It's not just a towel. It's a Clutch Towel.

Can a towel be more than just a towel? WE THINK SO.

Our thoughtfully-designed microfiber towels are the perfect companion for the beach, travel, tennis and fitness.

They are superior to regular, bulky terrycloth towels because they are super-absorbent, quick-drying and ultra-compact, so they fold down small and are easy to pack and take anywhere.

They're smooth and soft. They naturally repel mildew and odor, so no more of that wet towel smell. And they're easy to care for machine wash and dry or simply line dry, in a third of the time of regular cotton terrycloth. Each towel has our exclusive attached elastic band that keeps it neatly folded together and doubles as a handy hanging loop. And every towel is created from one of our original, happy designs.

ABOUT

Clutch Towels was founded by a busy mom who was looking for a better towel to pack in her kids' camp bags on busy summer mornings. The bulky, heavy, regular terrycloth towels would return home wet and smelly, and they just weren't working. She wanted to find stylish, colorful designs in a functional, well-designed towel that could make life easier. And when she couldn't find it, she made it herself.

Today, she still creates every bright & happy design, hand-selecting each color and ensuring the quality of the materials in everything she makes. And as her fun, modern designs extend to new items, her mission remains the same: to spread a little happiness with beautiful, functional products that make life easier.

The world is a beautiful place, and we want to make it easier to get outside and explore. Our goal is to spread a little happiness in the world with beautifully designed beach, travel and sport towels.

Some of the happiness we create is due to our colorful, clean designs.

Some of it comes from how well our towels perform - soft & smooth microfiber that is super absorbent, quick drying and mildew and odor resistant.

Some is due to the care we put into sourcing high quality fabric that is Oeko-Tex 100 Certified and made from 50% recycled water bottles.

Some happiness definitely comes from how easy our towels are to pack because they fold down small and have the unique attached elastic band that keeps them neatly folded together. And some of it comes from the great value we give our customers with a reasonable, affordable price.

But we think the happiness is really spread through our love of what we do, and the joy it gives us thinking about how our towels are helping make people's lives easier, whether it's packing their kids' bags for summer camp, packing their own suitcases for a long-awaited trip, or packing their tote bags for a fun day at the pool, beach, court or gym.

We love imagining our vivid towels out and about in the world, bringing some fun and function to peoples' every day lives and special moments.

Clutch Towels are thoughtfully-designed microfiber beach & sport towels made from 50% recycled water bottles, that are super-absorbent, quick-drying, and ultra-compact, so they're easy to pack & take anywhere.

Each towel has an attached elastic band that keeps it neatly folded together, and every one is created from one of our original, happy designs, sure to spread a little sunshine.

See our collection for travel, beach, swim, tennis, golf, & even your dog.

We can also create custom towels with your own design, logo and colors.
