspective for digital smile design that assists in creating more aesthetic restorations for patients.

Step 1

Use Intraoral Scanner to add Intraoral data

Step 2

Use MetiSmile to Capture the Facial Data

Step 3

Import Intraoral Data to MetiSmile Software for Auto Alignment

MetiSmile - Dental 3D Face Scanner

Ortho Simulation

Facial Feature Measurement and Comparison

Mandibular Trajectory Tracking

Application

The powerful and advanced software of the MetiSmile makes this product an indispensable tool for digital dental treatment, including maxillofacial surgery, implant and prosthesis, orthodontics, medical cosmetology, etc. It will take your clinic to the next level.

- ✦ Maxillofacial Surgery
- ✦ Implant And Prosthesis
- ✦ Orthodontics
- ✦ Medical Cosmetology
- ✦ Aesthetics Restoration

Outstanding Scanning Performance

The Aoralscan Elite software is equipped with numerous powerful tools to optimize the scanning process and enhance efficiency

Good User Experience

- ✦ Handheld mode & Fixed mode
- ✦ Eye-friendly flashless scan thanks to infrared technology
- ✦ Automatic brightness adjustment ensures outstanding face texture
- ✦ Guided operation throughout the scan workflow
- ✦ Open system to export STL, OBJ and PLY
- ✦ Elegant and compact, only 800 grams

Technical Specifications	
Resolution	Data Acquisition Camera: 1.3 Mega Pixel HD Texture Camera: 5.0 Mega Pixel
Accuracy	50µm

Output Format	PLY, OBJ, STL
White LED color temperature	5500K
Dimension	215*50*75mm
Weight	800g
Power Supply	Input: AC100-220V~, 50/60HZ, 1.5A
Output	DC12V, 7.0V

ioConnect™
Scan

GIVING YOU **MORE**
BY DOING **LESS**

Open System

Compatible with any dental CAD software for data importation and design.

Minimized Scanning Area

Focus on scanning **just the blue area** to reduce scanning error. Easy access and shorter scanning time.

Effortless MUA Detection with your IOS

Empower your **existing IOS (Intra-Oral Scanner)** to achieve the same photogrammetry workflow.

All About Options

Multiple sizes (S, M, L) available for you to choose depending on the implant position and the anatomy of each patient.

Why **ioConnect™**

A Perfect Example of **Less Is More**

Average scanning accuracy

The ioConnect™ scan bodies are specifically designed to minimize the scanning needed for full-arch cases. Stitching errors are a primary source of inaccuracies, so limiting the scan to the recommended area (the hexagons) helps achieve greater precision with less data. The diagram above illustrates how scanning discrepancies differ between a conventional full-arch scan and the optimized, reduced-area scan using ioConnect™ scan bodies.

TruSuite is a free software launcher with a variety of CAD capabilities including the **ioConnect™ app**

The application can be used by doctors or labs for conversion depending on each ope's workflow.

The TruSuite launcher requires a Windows PC and does not require a physical dongle.

Download now

ioConnect™ Product Specifications

TRIOS® 5 Wireless

TRIOS 5 Wireless - Meet the 5th Generation TRIOS

The Most Powerful 3shape Intraoral Scanner To Date!

Intelligent. The Ultimate TRIOS.

Next-level ergonomics. Effortless scan technology. Hygienic by design.

Our new scan engine avoids stitching errors by reconstructing and building up the 3D model while scanning.

POD Size: Pod diameter 11 cm & Weight: 380 g

Place your TRIOS 5 on the pod in any orientation while not scanning. The pod has been designed for easy cleaning and disinfection between patients for optimal hygiene.

THE SCANNER : Weight (incl. battery): 299 g

Light source: LED

Output format: PLY, DCM and STL

Scanner dimensions (LxWxH cm): 26.6 x 3.7 x 3.8

Tip dimensions (LxWxH cm): 9.5 x 2.26 x 1.95

BATTERY AND USAGE

TRIOS 5 wireless comes with three rechargeable batteries.

Battery duration (non stop scanning): Instant heating and up to 66 minutes of continuous scanning per battery.

Scanner sleep mode: The scanner can stay in sleep mode with the battery inserted for more than 7 days.

Battery charging time: 60 minutes to achieve 80% battery power. Less than 2 hours to achieve 100% battery power.

WIRELESS RANGE

Same room, up to 15 meters.

Scanning over WiFi possible with TRIOS Share NEW TRIOS 5

Body sleeves

TRIOS® 5 Wireless

Effortless Scanning

With five generations of experience up our sleeve, we know a thing or two about what makes or breaks a dental scan experience. With TRIOS 5, we've made scanning even smoother, faster and easier.

Calibration free

The scanner is calibration free, meaning you don't need to calibrate after a certain number of scans. It's always ready to use!

Smart haptic feedback

Switching focus between patient and screen can be distracting. That's why the scanner uses haptics – a subtle vibration – to give you feedback.

LED to indicate readiness

A LED ring on the scanner indicates the status of the scanner: it tells you when it's connected, low on battery, or the tip is ready, for example. You'll know if you're scan-ready with just a glance.

Remote control button

Use your scanner as a remote control. Point to the screen and use the button to select your next step or rotate the 3D model. There's no longer the need to touch (and clean) the mouse.

INNOVATIONS INCLUDE:

- ✦ 30% smaller and 20% lighter compared to TRIOS 4. Made to fit perfectly in your hand
- ✦ Introducing ScanAssist, providing you with easier scanning independent of scan strategy
- ✦ Improved battery technology, requiring only one battery per day
- ✦ Truly effortless: calibration free scanner
- ✦ LED ring and haptic feedback for better user guidance
- ✦ Two-button design for improved software navigation and scan analysis
- ✦ Autoclavable scan tips providing a microbial barrier on the scan tip
- ✦ Body sleeves to significantly reduce risk of cross contamination.
- ✦ Closed tip design to avoid cross contamination
- ✦ Scanner body has been designed for cleaning and disinfection

TRIOS® 3

**UNICORN
DenMart**®
Behind The Best Indian Dentists

invisalign®
COMPATIBLE

Proven. The Trusted Choice.

Proven scanning technology for a superior patient experience
Now without the need of a power adaptor, fewer cables, Simplified Scans

Choose award-winning TRIOS 3 for accurate, scan-and-send impressions. Just like tens of thousands of dentists use – and love – TRIOS 3. With 3D scans in realistic colors, three included engagement apps, and an improved pod that is lighter, smaller, and with fewer cables.

Inspire your patients: This dental scanner comes with free engagement apps. There are so many new ways to engage with your patients, add weight to your treatment proposals and gain – even better – case acceptance.

Simplified pod: 30% lighter. 10% smaller. Fewer cables.: The improved TRIOS 3 pod takes up less of your precious workspace. It has fewer cables, for a lot less fuss. And the LED indicator light lets you know when it's connected and ready to go!

TRIOS® Move+

Excite Your Patients & Advance Case Acceptance

TRIOS® Move+

TRIOS MOVE+ is a new larger TRIOS monitor. The workspace is 36% bigger than TRIOS MOVE - 15.6" vs. 13.3"- and it comes with a USB port at the back of the screen.

TRIOS® 3 Scanner

Compatible with TRIOS® 3 Color & TRIOS® 3 Wireless in both, Pen & Handle Grip.

Software

TRIOS® Digital Impression software with integrated 3Shape Communicate™ interface.

- ✦ Weight: 14 kgs
- ✦ Display: 15.6" (16:9) touch*
- ✦ Resolution: 1920 x 1080
- ✦ Processor: Intel i7 Quad core
- ✦ Disk storage: 1 TB SSD

The 3Shape TRIOS MOVE+ is the ultimate communication tool taking active patient involvement to the next level.

Flexibility

TRIOS MOVE+ features an ergonomic, 15.6" movable HD touchscreen* with USB port that allows you to easily share your digital scans, images, and treatment plan with patients. This helps patients picture their final results and ultimately, advance case acceptance.

Performance

TRIOS MOVE+ also features a powerful, custom PC specifically designed for use with all 3Shape TRIOS scanners to give a fast and smooth scan experience straight out of the box.

Excitement Apps

TRIOS Smile Design:

Design a smile in just minutes & share the photo-realistic images with your patients.

TRIOS Treatment Simulator:

TRIOS Treatment Simulator automatically generates a simulated result of the orthodontic treatment, side-by-side with their current dentition. This can be used to help facilitate patient engagement to increase treatment acceptance rates. You can also adjust individual teeth to create the perfect smile.

TRIOS Patient Specific Motion:

Your digital articulator using the patients own jaw movements to highlight occlusal contact points for a better fit.

TRIOS Patient Monitoring:

Use your TRIOS to monitor developments in your patients' dental status over time and to gain insight for preventive care.
