WELCOME to your catalog.

This season, we've had you at the top of our minds: home growers. We see you - we know that it takes much more time, care, and labor to grow those tomatoes, rather than scooping up a bag at the store. Harvesting them yourself means more to you. Regardless of whether you grow those cucumbers to make your own perfect pickles purely for the bragging rights, or whether you sprout your own greens because it just costs so much less than buying them from the market, we want you to know that we've dropped our prices across the board to make those efforts more economically sound for you.

At Harris Seeds, we stand behind our home growers and we want them to have the highest caliber seeds and supplies for their pursuits. We pride ourselves on providing the exact same high-quality, high-germination seed to home growers like you that we provide to professional farmers and growing operations - and now, at much more affordable prices.

You'll see throughout the 2025 Catalog that we've dedicated space to you. Last spring, when we decided to host the Summer 2024 Photo Contest, we didn't realize what we were getting into. Then, the photos started flooding in. Being offered a glimpse into your backyards, fields, gardens, farm stands, and homes through your photos and personal stories was immeasurably rewarding. So, we wanted to share some of those photos with you here. Turning the pages, you'll find photo entries from fellow growers across the nation - and don't miss out on seeing the winners on the final page.

This is your catalog. Enjoy. Thank you for choosing us for your home growing seeds and supplies, and for trusting your harvest with Harris Seeds.

BEANS

Growing Tips: Beans prefer a well-drained, fertile soil and a pH of 6.0 to 6.8. Because the seed is sensitive to cold temperatures, the soil should be at least 70°F for snap beans and 75°F for limas. Plant at a 1" depth, allowing 3-4" between plants and approximately 24" between rows. Most bean varieties germinate in 6-10 days under favorable conditions. Snap beans mature within 2 months from seeding, so successive plantings every third week can produce a constant supply all season.

LIMA BEANS

Eastland *Baby lima bean*

70 Days. Tall upright bush plants bear gray-green 3" pods filled with dime-sized greenish-white flat beans. This heavy yielder of high quality baby limas is one of the best small lima varieties available.

00021 Treated seed: 1100 sds \$7.25; ½ lb \$10.30.

Fordhook 242

74 Days. The large vigorous plants bear heavily from mid-season until frost. The pods are 3½-4" long, uniform and well-filled, and they shell out plump thick beans of the finest quality.

00026 Treated seed: 100 sds \$12.95; ½ lb \$11.39.

POLE BEANS

Kentucky Blue

63 Days. The large, straight, round 6-7" pods are of excellent quality and are produced on vigorous 6-8' vines. White seed. (P.V.P.)

00035 Cruiser Treated seed: 100 sds \$8.30;

½ lb \$25.19.

Seychelles

55 Days. A versatile AAS winning bean that offers stringless dark green 6" pods, with a continuous set of 6 uniform pods per node. Train 7-9' climbing plants to a trellis for best results.

12821 Cruiser Treated seed: 100 sds \$4.49.

12821 Organic seed: 50 sds \$3.45; 100 sds \$4.95.

BUSH BEANS

Bush Blue Lake 274

58 Days. Developed from the famous vining Blue Lake, this easier to pick version produces over a longer season than other bush beans and brings back the meatiness, color and flavor of the "good old days." The 6" long pods are dark green and smooth. Note: Bush Blue Lake 274 was developed from a vining bean and may produce runners under certain conditions.

00018 Treated seed: 100 sds \$4.25; ½ lb \$10.08.

00018 Untreated seed: 100 sds \$4.25; ½ lb \$10.08.

Caprice

56 Days. Caprice has straight smooth pods that have slow seed development and high eating quality. Its upright plants set their 5½" pods mid-high in the plant, which makes harvest easy. Caprice yields well under disease pressure and has good heat tolerance and holding ability. U.S. Patent 6,835,876.

00009 Cruiser Treated seed: 100 sds \$4.30.

CELINE ORGANIC

GOLD RUSH ORGANIC

LEWIS

CROCKETT

IMPROVED PURPLE QUEEN

MASCOTTE

Celine Organic ● *Purple wax bush bean*

58 Days. The first purple wax bean on the market, Celine has a bright magenta color, pale yellow interior, and sweet refined pods. The slender pods develop early and in high numbers. Pick these petite filet beans at 4½-5" long for best quality.

13126 Organic seed: 100 sds \$4.95.

Crockett ● *French filet bush bean*

58 Days. Filet types are known for their preferred eating quality at finer restaurants. Its slim tender flavorful pods will be favorites on your table too. Crockett yields over an extended season. U.S. Patent 7,439,423.

11021 Cruiser Treated seed: 100 sds \$4.70.

11021 Untreated seed: 100 sds \$4.70.

Gold Rush Organic ●

55 Days. This reliable variety offers a strong concentrated set of lemon-yellow beans that are easy to pick. The straight tender pods have crisp texture and nice flavor, and the plants carry strong disease resistance.

12761 Organic seed: 50 sds \$3.49;

100 sds \$4.89.

Improved Purple Queen ●

52 Days. A productive dark purple bean that is easy to pick, has disease resistance and tolerates cool weather conditions early in the growing season. The eye-catching 3-sieve pods measure 5½-6" long and have excellent flavor. The color fades to dark green when cooked.

13584 Treated seed: 100 sds \$3.25.

Lewis

53 Days. The upright plants of Lewis produce 5½" long, straight, dark green pods with excellent eating quality and flavor. High yields and high disease resistance make Lewis a reliable choice. U.S. Patent 8,058,521.

11016 Cruiser Treated seed: 100 sds \$4.42.

11016 Untreated seed: 100 sds \$4.42.

Mascotte ●

50 Days. This AAS Winner is ideal to grow in containers or window boxes. Dwarf upright plants grow 16-18" tall and offer a continuous yield of medium green colored beans.

11271 Untreated seed: 100 sds \$6.49.

Provider

50 Days. The tender pods are straight and smooth, round and approximately 5" long. The plant is vigorous and very productive, with heavy yields. Strong rooted plants have good disease resistance.

00060 Treated seed: 100 sds \$3.95; ½ lb \$9.64.

Roma II *Romano bush bean*

59 Days. Romano bush bean that is slow to develop seed, allowing for an extended harvest window of its high quality beans. Its wide, smooth, flat pods measure 5½" and have reduced fiber, which enhances eating quality.

11011 Cruiser Treated seed: 100 sds \$7.01;

½ lb \$9.51.

11011 Untreated seed: 100 sds \$7.01; ½ lb \$9.51.

BORO F1

CHIOGGIA GUARDSMARK ORGANIC

DETROIT DARK RED

GOLDEN BOY

BEETS

Growing Tips: Succession sowings will provide continuous harvests of delicious beets. Sow at approximately 1/2" depth when soil temperatures range from 60-85°F. Even moisture is critical for successful germination and growth. Choose a location with well-drained soil, and do not over water or allow soil to dry out. Germination requires 7-18 days, after which seedlings should be thinned to allow for 2-3" of space between each plant.

Avalanche

50 Days. These snow white roots have the sweetness of ordinary red beets, without the earthy bitterness. The 3" diameter roots are sized nicely for slicing or roasting, and can be grated into salads.
12180 Treated seed: 250 sds \$3.25.

Boro F1

50 Days. This flavorful beet was bred with quality of taste in mind. Harvest the roots as baby beets or when they have a diameter of 3-4". Leaves can also be harvested as baby greens.
12531 Untreated seed: 50 sds \$2.55;
250 sds \$3.66.
12531 Organic seed: 50 sds \$3.25.

Chioggia Guardsmark Organic

60 Days. These "candy cane" beets are favored for their distinctive pink and white candy striped interior color that is outstanding when served fresh, but tends to fade when cooked. The consistently round, slightly flattened roots have firm sweet mild flavored flesh. The bright green tops are well attached.
11164 Organic seed: 250 sds \$1.95.

Detroit Dark Red

63 Days. The globe-shaped roots have good uniformity and solid deep red flesh. The sweet rich flavor can be enjoyed throughout the season by making successive sowings. 2,000 sds/oz.
11209 Treated seed: 250 sds \$1.95; 1 oz \$3.15;
1/4 lb \$4.67.
11209 Untreated seed: 250 sds \$1.95; 1 oz \$3.15;
1/4 lb \$4.67.

Golden Boy

85 Days. A striking golden beet with uniform globe-shaped roots, bright yellow color, and high sugar content. Golden Boy performs well under disease and drought pressures and is slow to bolt.
13260 Treated seed: 250 sds \$2.15.

Red Atlas F1

55 Days. This high-yielding beet produces uniform globe-shaped roots with dark red color and low zoning. Red Atlas has high-quality roots with high sugar content. The upright bright green plants are 14-15" tall and are slow to bolt.
13169 Treated seed: 250 sds \$2.25.

Touchstone Gold

55 Days. A beet root with a vibrant orange-red exterior and rich gold interior. Striking green leaves contrast gold petioles and roots have a sweet mild flavor.
11213 Treated seed: 250 sds \$4.49.
11213 Untreated seed: 250 sds \$4.49.
11213 Organic seed: 250 sds \$5.49.

ASPAOC F1

ASTEROID F1

BELSTAR F1 ORGANIC

BROCCOLI

Brassica Growing Tips: Members of the Brassica family, (Broccoli, Brussels Sprouts, Cabbage, Cauliflower, and Kohlrabi), will tolerate cooler growing seasons, so extend your harvests by planting from early spring through late summer. Seeds can be direct seeded but are more commonly started indoors and then transplanted into the garden. Sow at a depth of ¼-½" at a soil temperature of 65-75°F indoors. Even soil moisture is critical for successful germination and growth, do not overwater or allow to dry out. Seeds will germinate in 6-10 days. Make sure seedlings get plenty of direct sunlight, or use supplemental lighting to encourage healthy transplants. Transplants will be ready to plant in the garden in approx. 4 weeks. Plant transplants 14-18" apart.

Aspacroc F1

55 Days. Known as Broccolini® in the produce section of your grocery store and on restaurant menus, Aspacroc resembles a broccoli raab with an asparagus stem, and offers a mild, spicy taste.

11298 Untreated seed: 50 sds \$2.15; 250 sds \$9.24.

Asteroid F1

77 Days. Dark green heads are high quality with a smooth dome and medium small bead. Healthy, upright plants are easy to harvest—a perfect addition to home gardens.

11726 Treated seed: 50 sds \$1.95.

Belstar F1 Organic

66 Days. This widely adapted variety grows well under many different regional growing conditions. After the main head is harvested, smaller side-shoots will be produced. Harvest these medium-sized florets for an extended season. With strong disease resistance, Belstar is a sure performer.

12532 Organic seed: 50 sds \$4.50; 250 sds \$9.72.

Green Magic F1

75 Days. A widely adapted broccoli that performs best in late summer and fall plantings. Plants have semi-domed, tight heads with small to medium bead size and a good plant habit. U.S. Patent 5,945,582.

11408 Treated seed: 50 sds \$3.50.

Luna F1

72 Days. This high quality dark blue-green broccoli produces uniform heads with medium-to-small bead size. Luna produces side shoots after the main head is harvested, and performs best in early spring or late summer plantings.

11725 Treated seed: 50 sds \$5.39.

11725 Untreated seed: 50 sds \$5.39.

Purple Magic F1

80 Days. This gorgeous AAS-winning variety has a fully purple head and stem, which boosts its nutritional value. The large domed heads have excellent tenderness and sweet broccoli flavor. Plants are medium-large, upright, and perform well in cooler seasons.

66544 Treated seed: 50 sds \$4.95.

CABBAGE

Bravo F1 ●

85 Days. Bravo cabbage, a rugged hybrid, has performed well from the Deep South in winter to the North in summer. The large, round cabbage heads are uniform and a beautiful blue-green color. Use close spacing (10-12") for smaller heads and wide spacing (18-24") for larger heads for sauerkraut.

00247 Treated seed: 50 sds \$4.49.

00247 Untreated seed: 50 sds \$4.49.

Bronco F1 Organic ●

78 Days. A main-season variety with high yields and high-quality 6-7" heads with a short core, sweet and crunchy texture, and tolerance to tip burn. The firm blue-green heads are tightly wrapped and a consistent 3-5 lb. size. Expect high-quality heads with a short core, sweet and crunchy texture, and tolerance to tip burn.

13356 Organic seed: 50 sds \$2.19.

Buscaro F1 Organic ●

95 Days. This large 4-5 lb. cabbage is ideal for processing coleslaw. The crisp heads offer a vibrant red and white coloring with a short core.

12535 Organic seed: 50 sds \$5.60; 250 sds \$18.92.

Integro F1 Organic ●

75 Days. Very uniform 3-4 lb. heads are produced on a small-framed plant with short cores. Large, sweet, tender leaves fresh right out of the garden with good short-term storage.

12368 Organic seed: 50 sds \$4.95; 250 sds \$13.95.

Red Jewel F1

75 Days. With a beautiful deep purple-red color, dense head, and short core, Red Jewel is ideal for both fresh and shredder uses. The uniform round 3-5 lb. heads tolerate tip burn and mature early and uniformly for an easier harvest. Red Jewel shines with excellent wrapper leaves and striking internal color.

12995 Treated seed: 50 sds \$4.25.

Serpentine F1

110 Days. An early-maturing green savoy cabbage for summer and early fall growing. The medium-to-large, flat-round heads weigh 3-4 lbs. with good density and leaf cover for reduced tipburn.

13416 Treated seed: 50 sds \$5.99.

SuperStar F1

90 Days. A high quality, fresh market cabbage for mid-season, SuperStar has medium-large 3 lb. green heads with excellent wrapper leaves, with holding ability in the field and post-harvest. The thick leaves are flavorful and well suited to eating fresh or within a recipe.

12993 Treated seed: 50 sds \$3.95.

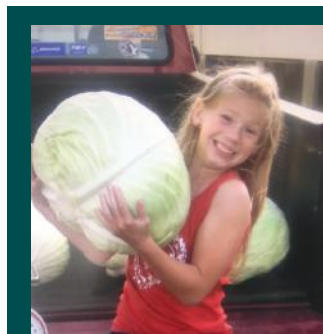

Taurus F1

105 Days. A high-yielding dual-purpose variety suited to both fresh use and processing for coleslaw, Taurus has a round to flat-round shape and blue-green color. Heads reach weights of 6-12 lbs. depending on spacing.

13244 Treated seed: 50 sds \$5.95.

CARROTS

Rich in calcium, vitamin A, and fiber, carrots are very easy to grow. Nantes carrots are slender in shape with rounded tips, or stump roots. Chantenay carrots are broad at the top with a tapering shape and rounded tip.

Photo by
Jessica McCollum,
Sellersburg Indiana,

CLOCKWISE FROM LEFT: DEEP PURPLE F₁ / FUERTE F₁ / YAYA F₁ ORGANIC / GOLDFINGER F₁ / MOONRAKER F₁
WHITE SATIN F₁ / YELLOW STONE ORGANIC

A Deep Purple F₁

72 Days. These dark purple carrots have a tapered shape and deep color through to the core. The sweet roots reach 7-8" in length and are excellent for fresh eating. Deep Purple has tall strong healthy tops and good disease resistance.

12936 Treated seed: 250 sds \$3.77.

12936 Untreated seed: 250 sds \$3.77.

B Fuerte F₁

70 Days. This excellent Nantes carrot is known for its nice uniform shape with strong tops and good flavor. Fuerte offers high yields of medium-orange blunt-tipped cylindrical roots with some shoulder.

12723 Untreated seed: 50 sds \$3.25.

C Goldfinger F₁

69 Days. Goldfinger is a beautiful Nantes type carrot that produces high quality roots. Its dark orange exterior color and smooth appearance has real eye-appeal, and its eating quality is superb. Harvest early for baby carrots.

11909 Treated seed: 50 sds \$2.54; 250 sds \$3.76.

11909 Untreated seed: 50 sds \$2.54; 250 sds \$3.76.

D Moonraker F₁

70 Days. A Chantenay type with high yield potential for 8-9" conical roots that resist splitting. Both exterior and interior are uniformly dark orange, and are complimented by strong dark green tops.

12861 Treated seed: 250 sds \$1.15.

E White Satin F₁

68 Days. This Imperator x Nantes hybrid produces sweet 8-9" long cylindrical roots with high quality. The bright white roots complement other colored carrots beautifully, and the plants have excellent disease resistance and tall tops for easy harvest.

12540 Organic seed: 250 sds \$2.92.

F Yaya F₁ Organic

60 Days. This variety sets the standard for uniformity for Nantes type carrots, making it ideal for full size or baby carrots. The 7" cylindrical, blunt roots are a brilliant deep orange and have strong resistance to many root and foliar diseases.

12370 Organic seed: 250 sds \$3.94.

G Yellow Stone Organic

70 Days. This versatile variety can be used fresh, cooked, or stored. Averaging 9" long, the bright yellow roots are very sweet and crisp. The plants have strong tops that make it easy to harvest.

12539 Organic seed: 250 sds \$3.26.

FLAMENCO F1

SNOW CROWN F1

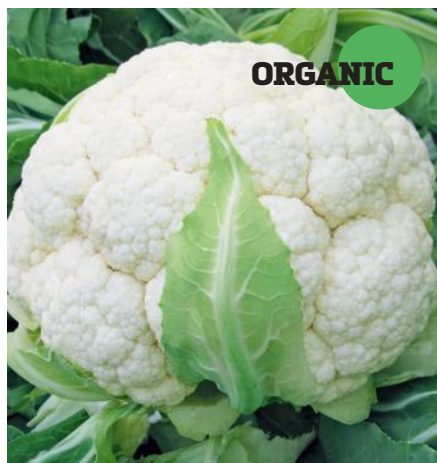

VERONICA F1 ORGANIC

FLAME STAR F1

GRAFFITI F1

SKYWALKER F1 ORGANIC

CAULIFLOWER

Cauliflower produces best when it matures during cool weather and is grown with plenty of moisture. To keep white heads bright, gather the outer leaves over the head and secure with twine or rubber bands when heads reach golf ball size. Check regularly to harvest at peak maturity. Oppositely, colored varieties will mature better when they are exposed to sunlight, so do not wrap these heads. **For more cauliflower growing tips, see broccoli growing tips on page 7.**

Flamenco F1

72 Days. Exceptional flavor and quality make Flamenco a great choice for fresh eating. The high, bright white, domed heads have dense curds and good cover.

12604 Treated seed: 50 sds \$5.78; 500 sds \$39.80.

12604 Untreated seed: 50 sds \$5.78; 500 sds \$39.80.

Flame Star F1

80 Days. Medium plants produce heavy heads of smooth dense high quality curds with pale orange color. Good tolerance to heat and stress.

12764 Treated seed: 50 sds \$17.55.

Graffiti F1

85 Days. The heads do not require tying, and the deep purple color will be the highlight of salads and relish trays. Works best for fall planting but can also be grown in spring. Purple color will fade with cooking.

00346 Treated seed: 50 sds \$20.01.

Skywalker F1 Organic

80 Days. Heavy heads with self-wrapping leaves make this an easy variety to grow. Uniform milky white curds are tight and high quality for fresh eating and cooking.

12541 Organic seed: 50 sds \$7.20; 250 sds \$17.95.

Snow Crown F1

50 Days. For early harvest and excellent quality, choose Snow Crown. Solid round snow white heads have a tight curd and 7-8" diameter.

00345 Treated seed: 50 sds \$5.30.

Veronica F1 Organic

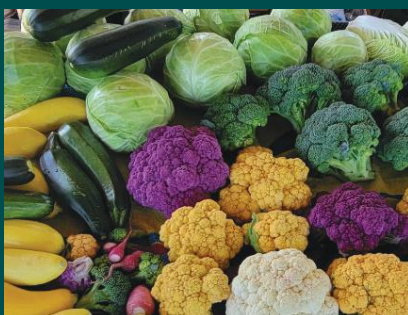

77 Days. This green Romanesco has spectacular aesthetics and earthy flavors when eaten fresh. It becomes sweeter after cooking and holds its color and structure.

12542 Organic seed: 50 sds \$10.45;

250 sds \$29.95.

SILVER QUEEN F₁

SILVER KING F₁

**XTRA-TENDER NATURAL
BRIGHT XR F₁ ORGANIC**

SWEET CORN

Growing Tips: Plant sweet corn at a depth of 1" in fertile soil with a minimum soil temperature of 65°F. Space plants at 8" within the row and 24-36" between rows. Plant varieties in blocks of at least 4-5 rows for proper wind pollination. Even soil moisture is critical for successful germination and growth, do not overwater or allow to dry out. Crop protectants, like Thuricide, may be used for worm control.

We offer 4 basic types of sweet corn:

Standard (su): Heirloom - lower sugar

Sugary Enhanced (se): More tender; medium sugar

Synergistic (sy): Tender; medium-to-high sugar

Supersweets (sh): High-to-extra-high sugar

Su, se, and sy types may be grown together but supersweets require isolation from these types. Isolate white varieties from yellow and bicolor varieties to maintain pure white color. Approximately 2,500-4,200 seeds/lb.

CORONADO F₁

WHITE CORN

STANDARD SUGARY WHITE

Silver Queen F₁

88 Days. (su) Late maturing ears are large and well-filled with glossy white kernels. Beautiful ears have tight dark green husks and creamy kernel quality. Wait until the soil has warmed to above 65°F before planting.

00134 Cruiser Treated seed: 250 sds \$8.25;
½ lb \$17.09.

00134 Untreated seed: 250 sds \$8.25;
½ lb \$17.09.

SUGARY ENHANCED WHITE

Silver King F₁ ●

82 Days. (se) Silver King matures earlier than Silver Queen and has improved eating quality. Easy-to-pick 8" ears are produced on plants with good disease protection.

01172 Cruiser Treated seed: 250 sds \$7.45;
½ lb \$18.48.

SUPERSWEET WHITE

Isolation recommended to ensure quality.

Xtra-Tender™ Natural Bright XR F₁ Organic ●

74 Days. (sh) As a sister line of bicolor Natural Sweet XR F₁, this exceptional white supersweet variety is one of few available organically. Expect excellent seedling vigor, plant strength, and top eating quality. Resistance to Common Rust (RpG).

12830 Organic seed: 50 sds \$12.50;
250 sds \$20.50.

Coronado F₁ ●

78 Days. (sh) This widely adaptable variety has all of the best traits for garden growing. Strong plants produce large ears that are well protected and easy to harvest. The ears have vibrant white kernels that are tender and flavorful.

12794 Cruiser Treated seed: 250 sds \$9.00.

YELLOW CORN

SYNERGISTIC YELLOW

Inferno F₁

73 Days. (sy) Inferno produces very sweet 7½-8" ears that are packed with tender yellow kernels. Its dark husk offers good protection to the ear, and the plants have good disease protection.

12319 Cruiser Treated seed: 250 sds \$11.29.

SUPERSWEET YELLOW

Isolation recommended to ensure quality.

Candice F₁ ●

74 Days. (sh) Large ears are filled with tender glossy yellow kernels of the highest sweetness and quality. Candice truly performs with excellent yield potential, husk protection, and flavor.

12327 Cruiser Treated seed: 250 sds \$9.00.
12327 Untreated seed: 250 sds \$9.00.

Summer Celebration F₁ ●

74 Days. (sh) The 7½" ears have bright yellow kernels, excellent supersweet eating quality, extended field holding ability, and an attractive husk package. Tall plants stand strong against lodging and have good disease protection.

13074 Cruiser Treated seed: 250 sds \$6.50.

SUGARY ENHANCED BICOLOR

Delectable R/M F₁

84 Days. (se) The 8½"-9" ears of this variety have strong kernel fill, a wonderful tenderness and taste, and are tightly wrapped with a dark green husk. Strong plants offer a great disease package.

01135 Cruiser Treated seed: 250 sds \$5.95;
½ lb \$20.83.

SYNERGISTIC BICOLOR

Allure F₁ ●

75 Days. (sy) Allure's large 8" ears are filled well to the tip with shiny yellow and white kernels. The ears are covered tightly with dark green husks, protecting the tender sweet kernels. Strong plants have a good disease package and offer high yields.

11225 Cruiser Treated seed: 250 sds \$12.00.

11225 Organic seed: 250 sds \$14.00.

Montauk F₁ ●

79 Days. (sy) Montauk produces large 8" ears that have an eating quality second to none. Highly recommended for its high yields, beautiful kernel color, and good husk protection.

01108 Cruiser Treated seed: 250 sds \$10.53.

01108 Untreated seed: 250 sds \$10.53.

SUPERSWEET BICOLOR

Isolation recommended to ensure quality.

Raquel F₁ ●

72 Days. (sh) This bicolor supersweet has excellent yield potential and holding ability. The large ears fill well to the tip with sweet and flavorful kernels, protected by a tight, deep green husk.

12321 Cruiser Treated seed: 250 sds \$10.50.

Rosie F₁ ●

74 Days. (sh) This mid-season bicolor has superior eating quality and holding ability. The large ears have glossy bright kernels and a tight, dark green husk that covers the ear well.

12322 Cruiser Treated seed: 250 sds \$10.00.

12322 Untreated seed: 250 sds \$10.00.

Xtra-Tender™ Natural Sweet XR F₁ Organic ●

74 Days. (sh) The excellent eating quality and flavor of this variety will have your family and friends asking for it by name! A great choice for its tender sweet kernels and strong productive plants.

12717 Organic seed: 50 sds \$11.95;

250 sds \$19.50.

Honey 'N Pearl F₁ ●

75 Days. (sh) One of the first supersweet varieties developed, Honey 'N Pearl has sweet, tender bicolor kernels. A classic - and a long-time favorite for gardeners. For best germination and seedling performance, plant in warm soil.

11101 Cruiser Treated seed: 250 sds \$9.95.

EARTH TONES DENT

GLASS GEM ORGANIC

STRAWBERRY DE-LITE

FIRECRACKER

MINIATURE BLUE

ORNAMENTAL CORN

Earth Tones Dent

90 Days. Earth Tones Dent is an exciting reselection from an heirloom, dent flour corn. The 8 to 10" ears display beautiful, muted earth tones of gold, bronze, mauve-pink, green, brown and blue. The attractive ears can be used for fall decoration, ground to use for flour or used for bird or animal feed.

01118 Untreated seed: 100 sds \$4.25; ½ lb \$14.83.

Firecracker

95 Days. Produces high yields of 5" multicolored ears, great as an ornamental and for popping. Red stalks reach 7½ feet. When popped, Firecracker produces a small white flake.

12627 Treated seed: 100 sds \$4.50; ½ lb \$17.05.

Glass Gem Organic

100 Days. The name says it all, this variety is a gem! The iridescent shiny glass-like kernels will glisten in the fall sunshine. Sturdy plants grow 6-8' tall and produce an abundance of 7-8" long ears. The multi-colored kernels can be popped or ground into flour.

12409 Organic seed: 100 sds \$11.25; 250 sds \$14.95.

Mini Blue Popcorn

100 Days. Shiny colonial blue kernels cover the 2 to 4" ears of this unique variety. Plants produce several uniform ears that are ideal for ornamental and craft use. A real must for those growing ornamentals.

01146 Untreated seed: 100 sds \$4.75; 1 oz \$13.73; ¼ lb \$19.98; ½ lb \$32.70.

Strawberry De-Lite

98 Days. This beautiful strawberry popcorn has longer ears than the standard, and a striking variety of colors including deep red, light pink, tan, and cream-colored kernels. The strong stalks stand well and offer outstanding yields of these attractive ears with beige husks that are occasionally streaked with red.

12847 Untreated seed: 100 sds \$4.25; ½ lb \$21.73

Wilda's Pride

110 Days. Tall sturdy plants produce 8-11" ears with kernel colors of yellow and white, deep maroon red, solid yellow, black red, and a wide assortment of multi-color combinations.

01177 Treated seed: 100 sds \$4.50; ½ lb \$11.65.

01177 Untreated seed: 100 sds \$4.50; ½ lb \$11.65.

POPCORN

Harvest Tip: Popcorn kernels will not pop unless they are completely dry. Allow ears to dry on the plant as long as possible. After harvesting, pull the husks back and hang ears in a well ventilated, dry location to cure further. This may take one to three weeks. Kernels are ready when they are easy to remove from the cob. They can then be stored or popped!

Gourmet Mushroom F1

103 Days. A superior mushroom-type variety with large kernels that pop into ball and mushroom shaped flakes, excellent for caramel and kettle corn.

12600 Treated seed: 100 sds \$7.50.

12600 Untreated seed: 100 sds \$7.50.

Top Pop F1

100 Days. These tall plants produce large ears of bright yellow kernels. When dry they will pop into large "sunburst" flakes that are tender and delicious.

01162 Treated seed: 100 sds \$6.50.

CUCUMBERS

Growing Tips: Cucumbers can be direct sown or started indoors 12-15 days before transplanting into the garden. Jiffy pots are excellent for starting cucumber seedlings (see page 90). Direct sow cucumbers at a depth of ½-1" in 70°F soil, seed will germinate after 6-10 days. Even soil moisture is critical for successful germination and growth, do not overwater or allow to dry out. Cucumbers are highly susceptible to fungal diseases, which can be managed using products like Liquid Copper (see page 96). Pick fruit regularly for a continuous yield.

Cucumber Flowering Types

Monoecious - most open pollinated varieties are this type; plants produce both male and female flowers and need to be naturally pollinated by insects to set fruit.

Gynoecious - plants produce predominately female flowers, resulting in higher yields, and should be planted near a monoecious type to provide adequate pollination for fruit set. Most gynoecious varieties are packaged with 12-15% pollinizer variety mixed in.

Parthenocarpic - plants produce seedless fruit without requiring pollination; if pollination does occur, fruit shape and eating quality may be affected.

SLICERS

Burpless 26 F₁

60 Days. Monoecious. Pick when young (not over 8-10" long) to enjoy its delicate taste and thin, tender skin.

00402 Treated seed: 50 sds \$3.95; 500 sds \$16.63.

00402 Untreated seed: 50 sds \$3.95; 500 sds \$16.63.

Diva F₁

58 Days. Parthenocarpic. Diva has a wonderful sweet and mild flavor, and its non-bitter skin requires no peeling. The vines yield plenty of bright green, slightly tapered tasty cucumbers. Diva is self-pollinating.

00444 Untreated seed: 50 sds \$6.59;

500 sds \$16.74.

Marketmore 76

68 Days. Monoecious. This variety features a deep, consistent color and a trim, uniform shape, as well as great taste.

00427 Treated seed: 50 sds \$1.95; 1 oz \$7.36;

¼ lb \$18.17.

00427 Organic seed: 50 sds \$2.50; 500 sds \$3.73.

Raider F₁

52 Days. Gynoecious. This hybrid is a high yielder of uniformly dark green cylindrical fruit. Pollinizer included.

00441 Treated seed: 50 sds \$5.89; 500 sds \$16.06.

00441 Untreated seed: 50 sds \$5.89;

500 sds \$16.06.

Sweet Slice F₁

63 Days. Monoecious. The skin is tender and free of bitterness, and plants produce excellent yields. Pick when fruit are 6-8" long for best flavor.

00438 Treated seed: 50 sds \$6.95.

00438 Untreated seed: 50 sds \$6.95.

Sweet Success F₁

54 Days. Parthenocarpic. The 12" long fruit are dark green and grow to 2¼" in diameter. Sweet Success is self-pollinating.

00448 FarMore Treated seed: 25 sds \$12.50;

100 sds \$35.95.

PICKLES

Growing Tips: Pickling cucumber varieties can be sensitive to stressful environments. Seasons with extreme weather conditions, such as droughts, may cause flowers to drop or fruit set to be slow. Encourage ideal growing conditions by providing pickling cucumber plantings with uniform watering and supplemental fertilization if needed. Encourage bees near your cucumber plantings to ensure strong fruit set; however, bee pollination of parthenocarpic (self-pollinating) varieties, such as Gherking, may cause some fruits to have a teardrop shape.

El Camino F1

60 Days. Monoecious. High-quality dark green fruit are set continuously on healthy vigorous vines. The uniform fruit are smooth with even color and nice flavor, excellent for canning. Strong disease package and good holding ability post-harvest.

13250 Treated seed: 50 sds \$5.25; 500 sds \$29.92.

Gherking F1 ●

53 Days. Parthenocarpic. Strong vines produce good yields of dark green pickles with white spines. Gherking is bitter free, perfect for pickling or eating fresh. Trellis recommended for easy harvest of high quality fruit. Gherking is self-pollinating.

12329 Untreated seed: 50 sds \$8.49; 500 sds \$42.23.

Provision F1 Organic ●

52 Days. Gynoecious. Dark green cylindrical fruit are sweet and flavorful with a nice texture suited to both fresh eating and preserving as pickle spears or slices. Manageable plants are well adapted to most climates and are resistant to disease.

13406 Organic seed: 50 sds \$14.56.

Regal F1 ●

52 Days. Gynoecious. Regal makes a great pickle with good brining quality. Fruit has white spines, is dark green and is uniformly sized with blunt ends.

00446 Treated seed: 50 sds \$6.25; 500 sds \$12.17.

00446 Untreated seed: 10 sds \$2.95; 50 sds \$6.25; 500 sds \$12.17.

CUCAMELON

Mouse Melon

65 Days. Mouse Melon, Cucamelon, Mexican Sour Gherkin - many names, one cute fruit! Large vining plants perform best when trellised and produce an abundance of small oblong green-striped fruit. This Mexico-native is crunchy, crisp and sweet, and can be used for pickles, stir-fries, salads, cocktails, and as a delicious snack!

22957 Untreated seed: 50 sds \$3.89; 500 sds \$7.70.

MICRO GREENS

Starting seeds to harvest as a micro green is an easy and efficient way to consume a power pack of nutrients! The life cycle of micro greens starts with germination when the root radicle emerges. Sprouting begins and the shoot emerges. The cotyledon stage is reached when the first set of leaves open, followed by the true-leaf stage when the first true leaves appear. Spread seeds onto a soil or hemp substrate that can be held in a tray. Avoid overwatering and promote aeration by misting the seeds. Adequate lighting is needed, and plant habit and appearance can be altered by using LED lights of varying spectra. Most typically harvest when 90% of true leaves are present (between 6-10 days) and cut plants right above the substrate.

BioStrate® 160 Felt

Moisten BioStrate® Felt with mist or a quick dip in a water bath and let excess water drain to grow micro greens. Sprinkle seeds to the desired density, then mist. BioStrate performs best when not overwatered. The amount of water will vary depending on the system used. The felt should be kept moist, not saturated. Water level should not be higher than the top of the medium. If water pools on the felt, reduce water flow. Available in 9½"W x 19½"L sheets and by the roll.

42015 BioStrate 160 Sheets 20ea. \$24.95

42014 BioStrate 160 Roll 9' x 250' \$126.25

BioStrate® Felt Kit

This lightweight, pH balanced, bio-based textile absorbs and retains water while providing an inert environment for healthy root development. Simply moisten the sheets, let excess water drain, and place into tray. Sprinkle seeds to the desired density and mist. Place dome over the tray and mist each day until greens reach desired stage. Do not let mat dry out (may require additional watering to keep moist). Each kit comes with 10 sheets of 9½"W x 19½"L BioStrate Felt, 2 trays and a dome.

42016 BioStrate® Felt Kit \$22.25

HARRIS' MICRO GREENS MIX

TerraFibre™ Hemp Grow Mats

Using the fibrous byproduct of the industrial hemp plant, TerraFibre™ grow mats are ideal for micro greens, sprouts, wheat grass, and other short rotation crops. Industrial hemp fibers are separated, cleaned, and needle punched to produce a 100% biodegradable soil-less growing medium. Hemp fibers have high water retention, keeping seeds wet through germination. Just sprinkle seeds to the desired density, then mist. Mats are pre-cut in 5" squares or the 10"W x 120"L roll allows you to cut to size to fit your needs. Mats are 100% biodegradable and fully compostable.

41827 TerraFibre 10"W x 20"L Mats 10ct. \$25.95

41828 TerraFibre 5"W x 5"L Mats 40ct. \$17.50

41829 TerraFibre 10"W x 120'L Roll \$106.50

Micro Greens Trays

These double-thick, heavy-duty trays are perfect for starting, growing, and harvesting micro greens. These shallow germination trays allow you to cut your micro greens closer to the plant base for increased yields and presentation. The shallow trays also offer better air flow around the plants, reducing the chances of fungus or disease. These trays are available with or without drainage holes. Trays measure 10"W x 20"L x 1.25"D.

41801 Drainage 5ct. \$27.95

41800 No Drainage 5ct. \$27.95

Harris' Micro Greens Mix ●

This formulated blend contains 7 different greens that offer an interesting combination of texture, flavor and color to use in your salads or sandwiches. The mix contains Swiss chard, beet greens, arugula, kale, and lettuce. 30,000 seeds/oz.

11522 Untreated seed: 250 sds \$4.25; 1 oz \$6.74;
¼ lb \$12.53.

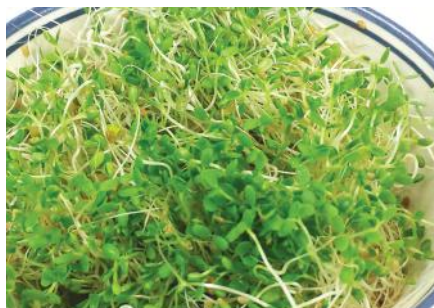

ALFALFA SPROUTS

BROCCOLI SPROUTS

SUNFLOWER SPROUTS

CLOVER SPROUTS

WHEAT SPROUTS

MUNG BEAN SPROUTS

FOUR TRAY SPROUTER

SPROUTING MASON JAR LID

SPROUTS

Sprouts are considered by many to be a "super-food" because they have such high levels of protein, vitamins, minerals, antioxidants, and fiber. They are quick and easy to grow year-round in your kitchen, no grow lights required. Sprouts can be enjoyed raw in sandwiches, salads, or as a snack, but they also make a great addition to homemade soups. Our top-quality sprout seeds have a high rate of germination and have been tested to be free of human or plant-based pathogens. All the seeds that we sell for sprouting are USDA organic and are packaged in resealable pouches for storing.

Note: When growing sprouts, it is important to only use seeds that have been specifically prepared for sprouting. To ensure safety for eating, you should not use ordinary garden seeds for sprouting.

Alfalfa Sprouts

12111 Organic seed: 3 oz \$6.00; 6 oz \$8.25.

Bean Mix Sprouts

Contains adzuki, mung, and green lentils.

12123 Organic seed: 3 oz \$5.50; 6 oz \$6.25.

Broccoli Sprouts

12113 Organic seed: 3 oz \$9.25; 6 oz \$14.25.

Clover Sprouts

12115 Organic seed: 3 oz \$5.50; 6 oz \$6.00.

Crispy Salad Mix Sprouts

Contains green pea, green lentils, and red lentils.

12125 Organic seed: 3 oz \$4.25; 6 oz \$5.50.

Mung Bean Sprouts

12117 Organic seed: 3 oz \$5.50; 6 oz \$6.00.

Spicy Mix Sprouts

Contains clover and radish.

12121 Organic seed: 3 oz \$5.50; 6 oz \$7.25.

Sunflower Sprouts

12184 Organic seed: 3 oz \$5.50; 6 oz \$7.25.

Wheat Sprouts

12119 Organic seed: 3 oz \$4.25; 6 oz \$5.50.

Four Tray Sprouter

This 4-tray seed sprouter produces nutritious sprouts in just 3-5 days. Simply spread the seeds in each tray and pour water in the top tray. As the water slowly siphons through to the trays below, the seeds are gently soaked to start the germination process. The four 6" diameter trays are made of BPA free plastic that is dishwasher safe and easy to clean by hand.

41159 Four Tray Sprouter \$18.95

Sprouting Mason Jar Lid

This sprouting lid fits most wide mouth mason jars. Made of a durable food-grade plastic with mesh holes big enough to drain, but small enough to hold tiny seeds, like alfalfa. Order multiple sprout lids and rotate your crops every 3-4 days to make sure that you always have a steady supply of your favorite sprouts. BPA free and dishwasher safe.

41158 Sprouting Mason Jar Lid \$5.95; 2@ \$5.50 ea.

ASSORTED GREENS

Growing Tips: Greens are easy to direct sow and are adaptable to many growing situations, including gardens, raised beds, and containers. Seeds germinate best between 60-80°F. Plant seeds at a depth of ¼-½". Start a mix of different varieties every two weeks to have a succession of fresh greens all season long. Harvest at the baby leaf or full leaf stage and choose varieties with different colors, textures, and flavors to create unique mixes.

ARUGULA

Astro ●●

24-38 Days. Gardeners prefer Astro for its lobed leaf type and its high yields of whole leaf arugula. Slow bolting vigorous plants may be cut at the baby or mature stage. Distinctly nutty flavor and attractive medium green color.
01935 Treated seed: 1 oz \$5.95; ¼ lb \$25.19.
01935 Organic seed: 250 sds \$4.76.

Uber Organic ●●

40 Days. Dark green arugula with a uniform refined serrated leaf and strong rocket flavor. With an upright habit, thick leaf, and stable quality, Uber is well suited to mechanical harvest. Harvest at 21 days for baby leaf or 40 days for full size.
13258 Organic seed: 250 sds \$2.22.

COLLARDS

Flash F1 ●●

75 Days. This hybrid collard is slow to bolt, has good uniformity, and fast re-growth allowing for heavy repeat harvests. The dark green leaves are smooth, broad, and well suited to stripping, bunching, and processing.
00390 Untreated seed: 250 sds \$7.50; 1 oz \$41.01.

Top Bunch 2.0 F1

70 Days. This early maturing hybrid has wavy, lightly savoyed blue-green leaves that re-grow quickly after harvest. Upright plants are slow to bolt and are a top choice for fresh eating.
12780 Untreated seed: 250 sds \$9.50; 1 oz \$39.17.

CHICORY

Escarole Eliance Organic ●●

50 Days. Dark green smooth leaves fill out tight heads that are upright and heat tolerant. Try covering with blanching caps the week before harvest for the best internal color and sweetness.
12951 Organic seed: 50 sds \$2.25; 250 sds \$5.82.

Endive Benefine Organic ●●

48 Days. This heat-tolerant frisée endive is suitable for growing in spring, summer, and fall plantings. Its compact, upright, tightly filled heads are strong against bolting and tipburn and have attractive shiny dark green exterior and well-blanching interior leaves. With high yields of nicely frilled leaves and proven adaptability, Benefine is an excellent choice for any region..
12950 Organic seed: 50 sds \$1.95; 250 sds \$5.22.

GREENS - BRIGHT AND SPICY MIX

● **GREENS - HARRIS' MESCLUN MIX**

GREENS MIXES

Bright and Spicy Mix

This colorful mix includes pak choy, tatsoi, mizuna, and mustard in a spectrum of colors; golden yellow, red, purple, light and dark green. The well-balanced formulated blend provides a full range of leaf types, textures, and flavors for an exceptional greens mix.

13119 Untreated seed: 1 oz \$14.41; ¼ lb \$40.44.

Harris' Mesclun Mix ●

Our mix has been carefully selected to give you a wonderful collection of color, texture and flavor. The mix includes eight different varieties of green and red lettuce, mustards, kale, mizuna and spinach. 30,000 seeds/oz.

00595 Untreated seed: 250 sds \$3.30; 1 oz \$23.51; ¼ lb \$52.12.

KOHLRABI

Harvest kohlrabi before the bulbs split for the best flavor and texture, as overgrown kohlrabi can become woody. Try cutting bulbs into sticks for dipping in hummus or sauces, or add shredded kohlrabi to salads and slaws.

Konan F1

49 Days. An early-maturing, All-America Selections winner that is a top performer. Konan produces an upright plant with smooth bulbs that have excellent texture and flavor.

12631 Treated seed: 50 sds \$5.40.

12631 Untreated seed: 50 sds \$5.40.

MUSTARD

Miz America F1

25 Days. This red mizuna-mustard hybrid has exceptional leaf color, shape, and size with a mild peppery flavor. Great for baby leaf, and mature leaf harvests, the deep red color is maintained throughout maturity on both sides of the leaf. Makes an excellent garnish.

12492 Untreated seed: 50 sds \$2.50.

Southern Giant Curled

48 Days. Plants grow to 2' and have a dark green, heavily curled leaf. An excellent producer, Southern Giant Curled resists bolting, so it can be grown in mid-summer. 16,000 seeds/oz.

00592 Treated seed: 250 sds \$2.95; 1 oz \$4.64; ¼ lb \$7.98.

PAK CHOI

Joi Choi F1 ●

24-45 Days. A hybrid Pak Choi with attractive spoon-shaped stalks, ivory white stems, and dark green leaves. Harvest at 25 days for baby greens and 45 days for full size. Compact plants hold well in the garden with tolerance to both bolting and cool temperatures.

00260 Treated seed: 50 sds \$4.10.

00260 Untreated seed: 550 sds \$4.10.

SNOWY ORGANIC

TRAVIATA F1 ORGANIC

EGGPLANT

Growing Tips: Sow seeds indoors 8-10 weeks prior to transplanting. Like tomatoes and peppers, seed germinates best at a soil temperature between 75-85°F, which can be maintained most easily using a heat mat. Make sure that seedlings get plenty of direct sunlight, or use supplemental lighting to ensure healthy transplants. Plant transplants 18-24" apart and apply fertilizer and even watering to ensure strong fruit set. Plastic mulch and continuous harvesting will help to produce high yields.

Classic F1 ●

76 Days. If you prefer a standard teardrop-shaped eggplant, we recommend Classic. The tapered shape is uniform in all sizes and its color is a rich, deep purple-black. The vigorous plants stand up to stress better than most.

00465 Treated seed: 50 sds \$9.01; 500 sds \$17.41.

00465 Untreated seed: 50 sds \$9.01; 500 sds \$17.41.

Fairy Tale F1 ●

50 Days. This All-America Selections winner has a compact plant perfect for containers or small-space gardens. The productive semi-spineless plants set clusters of small white fruit with violet stripes. Harvest the tender, non-bitter fruit at 1-2" long for baby size or 2-6" for full size.

00470 Untreated seed: 50 sds \$14.89; 500 sds \$45.86.

Listada de Gandia Organic ●

80 Days. Striking elliptical egg-shaped fruits are 5-6" long with white and purple stripes. Favored for its excellent flavor, tender texture, and very thin skin that does not require peeling.

12376 Organic seed: 50 sds \$2.78; 250 sds \$6.95;

500 sds \$9.75.

Little Fingers Organic ●

68 Days. Straight fruits are 4-5" long by 1-2" wide, set in clusters of 3-6. The creamy white interior offers a smooth taste and few seeds. Tender, thin skins do not require peeling or salting before cooking. Grill whole.

00460 Organic seed: 50 sds \$3.53; 500 sds \$12.24.

Patio Baby F1 ●

45 Days. This high yielding, compact AAS Winner produces mini eggplants very early and continues throughout the season. Patio Baby is a great choice for containers!

22895 Untreated seed: 50 sds \$19.34;

500 sds \$53.26.

Snowy Organic ●

65 Days. This ivory-white Italian type eggplant reaches 7" long and has excellent flavor and firm fruit. Performs well in-ground and in containers.

11466 Organic seed: 50 sds \$4.43; 500 sds \$7.44.

Traviata F1 Organic ●

68 Days. This outstanding, large, glossy-black eggplant offers high yields of traditional teardrop shaped fruits that can be picked at any stage, but have the potential to reach 7-8". The strong plant is nearly spineless for easier picking.

11195 Organic seed: 50 sds \$14.32; 250 sds \$59.95.

DAZZLING BLUE ORGANIC

ORGANIC

LACINATO ORGANIC

RAINBOW CANDY CRUSH F1

KALE

Black Magic ●

60 Days. Tuscan/Lacinato. Deep green, almost black color and exceptionally sweet rich flavor set this outstanding Lacinato type apart from others. The gorgeous, narrow strappy leaves are deeply puckered and the upright plants are easy to harvest, offering improved bolt tolerance, uniformity, and winter hardiness. Black Magic's dark color is striking when displayed in mature bunches or when added to baby leaf blends.

11430 Untreated seed: 1M sds \$3.99.

Dazzling Blue Organic ●

60 Days. Tuscan/Lacinato. This striking blue kale offers vivid color in both the leaves and pink mid-rib veins. More winter hardy than regular lacinato, this variety will extend your season well into winter.

12725 Organic seed: 50 sds \$1.95; 250 sds \$3.49.

Lacinato Organic ●

60 Days. Tuscan/Lacinato. These 10"L x 3"W wrinkled, dark blue-green leaves are a must for salads, smoothies, and soups. Tender leaves are great for cutting at the baby leaf stage. Extremely cold tolerant, a frost will sweeten the taste. Lacinato is also an outstanding variety to plant as an ornamental for large garden bed or landscape displays.

00052 Organic seed: 50 sds \$2.50; 250 sds \$7.73.

Rainbow Candy Crush F1

55 Days. Pink Curl. A vibrant pink kale with bright green edges and an upright growth habit. Rainbow Candy Crush has a mildly sweet flavor and thick tender leaves, excellent for kale chips. Color varies with temperature from pink to magenta to purple, beautiful for ornamental use.

13152 Untreated seed: 50 sds \$16.95.

Red Russian ●

50 Days. Russian. Well-known and sought after by home cooks and chefs, Red Russian is a staple kale variety. Its broad flat green leaves are defined by rosy red veins and have gently serrated edges. Cut Red Russian at baby leaf size or harvest mature leaves. 9,000 seeds/oz.

00488 Untreated seed: 1 oz \$3.05; ¼ lb \$14.50.

00488 Organic seed: 1 oz \$9.95; ¼ lb \$29.95.

Redbor F1

55 Days. Red Curl. This curly kale has eye-catching red and purple color, perfect for salad mixes and edible garnishes. Plants grow up to 24" tall and have an upright uniform habit. Continuously cut for yields all season.

01501 Untreated seed: 50 sds \$5.75;

250 sds \$17.34.

Vates ●

55 Days. Green Curl. A very uniform selection for finely curled vigorous leaves with lush, blue-green color. If protected, the 15" plants overwinter well and are sweetened by cool temperatures. 8,500 seeds/oz.

00487 Treated seed: 100 sds \$1.95; 1 oz \$5.50;

¼ lb \$9.25.

00487 Untreated seed: 100 sds \$1.95; 1 oz \$5.50;

Basil Everleaf Genovese ●

Bred for season-long performance and continual harvests, Everleaf Genovese is a well-branched yet tidy plant that performs well in field or container plantings. Leaves offer robust flavor that stands up to cooking. An excellent variety for growers and consumers alike!

12501 Untreated seed: 100 sds \$5.01; 250 sds \$11.12.

Basil Pluto

Pluto is a dwarf basil that produces heavily branched plants with tiny, dark green leaves. The leaves have a good basil aroma and a fine basil flavor. The plants are compact, globe-shaped and reach 7 to 8" in height at full maturity. Pluto is ideal for both beds and pots.

11484 Untreated Seed: 100 sds \$5.25; ¼ oz \$15.04.

Basil Prospera® Premium F1 Organic ●

A beautiful plant habit with bolt resistance, Prospera Premium provides long lasting production of aromatic Genovese basil.

12822 Organic seed: 50 sds \$2.49; 250 sds \$4.63.

Basil Purple Ruffles

This ornamental variety produces fragrant ruffled deep-purple leaves and light pink flowers. The vigorous well-branched plants are 18-24" tall. Perfect for adding a different color to pesto, salads and vinegars!

01933 Untreated seed: 100 sds \$3.75; ¼ oz \$33.58.

Cilantro Santo ●●

Fast growing yet remarkably slow bolting, Santo produces strong 1-2' tall stems. The broad celery-like leaves are deep green with strong flavor.

00954 Treated seed: 100 sds \$2.25; 1 oz \$3.30; ¼ lb \$8.03.

00954 Untreated seed: 100 sds \$2.25; 1 oz \$3.30; ¼ lb \$8.03.

00954 Organic seed: 50 sds \$2.95; 250 sds \$5.39.

Dill Bouquet ●●

Very vigorous and easy to grow with strong flavor. Plants reach 3-4' tall with feathery green leaves and greenish yellow flowers excellent for flavoring and pickling.

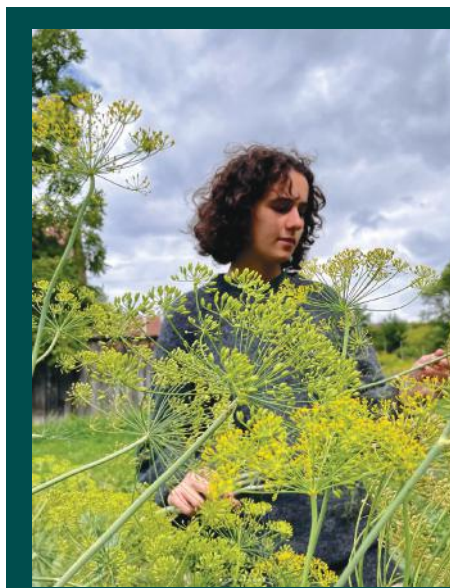

00459 Treated seed: 100 sds \$1.95; 1 oz \$3.92; ¼ lb \$9.87.

00459 Organic seed: 50 sds \$2.47; 250 sds \$4.26.

Dill Fernleaf

The dwarf 18" plants are excellent for growing in containers and slow to bolt. The delicate blue-green foliage makes it perfect for baby dill.

01939 Untreated seed: 100 sds \$5.27; 250 sds \$7.07.

● **HARRIS' LETTUCE BLEND**

LETTUCE

Growing Tips: Lettuce is adaptable to many growing situations, including raised beds and containers. It is easy to direct sow, or can be started indoors as transplants. Seeds germinate best between 60-80°F. Plant seeds ¼-½" deep and thin after germination, allowing 4-8" between leaf lettuce plants and 8-12" between head lettuce plants. Start a mix of different varieties every two weeks to enjoy a succession of fresh lettuce all season long. Use row covers for protection against frost, wind damage, and insects.

MIXES

Harris' Lettuce Blend ●●

With its stunning mix of color, shape and leaf textures, this formulated blend of six lettuce varieties is certain to liven up any salad. Harvest when leaves reach 4-6" in height. Cut the young plants about ½" above the soil and they will regrow for a later harvest. Mix includes: Cimmaron, Red Salad Bowl, Tango, Black Seeded Simpson, Green Salad Bowl, and Royal Oakleaf.

11525 Untreated seed: 250 sds \$3.50; 1 oz \$9.35;
¼ lb \$26.14.

Heirloom Cutting Blend Organic ●●

A well balanced formulation of green, red and speckled loose leaf, green butterhead, and red romaine lettuces. Sow close and cut early for baby leaf, or give more space and time for larger leaves.

12395 Organic seed: 50 sds \$1.95; 250 sds \$2.56.

QUICK & EASY SALAD MIXES

Multi-Seed Pellets: An easy and efficient way to start mixed salad containers. Each SimplySalad pellet contains multiple seeds and will produce 3 or more seedlings. For best results, evenly space 4-5 pellets in a 10-12" diameter container. Choose from three mixes:

12393 Pelleted Organic seed: 50 sds \$4.50;

250 sds \$7.59.

BIBB

Buttercrunch ●

64 Days. Buttercrunch is vigorous, dependable, and easy to grow. The leaves are delicious, but the best part is the heart of loosely folded leaves and thick, crisp, tender ribs.

00505 Untreated seed: 250 sds \$2.50;

1 oz \$3.05; ¼ lb \$8.40.

BUTTERHEAD

Harmony MTO ●

68 Days. Harmony is a remarkably uniform butterhead that has excellent internal quality, tender texture, and sweet flavor. It produces large heads with rich deep green color and smooth glossy leaves. Pelleted seed only.

00526 Pelleted Untreated seed: 250 sds \$2.83.

Milagro MTO Organic ●

60 Days. One of the best new butterheads on the market, Milagro is a highly adaptable variety that produces in multiple applications. The darker shaded green heads have a nice leaf gloss on an impressive plant frame and the heads produced are heavier than other butterhead varieties.

12836 Organic seed: 50 sds \$3.25; 250 sds \$3.94.

LEAF

Black Seeded Simpson ● Green Leaf

45 Days. One of the best early producing loose leaf varieties, it is extremely popular among gardeners and farmers alike. The light green leaves are tender and mildly flavored.

00504 Untreated seed: 250 sds \$1.95; 1 oz \$3.05;

¼ lb \$8.05.

New Red Fire MTO Red Leaf

45 Days. Dense, compact plants produce highly attractive, deep red leaf lettuce. Slow bolting and tolerant to heat and cold. Great for spring and early summer use in temperate areas and early summer to fall in cooler regions.

00512 Untreated seed: 250 sds \$2.79.

00512 Pelleted Untreated seed: 250 sds \$4.98.

Red Velvet Organic ● Red Leaf

55 Days. Vivid maroon colored leaves have rich color and green tints toward the base of the head. You eat with eyes first, but your taste buds will reassure your choice with one bite of the rich mild taste that's pleasing to any palate. Great in mixes and is included in the heirloom cutting blend.

12545 Organic Seed: 50 sds \$1.75; 250 sds \$1.92.

ROMAINE

Sonora

60 Days. Sonora's uniform heads weigh an average 1.4 lbs. with good internal color, a small core, and a sweet crisp texture. The tidy upright plants average 12" tall and are tolerant to tipburn and bolting.

13443 Pelleted Untreated seed: 250 sds \$2.72.

Super Jericho MTO ●

60 Days. Super Jericho was developed to endure the heat of summer in arid regions of the world. It performs extremely well in the heat here in the US while retaining the sweet, crisp texture that it's known for. It has also performed well in cool season plantings. Super Jericho produces sturdy, robust plants with large, light green leaves that are succulent, sweet and crisp.

MELONADE F1

SOLSTICE F1

MELONS

Growing Tips: Start melons indoors 12-15 days before transplanting into the garden, or direct sow at a depth of $\frac{3}{4}$ " in 80°F soil. Seed will germinate after 6-8 days. Even soil moisture is critical for successful germination and growth, do not overwater or allow to dry out. Plant transplants 18-24" apart, with 6-8' between rows.

Ambrosia F1

86 Days. A winner in taste tests, Ambrosia is recognized as one of the best tasting melons in the East. Its 4 to 4½ lb., round fruit has a tan color with peach-colored flesh that has a wonderful sweet flavor. The fruit's small seed cavities leave more room for the flavorful flesh.

00567 Treated seed: 25 sds \$5.95; 250 sds \$28.48.

Atlantis F1

74 Days. Atlantis is an impressive Eastern melon with strong vines, excellent interior quality, consistent high sugars, and a firm rind. The 6-8 lb. fruit have medium netting and slight sutures.

11577 Treated seed: 25 sds \$6.25; 250 sds \$25.57.

Earli Dew F1

80 Days. When ripe, the flesh is a distinct lime green color, and the fruit slips from the vine like a muskmelon. Averaging 2½-3 lbs., this succulent melon is ideal for home gardens.

00564 Treated seed: 25 sds \$6.74; 250 sds \$35.07.

Melonade F1

70 Days. This unique melon has a distinct lemon-lime flavor with standard cantaloupe flesh color and texture. Delicious on its own or in culinary creations, Melonade is a repeat favorite in our taste tests. The 4-5 lb. oval fruit have pronounced sutures and medium netting and are ready to cut from the vine when they become pale green to yellow and the nearest tendril has dried.

13242 Untreated seed: 25 sds \$7.50.

Solstice F1

76 Days. Solstice produces huge 7-9 lb. fruit that have deep ribs and heavy, rosey netting. Its thick flesh is very sweet, and there will be plenty to go around when you slice open one of these impressive fruits.

11216 Treated seed: 25 sds \$7.25; 250 sds \$25.27.

Sugar Cube F1

81 Days. Sugar Cube is a personal-sized 2 lb. melon that is small in size, but big on taste. Its deep orange colored flesh has superb eating quality and incredible sweetness.

11575 Treated seed: 25 sds \$6.35; 250 sds \$29.40.

11575 Untreated seed: 25 sds \$6.35;
250 sds \$29.40.

True Love F1 Organic

76 Days. This aromatic 2-3 lb. melon has high sugars and excellent texture that customers love. The fruit are full-slip at maturity for easy harvest, and plants offer high resistance to disease.

13128 Organic seed: 25 sds \$11.95.

BLACK TAIL MOUNTAIN ORGANIC

CRIMSON SWEET

MINI LOVE F1

WATERMELONS

Growing Tips: Jiffy Pots are excellent for starting watermelons. Start transplants 2-3 weeks prior to transplanting in the garden. Sow seeds at a depth of $\frac{3}{4}$ " and maintain a soil temperature of 75-80°F. For best fruit set and yield, allow 12-15 ft² per plant. To check if your watermelons are ready to harvest, look for the tendril along the stem closest to the fruit. If the tendril is dry or drying, the watermelon is ready to harvest. Another good indicator of ripeness is a creamy yellow ground-spot on the fruit.

Black Tail Mountain Organic ●

80 Days. A top performing watermelon for Northern climates, it also grows well in warmer zones. 8-12" round fruit have a delicious sweet, candy-like flesh. A real summertime treat!

12584 Organic seed: 50 sds \$4.50; 100 sds \$7.45; 500 sds \$28.05.

Crimson Sweet

85 Days. Crimson Sweet is a mid-sized, nearly-round, full-season beauty, with orange-red flesh and excellent flavor. (15-26 lbs.)

00581 Treated seed: 25 sds \$2.50; 1 oz \$9.18; $\frac{1}{4}$ lb \$22.44.

00581 Untreated seed: 25 sds \$2.50; 1 oz \$9.18; $\frac{1}{4}$ lb \$22.44.

Mini Love F1

70 Days. Mini Love has a sweet, crisp red flesh and very few seeds. Compact plants can yield up to 6 fruit per plant that weigh 7-9 lbs. each.

12346 Untreated seed: 25 sds \$10.71; 100 sds \$33.88.

Sangria F1 ●

80 Days. An elongated seeded melon weighing 20-24 lbs. Dark green rind with light green stripes over dark red, high quality flesh.

12768 FarMore Treated seed: 25 sds \$11.04; 100 sds \$23.46.

Sugar Baby

85 Days. The round, distinctively dark green Sugar Baby is a convenient 8-12 lbs. of sweet quality. Its firm, solid flesh is bright red, crisp and delicious with small, dark brown seeds. Able to grow in cool northern areas.

00587 Treated seed: 25 sds \$4.00; 1 oz \$8.40; $\frac{1}{4}$ lb \$23.05.

Sweetie Pie F1

75 Days. Sweetie Pie is a large 13 lb. Sugar Baby type watermelon with knock-out sweet flavor, slightly crunchy texture, and very juicy flesh! Fruit have a dark green shiny rind and flesh that is dark red and very sweet.

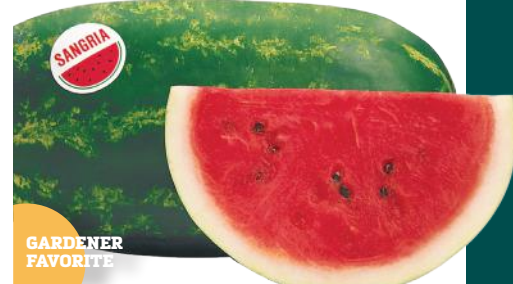

12722 Treated seed: 10 sds \$4.05; 100 sds \$8.77; 500 sds \$28.75.

12722 Untreated seed: 10 sds \$4.05; 100 sds \$8.77; 500 sds \$28.75.

Yellow Doll F1

PHENOMENAL

LINCOLN

LITTLE MARVEL

PEAS

Growing Tips: Plant peas as soon as you can work the ground in early spring after your last frost. Sow at 1" depth and 1-3" spacing. If temperatures average around 60-65°F, seeds will germinate in one week. Some varieties will need trellising; smaller bush varieties do not require trellising unless desired. Harvest Snap and Shelling peas when pods are large and rounded. Leave in shell until just before cooking to preserve sweetness. Snow peas should be picked when pods are still flat for best tenderness and sweetness.

COWPEA

Phenomenal

65 Days. (24") A showy variety that sets long yellow pods with red stems on bright green plants. Pods hold an average of 12 peas each, which are higher in amino acids and antioxidants than many other cowpea varieties. Seeds are cream colored and spotted with black and dark brown coloration.

12787 Treated seed: 250 sds \$3.95; ½ lb \$6.01.

SHELLING PEAS

Lincoln ●

67 Days. (28-30") Lincoln has exceptional tenderness and sweetness, both fresh and frozen. The vines do not require trellising.

00168 Treated seed: 100 sds \$2.95; ½ lb \$4.95.

00168 Untreated seed: 100 sds \$2.95; ½ lb \$4.95.

Little Marvel

67 Days. (18-20") These prolific dwarf vines offer dependable, early yields. Abundant, three-inched, blunt tipped pods are filled with five to six plump berries of unusually fine sweetness and flavor when picked young. Little Marvel develops its seeds quickly and needs no trellis.

00170 Treated seed: 100 sds \$2.95; ½ lb \$4.95.

SNAP PEAS

SS 141 Sugar Snap Organic ●

55 Days. (35") A vigorous, widely adapted variety that is good for early or late season production. Cooler temperatures will produce a sweeter flavor. Jumbo pods are plump with outstanding flavor.

12727 Organic seed: 50 sds \$1.95; 250 sds \$6.04.

Sugar Sprint

62 Days. (26") Sugar Sprint is a short-vined snap pea. This variety produces excellent early yields of edible, stringless pods that are very sweet and tender. The 3" pods can be enjoyed fresh off the vine, steamed or used in stir-fry.

00195 Cruiser Treated seed: 100 sds \$2.95;

½ lb \$4.95.

00195 Untreated seed: 100 sds \$2.95; ½ lb \$4.95.

Super Sugar Snap ●

66 Days. (4-5") High quality dark green pods reach 3" and are very tender. This highly disease-resistant snap pea is enjoyed raw, cooked or stir-fried. Trellising required.

00189 Cruiser Treated seed: 100 sds \$2.95;

½ lb \$4.95.

00189 Untreated seed: 100 sds \$2.95; ½ lb \$4.95.

SNOW PEAS

Norli Organic ●

48 Days. A compact plant that produces stringless 2½" pods. One of the most tender snow peas you will expose your taste buds to. Eat fresh right off the plant. Great for salads or sautéed.

12552 Organic seed: 50 sds \$2.95; 250 sds \$8.40.

Oregon Sugar Pod #2 ●

65 Days. (24-28") Pick the large flat pods before the peas fully develop for a delicious treat, whether steamed, fresh in salads, or stir-fried. The vines are vigorous and produce continuous yields.

FLAMINGO F₁

FLAVORBURST F₁ ORGANIC

KING OF THE NORTH ORGANIC

PEPPERS

Growing Tips: Sow seeds indoors 8-10 weeks prior to transplanting. Seed germinates best at a soil temperature between 75-85°F, which can be maintained most easily using a heat mat. Make sure that seedlings get plenty of direct sunlight, or use supplemental lighting. For space saving, peppers can be planted close together, 14-16", and still produce great yields. Provide fertilizer and even watering to ensure strong fruit set. As peppers mature, they change from green to their mature color. They are edible at all stages of ripeness, but are sweetest when fully mature.

SWEET BELL

Declaration F₁

70 Days. Declaration produces big, thick-walled fruit for stuffing and roasting. Another distinct advantage is its strong resistance to disease.

11673 Treated seed: 50 sds \$16.22; 250 sds \$57.89.

11673 Untreated seed: 50 sds \$16.22;

250 sds \$57.89.

Early Sunsation F₁

70 Days. Yields blocky fruit that are crisp and delicious in the green stage and ripen to a beautiful golden-yellow with a sweet taste.

00664 Treated seed: 50 sds \$13.89; 250 sds \$47.41.

Flamingo F₁

66 Days. Prolific plants produce smooth fruit that are 3½"W x 3½"L and slightly tapered, turning from ivory-yellow to orange-red. Flamingo is a beautiful, sweet salad pepper with bright colors.

00677 Treated seed: 50 sds \$14.60; 250 sds \$46.24.

00677 Untreated seed: 50 sds \$14.60;

250 sds \$46.24.

Flavorburst F₁ Organic ●

87 Days. Medium-large three-lobed bell peppers are slightly elongated with thick walls. Immature lime green fruit can be picked early at 67 days for a sharp citrusy flavor or allow fruit to ripen fully for sweet golden yellow bells.

11287 Organic seed: 50 sds \$14.68; 250 sds \$40.27.

King of the North Organic ●

70 Days. Introduced in the 1933 Joseph Harris Seed Catalog. Trials have shown comparable yields to hybrids! Sturdy plants produce early, heavy yields of blocky, thick walled, 3-4 lobed fruit. Crisp sweet flesh is delicious for fresh salads or cooking.

12411 Organic seed: 50 sds \$3.92; 250 sds \$9.09.

Lady Bell F₁ ●

71 Days. These peppers are best for stuffing and freezing and have a delicious sweet flavor. Ripens from rich green to a bright attractive red.

CANDY CANE RED F1

SWEET SPECIALTY

Candy Cane Red F1

65 Days. Eye-catching, variegated foliage and fruit that ripen from green striped to solid red make this pepper very unique. The medium sized plants produce high yields of cone shaped fruits that are 1¾"W x 3¾"L. The sweet flavor, thin walls, and crisp texture make this pepper perfect for fresh eating at any stage of ripeness.

23432 Untreated seed: 50 sds \$12.75;
250 sds \$43.96.

Giant Marconi F1

63 Days. An Italian fryer type pepper that has a wonderful sweet taste when it matures to red. The 3"W x 8"L fruit taper slightly, mature early and are great for roasting or grilling. **01658 Treated seed: 50 sds \$9.15; 250 sds \$31.94.**

Hamik F1

73 Days. Nearly seedless fruit have exceptional sweetness, ripen from light green to a brilliant orange, and are produced on compact, sturdy plants. The cone-shaped fruit measure 2-1/2" long by 1-1/4" wide, and have a crisp, juicy flesh.

11922 Untreated seed: 50 sds \$4.96;
250 sds \$17.19.

GIANT MARCONI F1

Mad Hatter F1

75 Days. These unique peppers have a refreshing citrus-floral flavor that remains sweet, only occasionally expressing mild heat near the seeds.

12490 Untreated seed: 10 sds \$6.52;
50 sds \$15.05; 250 sds \$41.71.

Prism F1

65 Days. This unique mini bell pepper ripens gradually from light green to yellow-orange and finally dark red, allowing all colors to be harvested from one plant as the fruit mature. Fruit measure 2¼"W x 2½"L. Plants perform well in-ground and in containers.

13261 Untreated seed: 50 sds \$10.95;
250 sds \$26.79.

Snackabelle Red F1

75 Days. This mini bell packs some serious flavor, measuring 2¼"W x 2¼"L and ripening from green to deep red. Its firm thick walls and blocky shape make it great for cooking, grilling, and stuffing.

12618 Untreated seed: 50 sds \$8.94;
250 sds \$37.05.

Sweet Banana

70 Days. Looks like a hot pepper but has a sweet taste! The 6" long pointed fruit ripen from light yellow to bright red. Fried or pickled, Sweet Banana is delicious!

CAYENNE

Cayenne Long Slim

75 Days. Tall bushy plants produce heavy yields of long, slim, wrinkled fruit that are 5" long and very hot. The fruit are thin walled and ripen from green to a fiery red. Use for hot sauces, drying, decoration, and dehydration.

01668 Untreated seed: 50 sds \$2.95; 250 sds \$4.95.

Cayennetta F1

69 Days. This All-America Selections Winner offers spicy flavor, prolific yield, and patio-friendly size. Grow the compact, upright plants in the garden or in containers. The 3-4" tapered fruit ripen dark green to brilliant red.

11096 Untreated seed: 10 sds \$11.23; 50 sds \$20.10; 100 sds \$34.47.

Golden Cayenne F1

87 Days. Compact plants produce an abundance of slender golden peppers that reach 3½-4" long. Well suited for growing in-ground or in containers. Fruit mature from green to golden yellow, and increase in heat as they ripen. Excellent for cooking, fresh eating in salsas, or dried and ground into a unique golden powder.

12848 Untreated seed: 50 sds \$12.68; 250 sds \$44.95.

JALAPEÑO

Black Magic F1 Organic

70 Days. The fruit of this unique variety are very shiny and such a dark green they appear nearly black. The striking 4" long fruit are very uniform, thick-walled, and high quality.

13257 Organic seed: 50 sds \$10.50; 250 sds \$32.14.

Dante F1

70 Days. A jalapeño that produces an early, continuous set of extra-large, deep green fruit. A top performer in a range of environments.

12607 Treated seed: 50 sds \$9.95; 250 sds \$33.97.

Early Jalapeño Organic

65 Days. Prolific yields of flavorful, blunt fruits that measure 2-2½" long. Compact plants are sturdy and work well in containers. Moderately spicy fruits with thick walls are normally harvested when dark green, but can also be used when red. Perfect for poppers, salsas, or adding heat to any dish.

00059 Organic seed: 50 sds \$5.17; 250 sds \$11.39.

Everman F1

75 Days. Everman is an extra-large, thick walled jalapeño with attractive dark green fruit. Vigorous plants have continuous set and high disease resistance.

12608 Treated seed: 50 sds \$10.19; 250 sds \$34.06.

Jalapeño M

70 Days. Jalapeño M is a favorite of many gardeners. This thick-walled deep green jalapeño grows to 3½" on upright plants.

00655 Untreated seed: 50 sds \$2.26; 250 sds \$6.51.

LARGE RED CHERRY HOT

SPECIALTY

Carolina Reaper 🌶️🌶️🌶️🌶️

110 Days. The Guinness Record holder for hottest pepper in the world, Carolina Reaper averages 1.5 million and peaks at 2.2 million Scoville units. Ripening to a deep red color, the fruit have a bumpy surface and average 1.5" W x 2" L. **Please note: This pepper is extremely hot!**

Handle seed and fruit very carefully!

12980 Untreated seed: 50 sds \$14.82;

250 sds \$54.03.

Chile G76 F1 🌶️🌶️ *Anaheim pepper*

72 Days. Chile G76 produces medium-thick fleshed fruit that have mild heat and a rich satisfying chile flavor. Its uniform 2"W x 8"L fruit ripen from bright green to red.

11653 Treated seed: 50 sds \$13.24; 250 sds \$47.33.

Ghost Pepper Multi-Color (Bhut Jolokia)

95 Days. Ghost Pepper, also known as Bhut Jolokia, is a legendary pepper considered one of the world's hottest peppers. The thin-walled, wrinkled, pointed fruit are 3-3½" in length, ripening to variations of red, peach, and yellow.

Please note: This pepper is extremely hot! Handle seed and fruit very carefully!

11443 Untreated seed: 50 sds \$5.95; ¼ oz \$34.73.

Habanero Orange 🌶️🌶️🌶️

90 Days. The productive plants support large numbers of thin-fleshed, wrinkled fruit that turn from light green to golden orange at maturity. These peppers are approximately 1½"W x 2"L and are used both fresh or dried. The citrus flavors are great for hot sauces.

00665 Untreated seed: 50 sds \$3.16; 250 sds \$9.46.

Hungarian Wax 🌶️🌶️

60 Days. This early, prolific hot pepper has bright yellow, waxy fruit that turn red when ripe. The peppers are 5-6" long and great for canning.

00672 Untreated seed: 50 sds \$3.21; 250 sds \$4.75.

Large Red Cherry Hot 🌶️🌶️

75 Days. Smooth, dark green fruit that mature to cherry red are produced in large numbers. Fruit are oblate with medium wall thickness, measure 1½"W x 2"L, and are very hot.

00674 Untreated seed: 50 sds \$4.66; 250 sds \$8.67.

Mariachi F1 🌶️🌶️ *Santa Fe Grande pepper*

85 Days. Mariachi produces unique cone-shaped fruit that ripen from pale cream to creamy orange to orange red at full maturity. The mild 3-4" long fruit are great to use for salsas, sauces, stuffing, or grilling.

11660 Treated seed: 50 sds \$14.58; 250 sds \$51.28.

Takara F1 🌶️ *Shishito pepper*

60 Days. A shishito pepper that produces small, finger-sized fruit with a mild but rich flavor. One in every ten peppers may have a little heat. Serve these tasty peppers at your next garden party to see who gets the luck of the draw!

NOVELTY PUMPKINS

Dill's Atlantic Giant

125 Days. With normal care, fruit often weigh 200-300 lbs., but the world record is over 2,000 lbs.! They require plenty of space with vines spreading up to 25'.

00689 Treated seed: 10 sds \$6.00; 1 oz \$15.00; ¼ lb \$38.00.

Grizzly Bear F1 *Warty*

90 Days. This small round pumpkin will offer a new look to your home fall display with its unique warts and caramel color.

12851 FarMore Treated seed: 25 sds \$18.99; 250 sds \$58.46.

Lumina *White*

100 Days. Lumina's white skinned, bright orange fleshed fruit weigh about 10 lbs. A perfect choice to grow for an elegant autumn display - but also as a canvas for painting! Pick them as they ripen to avoid color change when over mature.

01686 Treated seed: 25 sds \$9.00; 1 oz \$27.40; ¼ lb \$60.26.

Marina De Chioggia *Warty*

100 Days. A unique, green, warted, Italian heirloom squash valued for its eating quality, and traditionally used in preparing gnocchi and ravioli. The perfect shape for stacking, this novel ornamental is also long-storing.

12856 Treated seed: 25 sds \$6.00; 1 oz \$13.34; ¼ lb \$34.15.

One Too Many *Multi-colored*

110 Days. These white fruit are laced with red veins, resembling a bloodshot eye. Large vines produce 20-25 lb. fruit that vary in shape from round to flattened oblong.

11978 Treated seed: 25 sds \$15.00; 250 sds \$92.93.

Popcorn F1 *Warty*

110 Days. A creamy white, heavily warted pumpkin with long dark green stems. The 18 lb. fruit will become a buttery color with time. Handle fruit with care to minimize damage to the warts.

13082 Treated seed: 25 sds \$14.21; 250 sds \$41.63.

Porcelain Doll F1 *Pink*

100 Days. Porcelain Doll is an eye-catching fall ornamental squash with striking pink color on large, blocky, deeply-ribbed fruit. The 15-20 lb. fruit have sweet, deep orange flesh.

11487 Treated seed: 25 sds \$17.95; 250 sds \$67.65.

Warty Goblin F1 *Warty*

105 Days. Warty Goblin produces heavily warted fruit that are frightfully cool! The round to slightly tall fruit have a hard orange shell and green warts that stay green for several weeks after harvest.

11613 FarMore Treated seed: 25 sds \$23.23; 250 sds \$47.70.

AUTUMN WINGS LARGE

BIG BOY MIX

DAISY GOURD®

GALAXY OF STARS F1

GIZMO

GOURDS

Growing Tips: Gourds can be direct sown or started in Jiffy pots. Plant seeds at a depth of 1" in fertile, well-drained soil with a temperature of 70°F. Plant at a spacing which allows 24 ft² of area per plant, or trellis plants to maximize use of small growing spaces.

Autumn Wings Blend ●

100 Days. This gourd produces multi-colored, long necked fruit with "wings" on the bulb end. Plant early so the fruit can fully mature and dry in the garden.

11822 Treated seed: 25 sds \$4.99; 250 sds \$11.69.

Autumn Wings Large

100 Days. A unique swan-shaped gourd of many colors, detailed with wings and warts. Bulbs are 2½-3" in diameter with a neck up to 12" long. A beautiful addition to autumn displays.

12619 Treated seed: 25 sds \$4.99; 250 sds \$11.69.

Big Boy Mix ●

125 Days. We have formulated our own special mixture of large fruited gourds to ensure that you get the best selection possible. Equal proportions of Swan, Caveman's Club, Bushel, Dipper, Birdhouse, Apple and Snake gourds.

01801 Untreated seed: 25 sds \$3.50; 1 oz \$26.73.

Daisy Gourd®

95 Days. This attractive gourd mix produces mixed colored gourds in shades of green, orange, yellow and white. Most of the fruit produce a unique daisy pattern on the stem end.

11819 Untreated seed: 25 sds \$5.99;

250 sds \$20.61.

Galaxy of Stars F1

95 Days. An exciting and attractive hybrid gourd mixture with unique star-shaped fruit in varying striped patterns of yellow, cream, orange, green, and white.

11815 Treated seed: 25 sds \$6.59; 250 sds \$32.76.

Gizmo

95 Days. A hard-shelled winged gourd mix that offers beautiful multi-colored fruit with dark green, orange, yellow, light green, and white variations. Fruit are 3-5" tall x 6-8" wide at the wing tips, and are produced on bush type plants. A top-pick from our trials.

12781 Treated seed: 25 sds \$8.95; 250 sds \$39.65.

Lunch Lady

100 Days. Vigorous vines produce large gourds that weigh 5-20 lbs. each. It produces an array of fruit sizes, shapes, and colors, all with hard shells and warts. Big, classic shapes and shades mixed with startling bi-colors and stripes make Lunch Lady the ideal choice for high-impact fall decor.

11818 Treated seed: 25 sds \$4.45; 1 oz \$31.89.

Shenot Crown of Thorns

95 Days. An interesting, colorful gourd about 4-5" in diameter. It's roughly round with ribs and curved "fingers" pointing to the blossom end. Plants produce a variety of striped and bicolor fruit with white, yellow, light and dark green colors.

00806 Untreated seed: 25 sds \$2.95; 1 oz \$17.88;
¼ lb \$39.01.

LUNCH LADY

SHENOT CROWN OF THORNS

RADISHES

Radishes are one of the first crops to be planted and harvested in the spring. Seeds germinate in 5 days and roots are ready to harvest in 20-60 days. Radishes make a great container crop, requiring only 4-8" of soil depth to grow.

Photo by
Jessica McCollum,
Sellersburg, Indiana

CLOCKWISE FROM LEFT: STALAGNIT F₁ / BLUEMOON F₁ / WATERMELON / FRENCH BREAKFAST

A Stalagnit F₁

30 Days. An early hybrid white icicle radish with improved quality over open-pollinated types. Stalagnit has strong 8" tops that resist bolting, and uniform root shape and appearance. The bright white pointed roots reach 3-5" long, have a slightly milder taste, and resist caving and cracking.
13268 Untreated seed: 250 sds \$6.38.

B Bluemoon F₁

60 Days. A stunning radish with lavender-blue exterior and flesh that adds an unexpected pop of color to salads. A favorite from our trials, the roots are exceptionally tolerant to cracking and pithing, and have uniform conical shape.
12770 Untreated seed: 250 sds \$5.15.

C Watermelon

50 Days. This Chinese ball-shaped radish offers a pinkish-red interior color surrounded by a whitish flesh that turns green at the shoulders. Depending on when they are harvested, roots can measure from 2-4" in diameter and have tall tops. The flesh is crisp and mildly sweet. Great in salads!
11498 Untreated seed: 250 sds \$1.95; 1 oz \$3.95.

D French Breakfast

25 Days. This distinctively-colored French heirloom has been grown and enjoyed for well over 100 years. Its bright scarlet cylindrical roots are tipped with white and measure about 2" long. Grow some of these delicious radishes for your table.
00704 Treated seed: 250 sds \$1.95; 1 oz \$3.95; ¼ lb \$7.40.
00704 Organic seed: 250 sds \$3.12.

Champion

26 Days. Champion stays mild and delicious without a trace of pithiness. Grow extra-early and late plantings for tasty radishes all season long.
00708 Treated seed: 250 sds \$1.95; 1 oz \$2.95; ¼ lb \$4.53.

Cherry Belle

24 Days. Smooth and uniform, Cherry Belle has exceptionally short tops and quickly reaches edible size. The tasty white flesh is crisp and delicious.
00706 Treated seed: 250 sds \$1.95; 1 oz \$2.99; ¼ lb \$5.40.
00706 Organic seed: 250 sds \$3.30.

Purpella F₁

25 Days. A deep plum-colored radish with a crisp white interior, Purpella is a beautiful addition to mixed bunches or a standout on its own. The round roots are uniform in shape and size, with smooth shoulders and low cracking. Well-attached, vigorous, medium tops measure 5-6", are good for bunching, and slow to bolt.
13422 Treated seed: 250 sds \$4.04.

Red Satin F₁

22 Days. For picture-perfect uniform bright red roots, Red Satin is an outstanding choice. Flesh is pure white, flavorful, and crunchy. Medium-sized tops are well attached for easy harvest.
11702 Treated seed: 250 sds \$4.34.
11702 Untreated seed: 250 sds \$4.34.

SPINACH

A quick, easy to grow crop that thrives in cool weather, plant spinach in the early spring or late summer/fall. Spinach can be overwintered if protected with row covers or mulch. Spinach also grows well under counter-top grow lights right in your kitchen. Visit our Supplies section, (pages 93), to learn more about useful supplies for growing your Spinach plants for fresh greens all year.

Acadia F1 Organic ●

45 Days. Acadia is a dark green semi-savoyed spinach with medium-sized oval leaves and good texture for baby leaf harvest. Slow growing, tolerant to bolting, and suited for main season growing.

12954 Organic seed: 50 sds \$1.95; 250 sds \$2.95.

Olympia F1

46 Days. Olympia's smooth leaves are easier to wash than the heavily savoyed types. The plant is vigorous and productive, bearing good quantities of large green leaves.

00765 Treated seed: 250 sds \$1.95.

Regiment F1 Organic ●

37 Days. Mildly savoy, triangular, dark green leaves make nice full heads for bunching. Very good seedling vigor and excellent cold soil tolerance makes Regiment an excellent choice for both spring and fall sowing.

12423 Organic seed: 50 sds \$1.95; 250 sds \$2.95.

Seaside F1

25 Days. An excellent choice for baby leaf, the spade-shaped, dark green leaves are smooth and thick. The upright plants are slow to bolt and have high disease resistance.

12623 Treated seed: 250 sds \$1.95.

12623 Untreated seed: 50 sds \$1.50; 250 sds \$1.95.

Space F1 Organic ●

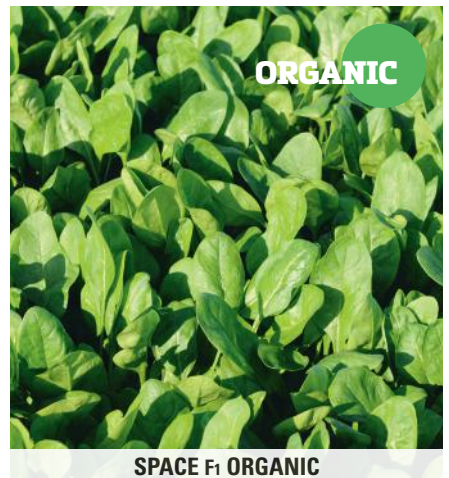

40 Days. Medium-green leaves are smooth to slightly savory with an upright habit for easy harvest. Space is well adapted to a range of conditions, resists bolting, and has high disease resistance.

13241 Organic seed: 250 sds \$2.95.

SV2157VB F1 ●

42 Days. SV2157VB spinach is a semi-savoy, mid maturity spinach that is adaptable across seasons and environments. It has uniform leaf shape and size, and its thick, shiny leaves are an attractive rich dark green color.

11499 Treated seed: 250 sds \$3.95.

SPACE F1 ORGANIC

SV2157VB F1

SWISS CHARD

Closely related to beets, Swiss chard has edible leaves and stalks rather than roots. It has a milder taste than spinach and does not cook down as much. Swiss chard is also much more tolerant of the summer heat. Plant in well-drained soils ranging from 60-85°F. Even soil moisture is critical for successful germination and growth, do not overwater or allow to dry out. Allow 7-18 days for germination. Plant seeds at a depth of approx. ½", and thin to a distance of 3-4".

Bright Lights

55 Days. This AAS winner offers consistent growth rate and excellent quality of lightly savoyed green or bronze leaves with multicolored petioles. Expect variations of red, orange, gold, pink, purple, and white petioles in this eye-catching mix that is suited to harvest at baby leaf and full maturity. Decorticated seeds.

00833 Untreated seed: 100 sds \$3.97; 250 sds \$5.03.

Large White Ribbed

60 Days. The flattened white stems bear thick leaves that are tender and delicious. Cook the stems and leaves together, or prepare the stems separately, like asparagus. **00832 Treated seed: 100 sds \$2.45; 1 oz \$3.95; ¼ lb \$7.93.**

Northern Lights

60 Days. Northern Lights Mix contains the most intense colors of chard that we have ever seen. The 21"—26" plants produce eye-catching stalk colors of deep gold, snow white, deep red, and magenta, all with shiny, medium green colored leaves. Leaves are smooth to lightly savoyed at the young stage, while mature leaves are lightly savoyed to heavily savoyed. The stalks are broad, tender, and fleshy, even at full maturity. Harvest for bunching at full maturity or for a colorful salad mix component at 3 - 4" tall. **00918 Treated seed: 100 sds \$2.37; 1 oz \$4.67; ¼ lb \$11.93. 00918 Untreated seed: 100 sds \$2.37; 1 oz \$4.67; ¼ lb \$11.93.**

Peppermint

60 Days. A highly ornamental chard that boasts pure white petioles with vibrant pink streaks. Topped by dark green, glossy leaves, plants have a very high resistance to bolting and perform well across multiple seasons.

11163 Untreated seed: 50 sds \$1.50; 250 sds \$1.95.

Rainbow Blend Organic

55 Days. The beautiful mix of red, yellow, orange, pink and white stems have dark green, multi-colored veined savoy leaves which will add depth and texture to your greens mix. This variety can be enjoyed fresh or cooked. Harvest at the baby leaf or full leaf stage for bunching.

12382 Organic seed: 50 sds \$2.25; 250 sds \$3.95.

Rhubarb Chard

63 Days. Large leaves are deep green with red veins. Both stems and leaves are delicious and add striking color to garden beds.

00834 Treated seed: 100 sds \$2.52; 1 oz \$3.41; ¼ lb \$10.13.

00834 Organic seed: 50 sds \$2.95; 250 sds \$4.95.

Whity Organic

25 days to baby leaf, 55 days to full leaf. The dark green, thick broad leaves are very tasty and will add bulk to your greens mix. This variety can be enjoyed fresh or cooked. Grow along with your Arugula, Lettuce Blend and other greens for harvest at the baby leaf or full leaf stage for bunching.

12383 Organic seed: 50 sds \$2.19; 250 sds \$4.95.

BAKED POTATOES F1

● **CARNIVAL F1**

MASHED POTATOES F1

WINTER SQUASH

Growing Tips: Winter Squash can be direct sown or started in Jiffy Pots. Plant seeds at a depth of 1" in fertile, well drained soil with a minimum temperature of 70°F. To ensure fruit sets and yields, allow sufficient space between each plant. Give small vines a 10 ft² area, and large vines a 15 ft² area. For best flavor, be sure to harvest winter squash when they are fully mature.

ACORN

Baked Potatoes F1

90 Days. Tan fruit weighing 1-1½ lbs. are produced on space-saving bush plants. The sweet flesh is off-white in color with a typical acorn texture.

12343 Treated seed: 25 sds \$4.70; 250 sds \$21.24.

Carnival F1 ●

85 Days. Semi-bush plants produce acorn-shaped fruit that bear shades of green, yellow, and orange. The fruit have golden yellow flesh that is delicious. Its great taste improves during storage.

00774 Treated seed: 25 sds \$4.20; 250 sds \$16.74.

00774 Untreated seed: 25 sds \$4.20; 250 sds \$16.74.

Mashed Potatoes F1

90 Days. Unique 1-1½ lb. fruit with a white rind and flesh that is nearly white. When baked and seasoned with garlic and butter, the flesh offers the consistency and flavor of mashed potatoes, a perfect addition to low-carbohydrate meals.

12208 Treated seed: 25 sds \$4.50; 250 sds \$16.14.

DELICATA AND SWEET DUMPLING

Honeyboat Delicata Organic ●

90 Days. Honeyboat Delicata's coppery-tan fruit are very sweet and just the right size for roasting and single servings. The flesh of this unusually colored Delicata is high in Calcium, Potassium, Folate, and Vitamins A & C. A reliable winter storage squash with fruit averaging 1 lb.

12427 Organic seed: 25 sds \$2.60; 250 sds \$10.80.

Sweet Dumpling

100 Days. Small, 4 to 5" acorn-shaped fruit are unusually colored with ivory and green. Ideal for single servings, the sweet, tender orange flesh is a delight. Medium size vines produce fruit that store for 3-4 months.

00797 Treated seed: 25 sds \$2.07; 1 oz \$15.50;
¼ lb \$48.50.

HUBBARD

Blue Magic F1

100 Days. This small hybrid Blue Hubbard has the same great eating qualities as a normal size hubbard, with its fine-grained, tasty flesh. The 4-6 lb. fruit are produced on semi-vining plants. 2,000 seeds/lb.

11791 Treated seed: 25 sds \$5.75; 1 oz \$15.19;
¼ lb \$48.15.

QUEENSLAND BLUE

BUTTERNUT

Atlas F₁ ●

110 Days. These large 5-7 lb. fruit are cream colored with dark orange flesh. The uniform cylindrical fruit are easy to peel and produce large amounts of flesh that is good for cooking and for freezing.
11786 Treated seed: 25 sds \$6.75; 250 sds \$24.95.

Hamilton Organic ● PMP

95 Days. An open pollinated butternut produced in New England, Hamilton's unique deep orange flesh has exceptional butternut flavor, high sugars and an abundance of flesh. Fruit size averages 2-3 lb.
12828 Organic seed: 25 sds \$5.29; 250 sds \$20.53.

Waltham Butternut AS ●

97 Days. Our most popular winter squash, the fruit are 8-10" long with thick, cylindrical necks and a creamy tan skin. Produced on large vines, these squash are remarkably uniform with thick, meaty necks.
00825 Treated seed: 25 sds \$4.95; 250 sds \$6.79.
00825 Organic seed: 25 sds \$5.45; 250 sds \$9.95.

SPAGHETTI

Primavera F₁ ●

93 Days. Growers have been asking us for a more uniform spaghetti squash and this is it. Primavera squash is a uniform, high yielding, 2-1/2 to 3 lb. variety with a nice, canary yellow skin color at maturity. Its restricted vine allows for a more concentrated fruit set.
11029 Untreated seed: 25 sds \$8.50; 250 sds \$28.07.
11029 FarMore Treated seed: 250 sds \$28.74.

GARDENER
FAVORITE

SPECKLED HOUND F₁

Tivoli F₁ AS

98 Days. The first national All-America Selections bush-plant spaghetti squash winner. With a small bush habit, plants offer a high yield potential and are space-saving. Fruits are large and oval, weigh 4-5 lbs., and have creamy flesh that is very easy to shred with a fork after roasting.
12485 Untreated seed: 2250 sds \$19.10.

SPECIALTY

Autumn Frost F₁ ● PMP

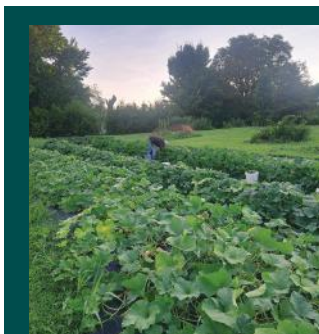

100 Days. Uniquely ribbed, round fruit ripens to dark tan with a frosted overlay. Flesh is similar to butternut with superior flavor, quality, and storage of up to 4 months. Prepare by cutting lengthwise for roasting or cut the top 2" to stuff and bake upright.
12961 Treated seed: 25 sds \$5.95; 250 sds \$28.42.
12961 Organic seed: 225 sds \$6.54; 250 sds \$30.90.

Queensland Blue

95 Days. This ribbed, dark blue-green pumpkin-like squash produces 8-10 lb. fruits with thick, sweet, meaty, orange flesh that is excellent for cooking. Use for fall decoration and then store in a cooler or root cellar for winter use.
12428 Untreated seed: 25 sds \$3.29; 250 sds \$15.27.

Speckled Hound F₁ ●

100 Days. Blocky fruit have a unique peach color with green and teal splotches that make this squash both decorative and edible! The thick yellow-orange flesh is very tasty, with a dry texture similar to a buttercup squash.
11772 Treated seed: 25 sds \$8.00; 250 sds \$26.72.

GREEN ZUCCHINI

Green Machine F1 Organic

44 Days. This high yielder is widely adaptable, producing 7-8" uniform medium green fruit with light flecking. A strong open plant allows easy harvest.

12205 Organic seed: 25 sds \$11.10; 50 sds \$16.00; 250 sds \$29.50.

Spineless Perfection F1

45 Days. This open, upright plant has spineless leaf petioles which makes harvest easier and minimizes fruit damage. The medium-green fruit have slight flecking and the stem allows easy harvest with just a twist.

11796 FarMore Treated seed: 25 sds \$11.25; 250 sds \$37.95.

11796 Untreated seed: 25 sds \$10.50; 250 sds \$35.17.

GOLDEN ZUCCHINI

Gold Rush F1

52 Days. A true zucchini with bright, golden-yellow color! The fruit are smooth, cylindrical and uniform on open, upright plants.

00827 FarMore Treated seed: 25 sds \$7.50; 250 sds \$33.41.

Yellowfin F1 Organic

47 Days. Beautiful deep yellow color is expressed best in cooler conditions and carries up into the peduncle. The plant habit is open and semi-spineless for easy picking. Pick daily for continuous yields and longer lasting plants.

12829 Organic seed: 25 sds \$12.45; 250 sds \$48.34.

YELLOW SQUASH

Multipik F1

50 Days. Bearing early and continuously, Multipik has tremendous yields, even by summer squash standards. This high quality squash has a light sweet taste that you'll enjoy all season long.

00810 Treated seed: 25 sds \$3.95; 250 sds \$14.46.

00810 Untreated seed: 25 sds \$3.95; 250 sds \$14.46.

SPECIALTY SUMMER SQUASH

Lemon Sun F1

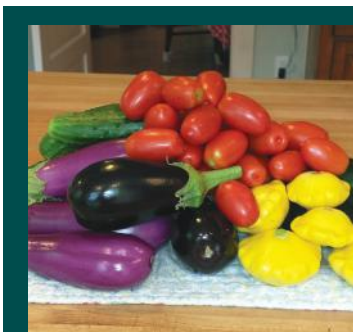

45 Days. Vigorous bush plants set high yields of this sweet and tender yellow patty pan squash. The uniform scalloped fruit are bright yellow with no green on the blossom end and are best harvested when 4" wide or smaller. Baby fruit can also be picked with the flower still attached. Lemon Sun is also a great choice for squash blossoms, setting a high number of male flowers.

13494 Treated seed: 25 sds \$4.95; 250 sds \$20.04.

Sunburst F1

50 Days. This early, productive variety yields high quality squash that are versatile for cooking. Harvest young squash at 2-3" in diameter to cook whole, or slice up larger fruit before cooking. They will be the most tender if harvested at a diameter of 4" or less.

00815 FarMore Treated seed: 25 sds \$5.85; 250 sds \$23.57.

ARTISAN™ PINK BUMBLEBEE ORGANIC

SUPERSWEET 100 F1

TROPICAL SUNSET ORGANIC

CANDYLAND RED

ESTERINA F1 ORGANIC

SPARKY XSL F1

TOMATOES

Growing Tips: Sow seeds indoors 5-6 weeks prior to transplanting. Like peppers and eggplants, seed germinates best at a soil temperature between 75-85°F, most easily maintained using a heat mat. Make sure seedlings get plenty of direct sunlight or use supplemental lighting to ensure healthy transplants. Supply fertilizer and even watering for strong fruit set. Plastic mulch and staking will reduce disease and make harvest easier. Grow tomatoes in containers on your patio to have fresh fruit just outside your door!

CHERRY

Artisan™ Pink Bumblebee Organic ●

70 Days. Indeterminate. This 1-1½" round cherry tomato has superb flavor and beautiful pink and yellow stripes. Fruit resist cracking and are extremely versatile in the kitchen.

11256 Organic seed: 50 sds \$6.15; 100 sds \$11.79; 250 sds \$26.81.

Candyland Red Currant tomato

58 Days. Indeterminate. This currant tomato has a much more manageable and compact plant than others of this type. Its ½" sweet, round, deep red fruit are produced on long trusses.

12335 Untreated seed: 50 sds \$5.95; 100 sds \$10.93.

Esterina F1 Organic ●

60 Days. Indeterminate. Very sweet 1-1½" cherry tomatoes are highly crack resistant. This multi-cluster type produces heavy yields of flavorful, bright yellow-orange fruits.

12333 Organic seed: 50 sds \$17.67; 100 sds \$28.41; 250 sds \$55.16.

Sparky XSL F1

65 Days. Indeterminate. From the Cream of the Crop brand, Sparky XSL has exceptional flavor and sweetness, beautiful gold striping, and high yields per plant. With the X-tended Shelf Life trait, fruits hold well in the garden and on the shelf after harvest.

12984 Untreated seed: 50 sds \$14.95; 100 sds \$27.92.

Supersweet 100 F1 ●

70 Days. Indeterminate. Exceptionally sweet and high in Vitamin C, Supersweet 100 produces hundreds of small cherry tomatoes in clusters.

00851 Untreated seed: 50 sds \$6.14; 100 sds \$9.45.

00851 Pelleted Untreated seed: 50 sds \$7.00.

Tropical Sunset Organic ●

65 Days. Indeterminate. A favorite from our trials, Tropical Sunset has earned its place in the Cream of the Crop Series from its sweet fruity flavor (8% Brix) and beautiful golden fruit with orange-pink blush. Fruit are round, 1 ½" in diameter, and hold well on the plant when ripe. Healthy indeterminate plants perform well in beds and greenhouse plantings.

12983 Organic seed: 50 sds \$4.95; 100 sds \$7.60.

11171 Untreated seed: 10 sds \$3.27; 100 sds \$7.80.

Mountain Magic F1

75 Days. Indeterminate. A gourmet cocktail type that produces high yields of 2 oz. fruit that have great flavor and high sugars. The plant has a high level of resistance to disease.

11382 Untreated seed: 10 sds \$6.87; 100 sds \$16.96.

Purple Zebra F1

80 Days. Indeterminate. This AAS winner has beautiful dark red fruit with green stripes and a deep mahogany red interior. A Cream of the Crop variety with firm texture, rich complex flavor, and good tolerance to cracking. High resistance to disease.

13265 Untreated seed: 50 sds \$29.95; 100 sds \$54.95.

SAUCE FOR CANNING

Bellatrix F1

65 Days. Determinate. An early maturing and high-yielding Roma tomato with a concentrated set and excellent quality for cooking and preserving. Fruit are 4-5 oz and have low incidence of blossom end rot. They perform best in the ground or large container. High resistance to disease.

65264 Untreated seed: 50 sds \$16.53;

100 sds \$28.58.

Roma VF

80 Days. Determinate. Compact plants produce plum-shaped, thick-walled fruit measuring 2½-3" long. Fruit are great for paste, juice, canning or fresh eating.

00886 Untreated seed: 50 sds \$2.95; 500 sds \$8.54.

GROUND CHERRY

Aunt Molly's Organic

85 Days. Once a very common home garden crop, ground cherries have become increasingly hard to find. The excellent citrus flavor enlivens salads, jams, pies, and sauces. Encased in a paper-like husk, fruits will store 3-4 weeks under cool and dry conditions. Bushy productive plants grow 24" tall. Great for containers. A fun and easy fruit for children to grow in the garden.

12500 Organic seed: 10 sds \$1.95; 50 sds \$3.16;

250 sds \$6.39.

Each collection contains a 25 ct. bag of Red Karmen, White Snowball, Yellow Stuttgarter, and Yellow Globe Fresh Pack.

12802 Collection \$25.95; Get 2 for \$23.95 ea.

ONION PLANT COLLECTION

Each collection contains one bunch each (50-60 plants/ bunch) of Candy, Redwing, and Super Star.

06523 Collection

\$39.95

SPRING SHIPPING

Onion and Shallot Sets ship from Rochester, NY beginning **April 7, 2025**. Onion and Leek Transplants ship directly from grower. Default ship weeks are assigned based on historical best planting time for your area. Please be sure to specify desired ship week when placing your order.

Tomato
ATREVIDO F1

EASY FREEZER MARINARA *This recipe makes roughly 5 pints.*

INGREDIENTS

8 to 10 lbs of Atrevido tomatoes
3 (6oz) cans of tomato paste
4 tbsp minced garlic
½ cup chopped yellow onion
2 tbsp lemon juice
⅛ cup white sugar

½ tbsp salt
½ tbsp black pepper
1 tsp red pepper flake
2 tbsp garlic powder
2 tbsp dried basil
2 tbsp dried oregano
3 tsp onion powder

DIRECTIONS

Blanch and skin your tomatoes. In a large stockpot combine all ingredients and cook down on low heat for 2-3 hours stirring occasionally. Use an immersion blender to even out the texture. If it's too sweet for your liking add more lemon juice one tsp at a time, then add to jars.

NOTES

You can either keep in the fridge for up to two weeks or freeze. You cannot can this recipe as the acidity levels are not safe. Be sure to only fill your jars ³/₄ of the way full if you are freezing to keep your jars from breaking. While we use this sauce primarily as a pizza sauce, it's great on pasta and homemade bread as well.

INDEX OF ORGANIC VARIETIES

\$150.01-\$200.00	\$22.99
\$200.01-\$249.99	\$24.99
\$250 or more.	FREE

Standard Shipping

Upon receiving your order, please allow us 48 hours to process and ship your order. Due to high demand during the peak months of January-May, orders may require additional time for packaging/shipment. Preferred shipment carriers are USPS and UPS. Please advise if you require a special carrier

Expedited Shipping

Expedited shipping is available upon request. Additional charges apply. Please call for details.

Truck Shipping

Large seed and supply orders may be shipped by truck. Additional charges apply. Please call for details.

Shipping Outside Continental U.S.

We are unable to ship outside the USA at this time. Additional charges may apply when shipping to AK, HI, PR, or U.S. holdings outside of the contiguous USA. Also please note that Credit/Debit cards, Checks and Money Orders must be from a U.S. based financial institution.

Additional Fees & Surcharge

Please be advised that our S&H rates are subject to change and that a surcharge may be applied for a select number of products that require additional postage, including large and heavy supplies, and live plant products shipping directly from our partner growers. Orders shipping to PR will incur a \$10 fee for phytosanitary certificates (per order). Please take advantage of our ship complete process to ensure all items ordered will ship. Back orders will be canceled.

P.O. Boxes & Street Addresses

Customers with P.O. Boxes should include a complete street

address to ensure prompt delivery.

Deliveries

Please meet your driver when possible and bring in your box(es) from the elements ASAP. Do not refuse shipment for any reason, you will still be financially responsible for the items. Any issues with shipping must be reported within 24 hrs. Please be available on your delivery date.

Shipping & Handling: PLUGS, BULBS, BARE-ROOTS, AND TUBERS

**Subject to vendor's terms and conditions.*

P.O. Boxes: Vendors cannot ship live plants to PO Boxes.

Please provide a physical address and phone number at order placement.

Freight: Plugs, live bulbs, roots are shipped by the supplier. Freight is estimated for plug orders until shipping when true freight has been received.

Sales Policies

Sales Tax

Sales tax is charged on all orders shipping to a state where we have Sales Tax Nexus. As of 7/1/2024 this includes all states with the exception of AK, DE, MT, NH, NM, and OR (for the most up to date list, please visit our website). Sales tax will be charged on all purchases within those states unless we have your resale or tax exempt certificate on file. If you are tax exempt, please include your resale or tax exempt certificate with your initial order. See Deliveries section under shipping and handling: seeds

Return & Refund Policy

All seed sales are final. All supplies must be returned in saleable condition within 90 days of purchase. We no longer accept returns or exchanges unless the product is damaged in transit or if the incorrect item was shipped. All damaged orders must be accompanied by a Return Authorization number (RMA), which can be obtained by calling us at 800.544.7938. For plug and live orders, claims must be made within 24 hours after receiving shipment.

Cancellation Policy

Orders for Live Goods may be canceled up to 5 weeks prior to the ship date. Unfortunately, cancellation requests made later than 10 business days prior to the ship date cannot be accommodated.

Prorate Policy

All seeds and plants listed for sale in this catalog are subject to delivery by our growers and suppliers. In the event that a variety is not delivered in full, we may choose to prorate the amount sold to each customer.

Catalog Pricing

Prices in this catalog are effective through June 30, 2025 and are subject to change without notice.

Harris Seeds and Customer Responsibilities

Variety Selection & Cultural Practices

The varietal descriptions and cultural information in this catalog are based on the observations and experience of our employees, associates, and suppliers. We strive to present the varietal and cultural information you need to choose appropriate varieties and raise them successfully.

Customer results may differ from our printed information as growing conditions vary considerably depending upon geographic location, soil type, climatic conditions, pest or disease pressures, and cultural practices.

We recommend that you consult your state's agricultural extension service for varietal suggestions and cultural information specific to your local area. **Although we do our utmost to provide accurate, helpful information and advice, you alone are ultimately responsible for the success or failure of your crops.**

Plant Diseases

Many flower and vegetable species are susceptible to serious seed- and soil-borne diseases. Our seed is carefully grown, treated, and/or tested to prevent seed-borne infection. Despite our best efforts, we are unable to guarantee absolute freedom from seed-borne disease, nor soil-borne organisms from attacking plants during growth. We try to offer superior varieties with resistance and/or intermediate resistance to diseases whenever such varieties are available and adapted to your conditions. We urge you to look for these features as you plan your seed purchases.

Free standard shipping on orders over \$250!

SHIPPING & HANDLING

Shipping & Handling charges include outbound freight and packaging materials. Charges apply to all orders (excluding plugs & liners, and select wholesale items), and are based on the total order value before tax.

BLUE RIBBON VEGGIES

Recipe makes 1 pint jar of pickled vegetables

INGREDIENTS

1 tsp pickling salt
1 clove of garlic
¼ tsp mustard seed
1 tsp dill

1 whole bay leaf
¼ tsp red pepper flake
½ cup white vinegar
1½ cup - 2 cups your choice of vegetable

DIRECTIONS

Pack your jars with washed and cut veggies. No higher than the bottom rim. Add all the dry ingredients to each jar. Then measure out your vinegar and add it to each jar pouring slowly to wash your seasonings down into the jar. Fill the rest of the way with water to the bottom lip. Wipe the edges of your jars clean (very important), secure your seals, and process in a water bath for 10 minutes. Let cool completely before checking the seals.

NOTES

If you are new to canning this is a great easy recipe to start with. Just remember, for safety reasons, canning recipes should never be altered, sterilized equipment and jars are essential, new seals **MUST** be used every time, and if for any reason your jar doesn't seal or it loses enough liquid in the canning process to leave exposed food in a large head space it must be eaten or refrigerated immediately.

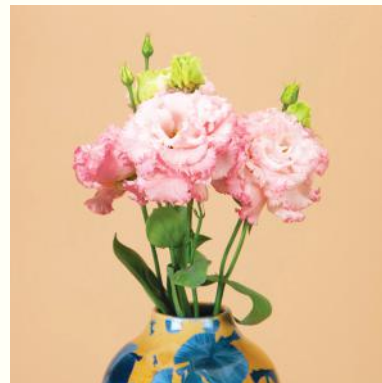

Quirky. Endearing. Infinitely gift-able.

Introducing our new friends: Plantgem.

Welcoming novices, paying homage to the legends, and embracing outsider garden artists, Plantgem seeks to find the most far-out plants and bring them into your garden. Shop by season, color, zodiac, generation, even musical preferences. Experiment. Get weird.

Live Plants

Giftable Seeds

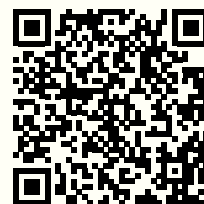

Dahlia Tubers

Plantgem is a breath of fresh (peony scented) air, offering a unique catalog of curated plants to the playful gardeners of the Harris Seed Family.

Plantgem[®]

grow something special | plantgem.com | [@theplantgem](https://twitter.com/theplantgem)

MUST-HAVE BEDDING PLANTS FROM SEED:

Wondering what to grow? Bedding plants are the fun way to seasonally brighten your steadfast perennials, trees, and shrubs with pops of whimsy and points of interest. Pick a color scheme that fits what you feel this year and mix and match! Continuously blooming flowers, interesting leaf textures, unexpected shapes, and pleasant scents make annual bedding plants a fun way to change up your garden every year.

AMMI *Page 58*

Commonly known as Lace Flower, akin to dill, the gentle lace-caps sway in the breeze with an elegant touch. An absolute must for any cottage garden.

This season's favorite: The color-changing Chocolate Lace (Dara), with tones ranging from pale pink to deep burgundy

Popular colors: Earth tones, white

GERANIUM *Pages 65*

The stoic matriarchs of the bedding flower family, we enjoy their foliage as much as their flowers.

This season's favorite: The lily-pad-shaped, variegated leaves of the Maverick Series

Popular colors: Red, pink, and bicolors

IMPATIENS *Pages 66*

Put color back into the shade! Now bred with Downy Mildew resistance, this garden staple plants well with coleus (page 62) and silver falls (page 89)

This season's favorite: The double blooms of the Athena Mix

Popular colors: Go BRIGHT in the shade!

COLEUS *Pages 62*

Put dynamic color in the shade with the foliage of Coleus. Their leaves steal the show, but spikes of tiny pale purple flowers pop up whenever they please throughout the growing season.

This season's favorite: The outrageous colors and patterns of Chocolate Covered Cherry

Popular colors: Vibrant limes mixed with deep reds

IPOMEA (MORNING GLORY) *Page 68*

No annual garden is complete without some climbers. Morning Glory flowers last only one day each - but they bloom constantly and abundantly all season, and are reliable re-seeders.

This season's favorite: The alluring scent of the night-blooming Moon Flower

Popular colors: Blue, purple, white

PETUNIA *Pages 69-71*

The most popular genus found in garden centers across the country. Most commonly known are the Wave petunias, perfect for hanging baskets and containers.

This season's favorite: The playful purple of Shock Wave Denim

Popular colors: Silver, purple, and blue

SNAPDRAGON *Page 72*

A great option for cooler climates with long sunny days, Snapdragons provide a vertical point of interest and a gentle, pleasant scent - that's just enough to keep the deer at bay.

This season's favorite: Bring yellow back to the garden in style with the butter-colored Double Shot Yellow.

Popular colors: Gentle pastels - great when mixed together.

VINCA *Page 75*

Annual vinca, or annual periwinkle, are heat-loving annuals that produce large, flat flowers with overlapping petals that cover glossy green foliage.

This season's favorite: The vibrant, gem-toned Tattoo™ series

Popular colors: Unexpected shades of pink ranging from deep berry to peach.

AGROSTEMMA
MILAS QUEEN MIX ORGANIC

AGERATUM - BLUE HORIZON F1

AMMI - DARA

AMMI - GREEN MIST

ANEMONE - MONA LISA MIX F1

AGROSTEMMA

Milas Queen Mix Organic

A mix of white and purple 2" flowers in a classic single bloom shape, providing the quintessential cottage garden feeling for a mass planting or pop of color. Flowers reach up to 3 ft high on long stems and look lovely bobbing in the breeze. A great beginner flower for direct sowing.

23463 Organic seed: 50 sds \$2.25; 250 sds \$6.94.

AGERATUM

Blue Horizon

Ageratum are sun loving plants that produce an abundance of small fuzzy blooms. Masses of flowers cover the well branched plants.

02000 Untreated seed: 50 sds \$5.66;
500 sds \$13.45.

AMMI

Ammi, also known as False Queen Ann's Lace, creates dill-like florets consisting of tiny flowers. Plants may need support if grown in unprotected areas. Can be direct sown in winter or early spring. They make an excellent "filler" for bouquets.

Dara (Chocolate Lace)

This is an intriguing novelty for cut flowers. Dara produces 4-5" flower panicles that are typical of lace flowers, but with an intriguing color range of soft, pale pink to rich, dark purple.

22956 Untreated seed: 250 sds \$6.57.

ANGELONIA - SERENA MIX F1

Green Mist

Green Mist Ammi's green to white flower heads offer an appealing contrast compared to traditional all white Ammi varieties. Large domed green and white umbels with feathery foliage add interesting color and texture in cut flower bouquets.

20376 Untreated seed: 50 sds \$3.65;
250 sds \$12.45.

ANEMONE

Mona Lisa Mix F1

A masterpiece among anemones: Mona Lisa puts out up to 18 flowers per plant and blooms under lower winter light levels. Mix of pink, purple, red, and white shades. Height: 16-20", 6-8" spread.

21877 Untreated seed: 25 sds \$12.37;
50 sds \$22.99; 100 sds \$27.62

ANGELONIA

Serena® Mix F1

Serena Angelonia seeds develop into a lovely plant that produces continuous blooms from early spring through summer. A hardy annual, this summer snapdragon will amaze you with its elegant look and dainty flowers in lush, bold colors such as pink, purple, and white against rich green foliage. Suitable for borders and containers, this variety delights even the most discerning gardener. A multi-award winning series, the superb, low-maintenance Serena F1 doesn't need much water and thrives in the summer heat, with vivid flowers that attract butterflies and hummingbirds.

20255 Pelleted Untreated seed: 25 sds \$14.13;
50 sds \$20.33; 100 sds \$30.16.

of Oceanview, Delaware

CAUDATUS RED

CORAL FOUNTAIN

DREADLOCKS ORGANIC

AMARANTHUS

Both hanging and upright types offer an enchanting look in the garden that plays well in bouquets. Pinch at 9 inches for multiple cuttable stems. Direct sow outdoors after last frost to garden beds or pots.

Caudatus Red

Commonly known as Love-Lies-Bleeding, this interesting old fashioned annual is best known for its large, drooping tassels of flowers that spill from the tall plants. They are often grown for cut flowers to use in fresh and dried arrangements, and in wreaths where they add both color and texture.

21926 Untreated seed: 50 sds \$3.57;
250 sds \$4.67.

Coral Fountain

Spilling tassels of coral and muted pink shades. This interesting old fashioned grain is a favorite direct sow flower. Hanging and upright types offer an enchanting look that designers will love.

24093 Untreated seed: 50 sds \$3.12;
250 sds \$4.85.

Dreadlocks Organic

Husky plants with thick knotted trails of deep red blooms falling from sturdy stems. Dreadlocks will add funky creativity to any cut flower display. Height: 24-36".

23464 Organic seed: 50 sds \$3.57; 250 sds \$8.68.

Hot Biscuits Mix Organic

Feathery flowers, with earthy cinnamon color. A great filler to compliment white and pale-pink statement blooms. Plumes can be multiplied if you pinch the center bud. Height: 4'.

23466 Organic seed: 50 sds \$2.36; 250 sds \$9.83.

Mira

Trailing bi-colored lime-green and raspberry-rose dreadlock ropes. Expect a mix of all lime, all pink, and speckled ropes cascading from this striking technicolor, decorative grain.

A whimsical spiller for window boxes and mixed containers. 23994 Untreated seed: 250 sds \$7.54.

  **CALENDULA - KINGLET FORMULA MIX**

  **CELOSIA - CELWAY MIX**

CALENDULA

Kinglet Formula Mix

We love the unusual yet classic shape and form of Calendula. Cut flower growers gravitate to this Kinglet for the clean, crisp flowers in bright and cheerful colors. A stunning mix of orange, yellow and apricot shades.

23348 Untreated seed: 550 sds \$2.71;
250 sds \$6.40.

CELOSIA

Celosia thrives in high summer heat, producing long-lived blooms that add color, texture, and surprising shapes to gardens and containers. Start indoors 4-6 weeks before transplanting outdoors..

Celway Mix ●

The series reputation for long vase life is a plus for cut flower gardeners. Mix includes shades of lemon, orange, purple, red, terracotta, and white. Height: 28-40", 5" spread.
21930 Pelleted Untreated seed: 25 sds \$8.04;
100 sds \$18.31.

Century Mix

Century Mix offers intriguing texture and stiking color in the form of feather-like blooms. Also known as cockscomb, the large, bright plumes grow tall enough to make it ideal for cutting. Also an excellent in both pots and beds. Colors include cream, orange, red, salmon and yellow.

02250 Untreated seed: 50 sds \$4.15;
500 sds \$13.35.

Supercrest Mix Organic ●

Mixture of fan-shaped flower combs in iridescent shades of green, orange, pink, red, and yellow. As peculiar as it is pretty, resembling coral reef or even brains, Supercrest makes for a surprising pop of texture and shape amongst more traditional blooms like begonias and marginals in mixed containers. Height: 36-48", 6-8" spread.

23264 Organic seed: 50 sds \$3.72;
250 sds \$6.91.

COLEUS

Chocolate Covered Cherry

Although all coleus varieties perform well in shady locations, some varieties will also tolerate much sunnier conditions. This variety is adaptable to full sun conditions where there is high humidity. Under dryer conditions, partial shade is recommended to prevent leaf scorching. This coleus flowers late, thus its feature is its foliage. They are well-suited for containers, landscapes, and garden accent plants. Color: Rose centers on each leaf are surrounded by deep mahogany, and topped off with thin green margins.

22436 Pelleted Untreated seed: 25 sds \$6.97; 100 sds \$24.06.

Giant Exhibition™ Mix

Giant Exhibition features extra large leaves on a compact plant habit. Leaves are about 6-7" long on mid-height plants, providing a colorful display in gardens, containers and landscapes. Formula mix of five colors - Limelight (green), Magma (burgundy), Marble (marble pattern of reds, green and white), Palisandra (dark purple-black), Rustic Red (red/maroon with green margins).

20268 Untreated seed: 100 sds \$15.55.

Premium Sun Coral Candy

The first seed coleus to ever win the coveted AAS Winner designation! Coral Candy features unique, multicolored foliage on a uniformly compact plant. This new form has narrow, serrated leaves that gracefully drape down the mounded plants.

24138 Pelleted Untreated seed: 25 sds \$9.83; 100 sds \$24.54.

Rainbow Formula Mix

This popular container and bedding strain has broad leaves on well-branched plants. This mixture is full of surprises, with a wide range of pattern combinations.

02300 Untreated seed: 500 sds \$9.18.

Wizard Select Mix ●

Oval to heart-shaped leaves in a charming color range. Garden performance is superior due to the dwarf basal branching plant habit. Mixture of Coral Sunrise, Mosaic, Pastel, Pineapple, Scarlet, Sunset, and Velvet Red.

20812 Untreated seed: 50 sds \$4.10; 500 sds \$9.20.

🌱🌱🌱 DOUBLE CLICK EXTRA MIX

COSMOS

These beauties make lovely additions to mixed arrangements and are a hit for cottage gardens. Start indoors 4-6 weeks to transplant or direct sow after last frost in garden beds.

Double Click Extra Mix

Mixture of semi-double to fully double fluffy flowers. Color mix of burgundy red, medium rose, violet, and creamy white. Height: 24-36", 18-24" spread.

20201 Untreated seed: 50 sds \$6.23;
250 sds \$11.10.

Sea Shells Organic

Unique fluted petals form tubular shell-like flowers in shades of carmine, pink, rose, and white. Height: 36", 24" spread.

23269 Organic seed: 50 sds \$3.05;
250 sds \$6.05.

Versailles White Rose Edge

Excellent for cut flowers and for the back of borders in the garden. This favorite for flexibility produces large flowers under short day conditions. Color: White-rose bicolor. Height: 36-42", 24-30" spread.

24091 Untreated seed: 50 sds \$2.10.

Xanthos Mix

Early flowering with 2.5" soft butter-yellow blooms on a nice compact, well-branched habit, this novelty Cosmo is a top attraction for borders, bedding, patio and cut flowers. A European garden award winner! Height: 36-42", 24-30" spread.

23185 Untreated seed: 50 sds \$8.66;
250 sds \$14.22.

DIGITALIS

Camelot Mix F1

Stately Camelot produces a superior central spike, followed by numerous secondary spikes on strong stems. Flowering first year from seed, large tubular, speckled florets populate each spike for an elegant appearance. Blooms late spring to mid-summer. The hybrid genetics translates to high germination, uniform plant habit and uniform flowering. Zones: 5-9; Height: 42-48", 12" spread.

20022 Pelleted Untreated seed: 25 sds \$4.88; 100 sds \$11.04; 500 sds \$45.45.

GAZANIA

New Day Mix

This happy mix gives you large flowers in shades of orange, red, rose, yellow, and white, with several varieties having stripes. These unique blooms close at night and on cloudy days, but open as the sun shines! A wonderful flower for children to grow. They are tough in various conditions and drought tolerant. Start indoors 6-8 weeks before last frost then transplant to garden beds or pots. Height: 8-10", 6-8" spread.

22203 Untreated seed: 50 sds \$6.74; 250 sds \$17.06.

GERBERA

Gerbera make for a fantastic cut flower for their fanciful colors and long, strong stems. A member of the Aster family, they are closer in relation to sunflowers than they are to traditional perennial daisies. They do not like "wet feet", so be careful not to over-water, allowing the top inch of soil to dry out between waterings. Bottom watering is suggested. These are an excellent investment for growers with greenhouses, as they will bloom all year. Repot to a bigger container every 12-18 months to allow your plants to grow and flourish. When grown outdoors, they are hardy annuals and perennials in mild regions.

Cartwheel Strawberry Twist

This lively mix offers large, showy, semi-double flowers such an unusual form! They are best grown in 5" pots or larger and are the perfect gift for Easter and Mother's Day. The colors range from shades of buttery yellow with a hint of pink, to deep strawberry red with a pop of yellow.

22656 Untreated seed: 50 sds \$37.14; 100 sds \$50.94.

Colorbloom Mix

So bright and vibrant - they hardly seem real! The ColorBloom Gerberas are quick to bloom and their compact plants produce long-lasting flowers. Gardeners love their fanciful nature.

63941 Untreated seed: 10 sds \$7.94; 50 sds \$31.57; 100 sds \$43.30.

GOMPHRENA

Ping Pong Series ●

Gomphrena is beloved for being both playful and pretty, delivering an explosion of colorful ball-shaped blooms that fit any garden style. It adds height, shape, texture, and dimension, making it terrific as a cut flower for fresh bouquets or dried. Easy to grow, tolerant to drought, and minimal maintenance required makes it great for beginners. Start indoors 4-6 weeks before last frost then transplant to garden beds or pots. Height: 16-20", 8-10" spread.

23196 Purple

23195 Mix: Shades of lavender, purple, and white.

Untreated seed: 250 sds \$13.31.

GERANIUM

Geraniums are relatively easy to start from seed, although they take a bit of time. Start indoors 10-12 weeks with extra heat and lights before last frost then transplant to garden beds or pots. As tough as they are pretty, with long bloom times, if you are planning on a mass planting of geraniums, starting from seed is the most economical option for these reliable but often pricey garden favorites.

Bulls Eye™ Mix F1

Unique, rich chocolate foliage contrasts beautifully with the bright flower colors in this geranium series. As uniform as its green-leaved Maverick cousins, growers enjoy the benefits of high-germinating seed, ease of control when growing, and long lasting blooms. You can be confident that the plants retain their dark foliage even under high light conditions. Color: Mixture of Cherry, Salmon and Scarlet, with rich chocolate foliage.

20699 Untreated seed: 25 sds \$9.79;
100 sds \$22.16.

Maverick™ Series F1

This uniform flowering geranium series features multiple stems and large blooms. Known for long bloom seasons and attractive, lily-pad shaped foliage. Mavericks are a classic, and always steal the show in the garden.

02560 Star: Attractive white edged with rose

06869 Violet

20143 Mix: Shades of orange, pink, red, rose, salmon, star, violet, violet picotee, and white.

Untreated seed: 25 sds \$8.96; 100 sds \$20.37.

Quantum™ Mix F1

The attractive star-shaped flowers play well with serrated foliage, making this an eye-catcher! This unique series is less prone to shattering, offering great heat tolerance and a beautiful display of color that lasts longer than your average geranium. Mix of pink, red, and salmon. Height: 12-16", 12-16" spread.

23843 Untreated seed: 25 sds \$10.83;
100 sds \$24.53.

Reach Out Mix F1

No more tangled plants! The compact habit and short internodes make this new Ivy Geranium easy to grow. Reach Out provides a canopy of color. Ivy geraniums have waxy leaves and flower heads that are not as large or globular as common geraniums, but still cover plants nicely. Their trailing habit makes them particularly suitable for containers, window boxes, and hanging baskets. Color: Lavender, pink, red, and white shades.

23843 Untreated seed: 10 sds \$10.07;
100 sds \$55.40.

MORNING GLORY (IPOMOEA)

A vigorous climber that begins blooming in early summer and produces attractive flowers all the way through fall. Can be grown in the ground, in trellised containers, and hanging baskets.

Carnival

Redefine what you imagine when you think "morning glory": Hot magenta and purple blooms with bold white stripes. These climbers are for gardeners who like to put on a color show. Blooms last for just one day but plants produce them abundantly all season long.

20994 Untreated seed: 500 sds \$3.97.

Giant White Moonflower

Huge 5" white flowers are fragrant when they open in the evening. Recommended for planting along decks and porches, where the evening fragrance and white luminescent flowers can be enjoyed.

02996 Untreated seed: 50 sds \$2.40; 500 sds \$7.17.

Heavenly Blue

The quintessential Morning Glory of yesteryear, we love Heavenly Blue's traditional 2-4" periwinkle flowers, that bloom plentifully, each one lasting only a day. Height: 12", 6-12" spread.

02974 Untreated seed: 50 sds \$7.39; 500 sds \$9.28.

NASTURTIIUM

Nasturtium make excellent fillers for containers and hanging baskets. They are also a nice fill-in item for garden beds and can be used as an annual ground cover. Frequently used in the restaurant trade as a garnish, the whole plant is edible, with flavor similar to watercress, that's peppery on the back end.

Baby Series

AAS's expert judges praised the uniformly compact plants that sported flowers with consistent coloration. Their compact habit means less "flower flopping," with their blooms remaining upright throughout the season. Height: 10"-12", 6"-12" spread.

65821 Orange: bright orange

23774 Rose: unique rose

Untreated seed: 50 sds \$7.69; 250 sds \$25.49.

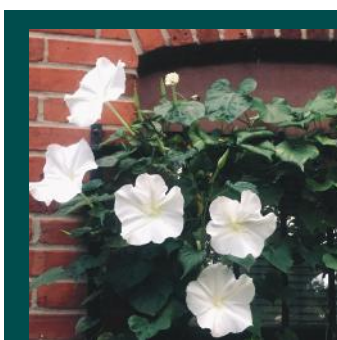

NIGELLA

Miss Jekyll Mix Organic

Nigella's are funky, fun - and edible! This mix is a great filler in bouquets or for garnishing dishes. Seed pods are a secondary accent later in the season. Colors includes shades of pink, purple and white. Height: 16-24, 9-12" spread.

23468 Organic seed: 25 sds \$2.32; 50 sds \$3.15; 250 sds \$8.45.

PETUNIAS (CONT.)

SPREADING

Shock Wave® Series F1

The Shock Wave series has found its niche as the small flowered, spreading seed petunia series of choice. The earliest to flower in the spreading petunia class, they yield a proliferation of 1½-2" blooms that blanket the mounded plants. See the diagram on page 69 for best outdoor uses. Height: 7-10", 20-30" spread.

22468 Deep Purple ●

23791 Purple Tie Dye: purple-blue and white bicolor

Pelleted Untreated seed: 25 sds \$11.71;

100 sds \$26.14.

Tidal Wave® Series F1

Considered a 'hedgiflora' petunia, this series is an aggressive grower, forming an almost 'shrub-like' shape that holds all summer long. A great landscape petunia, space 12" apart in the ground for a dense mounded hedge, or 24" apart for a ground cover. Tidal Wave is also the petunia of choice for the super large planters used in corporate and municipal landscapes. See the diagram on page 69 for best outdoor uses. Height: 16-22", 30-60" spread.

02211 Silver:  silvery white to pale lavender flowers. Slightly later to flower, more dense and mounded plant habit

22974 Velour Red: ●  dark blood red with velvety undertones and dark throat

Pelleted Untreated seed: 25 sds \$11.71;

100 sds \$26.14.

UPRIGHT GRANDIFLORA

- Upright plant habit
- Large single (up to 5" diameter) or double flowers
- Fewer flowers, but flowers are large and showy
- They take a hit in rainy weather, but will bounce back
- Great for garden beds and patio containers

Double Cascade Mix F1

Fully double flowers are large and showy. Mix includes shades of blue, burgundy, orchid, and pink. Height: 10-15", 10-12" spread.

02299 Pelleted Untreated seed: 50 sds \$5.35;

250 sds \$10.72.

Sophistica® Blackberry F1 ●

Petunias for the designer! Large 'one-of-a-kind' shimmering black with reddish purple undertone blooms fill out lush upright plants. Height: 10-15", 10-12" spread.

22469 Pelleted Untreated seed: 25 sds \$7.70;

100 sds \$17.19.

Dillen High Quality Hanging Baskets

Higher quality than traditional smooth walled hanging baskets, these hanging baskets give you a professional look without breaking the bank. Includes hanger, internal saucer, and drain. Five baskets per pack.

SNAPDRAGON

An old-fashioned garden favorite with delicately colored blossoms arranged on spikes. Beautiful for borders, backgrounds, and cut flower arrangements. Start indoors 8-10 weeks before last frost then transplant to garden beds or pots.

DoubleShot Series F1

DoubleShot™ is a new series of tall garden snapdragons with beautiful open-faced double flowers on strong, heavily branched plants. They produce flower stems in succession all through the growing season. Height: 18"-20", 6"-10" spread.

24145 Appleblossom

24147 Orange Bicolor 

24148 Peach

24149 Yellow

24146 Mix

Untreated seed: 50 sds \$6.65; 500 sds \$21.60.

Madame Butterfly Mix F1

A favorite in our trials! The double azalea flowers create very full flower spikes. Blooms in shades of lavender, orange, pink, red, white and yellow. Height: 24-30", 14-16" spread.

23641 Untreated seed: 50 sds \$6.18;

500 sds \$17.43.

Rocket Mix F1 ●

This legacy garden performer has shoppers buying it year after year for its tall spikes that display closely set florets on sturdy stems. Well rounded mix of nine colors. Height: 30-36", 16-18" spread.

03395 Untreated seed: 50 sds \$1.95;

500 sds \$10.96.

Snaptini™ Mix F1

Controlled and consistent blooms all season long! Snaptini provides a classic compact look that gardeners love.

Meanwhile, because it's daylength neutral, growers love the ease of production. Formula mix of nine colors. Height: 6-8", 6-14" spread.

23553 Untreated seed: 500 sds \$8.80.

Sonnet Mix F1

Bright flower spikes develop on sturdy well-branched plants. Tall luscious spikes make excellent garden bedding plants and cut flowers. Formula mix of nine colors. Height: 18-20", 10-12" spread.

03380 Untreated seed: 50 sds \$4.60;

500 sds \$8.80.

GROW GARDENS GROW SUNFLOWERS KIT

SUNFLOWERS

Sunflowers are garden favorites! Find sunflowers with heights ranging from eight inches to twelve feet, and flower colors extending from the traditional yellow to colors like bronze and burgundy. We have a huge selection, with our complete offering at harrisseed.com. Direct sow outdoors after last frost to garden beds or pots.

GIANT TYPES

Grow the tallest sunflowers in the neighborhood! Our selection of giant sunflowers will produce the largest flowers available. Grow in the garden as a hedge at the back of the garden, or grow a fun fort your kids will love!

American Giant F1

The sturdiest of the giant types with no worries about them falling over. Flower heads can grow as wide as 12". Height: 8-15', 24-30" spread.

22870 Untreated seed: 50 sds \$4.50; 250 sds \$7.81.

Mammoth

The standard giant sunflower that produces hundreds of edible seeds. Height: 8-10', 36-42" spread.

00747 Untreated seed: 50 sds \$3.56; 250 sds \$4.07.

Titan Organic

One of the tallest, largest seeded, largest headed sunflower varieties you will ever grow. This amazing plant grows 12 - 14 ft. tall with flower heads up to 24" across. They'll stop traffic in your neighborhood. Extra-large seeds are great for roasting.

23276 Organic seed: 50 sds \$3.74; 250 sds \$7.72.

DWARF TYPES

Bert® F1

Perfect for a 4-6" pots, the bright yellow petals surround a chocolate-colored, pollen-free disk. Height: 14-18", 8-12" spread.

23536 Untreated seed: 25 sds \$4.86; 250 sds \$26.02.

Smiley Gold F1

This potted sunflower has golden petals and a light green center. Wee as can be, this dwarf variety can be as short as 8" and as tall as 22". We love it's semi-double blooming nature.

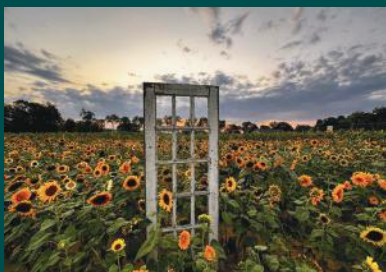

24150 Untreated seed: 25 sds \$9.53; 250 sds \$25.56.

Grow Gardens Grow Sunflowers Kit

Enjoy this kit that includes seed for Velvet Queen, Dwarf Sungold, Autumn Beauty, Classic Mammoth, Dwarf Sunspot, and Yellow Lemon Queen. Each egg carton garden kit includes 6 packages of seeds, starter soil, wooden plant ID stakes, growing instructions, pencil & 100% recycled fiber egg carton planter!

SOLUNA GOLD

ROUGE ROYALE F1

SUNFILL™ PURPLE F1

BUTTERCREAM F1

GIANT SUNGOLD

SUNFLOWERS (CONT.)

TALL CUT FLOWER TYPES

The key to amazing sunflowers is plenty of water and fertilizer. Their roots can run over 2 feet deep, and rapidly deplete the soil around them to achieve their height and support their leaves and blooms over such a short grow period. We recommend amending your soil before planting and fertilizing every two weeks.

Autumn Beauty Mix Organic ●●

Harvest an array of 5" blooms late summer through fall. Great for hedges and cut flowers. Height: 5-7'.

03500 Organic seed: 50 sds \$2.82; 250 sds \$9.66.

Buttercream F1

75-90 Days. This pollen-free hybrid sunflower has appealing primrose yellow petals that offset the dark brown disk. The mid-height plants are branched, allowing you to take multiple stems off each plant. This particular variety is well suited for mixed bouquets.

21022 Untreated seed: 50 sds \$6.33; 250 sds \$16.51.

Giant Sungold

100 Days. Giant 6" or larger fully double, golden-yellow fluffy blooms! This taller branching teddy bear type of sunflower is great in gardens and bouquets. Branching. Height 5-7'.

03507 Untreated seed: 50 sds \$4.33; 250 sds \$8.77.

ProCut White Series F1

Gorgeous buttery-white petals bring a new look to this garden favorite. Single stem. Height: 5'.

23662 White Lite: White petals with light disk.

23350 White Nite: White petals with dark brown disk.

Untreated seed: 50 sds \$8.20; 250 sds \$17.34.

Rouge Royale F1

65-70 Days. Formerly Moulin R. One of the darkest red sunflowers on the market, this excellent hybrid produces pollen-free, single-flowered blooms on tall plants. Plants branch with attractive dark 30" stems for prolonged cutting. Color: Dark red.

03512 Untreated seed: 250 sds \$7.82.

Soluna Gold

75-100 Days. For gardens and flower farmers looking for sunflowers with a more airy texture with smaller blooms check out this species. Though the look is more wild, the branching habit gives consistent long stems that flower freely all summer long. Branching. Height: 4-5'.

24210 Untreated seed: 250 sds \$5.55.

Sunfill™ Purple F1

50-55 Days. Looking for a far-out sunflower? A unique addition to bouquets, harvest in pre-bloom stage for a look similar to artichokes. Though they do open to bloom, the petals are quite short, so the emphasis is on the calyx and disk. Daylength neutral. Single stem. Totally one-of-a-kind.

23664 Untreated seed: 250 sds \$12.25.

  **MEGA BLOOM® ORCHID HALO**

  **PACIFICA XP POLKA DOT**

  **TATTOO™ ORANGE**

   **PACIFICA XP HALO BURGUNDY**

  **TATTOO™ BLACK CHERRY**

  **TATTOO™ PAPAYA**

VINCA

Heat loving annual vinca is a great alternative for impatiens when you're dealing with full sun conditions. Large flat flowers with overlapping petals cover glossy green foliage for colorful displays! An excellent annual for both garden beds and planters. Start indoors 4-6 weeks before last frost then transplant to garden beds or pots.

MEGA BLOOM® Orchid Halo

Bright rich purple w/wide white eyes, Mega Bloom is a new series, born of two AAS winning vinca, bred to withstand heat and humidity with huge 3" blooms! These flowers present an eye-catching look in the garden, even from a distance.

23360 Untreated seed: 25 sds \$3.48;
250 sds \$27.24.

Pacifica XP Series

The Pacifica XP series produces sun-worshipping flowers with large overlapping petals that give a lush, full look to the plants. Gardeners enjoy the strong season-long performance that this series is known for. Polka Dot and Halo Burgundy look splendid planted together.

20565 Halo Burgundy 
03627 Polka Dot

Untreated seed: 500 sds \$10.63.

Tattoo™ Series

A fun, bold, color-rich series, Tattoo is, without a doubt, the most unique vinca on the market today. Offering the well-branched floriferous plants you expect from PanAmerican breeding, each petal looks as if it has been inked or airbrushed with soft black brush strokes.

23573 Black Cherry:  swirls of cherry/raspberry

24083 Orange: medium orange

23555 Papaya: soft 'orangesicle'

23556 Raspberry: deep raspberry to soft rose

23574 Tangerine: tangerine blooms with bright eye

Untreated seed: 25 sds \$3.83; 250 sds \$20.51.

BENARY'S GIANT MIX

ZINNIAS

FOR BACKGROUNDS AND CUT FLOWERS

Zinnias can be direct sown outdoors once all danger of frost is past. Or get a head start by sowing your seed inside about 4-5 weeks prior to transplanting outside. Because of their delicate roots, we suggest sowing the seed directly in Jiffy Peat products. Planting the pot/pellet directly into the garden once your transplants are ready avoids damaging the root system.

Benary's Giant Series

Best cut flower zinnias!

Our most popular zinnia of all, this superb series is an excellent choice for garden bed backgrounds or as a cut flower. Tall, sturdy plants produce large 3-4" blooms on strong stems. Height: 40", 12-16" spread.

- 03720 Bright Pink
- 03732 Carmine Rose
- 03736 Deep Red
- 03733 Golden Yellow
- 03721 Lilac
- 03247 Lime
- 03738 Purple
- 03722 Salmon Rose
- 03737 White
- 21691 Wine

03740 Mix: Mix of all Benary's Giant colors except Lime.

ZINNIA FOR GARDEN BEDS

Whether you're just starting to grow plants, or are an experienced gardener, we recommend zinnias because of their easy to grow nature and bright bold colors make them so rewarding. From small diminutive types to the taller cut flower varieties, there is definitely a zinnia for just about any garden.

Dreamland Mix ●

Perfect for beds and containers, fully-double 3-4" brightly colored flowers abound on bushy plants. Mix includes shades of ivory, pink, red, rose, scarlet, and yellow. Height: 10-16", 10-12" spread.

03695 Untreated seed: 25 sds \$7.75; 250 sds \$38.55.

Magellan Mix F1

In the garden, secondary branching grows up and over the first flush of flowers, covering the spent blooms with no dead heading required. Enjoy continuous 3-3½" double blooms all season. Mix includes shades of ivory, pink, red, rose, scarlet, and yellow. Height: 12-14", 10-14" spread.

03978 Untreated seed: 25 sds \$9.05; 250 sds \$45.70.

Profusion Series

Profusions are well known for their vibrant colorful abundance of big blooms. We've selected the most outstanding color choices for your garden enjoyment. Height: 12-18", 16-24" spread.

Perennial Plants

These pillars of your garden community readily adapt to their environments, coming back bigger and hardier year after year to provide food and habitat for birds, butterflies, and other helping, friendly pollinators.

ASCLEPIAS - SILKY GOLD

ASCLEPIAS - SILKY DEEP RED

ASCLEPIAS - SOULMATE

**2025
YEAR OF THE
ASCLEPIAS**

ASCLEPIAS

Silky Series

Common name: Butterfly Weed. The essential food source of the Monarch Butterfly, Asclepias is a must for all pollinator gardens. This high-quality series prefers a warm, dry location.

20437 Gold

20869 Deep Red

Untreated seed: 250 sds \$8.90.

Soulmate

Common name: Milkweed. Tall stems with stunning deep rose clusters of bloom, this swamp milkweed attracts pollinators and has a great vase life. A must-grow for any cottage garden. Height: 32-48", 20-24" spread. Look for Swallowtail and Monarch caterpillars in the summer!

24109 Untreated seed: 250 sds \$3.54.

ACHILLEA

A North American Native, Achillea emerges as a delicate ground cover in the spring, with fine, fern-like foliage. Then, it shoots up in the summer to produce continuous flushes of flowers until first frost. Cut back dead flowers to encourage more blooming. Plant in full sun to prevent plants from becoming leggy. Achillea is incredibly hardy, thrives in the heat, and does not like soggy soil - making it great for mass plantings.

Noblessa

Common name: Yarrow. Snowy white double flowers are a great filler in bouquets and garden borders. Height: 18-24", 12-18" spread. Drought tolerant, deer resistant, loved by pollinators and tough as nails.

24215 Untreated seed: 250 sds \$15.15.

Favorite Berries

Common name: Yarrow. This pleasing mix features flowers in a blend of apricot, lavender, pink, rose, white, and yellow shades. Height: 24-30", 12-18" spread. Drought tolerant, deer resistant, loved by pollinators and tough as nails.

24214 Untreated seed: 250 sds \$7.84.

COREOPSIS

Sunfire

Common name: Tickseed. This first year flowering perennial naturally fills the garden with summery color, season after season. Fluttery blooms wave on wiry stems. Color: Golden yellow blooms with burgundy red centers. Drought tolerant, deer resistant, and loved by pollinators. Deadhead for more blooms.

20270 Untreated seed: 250 sds \$12.12.

ECHINACEA

Cheyenne Spirit Mix

Common name: Coneflower. A popular native plant for its adaptability. It can take a variety of soil types and can thrive in full sun to half shade. This All America Selections award winning echinacea mixture blooms with sought-after shades of red, orange, purple, scarlet, cream, yellow and white. Superior genetics creates highly branched plants, putting on more flowers per plant than ever before and providing high color impact. Flowering first year from seed, Cheyenne is deer proof, essential for pollinators, and comes back stronger every year. Color: Shades of red, orange, purple, scarlet, cream, yellow and white.

22467 Untreated seed: 10 sds \$7.30;

100 sds \$39.95.

PowWow Wild Berry

Common name: Coneflower. PowWows are quicker to flower than any other seed Echinacea. Add a highly basal-branching plant habit that is genetically short, and you have a winner. That is exactly what happened with PowWow Wild Berry, which achieved a prestigious All America Selections award for both outdoor performance and amazing color. Best yet, plants flower first year approximately 20 weeks from sowing, with the rapid and uniform flowering occurring at 14 hours of light. Deer proof and loved by pollinators. Color: Deep rose-purple.

21891 Untreated seed: 25 sds \$11.59;

100 sds \$24.30.

  **DIANTHUS - DIABUNDA MIX F1**

 **ERYNGIUM - BLUE GLITTER**

  **GAILLARDIA - ARIZONA SUN**

GAILLARDIA - MESA PEACH

DELPHINIUM

Guardian Mix F1

Common name: Larkspur. Blooms early to late summer. Guardian Mix can be used for bedding, but the spikes are produced on thin, wiry stems, making them particularly ideal for cutting and use in florist work. Popular with butterflies and hummingbirds. Please note that all parts of the plant are poisonous so be mindful of pets and grazing livestock. Color: Mixture consists of an even blend of blue, lavender and white.

02755 Untreated seed: 100 sds \$21.23.

DIANTHUS

Diabunda Mix F1

Common name: Carnation or Sweet William. Diabunda is popular for its low-growing, well-branched plant habit that is ideal for both containers and garden beds. Plants start branching early on, which helps keep the habit low and wide. Dianthus are great as a cut flower, and have a lovely, clove-like scent. Color: Formula mixture of Diabunda Crimson, Pink Pearl, Purple, Purple Picotee, Red, Red Picotee, and Rose.

**21936 Untreated seed: 100 sds \$9.02;
500 sds \$39.60.**

ERYNGIUM

Blue Glitter

Common name: Sea Holly. Plants produce silver blue stems with sprays of small, blue-grey pincushion flowers. Useful in both fresh and dried arrangements, Blue Glitter add that extra touch of color and texture in mixed bouquets. Blue Glitter has the advantage of thriving in hot dry conditions, and even sandy, salty soil.

20479 Untreated seed: 100 sds \$17.60.

  **GAILLARDIA - MESA RED**

GAILLARDIA

Arizona Sun

Common name: Blanket Flower. Gaillardia is an excellent choice for perennial beds. Arizona Sun flowers first year from seed, are early to bloom, and continue to produce flushes of blooms throughout the summer and well into the autumn. A great choice massed in landscape but also looks great in pots and mixed containers. The Arizona Gaillardia series thrives in hot sun, giving it mass appeal. Color: Red-orange and yellow bi-colored flowers.

**20027 Untreated seed: 50 sds \$5.38;
250 sds \$14.95.**

Mesa Series

Common name: Blanket Flower. Hybrid Mesa delivers a uniform habit with more flowers than typical open pollinated varieties - a trait that has been consistently demonstrated in our trials. Gardeners love the lovely, soft, non-fading color all season long, and the inherent drought tolerance. Because Mesa is a first year flowering perennial, it is an excellent choice for mixed containers, gardens, and landscapes. Blanket Flowers are pollinator magnets and deer resistant.

22673 Mesa Peach

23190 Mesa Red

Untreated seed: 100 sds \$13.73.

2024 PHOTO CONTEST HONORABLE MENTION

Photo by Martha Parker
of Polkton, North Carolina

GARDENER FAVORITE

 **LAVENDER - HIDCOTE**

 **LAVENDER - MUNSTEAD**

 **LUPINE - RUSSELL MIX**

LAVENDER

Hidcote

A long-time favorite, Hidcote Blue is now available with high-quality, reliable seed. Attractive, tiny, purple-blue flowers contrast with the grey-green foliage, forming attractive evergreen clumps. Their scent is heavenly, and attracts pollinators for miles. Hidcote is used for perennial gardens, rock gardens, and as potpourri. Extremely drought and deer tolerant.

09597 Untreated seed: 500 sds \$7.41.

Munstead

The spicy freshness of the much-loved English lavender Munstead has spellbound and entranced people for centuries. Who can resist the bright, clean fragrance of a spray of fresh lavender? This heirloom strain grows easily and produces plants with silvery gray foliage and dainty purple flowers. The strong, clear perfume is carried throughout the leaves, and attracts bees and butterflies. The dried flowers retain their fragrance and color for months. It tolerates clipping and will form a handsome hedge.

09599 Untreated seed: 500 sds \$7.80.

LUPINE

Russell Mix

A short-lived North American Native, growing 36"-48" tall, Russell Mix Lupine gives beds a wow factor with showy flowers on spikes in a well rounded color range. Makes a unique cut flower as well. (Note: Grown as an annual in warm-winter regions). Colors can show up in shades of white, yellow, pink, orange, red, salmon, lavender, blue, purple, and bicolors.

02810 Untreated seed: 50 sds \$2.28;
500 sds \$12.00.

MONARDA

Panorama

Common name: Bee Balm. Native to the USA and a member of the mint family, Monarda is lightly clove scented, and adored by bees, butterflies, and hummingbirds. Panorama adds feathery whimsy to the garden. The whorls of flowers are set in leaf axils, creating a kooky Dr. Seuss look. Deer tolerant, and can grow in swampy conditions.

02398 Red

03775 Mix

Untreated seed: 500 sds \$11.88.

POPPY

Champagne Bubbles Mix

Oodles of large 3-5" cup-shaped flowers top bushy, strong-stemmed plants. Iceland poppies are the best for cuts, offering tissue paper-like blooms. In areas with high heat, grow as an annual, as they prefer cool temperatures. Color: Mixture contains shades of white, orange, pink, red, and yellow.

09628 Untreated seed: 250 sds \$6.70.

2024 PHOTO CONTEST HONORABLE MENTION

Photo by Eula Barnett
of Streamwood, Illinois

 **RUDBECKIA - SPUTNIK**

 **RUDBECKIA - GOLDBLITZ**

 **RUDBECKIA - CHIM CHIMINEE**

 **RUDBECKIA - IRISH SPRING**

 **RUDBECKIA - SAHARA**

RUDBECKIA

Rudbeckia, also known as Black Eyed Susan, can be started indoors or direct sown in fall or early spring. We like to consider them a hardy, perennial, USA-native zinnia alternative, as they make for attractive mass plantings and cut flowers that are tolerant of poor soil and drought conditions. Loved by pollinators and deer proof, they offer beauty, aid native biodiversity, and are tougher than old boots.

Sputnik

A short-lived perennial, Sputnik sports a lush mahogany center that contrasts with golden yellow tips. Height: 30-36"

23819 Untreated seed: 250 sds \$6.86.

Chim Chiminee

A tender perennial, this mixture is primarily quilled petals in shades of gold to cinnamon. Height: 24-36"

24218 Untreated seed: 250 sds \$12.26.

Irish Spring

Irish Spring breaks the mold! Attractive 5-7" blooms with yellow petals in sharp contrast to the green eye. Height: 30-36"

20346 Untreated seed: 250 sds \$9.27.

Sahara

A short-lived perennial, Sahara's color mix ranges from burgundy to bronze to copper, with a double blooming mum-like shape. Height 24-36"

24220 Untreated seed: 250 sds \$25.36.

Goldblitz

When gardeners dream of blacked-eyed Susans, this standard perennial is the plant they see. Great in gardens, backs of borders, and even in large containers. Height: 24-28"

24078 Untreated seed: 25 sds \$7.15;

100 sds \$18.25.

 **SALVIA - NEW DIMENSION BLUE**

SALVIA

New Dimension

Common name: Sage. Compact, well-branched finished plants bloom as a first year flowering perennial, with the long lasting blooms going strong throughout the summer. Extremely tough and drought tolerant, deer proof, and beloved by pollinators. Lightly scented.

21983 Blue

21984 Rose

Treated seed: 250 sds \$13.25.

 **SALVIA - NEW DIMENSION ROSE**

VERBENA

Bonareinsis Finesse

Common name: Vervain. Farmers and gardeners alike enjoy growing Verbena Bonariensis perennials from seed. An abundance of magenta-purple blooms covers tall plants of this well-known perennial Verbena species. They bloom best with ample sunshine, steady moisture and they can grow up to 4 feet tall and bloom from mid-summer until the first fall frost.

03702 Untreated seed: 250 sds \$8.15.

Vanity

Common name: Vervain. Well known as a perennial for whimsical gardens or wild landscapes, it's also used for accent fillers in bouquets and delicate arrangements. It's not every day we see a new variety of a classic cottage garden plant but Vanity is one to wow! Not only does this type of verbena create a pollinator paradise in your garden, but also the compact habit makes it sturdier and easier to maintain. Deep blue/purple flowers are 1-1.5" across and attract butterflies and hummingbirds. Vanity prides itself on performing well in hot dry conditions while remaining a showy garden plant.

24081 Untreated seed: 50 sds \$2.79;

250 sds \$13.28.

VERBENA - BONAREINSIS FINESSE

VERBENA - VANITY

 **FLARE ROSE F1**

 **CRANE FEATHER QUEEN F1**

 **LUCIR WHITE F1**

 **YOKOHAMA MIX F1**

ORNAMENTAL KALE CUT FLOWER COLLECTION

For a spectacular and unexpected display of shape and texture, try these tall ornamental kale varieties, ideal for "winter roses". Great for seasonal gifting and mixing with autumn bouquets! This collection gives you 50 seeds each of the following:

Crane Pink, Red and White.

23845 Untreated seed: \$11.53;

Get 2 for \$10.96 ea.

 **CRANE PINK, RED AND WHITE**

ORNAMENTAL KALE FLAT LEAF COLLECTION

Refresh your summer annual pots and garden edges with a splash of cool season color. These three flat leaf ornamental kale varieties are terrific to mix in combo baskets with each other and other kale varieties, too. This collection includes 50 seeds each of the following: **Pigeon Purple, Red, and White.**

22260 Untreated seed: \$11.09;

Get 2 for \$10.54 ea.

GARDENER FAVORITE

 **PIGEON PURPLE, RED AND WHITE**

ORNAMENTAL KALE FRILLY LEAF COLLECTION

Add texture, depth, and color to your fall and winter arrangements with these lovely, whimsical Frilly Leaf Kales. This collection gives you 50 seeds each of **Nagoya Red, Rose and White.**

03848 Untreated seed: \$8.29;

Get 2 for \$7.88 ea.

 **NAGOYA RED**

 **NAGOYA ROSE**

 **NAGOYA WHITE**

KALE, ORNAMENTAL

While Kale is generally known as a crunchy, edible foliage, it is also loved for its fall and winter decorative value. Decorative Kales can be used in seasonal flower arrangements and to update your garden displays when summer annuals fade away. Kales put on a fun color show, too, changing shades when the temperature falls below 55 degrees. Height: 20-36", 4-6" spread.

Flare™ Rose F1

Flare Rose Kale will add delightful, unique, and surprising florets of mint-green and purple foliage to your cool season bouquets and arrangements. Their delicate ruffled edges and long stems make them the perfect "cut flower" kale.

23523 Untreated seed: 100 sds \$13.34.

Crane Feather Queen F1

The unusual feather-leaf cut texture brings a contemporary flair.

23210 Untreated seed: 100 sds \$13.81.

Lucir White F1

Similar leaf style of the Crane Series with a glossy leaf.

21957 Untreated seed: 50 sds \$11.46;

100 sds \$14.29.

Yokohama Mix F1

The fringed leaves of Yokohama are extra curly, presenting an attractive and unique look to these compact plants.

While the center of the leaves turn color under cooler temperatures, the outer edges remain a medium to dark green. A great option for "filler" in mixed containers.

23324 Untreated seed: 50 sds \$3.30;

250 sds \$7.90.

  **DICHONDRA - EMERALD FALLS**

  **DICHONDRA - SILVER FALLS**

  **JUNCUS - STIPA SIROCCO**

DICHONDRA

Emerald Falls

With small, rounded leaves on a vining plant habit, the Falls series show their best attributes in containers or hanging baskets, either as a stand-alone plant or an accent plant. Both varieties also can be grown as a low growing annual ground cover. Emerald Falls has slightly more rounded, green leaves, with a fuller, shorter trailing habit than Silver Falls

02986 Multi-Pelleted Untreated seed:
100 sds \$27.36.

Silver Falls

Silver stemmed plants with striking small rounded silver leaves can grow up to 4 feet long. Silver falls makes dramatic spiller for window boxes. Height: 2-3", 36-48" spread.

02371 Untreated seed: 25 sds \$7.79;
100 sds \$27.37.

EUCALYPTUS

This popular Australian native plant is suitable for cut flower gardens and for great thrillers in a mixed container. Its bright, refreshing scent lends itself to bouquets with scentless flowers. Stems are long lasting and leaves are slightly fleshy to the touch

Silver Dollar

This silvery-grey foliage has rounded leaves on long strong branches. Extremely heat and drought tolerant.

24142 Untreated seed: 50 sds \$7.97;
250 sds \$26.17.

JUNCUS

Stipa Sirocco

The only pink grass from seed on the market, Sirocco adds color and texture in a wide variety of uses. Its mounded plant habit makes it a good candidate for landscapes, bedding, mixed containers and hanging baskets. The attractive foliage turns to shades of copper and pink as it matures under cool conditions and natural sunlight. Color: Shades of copper and pink.

20782 Multi-Pelleted Untreated seed:
50 sds \$17.50.

 **EUCALYPTUS - SILVER DOLLAR**

ORNAMENTAL HERBS

The benefit of a pleasing scent is often overlooked when considering mixed containers and even bouquets. Adding the visual beauty and enchanting aromas of ornamental herbs to the pots and beds near your sitting areas will create a welcoming atmosphere for you and your garden guests!

Basil Cardinal Organic

We are quite taken with this unusual organic basil, with its nice contrast between dark green leaves and maroon rosettes. The plants are well-branched, so you can take a number of cuts per plant for bouquets. Cardinal has exhibited a fine vase life in which the aroma of fresh basil lightly permeates the room..

20967 Organic seed: 50 sds \$2.15; 250 sds \$3.87.

Oregano Kirigami

This eye-catching, non-culinary oregano features large purple-green bracts, itty-bitty rose flowers, and light green foliage. Ideal as a decorative patio plant, with a delicious fragrance to attract pollinators as a spiller in containers and hanging baskets or ground cover in borders and rock gardens.

23334 Untreated seed: 50 sds \$9.39.

   **ORNAMENTAL BASIL CARDINAL ORGANIC**

   **ORNAMENTAL OREGANO KIRIGAMI**

Supplies

JIFFY 'POLY-PAKS' SQUARE POT HANDLING SHEETS

JIFFY ROUND POTS

JIFFY POTS

For starting single plants.

Grow earlier vegetables and flowers by starting them in biodegradable Jiffy Pots. At transplant time, plant the whole pot into the garden. Roots are not disturbed, which encourages vigorous, sustained growth rather than checking or wilting. Choose larger pots for large, fast-growing vegetables like pumpkins or squash. Jiffy Pots are ideal when planting just a few of each variety for flower boxes or vegetable beds.

Jiffy 'Poly-Paks' Square Pot Handling Sheets

Convenient Jiffy Poly-Paks are a real time saver! Individual square pots are pre-loaded into a thin plastic handling sheet, which may be placed into a 1020 carrying tray.

Medium 2"W x 3"D Handling Sheets

PLUG TRAYS

Great for individualizing single plants. These heavy duty, semi-rigid black plug trays allow you to easily separate species in one tray, reducing potential disease spread and for easy transplanting. Trays easily fit into our 1020 no-drainage trays and Permanest trays (lip of plug trays may rest on top of other trays so that cells are in the trays, but depending on cell size, the bottom of the cells may not touch bottom of tray. Width of cells measured from top of cell as cells taper.)

Tray measurements:

72 cell – 11"W x 21¼"L	128 cell – 11"W x 21¼"L
288 cell – 10½"W x 20½"L	512 cell – 10½"W x 20½"L

Ken-Bar®
products for the grower

Made in the USA

Harris Seeds's premier partner for greenhouse supplies!

*Harris Seeds is excited to offer Ken-Bar growing products.
A member of the GTI-family of brands, Ken-Bar brings over 40 years
of industry experience to our growing supplies lineup.*

*With a commitment to quality and outstanding customer service, Ken-Bar
offers American-made equipment and supplies to growers of all sizes.*

*Specializing in seed germination and greenhouse ventilation, Ken-Bar manufactures
its own line of custom Convection Tubing, Agritape Heat Mats, and High Tunnel Greenhouse
Vents – all assembled right here in the USA.*

Ken-Bar Agritape Seed Tray Heaters

*Professional-grade and fully
customizable, featuring efficient,
uniform heating for seed starts
and transplants.*

Row Covers and Support Wires

*Extend your growing season and
protect your late crops with our clear
poly row covers. And our 76" or 54"
support wires can be used to support
your low tunnels!*

Ken-Bar Convection Tubing

*Trusted by greenhouse growers
across the nation. Offering complete
customization to meet your heating,
cooling, and airflow needs.*

* Look for the Ken-Bar logo () in our supplies selection to view our current offerings.

* For custom-order and made-to-spec items we encourage you to visit ken-bar.com/directly.

MINI GREENHOUSES

SunBlaster Mini Greenhouses and Combo Kits

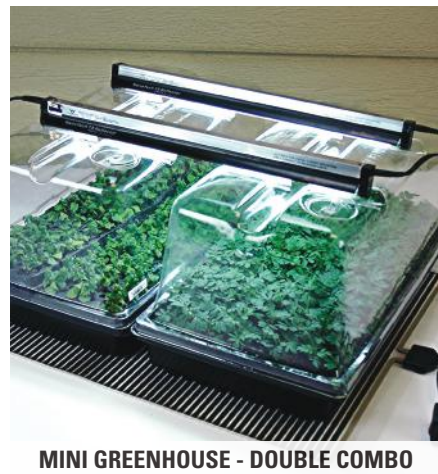

SunBlaster's Mini Greenhouse Kits provide an excellent environment for starting your transplants, indoor herb gardens, micro greens, and other indoor gardening. Two options available: The kit includes a florescent T5 18" full spectrum 6400K grow light and reflector or an 18" LED full spectrum 6400K grow light and reflector. Kits also include an extra thick 10"W x 20"L no drainage planting tray, and SunBlaster's exclusive NanoDome that has a unique H pattern which enables you to lay your lighting across single or multiple domes. Combine this kit with our top selling Kwik Grow Heat Mats (designed to generate uniform gentle heat ideal for germinating seeds) for money saving combos. The

single combo gives you one SunBlaster Mini Greenhouse Kit and a Kwik Grow 1-Tray Heat Mat. The double combo gives you two SunBlaster Mini Greenhouse Kits and the Kwik Grow 2-Tray Heat Mat.

INSECT CONTROL

A Captain Jack's Deadbug Brew®

Captain Jack's Deadbug Brew contains Spinosad, a product first isolated from a naturally occurring soil dwelling bacterium that was collected on a Caribbean island from an abandoned rum distillery. Deadbug Brew kills bagworms, borers, beetles, caterpillars, moths, loopers, leaf miners, spider mites, thrips and more! Use on ornamentals, fruit, vegetables, berries, citrus, grapes, and nuts. 32 oz. concentrate makes 16 gallons of spray. **Not available for sale in AK or HI.**

41130 Deadbug Brew 32 oz. \$29.95

B Active Eye Microscope

The Active Eye line of microscopes uses super-bright LED bulbs to illuminate your specimens with no eye strain. The lightweight construction allows you to bring the microscope into the field or greenhouse. Provides targeted, optimal illumination and features an adjustable zoom from 60x to 100x. Includes batteries and case.

41156 Active Eye \$18.95

C Thyme Guard

Made from the essential oil extracted from the thyme herb, Thyme Guard is a 100% biodegradable broad spectrum contact and systemic liquid organic bactericide, fungicide, and insecticide for use on all crops, turf, and ornamentals. Dilute into water at a rate of 0.5% (2 quart/100 gallons) to 0.125% (1 pint/100 gallons). Thyme Guard is tank mixable with most other chemicals. Do not mix with peroxides and/or sulfonates. Can be used at any time including on harvest day.

41794 32 oz. \$41.95

D Yellow Sticky Cards

Free your plants of whiteflies, gnats, and other flying insects without using pesticides. These bright yellow 3"W x 5"H cards have been coated on each side with a specially formulated non-toxic adhesive that permanently traps insects when they land.

40237 Yellow Sticky Cards 10 ct. \$10.95

40237 Yellow Sticky Cards 50 ct. \$33.95

E Wire Sticky Trap/Sign Holders

These 11" galvanized wire with loop ends are perfect for holding sticky traps. These holders allow you to place your sticky traps near the soil or higher above the plant canopy. Wire holders also work great for signs and pricing.

41204 Sticky Trap/Sign Holders 10 ct. \$13.95
2 @ \$12.95 ea.

F Blue Sticky Cards

Blue Sticky Traps attract and catches thrips and leafminers. The easy-to-open 4"x7" trap reverse folds to expose 4"x14" sticky (yellow or blue) surface with grid for precision monitoring purposes. Approximately 30 square inch adhesive area. Non-poisonous and weatherproof.

41203 Blue 5 ct. \$8.25; 2 @ \$7.25 ea.

G Neem Oil

NeemMax is a plant-based, botanical product that contains the full spectrum of bioactive compounds that stop the insect lifecycle. This 4-in-1 product is a Fungicide, Insecticide, Miticide & Nematicide.

DISEASE CONTROL

A MilStop® WP Fungicide 5 lb. MilStop is an EPA-registered, potassium bicarbonate-based foliar fungicide that kills powdery mildew on contact by pulling water from spores and their growing strands. The patented formulation easily spreads out evenly for great leaf coverage, providing 1-2 weeks of residual protection. Milstop also helps control alternaria blight, anthracnose, black spot, botrytis blight, leaf spot, downy mildew, and more. OMRI Listed for organic production. **Not available for sale in AK, DC, HI, WY.**
41247 MilStop WP 5 lb. **\$94.50**

B Liquid Copper Fungicide Bonide's patented formula allows for all-around use, from turf to veggies and fruit to flowers. The concentrate provides excellent control of blights, leaf spots, rusts, mildews, scab, anthracnose, and mold with as little as 1½ teaspoons per gallon. Also suitable for indoor use and is a natural way to control disease. 16 oz concentrate. **Not available for sale in AK and DC.**
40568 Liquid Copper Fungicide **\$31.95**

C Tenet WP Fungicide New standard for soil-borne disease control, TENET® WP is a second-generation biorational fungicide that contains two powerful species of beneficial Trichoderma fungi that effectively control or suppress soil-borne diseases. Tenet is highly effective against Fusarium, Phytophthora, Sclerotinia and other diseases. The active ingredients that grow in the soil and around the plant's root system using multiple modes of action to suppress and destroy disease causing fungi. Tenet is perfect for both early season planting in cooler soil as well as late season applications. For use as a soil drench, spray, irrigation, or in hydroponic systems. OMRI Listed for organic production.
41854 Tenet WP Fungicide 1 lb. **\$66.95**

D Armory Beneficial Bacteria Armory is a high concentration of several select beneficial plant bacteria. These powerful species of Bacillus and Streptomyces are all scientifically proven plant growth, yield, and vigor-promoting bacteria. This unique and powerful product not only strengthens plants, but can also be used to greatly enhance soil quality. Soil that has been sterilized with overuse of chemicals, old or re-used potting soil, and other low-quality growing mixes can greatly benefit from being treated with Armory. Armory can be used as a drench, liquid feed, irrigation, spray, or seed treatment. It is compatible with fungicides, insecticides, fertilizers, and biological stimulants. Armory is 100% soluble and it will not clog machinery. Mixing rates depend on application method, 2oz package. OMRI Listed for organic production.
41852 Armory Beneficial Bacteria 2oz. **\$33.50**

E Revitalize Biofungicide This uniquely formulated fungicide triggers a plant's immune response in order to control and prevent common fungal diseases.
42030 Bonide Biofungicide **\$29.95**
