Compact Design, Flexible Holding Gestures

Compact Size supports both pen-style and injection-style holding gestures, meeting the diverse needs of Clinical Practice.

Two holding gestures

Injection-Style Holding

Stable and Powerful, suitable for large thrust or Rapid Injection

Pen-Style Holding

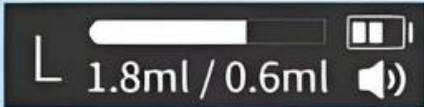

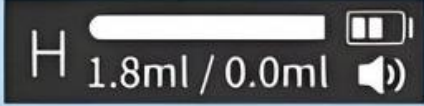

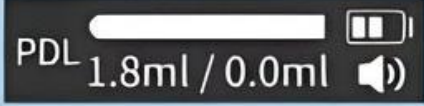

Fine Operation, Precise Control

GENI Pro

Dental Anesthesia Booster

Three Precisely Matched Injection Modes

Enhanced Anesthetic Delivery Accuracy, Comfort, and Success Rates increase Patient Comfort and elevates injection success, delivering a safer experience for both clinicians and patients.

Mode	Time to inject 1 cartridge anesthetic
<p>Low</p> 	About 80s
<p>High</p> 	About 150s
<p>PDL</p> 	≥ 265s

GENI Pro
Dental Anesthesia Booster

Smart Injection, Perfectly Controlled

Magnetic encoder ensure precise speed control, while intelligent pressure deedback adjusts flow in real time – for safer, smoother anesthesia delivery.

Injection pressure

▪ Manual Syringe Injection lacks precise control over flow rate and pressure, often leading to failed delivery, tissue swelling, and patient discomfort.

GENI Pro
Dental Anesthesia Booster

Enhanced Compatibility

Supports both metric and imperial cartridge holder. Autoclavable for high-temperature sterilization, adaptable to various clinical environments

Precision Delivery

0.1 ml injection accuracy ensures safer and more consistent dosing.
