Orthodontic Nursing Certificate

Blended Learning| Post-Qualification

Elevate your dental career with Tempdent's Orthodontic Certificate course, designed to equip you with advanced skills and knowledge to excel in orthodontic practice and patient care, while learning from industry experts and gaining hands-on experience.

“Tempdent for me personally was an amazing experience and professional company who helped me to qualify as a Dental Nurse. The organisation as a whole was very supportive. They care about their trainees and are always asking for ways in which they can improve, any feedback was welcome. I felt every step was explained which really took the pressure off.”

Course Overview

The awarding body for the Certificate in Orthodontic Nursing is the National Examining Board for Dental Nurses (NEBDN). This 40-hour course is a qualification suitable for dental nurses who assist Orthodontists in the surgery. Assessment includes a written examination and successful completion of a work based Record of Competence (RoC).

The RoC is designed to provide a record of activities completed to facilitate specific learning experiences, these include:

Candidates must complete Practical Competence Assessment Sheets to provide evidence of their involvement in the care of at least fifty patients, which should include at least ten cases of fixed appliances and ten cases of removable appliances of which five cases must be functional appliances.

There are also 2 case studies to complete:

One should be advice to a patient requiring advice on maintenance of oral health and care of their orthodontic appliance

One patient undergoing orthodontic treatment requiring an interdisciplinary approach

There are also Directly Observed Clinical Skills sheets for which suitably qualified GDC registrants will witness and feedback to the candidate and also Supplementary Outcomes which will include:

- Taking of clinical photographs
- Completion of cephalometric tracing, digitisation and measurement
- Assisting with the taking and handling of impressions
- Casting of study models
- Contributing to the fitting and adjustment of orthodontic appliances

Who should attend?

GDC registered nurses, who assist orthodontists in the dental practice

GDC registered dental nurses engaged in this type of work on a regular basis

Start Date

- Our intakes start in April & October
- The class will be held on one Saturday every month and will run for 12 months (with 11 sessions)
- We deliver the above course through online webinars supported by our online content platform.

Course Fees

- This course costs £850 + VAT, excluding an examination fee of £210
- You will be required to pay a minimum deposit of £300 before your place on the course is confirmed. You will also be required to pay the exam fee in full at this stage

Learning Outcomes (syllabus)

The Record of Experience is designed to provide a record of activities completed to facilitate specific learning experiences, these include

- Anatomical structures relative to orthodontics
- Classification of malocclusion
- Orthodontic treatment & orthodontic appliances
- Orthodontic records
- Cross infection in orthodontics
- Interdisciplinary care
- Laboratory skills
- Oral health in relation to the care and management of appliances
- Orthodontic stock control
- Medico-legal aspects of orthodontics

The Record of Experience is designed to provide a record of activities completed to facilitate specific learning experiences. These include:

Part A – Log sheets

Candidates must complete the log sheets to provide evidence of their involvement in the care of at least fifty patients, which should include at least ten cases of fixed appliances and ten cases of removable appliances of which five cases must be functional appliances.

Part B – Case studies

Two case studies of 2000 words relating to:

- Advice to one patient requiring advice on maintenance of oral health and care of their orthodontic appliance
- One patient undergoing orthodontic treatment requiring an interdisciplinary approach

Part C – evidence of competence

During the course the candidates will be expected to demonstrate competence in relation to the following:

- Taking of clinical photographs
- Completion of cephalometric tracing, digitisation and measurement
- Assisting with the taking and handling of impressions
- Casting of study models
- Contributing to the fitting and adjustment of orthodontic appliances

The exam is a 90-minute written exam held online consisting of a Part A (20 multiple choice questions) and Part B (3 structured short answer questions).

How do I apply?

- You can book and pay online for the Orthodontic Nursing Certificate or request a call to discuss your requirements.
- You will need to complete an application form.
- We will arrange a 1:1 online enrolment interview where you will need to produce your GDC certificate and dental nursing qualification certificate.
- Upon enrolment, we will provide you with a course acceptance letter.
