

# Drive your style

3M™ Films help you express yourself –  
and protect your vehicle

## Bring more color into your life.

Restyle your vehicle without the expense – or commitment – of a new paint job. 3M™ Wrap Films give you a beautiful and durable alternative to paint. With 100-plus colors to select from, there are plenty of ways to design a look that's all you.

**Express your style in a one-of-a-kind way.**

Choose colors, textures and finishes you can't get with paint.

**Get a preview.**

A proprietary digital visualization tool, the Restyling Studio at [3M.com.au/RestylingStudio](https://3M.com.au/RestylingStudio) helps you see what your vehicle might look like newly wrapped or tinted with automotive window tint.

**Give yourself some flexibility.**

Styles change – and your wrap job can too. A 3M recommended installer can easily remove 3M™ Wrap Films.

**Enhance resale value.**

Wrap film won't damage paint.

**3M Films help you express yourself — and protect your vehicle.**

# Sweat the details.

3M.com.au/2080

Make sure your style is in good hands. A 3M recommended installer can bring your vision for your vehicle to life. High-quality 3M™ Wrap Film stretches and conforms to hug the curves, take corners and give you the confidence of a job done right.

- **Durability.** High-quality films provide a durable finish that lasts up to seven years.
- **Reliability.** Your 3M recommended installer and the latest installation techniques help ensure proper adhesion and a smooth, beautiful appearance.
- **Peace of mind.** A product from 3M, a name you know and trust, paired with the most comprehensive warranty in the industry – up to seven years on vertical surfaces – give you the confidence that you're protected.

## How do I wrap my vehicle?

Visit a 3M recommended installer. Locate one at **3M.com.au/find-an-installer**

Choose from 3M's portfolio of over 100 colors, textures and finishes.

The installer will prep your car and install the film over your existing paint. The wrap film will adhere to your car without damaging the original paint job.\*

The installer will tell you how to care for your vehicle wrap.

Drive away in your newly restyled vehicle – and make a statement wherever you go.

\*To ensure a quality wrap job, paint should be in good condition. If you have questions about the suitability of wrap films for your vehicle, consult a 3M recommended installer.

# A new way to wrap.

## Introducing 3M™ Wrap Film Series 2080

You've always been one to make the bold choice. Align yourself with a leader. 3M have reinvented their Wrap Film Series with features that will leave your competition in the dust.

3M Films help you express yourself — and protect your vehicle.

# Create a sensation.

## Don't follow. Lead the way.

A Protective Film Layer on gloss colors.

Stays on during installation then is removed quickly, easily and cleanly after install to reduce surface impressions and scratches for a beautiful finish and improved productivity.

- Performs well with Knifeless Tape
- Protective layer is recyclable
- Patent pending: cannot be replicated by competitors

## Wrap smarter not harder.

Provide a better fit around curves and in channels for sleek appearance and easier installation.

- Increased heat stretch performance and superior lifting resistance
- Best in class conformability based on internal testing

## An improved warranty.

Greater confidence for the installer and better support for end customers.

### 2080:

7yr vertical / 2yr horizontal

\* Warranty varies by zone.  
Warranty information is not valid for Gloss Silver Chrome GC451.

# It's a wrap.

Backed by 3M technical support, training and certification programs that help you and your staff keep up with the latest techniques.

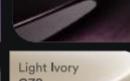

New technology and innovation to help installers wrap smarter, not harder.

*Installation Guide | Tips & Tricks*

# A go-to for installers worldwide.

**3M™ Print Wrap Film IJ280 with 3M™ Gloss Wrap Overlamine 8428G**

3M™ Print Wrap Film IJ280 & 3M™ Gloss Wrap Overlamine 8428G are a best-in-class vehicle wrap designed for converters and installers. Backed globally by the 3M™ MCS™ Warranty, this print wrap solution delivers exceptional performance, print quality and productivity, leading to faster installations with less rework.

This film and overlamine combination is up to 20% faster to install<sup>^</sup> and proven to lift 2x less.\* These benefits are brought to life by several unique features:

- Conforms with less heat\*
- New 3M™ Comply™ v4 Air Release for max air flow and smooth results
- New, proprietary adhesive with optimized initial tack, slide and repositionability
- Removes cleanly at end of life with heat\*\*

Please see below for tips and tricks on how to use the most technologically advanced print wrap solution we've ever made.

Sincerely,

3M Application Engineers

[www.3m.com.au/IJ280](http://www.3m.com.au/IJ280)  
[www.3m.co.nz/IJ280](http://www.3m.co.nz/IJ280)

**3M Films help you express yourself — and protect your vehicle.**

# Wrap fast

*What makes 3M™ Print Wrap Film IJ280 with 3M™ Gloss Wrap Overlamine 8428G up to 20% faster to install?*

## Conforms with less heat.

- ▶ This solution conforms more at room temperature, which means you can stretch and conform the graphic further with less heat.
- ▶ It also conforms at a lower temperature when you are using heat.
  - **Tip #1:** When using your heat gun, a little goes a long way. When you first try the film, experiment using less heat than you normally do. This is how you 'unlock' the true benefits of our solution and start to install faster.
  - **Tip #2:** The less you pick up your heat gun, the faster you can install. Fight the urge to overheat the film. Once you see the film relax, you'll know you've reached the optimal temperature to conform the film.
  - We recommend heating the film to about 120-130F.

You can install around compound curves and deep recesses without relief cuts.

## New 3M™ Comply™ v4 Air Release for max air flow and smooth results:

- ▶ This new 3M™ Comply™ v4 Air Release pattern eliminates channel collapse, maximizes air flow and finishes with a non-visible result.

## New, proprietary adhesive with optimized initial tack, slide and repositionability

We traveled the world to learn what adhesive experience installers want and developed something that hits the 'sweet spot'.

- ▶ The tack of our new adhesive is low enough to easily slide or reposition the film. It won't tack on the surface until you want it to.
- ▶ It is also high enough that you can trust the film to stay down.
- ▶ Make a small mistake? Don't worry. This adhesive is installer friendly, allowing you to reposition the film and fix a mistake.
- ▶ The combination of our new adhesive with 3M™ Controltac™ Adhesive technology enables excellent slide, no matter which printer platform the graphic was produced on.

## Reduced outgassing time.

- ▶ Because of the unique design of 3M™ Print Wrap Film IJ280, we are reducing our recommended minimum outgas time between printing and lamination from 24 to 8 hours.
- ▶ As an installer, this means you can expect the same adhesive experience printed & unprinted and you won't battle the 'solvent effect', even at a shorter outgas time.

# Wrap fearlessly

*What makes 3M™ Print Wrap Film IJ280 with 3M™ Gloss Wrap Overlamine 8428G proven to lift 2x less?\**

## Lifting resistance.

- ▶ With proper installation methods, this print wrap solution is proven to stay down in deep recesses without lifting. If you can get it into the recess, you can trust it will stay there.
- **Tip #1:** You don't need to use any 'hacks', special tricks, or even relief cuts.
- **Tip #2:** Experiment with a small piece of film and wrap it around a bumper or into a deep channel and experience best-in-class lifting resistance.

## Post heat

- ▶ Post-heating is an important step to ensuring a film will stay down.
- ▶ While post-heating is still a necessary step, you can post heat this solution at a lower temperature, allowing you to get the job out the door faster.
- ▶ Continue post heating the film after installation to 220-225F. Use an IR Temperature Gauge to ensure the film has been post heated to the correct temperature.

## Removes cleanly at end of life with heat.\*\*

- ▶ When using heat, this film should remove easily. No adhesive should be left behind at the end of life.

\*when compared to 3M™ IJ180Cv3/mC/8518 Overlamine.

^when compared to 3M™ IJ180Cv3/mC/8518 Overlamine with experienced installers applying 3M™ IJ280/8428G for the first time.

\*\*compared to IJ180Cv3 with 8518 overlamine tears less at removal after accelerated weathering.

## 3M™ Envision™ Print Wrap Film

### SV480mC (Solvent & UV) LX480mC (Latex)

Transforming. Enhancing. Protective. 3M's high performing Envision™ Print Wrap Film SV480mC and LX480mC adds a layer of beauty to your project. Not only that, it protects it for years to come, guarding against UV rays, high temperature, moisture and mild acids. So your walls, vehicles, trailers or textured surfaces will be radiant well into the future. An ultra-versatile solution with superb printability and excellent repositionability, it's also non PVC, so it's protecting the earth as well. That's the beauty of 3M™.

#### Features:

- Easier positioning means it installs 50% faster on textured surfaces
- Conformable and stretches up to 50% with no lift
- Fast excellent and removal repositionability
- Highly durable and resists tearing and squeegee scratching
- Sensational gloss and clarity
- Heated film recovery
- Sustainability edge – PVC, phthalates, chlorine and halogen-free

#### Ideal for:

- Walls and other textured surfaces
- Motor vehicles, trailers and boats
- Short or long term, indoor and outdoor

#### Graphic Protection:

Graphic protection is essential and improves the appearance, performance and durability of the printed image.

- 3M™ Envision™ Gloss Wrap Overlaminate 8548G
- 3M™ Envision™ Lustre Wrap Overlaminate 8549L
- 3M™ Envision™ Matt Wrap Overlaminate 8550M

#### Sizes:

- Envision 480mC available in 1370mm & 1524mm

#### Fire Rating:

# TURBO CHARGE YOUR PERFORMANCE

LOOK NO FURTHER THAN

**3M** IJ180mC

## 3M™ Print Wrap Film IJ180mC

Imagine products that perform even better and provide even more design flexibility, with white, metallic silver and clear. Now there is a product for every project – including vehicles, boats, fleet, interior walls, exterior signs, stainless steel and recreational vehicles.

### IJ180mC-10 WHITE

An industry favourite for wraps, this dependable print film now features 3M™ Comply™ micro technology which provides an even easier, faster and better-looking installation.

### IJ180mC-120 METALLIC SILVER

Introducing the FIRST printable metallic silver wrap film for an attention-grabbing finish.

### IJ180mC-114 CLEAR

Mix printed images with clear areas to create ultra-cool, never-been-done-before designs.

### IJ180mC-10 WHITE LSE

Challenging surface? Give ATV's, motocross bikes and other motorsports vehicles a winning design that's up for the adventure.

### IJ180mC-10 WHITE UR

Use this for partial short-term vehicle wraps but still have easy installation and then ultra-removable adhesive removes cleanly without heat or chemicals.

### Features:

- Comply™ Adhesive provides excellent air release
- Slideability and initial tack optimised for wraps
- Stretches 130% without primer and will not lift
- Excellent liner release

### Applications:

- Indoor and outdoor graphics and signs
- Wraps for vehicles, straight trucks, semi-trucks and semi-trailers
- Bus graphics
- Rail car graphics (excluding stainless steel)
- Watercraft graphics (above the static water line only)
- Point-of-purchase graphics and displays, emblems or striping

### Sizes:

Roll width available: 1371mm & 1524mm

### Fire rating:

BCA GRP1 AS/NZS3837:1998

### Graphic Protection:

Graphic protection can improve the appearance, performance, and durability of your graphic. Always use one of the following graphic protection options:

- 3M™ Scotchcal™ Gloss Overlamine 8518
- 3M™ Scotchcal™ Lustre Overlamine 8519
- 3M™ Scotchcal™ Matt Overlamine 8520

# Ride in style and comfort.

**3M™ Automotive Window Film Crystalline Series** offers the ultimate in high technology, superior clarity and performance with a premium look. It features a proprietary, multilayer optical film technology that combines over 200 layers in a film that is thinner than a Post-it® Note. This unique technology is the reason a clear film can reject more heat than darker films.

## Unique technology

With patented multilayer optical film and ceramic nano-technology, the 3M™ Crystalline Series provides better heat and UV protection than many darker films.

## Stay cool

Turn down the A/C with our top-of-the-line 3M™ Crystalline Series film. Rejecting up to 64% of total solar energy optimizing thermal comfort and minimizing the feel of the sun's heat on your skin.

## See clearly

The 3M™ Crystalline Series is designed to enhance your view by allowing visible light into your vehicle while keeping heat out, so you can see clearly through your windows — and maintain your vehicle's original appearance.

## Reduce glare

The 3M™ Crystalline Series allows you to see better and concentrate more on driving by reducing up to 81% of the glare from blinding sunlight.

## Stay connected

The 3M™ Crystalline Series is a non-metallized window film that won't interfere with mobile devices, GPS or satellite radio reception.

**3M** | Knifeless™ Tape

# Changing the installation experience.

Make the installation experience easier with 3M™ Knifeless Tape. Easily cut through any graphic film with sharp and clean lines - no matter the design!

## Cuts like a knife. Only better.

Get a line on the lineup of tapes that lets you do more.

Knifeless Tapes were inspired by the idea of never having to worry about surface damage when cutting any graphic film. Designed by graphics installers for graphics installers, Knifeless Tape gives new installers the opportunity to start trimming sooner, gaining confidence. And it takes experienced installers to the next level — increasing their speed and unleashing their creativity. What could be better than that?

[3M.com/knifelesstape](http://3M.com/knifelesstape)

### 3M™ Finish Line Knifeless Tape KTS-FL1

Our #1 product set the new industry standard for finishing vehicle graphic installations without a blade.

- Easily cuts most vinyl wrap films
- Patented design turns easily in any direction to follow contours and curves
- For single or multiple vinyl layer applications

Follow contours and curves on any part of the vehicle.

### 3M™ Design Line Knifeless Tape KTS-DL1

Flexible tape and filament are engineered to easily create highly contoured designs and leave a sharp, clean edge.

- Create striping, accents and designs that rival using a knife or plotter
- Patented design stretches slightly and turns easily in any direction for one-of-a-kind works of art
- Tape can be broken with hands for faster application
- For single layer vinyl applications

Create unique accents and designs.

**3M Films help you express yourself — and protect your vehicle.**

## Knifeless Tape Usage Guide

	Finish Line	Design Line	Perf Line	Bridge Line	Tri Line (6mm)	Tri Line (9mm)
3M Wrap Film Series	✓	✓		✓	✓	✓
Non-PVC & Laminated Films	✓			✓		
Reflective Film	✓			✓		
Perforated Window Film			✓			
Chrome Wrap Film				✓		

### 3M™ Perf Line Knifeless Tape KTS-PERF1

Easily cut a uniform margin between window graphic and rubber molding.

- Use to cut laminated, perforated window films and create a uniform relief cut along rubber molding before applying edge-sealing tape
- Can be used to bridge tight gaps and trimming

Create a uniform relief cut between window graphic and rubber molding.

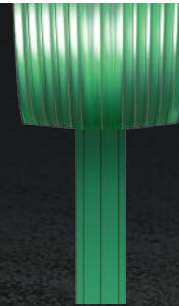

### 3M™ Bridge Line Knifeless Tape KTS-BL1

Create evenly cut graphics bridging from one panel to the next for a professional finish.

- Use to achieve clean and uniform cuts in wide gaps between doors, fenders and rubber moldings
- For single or multiple vinyl layer applications

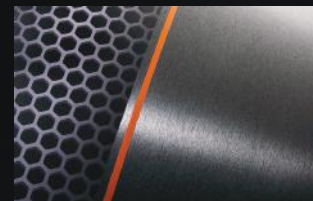

Evenly cut in gaps between car panels.

### 3M™ Tri Line Knifeless Tape KTS-TL6 & KTS-TL9

Unique, triple-lined tape ensures accurate, consistent stripe width from one end of the vehicle to the other.

- Create pinstripes, gaps and butt seams that rival using a knife or plotter
- Create different widths using 6mm, 9mm or a combination of both
- Patented design stretches slightly and turns easily in any direction for one-of-a-kind works of art
- Tape can be broken with hands for faster application
- For single layer vinyl applications

Create consistent pinstripes using any wrap films.

# Once we have you covered, you're covered.

**Sun. Rain. Snow. Whatever the weather, 3M graphics will stand up to it.**

As a world leader in weathering test standards, we use a combination of science, technology and innovation to ensure your finished graphic will perform for its intended life.

## 3M Basic Product Warranty

**Ready to go, out of the box.**

Prepare to be amazed. No physical damage. No visual or adhesive defects. Just stunning graphics, guaranteed. Basically, anything that affects the functionality of our adhesive-backed graphic film is covered.

## 3M™ MCS™ Warranty

**The most comprehensive finished graphics warranty in the industry.**

This one wins best in show. When you use finished graphics made with all 3M Graphics products and components, you're protected for virtually any application.

- Non-prorated warranty coverage
- Dedicated complaint resolution team
- Easy access to warranty period matrices
- Weathering tests that set the standard for evaluating the performance and life of a finished graphic

## Opaque colored films

Your color will stay your color for the life of the warranty.

- For everything from large fleet markings to small cut letters on signs or store fronts
- Lifetime Warranty\* for tractors and trailers
- Extended Warranty for legibility (white or black films)

## Colored/textured wrap films

Same warranty for all film types makes it easy to understand and explain to customers.

- Solid-color vehicle detailing for personal and commercial use
- Exceptional Horizontal Warranty\*
- Ready to install — no graphics protection or printing needed

\*See 3M Product Bulletins and warranty matrices at [3M.com/graphics](https://www.3m.com/graphics) for details.

**3M Films help you express yourself — and protect your vehicle.**

# Training and testing

Learn up-to-date installation techniques, industry best practices and 3M-specific solutions. 3M offers best-in-class graphics installation training and testing programs across the country.

## Select Partners

Our national network of 3M Select Partners are loyal 3M partners who can help you create and execute your graphics, architectural and window films solutions. All partners must pass 3M's thorough auditing process to achieve this elite status and are recognised by 3M as leaders in the graphics, architectural and window film industries. To hire a company for your graphics, architectural and window films projects, please contact a 3M Select Partner.

## Installer Training & Testing

Get personal, hands-on training from 3M Graphics Authorised Trainers. Practice your skills, including vehicle graphics, Architectural and Window Films, smooth and textured walls and floor graphics. The low student-to-trainer ratio of this advanced training will help improve your installation knowledge and skills. This is available to our 3M Select Network or 3M Preferred Graphics Installers.

### Find out more

To find your local 3M Select Partner, 3M Preferred Graphics installer, or for training and support contact your local Spicers representative.
