COMPANY INTRODUCTION

Praveen Narzee
Owner / Director

Pixelcare Consulting offers top-notch services for **INFORMATION TECHNOLOGY CONSULTING & MANAGEMENT**. We as a team able to understand the core of the business and translate the same in our consulting. Pixelcare can be your one-stop solution partner for all your services requirement. We guarantee high-class services with very affordable costs with adequate ROI.

MISSION

Our aim is to be a niche end-to-end solutions provider with a market edge of being product independent and enabling our clients to a tailored fit system within the shortest span of time and keeping the Lowest costs of ownership.

VISION

Pixelcare with its industry knowledge and know-how is currently embarking on offering Industry tailored fit solutions which can be as simple as unpacking the software and using it with a basic plug-and-play mechanism.

JOURNEY OF OUR COMPANY

2013

The humble beginnings of Pixelcare consulting started as a software development house customizing various industry requirements into templated solutions.

2015

Pixelcare was gaining a bigger client base and ventured into ERP systems and services sectors to enhance its services practice to varied business verticals.

2018

Malaysian & Philippines overseas operations were established to expand its service portfolio to acquire more partners and client base

2020

Pixelcare sustained its course during the pandemic times and our prized clients supported our existence by staying committed to our cause

2022

The company sought to grow its portfolio into offering business verticals targeting Education / Retail and Logistical solutions while maintaining its core ERP practice.

DOMAIN

KNOWLEDGEBASE

CAMU LMS & SIS SYSTEM

Why CAMU is the Solution of Choice?

Digital transformation is the new reality of this modern world. CAMU LMS & SIS System helps Educational Institutions especially colleges in various ways, such as storing data, maintaining student profiles, analyzing administrative and academic data, improving communication, and engaging students.

The CAMU LMS & SIS system is the ultimate solution to digitize and streamline the day-to-day operations of colleges and universities. From student enrolment system to admission management and online classes management to finance management and human resource management, as well as every other process of college operations. It also digitizes routine work of the campus such as the student attendance management system, student record management system, student profile management system, student record keeping system, student mark management system, student fee management, and other small and big operations.

Student Information System (SIS)

Imagine a system that can store, retrieve, manage, monitor, and analyze student data, all within a single cloud! A limitless cloud, where every task, administrative or academic, has its own distinct place. Now, imagine the convenience and speed at which decisions can be made! And with safety and security.

Learning Management System (LMS)

What is something that is easy to explore and simple to set up?

Well, the answer lies in the heading itself! Camu's Learning Management System is one of a kind. From high-tech to hello-tech, discover a human-friendly platform!

Not only does it facilitate the most powerful student-teacher dynamic yet, but it also administers, reports, automates, tracks and measures academic lifecycles with skill.

CAMU SOFTWARE MODULES

Admission and Marketing Management

Parents-Teacher, Teacher-Student Communication Management

Student Fees Management System

Exam and Result Management

Student Attendance Management System

Library Management

and more....

ZEONIQ

POS SOLUTION

Why your Business Needs a POS?

1

QUICK PAYMENT

POS can make transactions faster. The employee selects the products the customers want to buy and the system can automatically calculate the price.

EASY HANDLING OF PROMOTIONS AND DISCOUNTS

Customers love promotions and discounts. With POS System, all you have to do is input the SKU and the discount or promotions on the back end, and everything else is taken care of.

2

3

REAL-TIME SALES DATA ACROSS MULTIPLE OUTLETS

No matter what products you sell, you need to keep track of what is moving and what is sitting on a shelf. With a POS system in place, accurate information on product sales and inventory levels is only a click away.

RUN YOUR BUSINESS FROM ANYWHERE

Imagine taking your business wherever you go. Having POS system can monitor your ongoing transactions, track inventory, or view sales data using its friendly Mobile App.

4

5

ELIMINATE HUMAN ERRORS

With an effective and reliable POS System, your business doesn't need to manually write orders and count inventory anymore.

BETTER CUSTOMER SATISFACTION

POS systems are not just used for processing payments and transactions. It could track your customers' preferences down to the very last detail. It's a guaranteed way to convert new customers into loyal ones, and when you start rewarding them for every purchase, they'll be coming back for more.

6

7

CAN GROW YOUR BUSINESS

POS systems can do wonders by not just helping you with day-to-day challenges such as keeping track of sales and inventory and monitoring employee attendance but also streamlining the entire process altogether.

Top Reasons to Choose Zeoniq POS System

CUSTOMIZED AND FLEXIBLE RESTAURANT ORDER SCREEN

Flexible and customizable order screen, suitable for touch and non-touchscreen, for retail and F&B sectors, and for left-handed and right-handed users.

ADVANCED PROMOTION ENGINE

This POS system for restaurants is also equipped with an advanced promotion engine and provides standard logic that can be used easily.

ULTIMATE FEATURES FOR THE FOODS AND BEVERAGES

- Table management
- Kitchen slip printing
- Flexible combos and modifiers

3A SECURITY SYSTEM (AUTHENTICATION, AUTHORIZATION, ACCOUNTING)

Hardware integrated authentication (eg. fingerprint, magnetic card), with configurable authorization for each function, and audit report logging all activities in the system.

COMPATIBLE ON MULTIPLE PLATFORMS

This system is compatible with Windows, iOS, and Android. The owners can use it on their Smartphone or iPhone as it presents a fully compatible mobile view

REPORTING

- Listing with dynamic filtering and grouping
- Analytical pivot report with dynamic filtering and dimension configuration

Make your day-to-day business operations easier, faster, and more efficient with Zeoniq POS.

AI FIELD MANAGEMENT

What is AIFM?

AI Field Management allows organizations to manage their entire business from end to end with just one platform, with tools for managing workers, contractors, customers, jobs, and assets by geography and time at a fair business price.

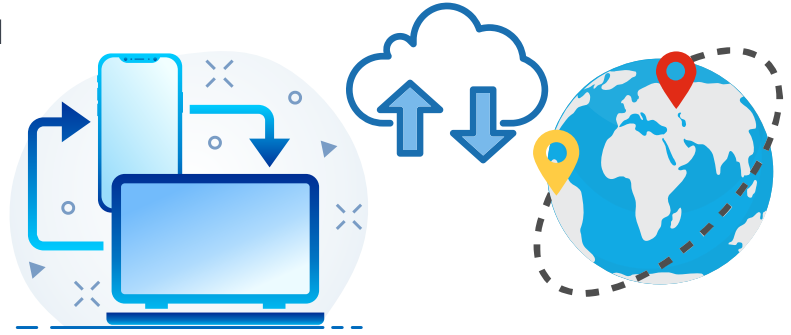

The ultimate goal is for the System to proactively predict when a customer will need service, the kind of service, the duration of the service, which combination of workers should be assigned, and... once approved by the human being to execute on deploying resources. Essentially, the human being will transition from initiating an action with the support of the System to being a reviewer and approver of the System's recommendations

MOBILE FIRST & DEVELOPED ON THE CLOUD

AIFM was initially developed for mobiles and developed on the cloud for the cloud.

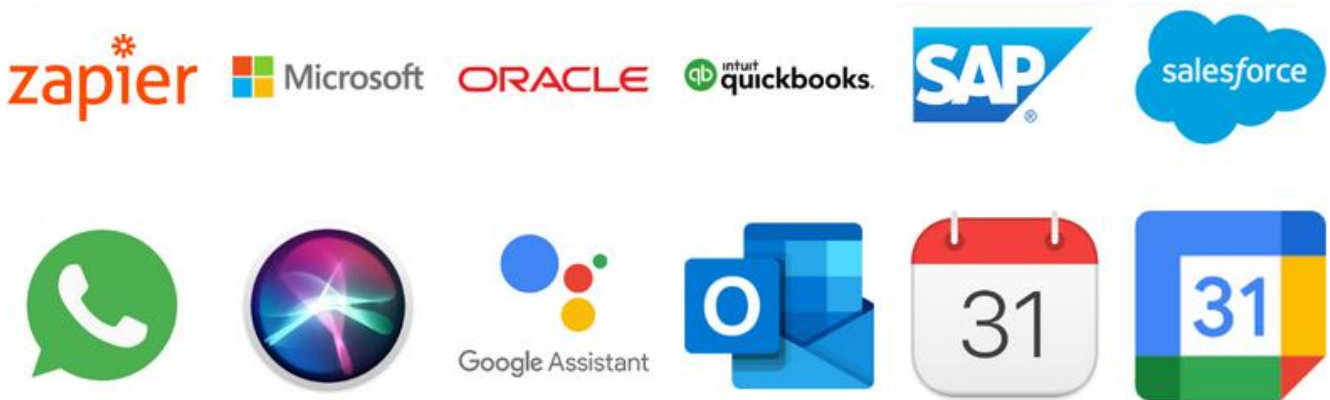

This means that you can use AIFM advanced application with all features easily from your iPhone, Android, or Tablet device. It's safe, fast, and accessible from anywhere on the planet - all you need is an internet connection

This is a huge productivity improvement for you and your field workers, they have access to the application too so they can be in the loop while on the road.

Schedule jobs without overlap, dispatch job information to your field workers' phones and automatically let customers know when a tech is on the way. Complete all tasks with a few clicks in one centralized system, including managing customer calls, scheduling, and monitoring your fleet.

SEAMLESSLY INTEGRATE WITH THE TOOLS YOU ALREADY USE

COMPUTEC

WMS

What is a Warehouse Management System? (WMS)

WMS is a software application designed to support and optimize warehouse operations that offer visibility into a business's entire inventory and manage supply chain fulfillment from the time goods or materials enter a warehouse until they move out.

Benefits of Warehouse Management System

Optimized Warehouse Space

Having enough storage space is vital to an effective warehousing operation. In Computec WMS, you can manage the movement of goods in multiple warehouses at the touch of a button. It's easy to identify where any item is and how much of it you have in real-time and the detailed data available.

Improved Relationships with Customers

Customers like convenience. Using a barcode system to manage your warehouse, Computec WMS makes it easy to track the availability and flow of particular goods. You will find that stocktaking time is vastly reduced and orders can be completed faster which reduces the level of customer complaints and enhances your overall customer service.

Track availability and flow of inventory

The nature of warehouses means that stock is constantly on the move. There are goods traveling in multiple directions, which can make the process confusing. Using Computec WMS, the flow of goods will be streamlined, information from elsewhere in the system about purchasing, production, and sales will allow for optimal warehouse management practices and everything will be recorded and fully auditable.

IQVIA

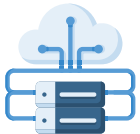

ARCUS AIR (HIS SOLUTION)

IQVIA Hospital Information System

Arcus Air™ unifies the entire hospital network as a powerful communication and collaboration platform that can be utilized by all stakeholders involved in patient care.

Arcus Air HIS is a comprehensive hospital information system that handles patient administration, advanced clinical information systems, and departmental solutions. Arcus Air EMR gives physicians, nurses, and the entire healthcare team the environment to deliver best-practice, evidence-based care. As a single unified system, it helps improve care coordination, minimizes treatment delays, and reduces medication errors and test duplication. It supports the patient journey through the hospital from admission to discharge.

Current HIS Technology Challenges

**ADOPTING
TRUE CLOUD
SOLUTION**

**LIMITATION OF
EXISTING
PRODUCTS**

**COST OF
REBUILDING
A NEW HIS PRODUCT**

**INCREASING
COST OF PRODUCT
OWNERSHIP**

**NEED FOR AN
E-COMMERCE
PLATFORM**

Arcus Air is a comprehensive, highly configurable, unified system that provides hospitals with the tools for improved clinical tasks and patient administration.

Work Smarter, Not Harder

Reimagine a smarter, more productive future with an intelligent customer engagement platform that transforms the work of life science teams for real results.

Arcus Air Hospital Information System

WHY ARCUS AIR?

A SINGLE UNIFIED SYSTEM

with modules ready to be deployed for the administrative, departmental and clinical team.

TEMPLATE-DRIVEN DESIGN

that is highly customizable and ready to adapt to individual processes and specialist needs.

RESPONSIVE GUI

User friendly, fast and responsive GUI using AngularJS and HTML5.

PROVEN AS A SPECIALIST CARE SOLUTION

with the ability to work within clearly defined and effective clinical pathways.

SEAMLESS WORKFLOWS

without dependency on third-party applications.

FLEXIBLE, SCALABLE AND FAST TO DEPLOY

configurations that are tailored for the hospital or network of hospitals.

OTHER SERVICES OFFERED

Cloud Hosting & Management

Cloud services solutions enable our customers to be more nimble, efficient, and cost-effective than ever before clients are often left to deal with their infrastructure which will now become a one-stop shop for Application & Hardware managed services.
