A SWISS PREMIUM COMPANY

NO TREES WERE HARMED IN THE PROCESS

serveware made from

RICE HUSK AND RICE STRAW

our serveware in rice are:

biodegradable

earth friendly

soil to soil

freezable

home grown

animal edible

holds wet

holds warm food

rice husk plates.

Earth-sensitive, biodegradable, and disposable snack plates made solely with rice husk and straws, giving paddy residues new purposes.

Available in two
dimensions:

Snack Plate: 20.32 cm

Dinner Plate: 25.4 cm

Born from the earth and designed to return to it, these simple soil-to-soil plates mark the origin of the brand. Fully biodegradable within thirty days of disposal, they are crafted without any chemical additives or artificial adhesives. Instead, rice husk and rice straw are transformed into a natural mulch, then moulded and steamed into durable plates. Animal-edible by design, (an essential criterion from the very beginning), these plates are not only sustainable, but also highly functional. They are microwave and a safe and enough to hold wet or curried foods without compromise.

Disposable and biodegradable drinking straws made from tapioca powder and rice starch. These edible straws use sustainable raw materials from tapioca roots and rice plants.

Crafted from upcycled agricultural by-products, these straws are ideal for everyday use and as convenient, portable drinking accessories.

RICE STRAWS:

Our straws and cutlery are:

biodegradable

compostable

soil to soil

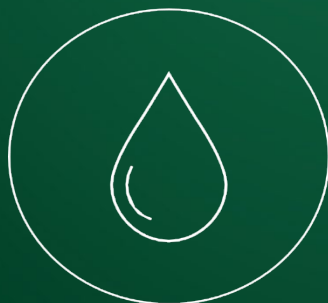

freezable

home grown

plant based

holds wet

microwaveable

Available in 3 different dimensions

Cocktail Straw - Length: 15.24 cm, Diameter: 6.5 mm

Juice Straw - Length: 20.32 cm, Diameter: 8 mm

Shake Straw - Length: 20.32 cm, Diameter: 10 mm

RICE STRAWS:

serveware made from

NATURAL BAGASSE

The sugar cane plant-based bagasse range is a thoughtful collection designed to offer accessible and varied disposable serveware. This range focuses on practical, sustainable solutions for everyday use.

This includes sauce and dip bowls, salad bowls, dinner and snack plates, compartmentalised canteen-style plates and takeaway containers. All are biodegradable within ninety days and are suited for specific or general disposable tableware needs.

Leak-proof, microwave-safe and free of carcinogens or any other toxic chemicals, these items are compostable, leaving no trace or harm after use.

our natural bagasse range is:

biodegradable

compostable

NATURAL FIBRE CUTLERY :

Butter Knife:
Length: 160mm
Width: 20mm

Fork:
Length: 155mm
Width: 28mm

Ice Cream Spoon:
Length: 93mm
Width: 25mm

Table Spoons:
Diameter: 160mm / Width: 20mm

NATURAL FIBRE CUTLERY:

EDIBLE CUTLERY.

- Edible Cutlery are 100% Natural, Vegetarian and baked products
- Edible Cutlery contains NO Egg, NO Chemicals, NO Additives or Even Added Preservatives.
- Edible Cutlery are Biodegradable, Ecofriendly, Water Conservation, Zero-Waste, Sustainable, Hygienic
- Edible Cutlery is made of food materials and they come with nutritive contents.
- Edible Cutlery products are for Human Consumption made from Millets, Grains, Spices & Pulses.
- Edible Cutlery can hold up to +90°C to -40°C (Hot / Cold)
- Holding Capacity: Snacky type (supplying now) 10-15min & for Retention type (on order) 45-60 min Edible Cutlery Shelf Life is 1 year/365days (when vacuum packed)
- Edible Cutlery falls under food category and hence, hygiene in of paramount importance. These disintegrate in less than a week, unless stray animals and insects do not eat them up sooner.
- Edible Cutlery cannot be reused. These are baked at high temperatures; therefore, the likelihood of microbial spores to survive is very little. Even if these micro-spores land after production, they are not likely to germinate because, the products are dehydrated (which is why they have long shelf life, even without preservatives). Moisture is essential for life to germinate/generate.

INSTRUCTION FOR USE: The Products utility is to hold the hot/cold food till you finish the food in it. By the time you finish the food the product would have got ripened for you to consume.

CAUTION: Please do not consume just like a snack (not directly without putting the food for which it is meant/supposed to be) otherwise it will be very hard to bite in.

soil to soil

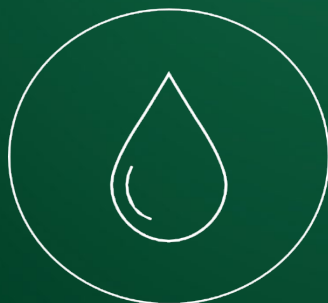

freezable

home grown

plant based

holds wet

microwaveable

WATER-COATED PAPER CUPS AND SUGARCANE LIDS:

Paper cups are made with a unique eco-friendly material called water-based barrier coating. Our paper cups are:

- Lined on the inside with a water-based coating - no PP, PE, or PLA - making it 100% home-compostable
- Heat-resistant up to 100°C / 212°F
- Decomposes within 18 weeks

WATER-COATED PAPER CUPS :

2 4 0 mL

Size: 80 x 52 x 95 mm (Ø x B x H)

2 4 0 mL

Size: 90 x 57 x 88 mm (Ø x B x H)

3 5 0 mL

Size: 90 x 57 x 99 mm (Ø x B x H)

4 5 0 mL

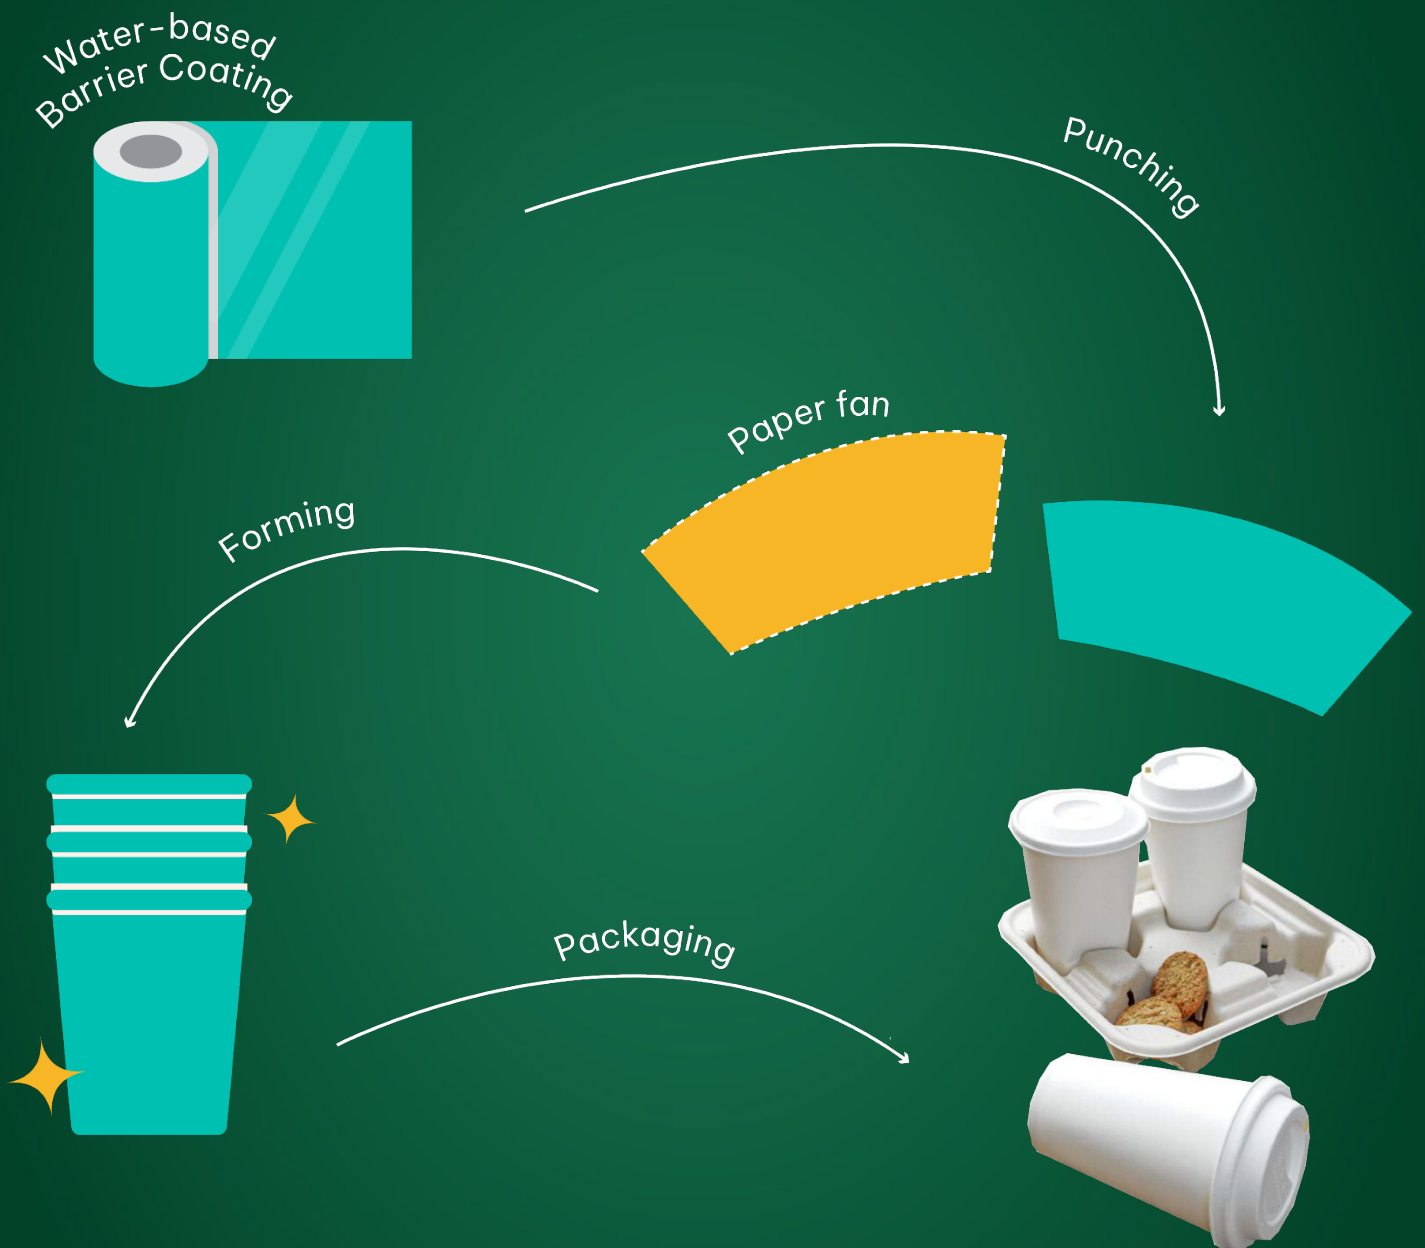

Size: 90 x 60 x 128 mm (Ø x B x H)

6 0 0 mL

Size: 90 x 62 x 150 mm (Ø x B x H)

WATER-COATED PAPER CUPS :

PAPER CUPS PRODUCTION PROCESS:

Along with paper cups are the indispensable lids, suitable for all kinds of drinks, hot or cold, allowing you to enjoy every sip to the fullest. They are made from sugarcane fiber, 100% plastic-free, and compostable. We have 3 types of lids: Coffee lid; Flat lid; Dome lid.

- Water-resistant
- Suitable for cold & hot drinks
- Leak-proof
- Home-compostable
- Sturdy and flexible
- PLA-free (bio-plastic free)

SUGARCANE LIDS:

Coffee Lids

Featuring an elevated spout to enable comfort in every sip.

1. Size for Ø80 mm cups:

85 x 20 mm (Ø x H)

2. Size for Ø90 mm cups:

94 x 20 mm (Ø x H)

Dome Lids

Specially designed for ice-cold drinks like smoothies, frappes and delicious toppings! Straw-friendly!

Size for Ø90 mm cups:

94 x 40 mm (Ø x H)

Flat Lids

Straw-friendly!

Size for Ø90 mm cups:

94 x 10 mm (Ø x H)

SUGARCANE LIDS:

SUGARCANE FOOD PACKAGING PRODUCTION PROCESS:

Cup Sleeve

- Available in brown kraft paper
- Print up to 4 colors

Sticker

- No coating
- Print up to 4 colors

PORT OF ORIGIN: CHINA PAPER CUP & LID :

COME ALONG AND BE PART OF THE SOLUTION FOR A
SUSTAINABLE FUTURE!

WASTE AFTER AN EVENT: ZERO.

It was created with the aim of making social events and gatherings more mindful of sustainable eating habits. We replace single-use plastic and paper serveware with environmentally responsible alternatives. Our snack plates contain no artificial adhesives, linings or coatings, and are completely safe to use, breaking down naturally within ninety days.

SOIL TO SOIL:

WHY WE DO WHAT WE DO.

Our biodegradable serveware is born from a conscious urge to create tables and eating experiences that heal - both people and the planet. With every rice straw, snack plate, or tumbler, we are growing mindful efforts to become the sensible choice in biodegradable and disposable tableware.

With a team deeply aware of today's sustainability needs, we operate from a fertile adaptable factory space - designed to evolve with the growing demands of the communities we serve.

Our efforts aim to heal the very waters, soils and creatures that sustain our fragile race.

CONNECT. HEAL.

A family of earth-conscious individuals united by a shared purpose - to create agro-based, biodegradable tableware that serves as a meaningful alternative to plastic, paper and other disposable options.

Our strength lies in purpose-driven innovation and practical research. We are committed to enabling everyday sustainable choices that are accessible to anyone seeking to reduce their carbon footprint.
