Our History.

Since its establishment in **1972**, Nectar Group has earned a worldwide reputation for safe handling of bulk cargoes. **MOPACK™**, the first generation of Nectar mobile bagging equipment specifically designed to work alongside a vessel on a quayside, **transformed how cargoes were handled around the world.**

It helped open whole new markets by enabling cost efficient bulk shipments. Since then, Nectar has continued to develop innovative bagging equipment, including the COMPAC™ and IMPAC™ range and today offers a wide range of value-added solutions for handling bulk cargoes.

Over its 50-year history of delivering high class professional bulk handling services and solutions to clients, Nectar has developed important strategic relationships and specialist knowledge of port infrastructure across the world, enabling the Group to gain early insights into projects and capitalise on a diverse range of opportunities as and when they arise.

Discover our **Rich Past** & Why We Are **Uniquely Nectar.**

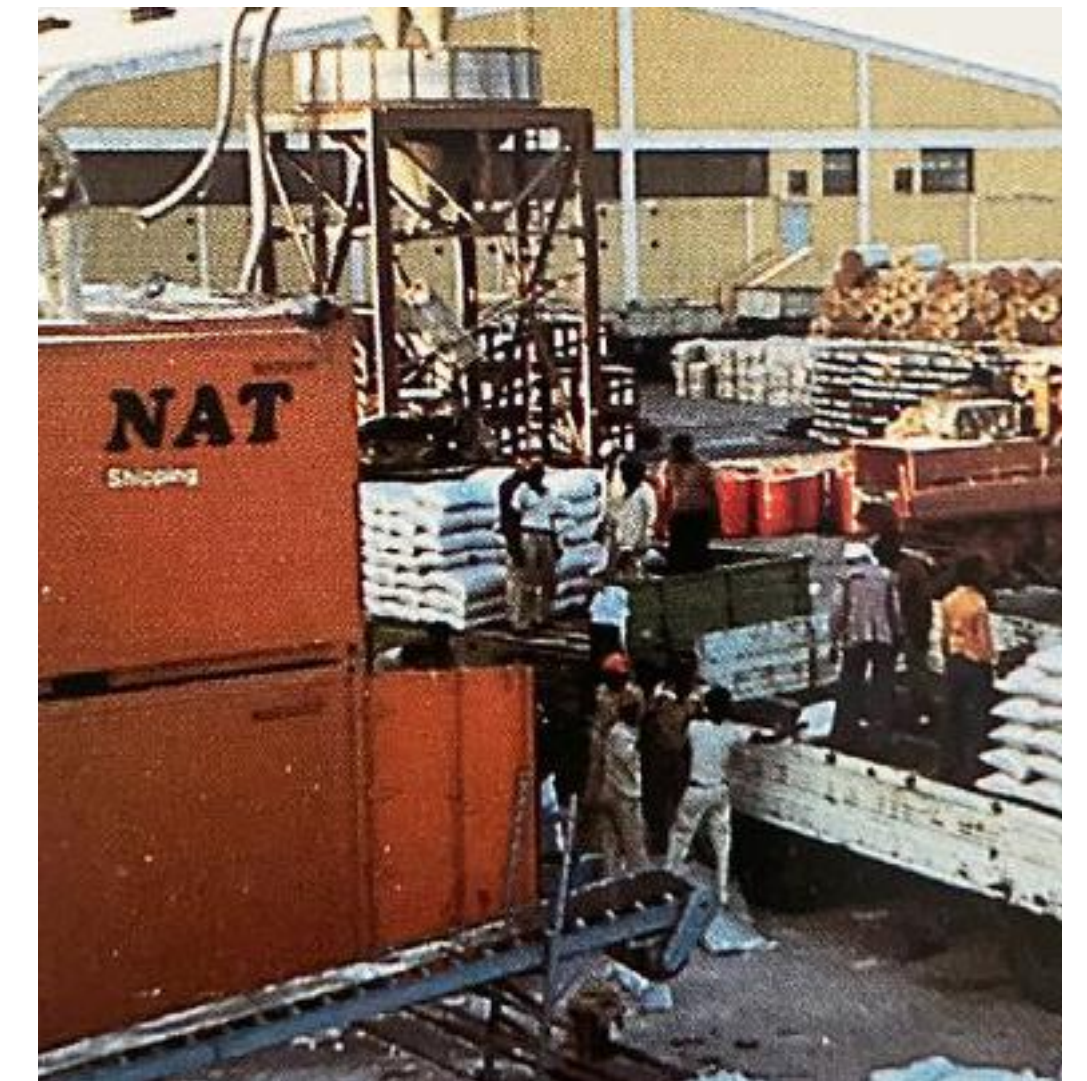

Nectar is a unique company that has always been innovative, diverse, and inclusive. There are three main reasons as to why the business has succeeded often in very challenging locations and conditions and these are:

its **People** (both in the UK head office and in the various locations around the world),

its **Equipment** (from concept through to design, maintenance, logistics and long-term aftercare) and

its **Customers and Partners** (who have supported the business throughout the last 50 years).

The Group has evolved from the early days when 'mobile bagging' was just a concept with prototype machines designed in the town of Numansdorp, Netherlands... to today, where **we handle over 10 million tonnes of cargo per year** through our various terminals and fleet of bagging equipment.

Nectar Brand. Why the Hummingbird.

The mighty hummingbird has featured as Nectar's Logo for over five decades.

Hummingbirds are among the smallest of birds, some being only three inches tall and weighing the same as a penny. They have little control of their surroundings, however possess the capability to respond to changes making it able to survive in the most challenging of environments.

Hummingbirds are **extremely resourceful**. They migrate in the winter, flying as far as Alaska to Mexico. Often winds or severe weather can blow them off course due to their small size, nevertheless due to their flexibility and determination they have the capability to carefully navigate weather patterns to stay on their path.

Like the unique hummingbird, Nectar responds quickly, showing **flexibility and determination**, responding to changes and surviving in the most challenging of environments. The hummingbird remains a strong representation of our brand as we propel into the future and mark 50 years in business.

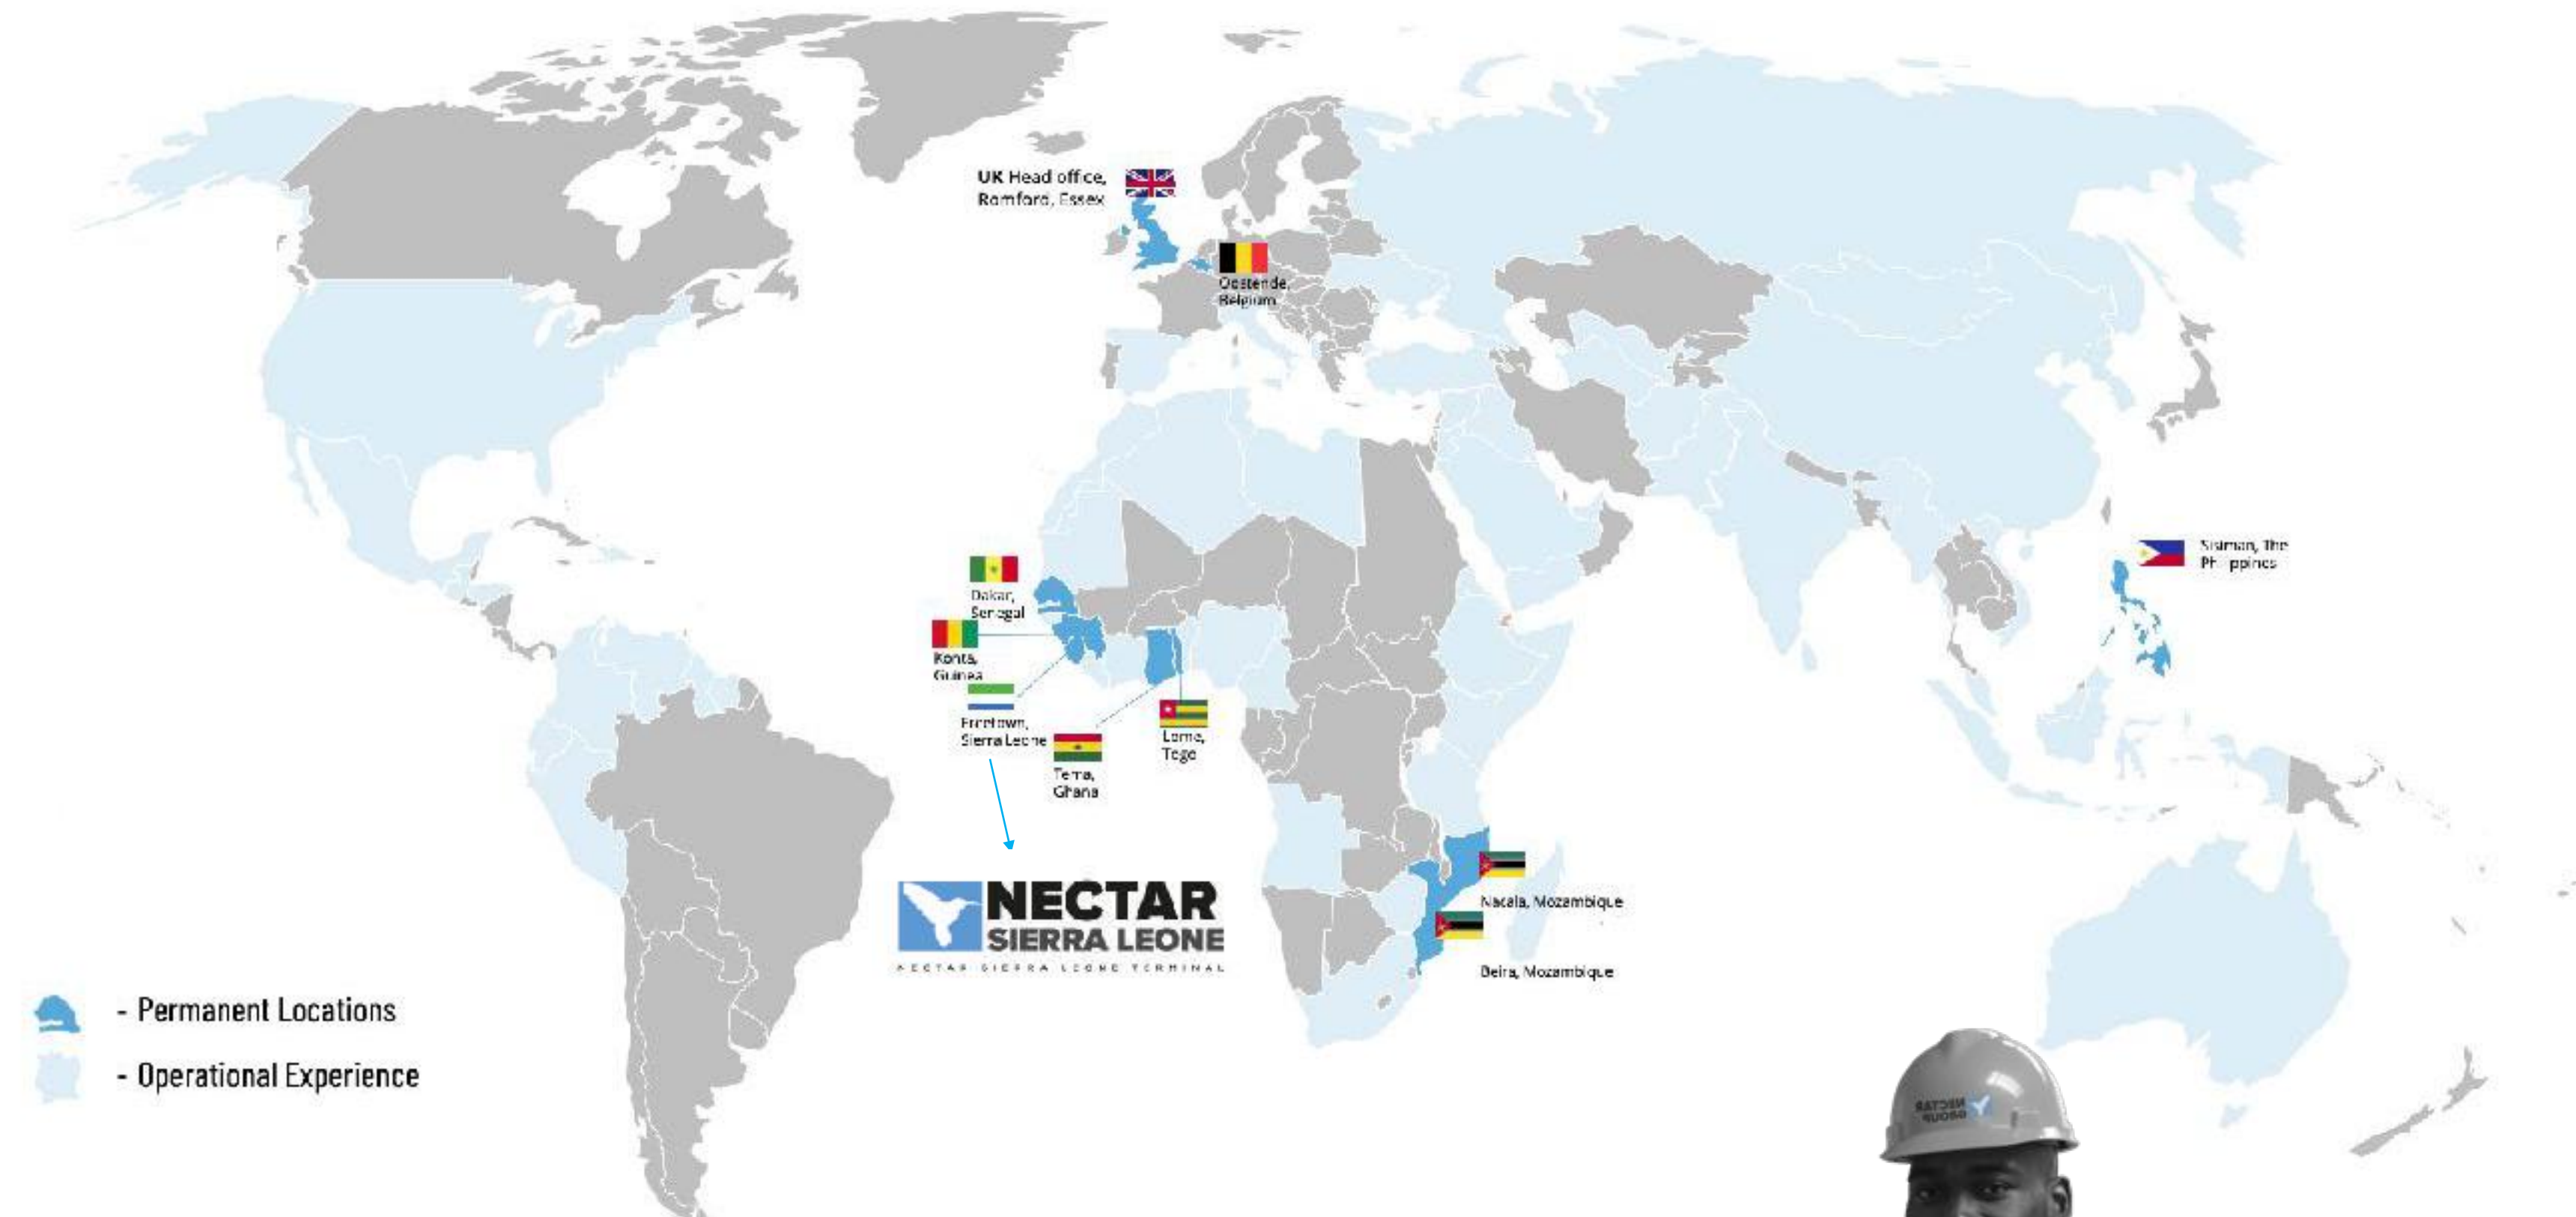

The hummingbird remains integral to our distinctiveness & integrity.

Our Global Reach & Coverage.

Today, Nectar Group operates and manages a number of Bulk Terminals around the globe as well as continuing to offer a range of value-added solutions for handling cargoes, **employing over 400 people around the world.**

Since its inception in **1972**, Nectar Group has operated in 165 different locations in **75** countries, and its fleet now consists of more than 70 mobile bagging plants (managed and owned) along with Grabs, Hoppers, Cranes and Ancillary Equipment.

NSBT has been operating since 2015.
Each year, the Group handles over 10 million tonnes of cargo.

Nectar Sierra Leone Terminal, Freetown.

Location: Freetown, Sierra Leone

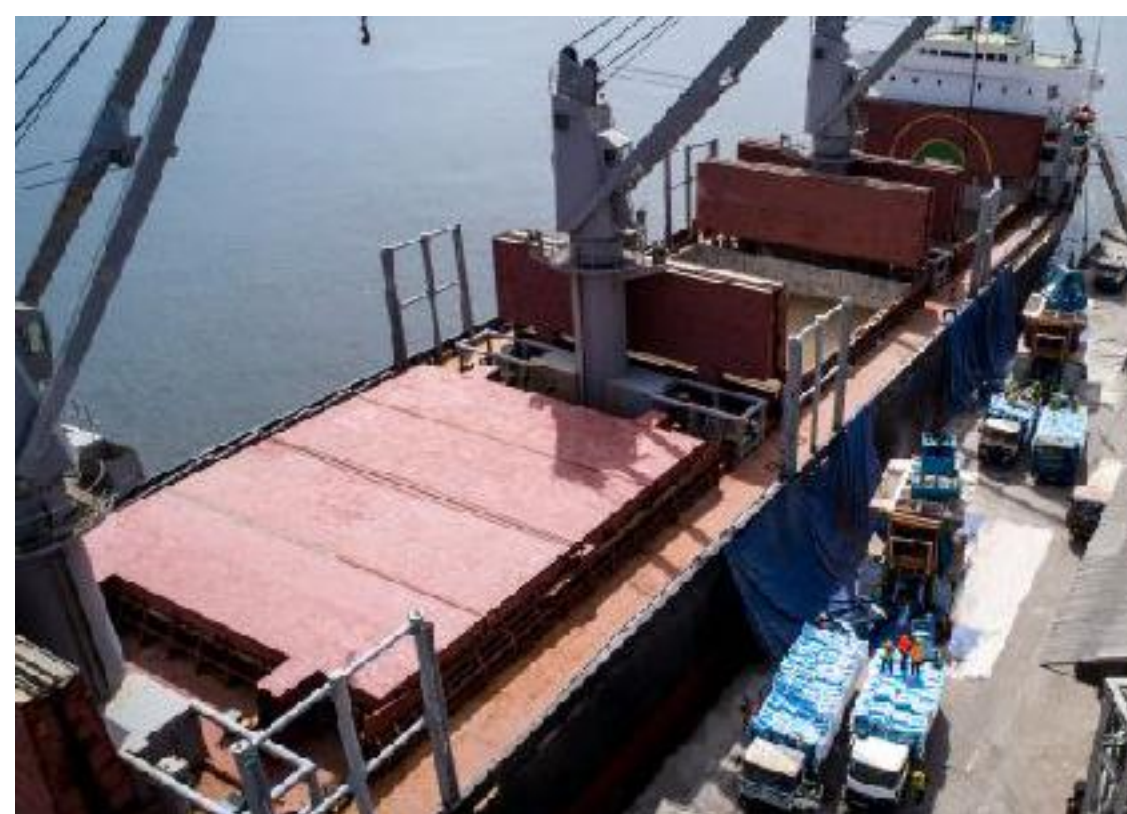

Requirement: Sierra Leone's primary multi-user bulk & breakbulk port

Offering: Port & Operations Management, Terminal Design, Bulk Handling, Warehousing, Logistics and Maintenance

Located in the largest natural harbour on the African continent, Nectar Sierra Leone Bulk Terminal (NSBT) is a subsidiary of Nectar Group Ltd. The Company has had a presence in Freetown since October 1988, when they first assisted in bagging imported rice from bulk vessels.

In 2015, Nectar took over the Bulk Terminal in Freetown, Sierra Leone, employing 80% of Sierra Leone nationals. In 2016, the port was recognised by the 'Best Dry Bulk Port' award at the IBJ industry awards.

NSBT is currently expanding its operations with a 3rd deep-water berth project, due for completion later this year. The new berth will facilitate the arrival of vessels of up to 225 metres in length with a 13-metre draft, improving the economies of scale in shipping cargo.

No matter the stage of your project,
Nectar is equipped with the expertise to support all your cargo requirements.

Nectar Sierra Leone Terminal, Freetown.

NSBT is responsible for all terminal activities from unloading vessels to storing cargo as well as maintenance of all terminal equipment. The port provides a comprehensive range of services including;

- Responsible for all terminal activities
- Unloading vessels to storing of cargo (storage facilities)
- Quayside bagging operations
- Maintenance programme for all terminal equipment
- Bulk & Breakbulk discharging
- Weighbridge services
- Consolidation cargo management
- Integrated terminal management system
- Project cargo capabilities
- Investment in new bulk handling equipment
- Bulk hoppers, mobile bagging machines, 45mt Reach-staker, safety boat, fire truck, Backhoe, Bobcats, mechanised sweepers, mobile lighting, grabs and generators.

No matter the stage of your project,
Nectar is equipped with the expertise to support all your cargo requirements.

NSBT Developments. 3rd **Berth Expansion** In **Freetown**, Sierra Leone.

Location: Freetown, Sierra Leone

3rd Berth Size: Deep water berth of 190 m

Quay Space: Enhanced space of 12,000 sq m

NSBT Offering: Port & Operations Management, Terminal Design, Bulk Handling, Warehousing, Logistics, & Maintenance

The expansion of the bulk terminal in Freetown is one of the largest and complex projects undertaken by the Group. The project comprises of the design and construction of a new deep-water berth of 190m and enhanced quay space of 1.2 hectares (12,000 sq m) to facilitate a larger-class of vessel size to call at QEII terminal at Freetown (the largest natural harbour on the African Continent) as well as incorporating refurbishment of the existing berths.

New berth will enhance cargo handling capabilities & vessel discharging speeds.

NSBT will reclaim 1.2 hectares (2.96 acres) of land. Enabling further shoreside storage and new warehousing facilities.

NSBT Developments. 3rd **Berth Expansion** Project Update.

Nectar Group has partnered with Marine Consulting Engineers, Beckett Rankine and Civil Engineering firm, Eiffage Génie Civil to deliver the berth expansion. The collaboration is part of steps being taken to meet international standards of the terminal in every operational aspect, with NSBT significantly investing in equipment and infrastructure at Sierra Leone's primary multi-user bulk and break-bulk port.

The project is currently well underway and as of February of this year, the installation of tie rods has been completed. Demobilization of the marine spread commenced at the beginning of March, including dredging and reclamation works. Ongoing works for the east revetment, flood-wall, existing drainage, and mooring blocks continues.

Reclamation and dredging stage underway.

We are proud to partner with the Sierra Leone Port Authority.

Your local **Operations Contact.**

We pride ourselves on our outstanding H&S record, project management and terminal capabilities.

- Agricultural development | Working with SOCFIN
- NSBT Christmas Giving Campaign | Community involvement through perishable and non-perishable food donations.
- Partner with 'Street Child Sierra Leone' sponsoring children in the Cline Town area.
- In 2018, NSBT refurbished classrooms at Bishop Crowther Primary School.

Nectar Group is fully committed to being an active global citizen, socially responsible and environmentally conscious company. We seek to create a positive impact on the environment in which we work and make a significant difference across communities, in the workplace and beyond.

Our Board of Directors.

You can rely on us to consistently deliver to the highest standard. Supported by senior management team, our dedicated local team of experts will work closely with you in a **transparent** and **collaborative** way throughout your project and beyond.

As a core leadership team, we are passionate about offering our **insight** and **expertise** to help advance and innovate our evolving sector.

Chris Boughton
Director

Chris joined the Group in 1999 originally as Financial Director and was appointed Managing Director following an MBO in 1998.

Chris has 35 years of accountancy experience within several different industries, including the last 29 years dedicated to working within the maritime and shipping sector. Chris takes on a lead role for business development and client relationships in Nectar's key global locations. Together with his fellow Directors, Chris has been actively involved in the overall management and strategic development of the Group over the last 11 years.

Chris also serves as a Non-Executive Director of The Caribbean Council.

Guy Wilkes
Director

Guy joined the Group in 2003 and is responsible for developing new avenues of business as well as managing the commercial department.

Guy brings with him over 28 years' experience in the shipping industry, where he started his career in the shipping container sector and then spent 7 years working with Mitsui OSK lines. Guy has actively developed new opportunities for the group in locations such as Senegal, Sierra Leone, Nigeria, and Benin.

Guy is a member of the Chartered Institute of Logistics & Transport and serves on the Trustee board of two UK charities.

Han Ozturk
Director

With over 38 years' experience in the shipping and maritime industry, Han's primary focus is on operational and terminal development. Han joined Nectar Group in 1999 as Projects Manager taking charge of worldwide projects and expanding the Group's portfolio.

Han brings with him a wealth of expertise in bulk cargo handling and terminal operations both from port operations and vessel perspective. He has been instrumental in the advancement of bulk terminal development, management, and consultancy services.

Han is actively involved in several international nautical and port related organisations within a leading role capacity and has recently completed his Doctorate in Business Administration.

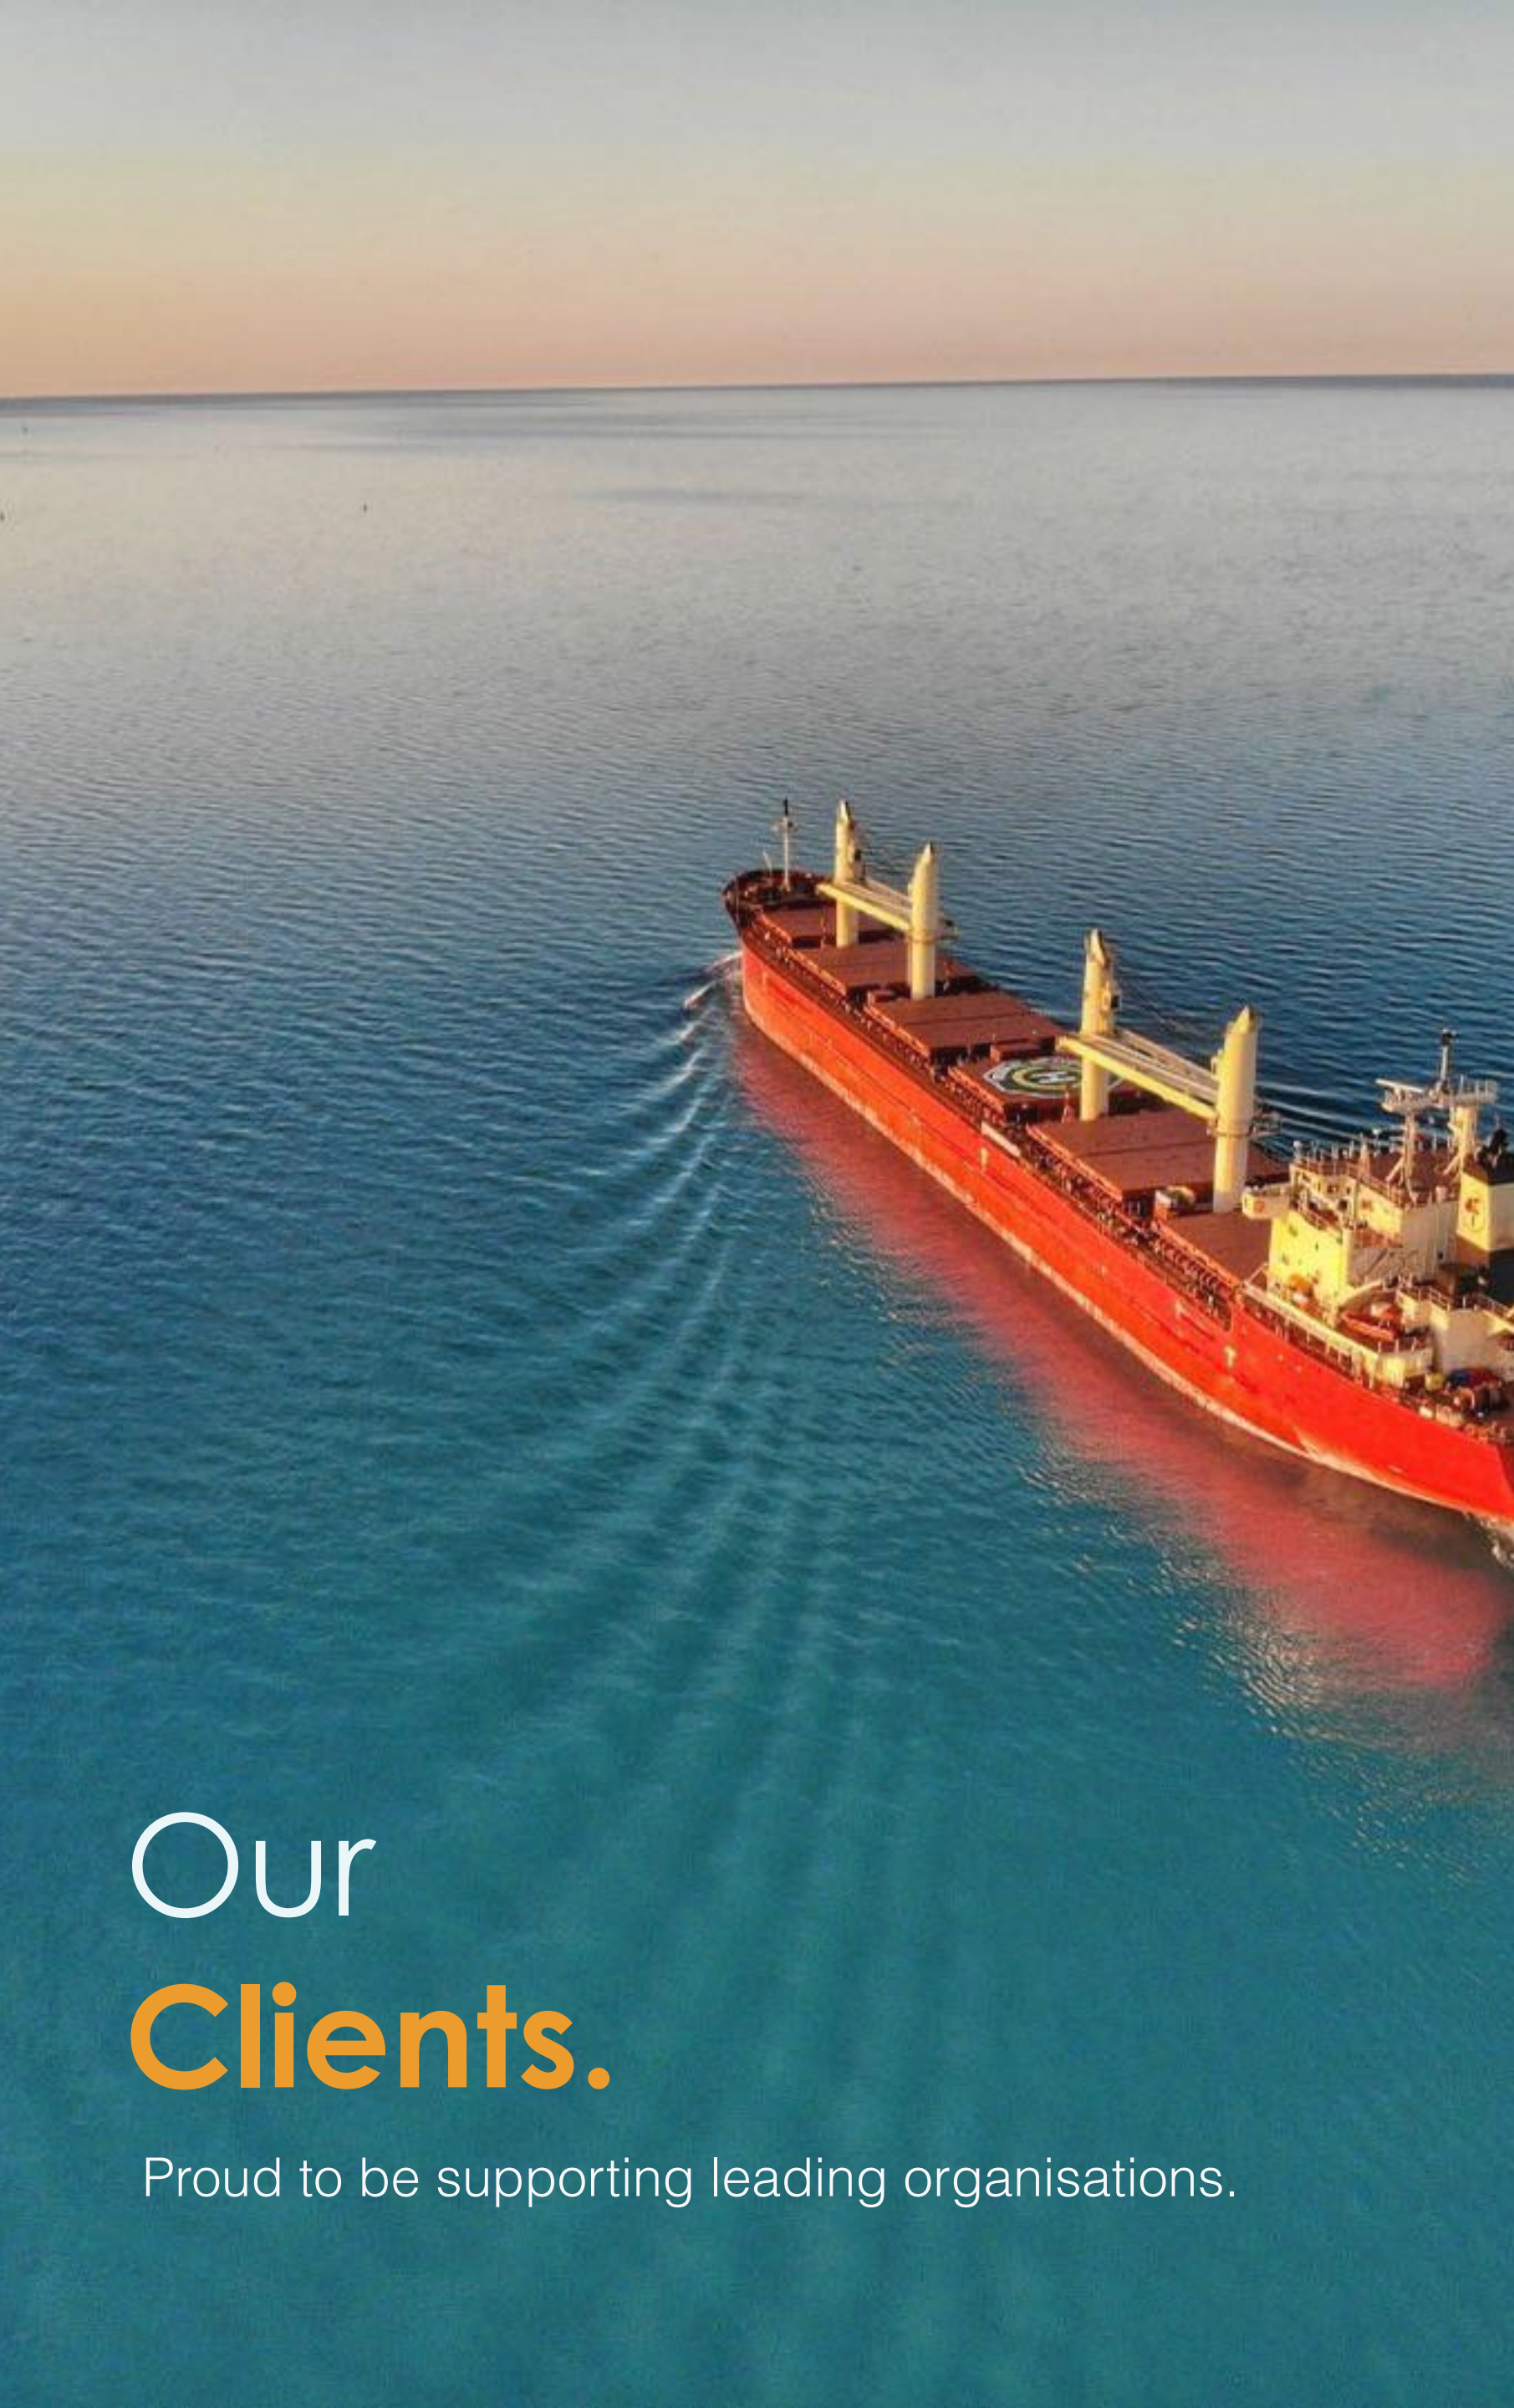

Proudly celebrating 50 strong years

Half a century in business is a great source of **pride** and **accomplishment**; and it is the **dedication** and **motivation** of our international team that has been the catalyst to make this happen.

"It is our people that make the company." Chris, Guy & Han - Directors 2022

Our Clients.

Proud to be supporting leading organisations.
