## INTRODUCING...

NEW:

Edspry Learning's Accelerate Ebooks and Teacher Resource Packs.

Edspry Learning distills complex subjects into easily digestible summaries, providing students with all the essential information needed to succeed. Whether you need a quick review or a more profound understanding, Edspry keeps students engaged with real-world issues and current events, avoiding outdated print content.

See pages 38-43 for more details!

### **Digital Coursebooks**

 ${\it Master complex subjects with Edspry's innovative learning platform.}$ 

Edspry Accelerate tackles your biggest learning challenges:

Information Overload: We break down complex topics into bite-sized, easy-to-understand summaries, keeping you focused on the essentials.

Outdated Content: Stay ahead of the curve with Edspry's commitment to current events and real-world issues, ensuring your learning is always relevant.

Edspry Accelerate empowers both students and teachers:

Real-Time Support: Thanks to Edspry's instant feedback on student assessments, teachers can identify areas needing extra attention, allowing for immediate adjustments in teaching strategies.

Targeted Learning: With immediate feedback, students can pinpoint their strengths and weaknesses, enabling them to focus their efforts on specific areas for improvement.

This comprehensive digital coursebook offers everything you need to excel, and it is available in convenient subscription plans for individuals and schools.

School Subscriptions:

1-Year Access: Empower your entire class for just \$19 per student/year.

2-Year Access: Deepen understanding with extended access for \$29 per student/year.

## TEACHER RESOURCES DESIGNED TO ENHANCE YOUR CLASSROOM EXPERIENCE

Teachers are the cornerstone of education, irreplaceable in their role to inspire and guide. Edspry resources complement this by providing tools that enrich instruction and save time, allowing teachers to focus on what they do best—engaging and educating students to their fullest potential.

## New Changes Psychology

Scan to see new Psychology Subject Brief

#### General description of the course and teaching format:

Psychology is the scientific study of human and animal cognition and behaviour, with the goal of solving problems and increasing the quality of life for individuals and their communities. Psychologists attempt to describe, explain, predict and change behaviour by observing humans, forming hypotheses and theories regarding behaviour, and testing them empirically. However, psychology also is a human science and looks for the meaning behind human behaviour through conversations and inquiry. In the DP psychology course, students will develop knowledge and understanding of psychological concepts, content and contexts, as well as the models and theories associated with these areas. Through the course, students will develop the ability to engage in critical thinking, assess evidence and acknowledge the evolving nature of knowledge. They will acquire the ability to seek fresh information and generate understanding by employing research methodologies. The goal of the DP psychology course is not to create psychologists, but to promote psychological literacy, which includes: understanding basic concepts and principles of psychology understanding the scientific research process having the ability to problem-solve applying psychological principles to personal, social, or organizational problems acting ethically thinking critically communicating well in different contexts having cultural competence and respecting diversity possessing self-awareness. The course encourages the application of psychology through concept-based learning and engaging in class practicals in each of the four contexts. See below for an overview of the research methodology students will use in each context. Source: IBO.ORG - For full update information visit IBO.ORG

Available in ebook

Psychology for the IB Diploma Programme 3rd Edition

ISBN: 9781292477367 Price:\$109.00

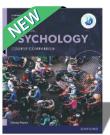

**Publisher: Pearson Education** 

These co-published resources provide IB Diploma Psychology teachers and students with flexible, comprehensive tools tailored to the new subject guide, complete with a two-year eBook to enhance teaching and learning. Key features and benefits include:

- Comprehensive coverage of Psychology themes, including Concepts, Content, Contexts, the Internal Assessment, and HL-only content, ensuring all curriculum requirements are fully addressed.
- Two-year eBook access, offering additional teacher support, digital tools, and resources to enhance the learning experience and help students excel.

Available in ebook

IB DP Psychology Course Companion ISBN: 9781382056663

Price:\$99.00

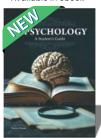

**Publisher: Oxford University Press** 

Comprehensively updated for the 2025 syllabus and developed in collaboration with the IB, this resource offers complete coverage of all Standard and Higher Level content while providing extensive support for assessment preparation.

- IB-approved content: Published in cooperation with the IB, ensuring full alignment with the latest curriculum and adherence to IB standards.
- Promotes critical thinking and concept-based learning: Structured activities and opportunities encourage independent inquiry and deep understanding.
- Engages learners with real-world connections: Includes activities, thought-provoking discussion points, and diverse research examples to bring theory to life.

Available in ebook

IB Psychology: A Student's Guide (Second Edition)

ISBN: 9780995139015

Price:\$79.00

**Publisher: Themantic Education** 

Want to teach about couples, cults and criminology in IB Psychology? Now you can with "IB Psychology: A Student's Guide." In this second edition, Travis takes dry topics like "Group behaviour" and "Interpersonal relationships" and turns them into instantly engaging chapters like Couples, Cults, and Criminology. This results in more engagement, deeper learning and better results. The book's designed to make your life easier. Here's how:

- Lesson-by-lesson structure
- Differentiated learning outcomes to start every lesson
- Extension work for fast finishers
- Student-friendly language
- Teacher support packs for every chapter

## New Changes Extended Essay

Scan to see new Extended Essay Subject Brief

#### Overview of the new course:

The EE, a component of the DP core, is a compulsory, externally assessed piece of independent research presented as a formal piece of academic writing. It is an in-depth study of a focused topic—undertaken either through a subject-focused approach or an interdisciplinary approach. Students choose from the list of available DP subjects for the examination session in question. This normally is one of the six subjects a student is taking (or two, in the case of the interdisciplinary approach) or a subject that a course student has a background in.

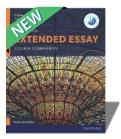

The EE is intended to promote academic research and writing skills, providing students with an opportunity to engage in personal research in a topic of their own choice under the guidance of a supervisor (an appropriately qualified member of staff within the school). Students produce a significant piece of appropriately presented and structured writing in which they communicate their ideas and findings in a coherent, reasoned manner, appropriate to the subject(s) chosen.

The updated EE puts a stronger emphasis on students using an interdisciplinary approach to research in order to address complex issues and questions. The world studies EE has been absorbed into a broader, more flexible interdisciplinary pathway within the new EE, where students integrate the lenses of two DP subjects. Focusing on one subject for the EE also is an equally viable research pathway for students, depending on the nature of the topic.

Designed to inspire confidence and clarity, it supports students through every step of the Extended Essay journey.

## New Changes Computer Science

Scan to see new Computer Science Subject Brief

#### Overview of the new course:

The content of the course has been revised to ensure that the focus is computer science and not information technology. This supports students in developing the skills to apply their knowledge of problem-solving in computer science to different contexts, being able to study computer science at the university level and developing their computing skills in future careers.

DP computer science requires an understanding of the fundamental concepts of computing systems and the computational thinking process to solve problems in the real world. The course is organized into two key themes:

#### A: Concepts of computer science

#### B: Computational thinking and problem-solving

Theme A focuses on how computing systems work, and Theme B focuses on how students can use computing systems to solve real-world problems. The course is future-facing and includes a topic on machine learning. There also is a case study so that emerging technologies can be considered during the lifetime of the course. Finally, the course has a practical programme that consists of the development of a computational solution and a collaborative science project

Designed for both Higher Level (HL) and Standard Level (SL), it fully aligns with the revised guide and prepares students for success in the first assessment.

## New Changes Visual Arts

Scan to see new Visual Arts Subject Brief

#### Overview of the new course:

Art-making as inquiry is at the centre of the new DP visual arts course, which remains a creative, practice-based course that can be adapted to different contexts and cohorts of students.

This course fosters creativity, communication, critical thinking and collaboration. Students learn that by making art, they are empowered to engage, transform and emerge as individuals and members of a community. The higher level (HL) course offers a solid preparation for students who wish to continue their studies or career in the visual arts, but the syllabus more broadly equips students with skills essential in a rapidly evolving world. In the new course, the aims, assessment objectives and assessment tasks are fully aligned and better connected with the syllabus content. This is now organized in three core areas—create, connect and communicate—which are integrated in art-making as inquiry.

Teachers and students are invited to transform the classroom into a visual arts studio, a collaborative, inclusive, creative and conceptually rich space where students develop their art and are supported in becoming increasingly independent art practitioners.

The new syllabus enhances the authenticity of learning experiences in DP visual arts and more clearly defines how learning in this subject is non-linear, generative and interactive.

The creative process remains unprescribed and flexible, and the new course more clearly fosters the synthesis of conceptual and material practices. Students must engage with a variety of art-making forms, but also with creative strategies.

The new course explicitly invites students to reflect on the relationship between artist, artwork, context and audience to develop their understanding and reflexivity. A clear definition of cultural significance supports teaching and learning.

#### **Publisher: Oxford University Press**

Matched to the first teaching 2025 syllabus, these resources break down and clarify all the assessment components of the course. It guides learners through each assessment task, with a range of authentic student artwork samples which contextualize the exam criteria, reinforce comprehension and build confidence.

- Published in cooperation with the IB so you can be assured the content is aligned, reviewed, and approved
- Contains a wealth of authentic, annotated student samples, to contextualise the assessment criteria

\*Pricing varies based on cohort size.

# New Changes Design Technology

Scan to see new Computer Science Subject Brief

Sciences: DP Design technology First assessment 2027

#### Overview of the new course

Design technology is a problem-solving and innovation approach that places a strong emphasis on understanding the needs and perspectives of the intended end user(s). It is a flexible and iterative process that can be applied to a wide range of challenges, from product development to service design and beyond.

A relevant and effective design technology education needs to reflect societal change with a greater focus on skills and the interconnectedness of concepts, contexts and content, and to facilitate deep learning and student understanding. New developments have been implemented to address these needs.

The updated design technology curriculum explores three themes: design in theory, design in practice and design in context. Through these, design technology students will develop long-enduring knowledge and understanding of the design thinking process. The study of their interconnections will provide students with opportunities to explore different perspectives and conceptual frameworks. Conceptual learning

## Sports, Exercise and Health Science Check out o Sports, Exercise and Health

Scan to see the Sports, exercise and health science Subject Brief

#### Overview of the new course:

The new DP sports, exercise, and health science (SEHS) course will be launched in February 2024 for first teaching in August 2024. First assessment will take place in May 2026.

Below you will find an overview of the course updates. For a technical breakdown of the DP curriculum and assessment methods for this course, read the sports, exercise and health sciences subject brief (SL & HL).

Overview of the new course

A relevant and effective science education needs to reflect societal change with a greater focus on skills and the interconnectedness of concepts, contexts and content, and to facilitate deep learning and student understanding. Developments have taken place to address these needs.

The SEHS curriculum explores three themes:

- · exercise physiology and nutrition of the human body
- · biomechanics
- sports psychology and motor learning.

Through these, SEHS students will develop long-enduring knowledge and understanding of the science at play in human physiology, biomechanics and psychology. The study of their interconnections will provide students opportunities to explore different perspectives and conceptual frameworks.

\*Teacher Resource also available

The business management course is designed to develop students' knowledge and understanding of business management theories, as well as their ability to apply a range of tools and techniques.

Students learn to analyse, discuss and evaluate business activities at local, national and international levels. The course covers a range of organizations from all sectors, as well as the socio-cultural and economic contexts in which those organizations operate.

The course covers the key characteristics of business organization and environment and the business functions of human resource management, finance and accounts, marketing and operations management. Links between the topics are central to the course. Through the exploration of six underpinning concepts (change, culture, ethics, globalization, innovation and strategy), the course allows students to develop a holistic understanding of today's complex and dynamic business environment. The conceptual learning is firmly anchored in business management theories, tools and techniques and placed in the context of real world examples and case studies.

The course encourages the appreciation of ethical concerns at both a local and global level. It aims to develop relevant and transferable skills, including the ability to: think critically; make ethically sound and well-informed decisions; appreciate the pace, nature and significance of change; think strategically; and undertake long term planning, analysis and evaluation. The course also develops subject-specific skills, such as financial analysis.

## **History**

History is a dynamic, contested, evidence-based discipline that involves an exciting engagement with the past.

History is an exploratory subject that fosters a sense of inquiry. It is also an interpretive discipline, allowing opportunity for engagement with multiple perspectives and opinions. Studying history develops an understanding of the past, which leads to a deeper understanding of the nature

The Diploma Programme (DP) history course is a world history course based on a comparative, multi-perspective approach to history and focused around key historical concepts such as change, causation and significance. It involves the study of a variety of types of history, including political, economic, social and cultural, encouraging students to think historically and to develop historical skills. In this way, the course involves a challenging and demanding critical exploration of the past.

The DP history course requires students to study and compare examples from different regions of the world, helping to foster international mindedness. Teachers have a great deal of freedom to choose relevant examples to explore with their students, helping to ensure that the course meets their students' needs and interests regardless of their location or context.

History is available at both Standard Level (SL) and Higher Level (HL).

## Oxford Resources for IB

## 100PERAJION WITH

## Prepare for teaching with Oxford's 2025 editions

Developed in cooperation with the IB for first teaching 2025

#### **DP Computer Science**

These comprehensive resources offer support for key concepts, theories and skills.

- Focus on both knowledge and skills with high quality content created by experienced IB authors, examiners, and teachers
- Prepare learners for assessment with worked examples, activities, formative practice questions and end-of-topic tests that support learners new to computer science
- Enable rich understanding of code for students new to programming or developing their skills

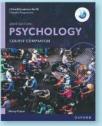

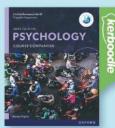

#### **DP Visual Arts**

These resources break down and clarify all the assessment components of the course.

- Contains a wealth of authentic, annotated student samples, to contextualise the assessment criteria
- Fully unpacks and explains the assessment components and requirements, through a highly visual approach
- Enhances learning with creative prompts, challenges and activities throughout

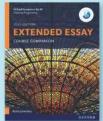

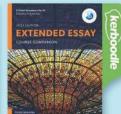

### **DP Psychology**

These comprehensive resources offer thorough coverage of all Standard and Higher Level content, as well as assessment preparation support.

- Develops enquiring and independent learners using structured opportunities for critical thinking and concept-based learning
- Brings theory to life with engaging activities, in-depth discussion points and diverse research
- Introduces a new 'Chat with Al' feature, to teach the principles of using generative Al in a way that deepens knowledge and learning

### **DP Extended Essay**

These essential resources provide learners with a step-by-step pathway to maximize achievement.

- Equips learners to fully understand and address each requirement, with a comprehensive outline of the assessment criteria
- Provides expanded subject-specific guidance and increased interdisciplinary support
- Builds the skills central to performance in the Extended Essay, with techniques and strategies that support success

All 2025 editions now published and available as Kerboodle courses with digital resources

Teacher Book and Student Workbook also available

IBDP Language B Teacher Toolkit (Version 2.1)

ISBN: 9781957136912 \$99.00

**Publisher: SELTrove** 

The language B Standard Level (SL) and language B Higher Level (HL) courses are language acquisition courses for students with some previous experience of the target language.

The distinction between language B SL and HL can been seen in the number of recommended teaching hours, the level of competency the student is expected to develop in receptive, productive and interactive skills, and that HL students are required to study two literary works originally written in the target language.

Students develop the ability to communicate in the target language through the study of language, themes and texts. In doing so, they also develop conceptual understandings of how language works. Communication is evidenced through receptive, productive and interactive skills across a range of contexts and purposes that are appropriate to the level of the course (and beyond those for language ab initio).

The language B syllabus is organized into five prescribed themes: identities, experiences, human ingenuity, social organization and sharing the planet. Optional recommended topics and possible questions for each theme are presented in the guide, but are not prescribed.

#### Key features of the curriculum and assessment models:

- Available at standard (SL) and higher level (HL)
- The recommended teaching time to complete the course is 150 hours for SL and 240 hours for HL
- Knowledge of vocabulary and grammar (the what of language) is reinforced and extended by understanding audience, context, purpose, meaning and variation (the why and how of language)
- The development of international-mindedness is one of the key aims of the course
- Students are exposed to a variety of authentic text types in relation to the prescribed themes and related course content
- Students describe situations, narrate events, make comparisons, explain problems, and state and support their personal opinions on a variety of topics relating to course content
- Students produce a wide variety of oral and written texts for audiences, contexts and purposes associated with academic and personal interests
- At HL, students are required to study two literary works originally written in the target language, and are expected to extend the range and complexity of the language they use and understand in order to communicate
- Students are assessed both externally and internally

## Italian B & German B

A-Z for Italian AB Inito / Italian B

ISBN: 9781739467005 \$33.00

**Publisher: Elemi Publishing** 

Part of an A-Z for IB Diploma series to provide students with carefully curated vocabulary and phrases in topic-by-topic lists. A-Z for Italian supports both IB Diploma AB and B levels, with vocabulary and language labelled by level. Offers learners help with:

learning and engaging with relevant vocabulary and language in topic-by-topic lists

developing writing in a variety of text types

supporting speaking skills, particularly oral presentations and discussions as part of the internal assessment

#### Contents:

Essential vocabulary and key phrases organized in topics to reflect the five prescribed themes of the IB Diploma Identities

Experiences

Human ingenuity

Social organization

Sharing the planet

Useful words

including greetings; figures and numbers; expressions of time; expressions of quantity; place indicators; colours, patterns, shapes, materials; and parts of the body

valuable tips for the oral exam

essential guidance for the written exam

Vocabulary and phrases labelled at Italian AB and/or Italian B level – allows Italian B learners to revise/refresh more basic vocabulary whilst also challenging their language knowledge at a more advanced level.

Provides a useful reference to help students express their own ideas and opinions in written and spoken Italian.

Offers a range of appropriate vocabulary and key phrases to develop students' interactive skills and help them maintain a conversation.

Suitable for both HL and SL students, with more complex language clearly highlighted as appropriate for HL.

A-Z for German B: Essential vocabulary organized by topic for IB Diploma

ISBN: 9781916413153 \$33.00

**Publisher: Elemi Publishing** 

Part of the A-Z series from Elemi which aims to support students throughout their IB Diploma studies, this A-Z for German B provides a glossary of German-English vocabulary: Essential vocabulary and key phrases organized in topics to reflect the five conceptual themes of IB Diploma German B. Entirely focused on the needs of the IB Diploma curriculum, students learn and engage with current topical vocabulary across a variety of text types.

Provides a useful reference to help students express their own ideas and opinions in written and spoken German. Offers a range of appropriate vocabulary and key phrases to develop students' interactive skills and help them maintain a conversation. Suitable for both HL and SL studies.

This popular book specifically offers help with: learning and engaging with appropriate and varied vocabulary in topic-by-topic lists developing extended writing in a variety of text types supporting speaking skills, particularly oral presentations and discussions as part of the internal assessment.

Transform Your IBDP Literature Lessons with Ready-to-Use Teacher Resource Packs

Our Teacher Resource Packs are thoughtfully designed to support the IBDP Literature curriculum, giving you the tools to deliver meaningful, engaging, and impactful lessons while saving valuable preparation time. What's Included?

Our resource packs include a wide array of materials tailored to support every aspect of the curriculum:

#### **Teacher PowerPoint Presentations**

- Lit: Communication in Literature
- Lit: Creativity in Literature
- Lit: Culture in Literature
- Lit: Identity in Literature
- Lit: Perspectives in Literature
- Lit: Representation in LiteratureLit: Transformation in Literature

# **Edspry Learning**

Teachers are the cornerstone of education, irreplaceable in their role to inspire and guide. Edspry resources complement this by providing tools that enrich instruction and save time, allowing teachers to focus on what they do best—engaging and educating students to their fullest potential.

#### **Edspry Accelerate:**

Edspry Learning is an educational platform dedicated to enhancing teaching and learning experiences through high-quality digital resources. Their offerings are meticulously designed to align with rigorous standards of curricula such as the International Baccalaureate (IB) and Cambridge International Examinations (CIE). These resources cater to various educational levels, including the IB Diploma Programme (IBDP) and Middle Years Programme (MYP), covering a broad spectrum of subjects.

#### **Key Features of Edspry Learning:**

- Curriculum-Aligned Resources: Edspry ensures all content adheres strictly to curriculum guidelines and standards, providing a cohesive and high-quality learning experience.
- **Just-in-Time Publishing:** The platform swiftly updates its digital resources to reflect real-world events, ensuring students have access to the most current and relevant information.
- Multilingual Support: Recognizing the global nature of education, Edspry offers resources in multiple languages, including Spanish, Italian, and English, fostering an inclusive learning environment.

#### Subject-Specific Resources:

Edspry provides tailored resources for various IBDP subjects, each designed to enhance classroom experiences:

- Language & Literature: Comprehensive materials that promote critical thinking and ethical awareness, aligning with IB's core principles.
- · Literature: Resources focused on facilitating engaging and effective teaching, emphasizing inquiry and knowledge.
- Global Politics: Materials that help students navigate and analyze the complexities of global political landscapes.
- Environmental Systems and Societies (ESS): Resources designed to deepen understanding of environmental systems, promoting critical thinking and global awareness.
- Sports, Exercise, and Health Science (SEHS): Comprehensive materials that prepare students to understand and analyze the complexities of sports science.
- Business Management: Resources that include activities and case studies to enhance understanding of business concepts.

Edspry's commitment to leveraging technology in education aims to make learning effective, engaging, equitable, and accessible to all.

Discover an engaging, inquiry-led approach to MYP Mathematics with this student-focused series, fully aligned with the 2020 IB Guide.

#### **Key Features:**

- Interactive Learning: Explore concepts with worked examples, reflections, and "check your knowledge" questions.
- IB Curriculum Aligned: Clear links to key concepts, global contexts, and inquiry questions in every chapter.
- Build ATL Skills: Develop critical thinking and research skills with integrated Approaches to Learning (ATL).
- Hands-On Investigations: Foster curiosity and understanding through research-based activities.
- Expert Team: Written by experienced international educators, led by Series Editor Ibrahim Wazir.

This series offers everything students and teachers need for a dynamic, concept-driven MYP Mathematics experience. Perfect for enhancing learning and achieving success in the IB framework!

MYP Mathematics: Build Understanding and Prepare for IB Success This inquiry-based series helps students master MYP Mathematics while fostering critical thinking and conceptual connections, fully aligned with the MYP Next Chapter curriculum.

Key Features:

- Comprehensive Coverage: Fully supports the Revised MYP framework and progression into the IB Diploma.
- Flexible Learning Options: Teach by mathematical units or key concepts to suit your classroom.
- Critical Thinking Focus: Explore key and related concepts with factual, conceptual, and debatable questions.
- Practical Skill Building: Extensive practice equips students to confidently apply mathematical skills.
- eAssessment Ready: Fully prepares learners for MYP eAssessment success.
- Cross-Platform Access: Includes a print and online course book, compatible with all devices.
- Quick Setup: First login made easy with a printed access card sent directly to you.

Perfect for fostering deeper understanding and equipping students with the skills to excel in both MYP and the IB Diploma Programme!

Design for the IB MYP 1-3 by Concept

As part of the Middle Years Programme (MYP), design challenges all students to:

- apply practical and creative thinking skills to solve design problems
- explore the role of design in both historical and contemporary contexts
- · consider their responsibilities when making design decisions and taking action.

MYP design focuses a holistic design process rather than final products and solutions. What is the significance of design in the MYP?

MYP uses the design cycle as a way to structure:

- inquiry and analysis of design problems
- development and creation of feasible solutions
- · testing and evaluation of students' models, prototypes, products or systems.

How is design structured in the MYP?

Design courses can be offered as:

- a distinct digital and/or product design course
- a series of distinct digital and/or product design courses
- a single course which combines digital and product design.

MYP Language and Literature: Concept-Driven Learning for Global Thinkers

This series offers a dynamic MYP Language and Literature approach, combining conceptual exploration with assessment preparation to enhance learning.

Kev Features

- Inquiry-Based Learning: Chapters begin with statements of inquiry framed by key and related concepts in global contexts.
- Assessment Support: Expert-designed tasks prepare students for all aspects of MYP assessment.
- Extended Learning: Research projects and interdisciplinary opportunities challenge and enrich understanding.
- Global Perspective: Meaningful application of global contexts fosters an internationally minded approach to Language and Literature.

Engage students with lessons that connect Language and Literature to global themes while building skills for MYP success!

The study of additional languages in the Middle Years Programme (MYP) provides students with the opportunity to develop insights into the features, processes and craft of language and the concept of culture, and to realize that there are diverse ways of living, viewing and behaving in

MYP language acquisition is a compulsory component of the MYP in every year of the programme. Schools must provide sustained language learning in at least two languages for each year of the MYP.

Language and identity

Learning to communicate in a variety of ways is fundamental to students' identity affirmation.

What is the significance of language acquisition in the MYP?

The ability to communicate in a variety of modes, in more than one language, is essential to the concept of an international education. The language acquisition course provides a linguistic and academic challenge for students in order to facilitate the best possible educational

Students are given the opportunity to develop their language skills to their full potential, as well as the possibility of progressing through various phases over the course of the MYP.

## **PYP Series**

#### Write-on Workbooks and Textbook specifically written for students in the PYP Programme

Content is presented in a clear, age-appropriate style appealing to students, and aids in longterm skill development.

All titles come with interactive digital features

#### Teacher Resources also available!

Teacher Resouces complement the use of our PYP series in classrooms, containing comprehensive teaching notes, additional content, answers, and tailored PYP support to accompany the student books.

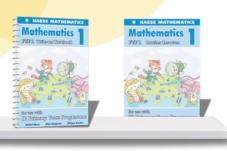

#### **PYP Math**

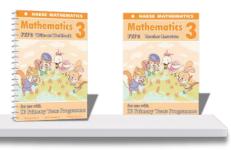

Our PYP series has been specifically written for students in the PYP Programme, based on the PYP Mathematics Scope and Sequence developed by the IB. The Write-On Workbooks for PYP 1 to 4 provide an engaging, comprehensive, and international approach. PYP 5/ MYP 0 has been written as a textbook to acknowledge student abilities and transition toward MYP Mathematics. All of the content is presented in a clear, age-appropriate style appealing to students, and aids in long-term mathematics skill development.

The Wellbeing and Mindfulness Student Journals support students' mental, emotional, social, and physical health through weekly themes that build personal and academic skills. These age-appropriate workbooks provide meaningful lessons and activities to foster lifelong wellbeing.

#### Features:

- · Weekly Themes: Structured lessons and activities tied to six key elements of wellbeing: Strengths and Emotions, Positive Engagement, Relationships and Optimism, Skills and Achievement, Exercise and Vitality, and Meaning and Purpose.
- Resilience Builders: Teamwork and resiliency activities.
- Mindfulness Practices: Relaxation exercises and mindful coloring for focus and calm.
- Reflections: Weekly journaling prompts to track progress and growth.
- Free Teacher Manual: Guides for incorporating wellbeing into the classroom. Benefits for Students:
- Build a positive mindset and manage emotions effectively.
- Strengthen social connections and develop resilience.
- · Practice mindfulness to reduce stress and improve focus.

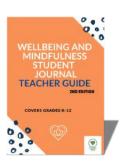

#### Benefits for Teachers:

- Foster an inclusive, supportive classroom.
- Access ready-to-use wellbeing lessons and focus strategies.
- Promote team-building and conflict resolution.

#### Benefits for Families:

- Engage in activities that support wellbeing at home.
- Encourage emotional and social growth in children.
- Create a positive, mindful home environment.

These journals empower students to thrive, while supporting teachers and families in fostering a culture of wellbeing.
