# WHO WE ARE

## WELIVEIT

WeLiveIT (Pty) Ltd is a proudly South African, 100% black-owned technology solutions provider, offering a full spectrum of IT services, infrastructure solutions, and digital transformation support. Established in 2021, we have grown into a trusted partner for organisations requiring reliable, secure, and scalable technology environments to support their operational goals and long-term strategic initiatives.

## KEEPING IT FAST & SIMPLE

Our focus is on helping organisations navigate the evolving technology landscape by delivering fit-for-purpose solutions that balance innovation, cost-effectiveness, and compliance. With expertise across multiple technology domains, WeLiveIT ensures that IT infrastructure and digital services become enablers of productivity, efficiency, and service delivery, rather than operational bottlenecks.

# COMPREHENSIVE **IT** SERVICES

At WeLiveIT, we understand that technology is the backbone of modern organisations. Our full range of IT services is designed to support businesses and institutions at every stage of their technology journey, from initial planning and procurement to implementation, security, and ongoing management. We take a strategic, vendor-neutral approach, ensuring that each solution is aligned with the client's objectives, budget, and future growth plans.

---

## INFRASTRUCTURE DESIGN & IMPLEMENTATION

A resilient and well-designed network infrastructure is the foundation of any efficient and secure organisation. WeLiveIT specialises in the design, deployment, and optimisation of enterprise-grade networks, ensuring seamless connectivity, high performance, and future scalability. Our solutions support everything from on-premises networks to cloud-connected environments, always tailored to meet the operational and security requirements of each organisation. End-to-end IT infrastructure planning, deployment, and optimisation.

- Comprehensive LAN, WAN, and wireless network planning and design.
  - Structured cabling, fibre installation, and equipment configuration.
  - Network performance optimisation to ensure high availability and low latency.
  - Integration of cloud networking solutions to support hybrid environments.
  - Ongoing network monitoring, management, and optimisation to maintain peak performance
- 

## MANAGED **IT** SERVICES

Technology downtime can be costly. Our Managed IT Services provide proactive monitoring, maintenance, and support to ensure that critical systems remain operational, secure, and optimised. We offer custom service-level agreements (SLAs) to meet the needs of organisations of all sizes.

- 24/7 IT infrastructure monitoring and maintenance.
- Helpdesk and remote IT support services.
- Disaster recovery, business continuity, and data backup solutions.
- IT asset tracking and lifecycle management.

## CYBERSECURITY & RISK MANAGEMENT

With increasing cybersecurity threats, organisations need robust security frameworks to protect sensitive data, critical infrastructure, and intellectual property. Our cybersecurity services focus on proactive threat prevention, risk mitigation, and compliance alignment to safeguard IT environments.

- Cybersecurity audits, risk assessments, and compliance consulting.
- Endpoint security, firewall configuration, and network security monitoring.
- Data protection strategies, encryption, and access control management.
- Incident response, threat intelligence, and penetration testing.
- End user training and cyber security

## IT PROCUREMENT & ASSET MANAGEMENT

We simplify IT procurement by offering a transparent, vendor-neutral approach, ensuring that organisations receive high-quality, cost-effective technology solutions without unnecessary overheads. From hardware acquisition to software licensing and IT asset management, our solutions optimise both cost and performance.

- Procurement of servers, workstations, networking devices, and peripherals.
- Software licensing and compliance management (Microsoft, Adobe, Oracle, etc.).
- Asset lifecycle management to maximise IT investment.
- Warranty management, contract negotiations, and vendor coordination.

## NETWORKING & COMMUNICATIONS

Reliable networking and seamless communication solutions are essential for operational efficiency. We provide end-to-end network infrastructure solutions that support secure, high-speed connectivity for organisations of all sizes.

- LAN, WAN, VPN, and wireless network design, deployment, and optimisation.
- Cloud-based collaboration tools, VoIP, and unified communication solutions.
- Structured cabling, network performance tuning, and bandwidth management.
- Telecommunications strategy consulting and VOIP Services.

## DIGITAL TRANSFORMATION & CUSTOM SOLUTIONS

Digital transformation is at the core of modern business success. We help organisations modernise operations, enhance customer experiences, and drive innovation through custom-built digital solutions.

- Development of tailored business applications and automation workflows.
- Integration of emerging technologies like AI, IoT, and blockchain.
- Website, e-commerce, and mobile app development.
- IT strategy consulting for long-term digital transformation.
- IoT Solutions

## OFFICE AUTOMATION & DOCUMENT MANAGEMENT

Efficiency in document handling and office workflows can significantly boost productivity. We provide comprehensive document management and automation solutions that streamline printing, scanning, and digital archiving.

- Managed print services (MPS) with cost-effective solutions.
- Secure document scanning, storage, and retrieval.
- Enterprise content management systems (ECM) and workflow automation.
- Integration with cloud storage and digital archiving platforms.

## SURVEILLANCE & PHYSICAL SECURITY SOLUTIONS

Security extends beyond IT infrastructure. We provide intelligent surveillance and access control solutions to ensure that organisations maintain a secure environment, both physically and digitally.

- High-definition CCTV and remote surveillance system installations.
- Biometric and RFID-based access control solutions.
- AI-driven security analytics and automated threat detection.
- Integration of physical security systems with cybersecurity frameworks.

## OUR APPROACH

WeLiveIT believes that technology should be aligned with the organisation's broader strategic goals. Our approach combines technical expertise, proactive advisory, and long-term support to ensure that technology investments deliver tangible business value. We focus on enhancing operational efficiency, minimising risk, improving service delivery, and future-proofing IT investments.

## WHY CHOOSE WELIVEIT

- ✓ Level 1 BBBEE Contributor
- ✓ Proven Track Record in Complex IT Environments
- ✓ Vendor-Neutral Procurement & Advisory
- ✓ Focus on Risk Management, Governance & Compliance
- ✓ End-to-End Service Delivery
- ✓ Customer-Centric Support with Clear SLAs
