Innovation Hub

European Community of Smart and High Performance Textile Innovators

Nowadays, e-textiles, wearables, and high-performance fibers and textiles are increasing significance in our daily lives. Textile professionals are progressively looking for cross-sector collaborations, seeking synergies with various engineering disciplines and fields. Aiming to achieve ambitious goals, enhancing existing smart textiles and introducing intricate solutions to the market.

The SmartX Innovation Hub provides opportunities to stay informed about the latest technologies and applications. The platform serves as a space for collaboration, hosting various activities to disseminate information and raise industry awareness for diverse applications. It also offers chances to network and connect with relevant stakeholders, facilitating business collaborations.

How does it work?
