Born in Les Genevez, Switzerland.

The first Swiss watch brand manufacturing Swiss-made  
and hand-assembled timepieces at an affordable price.

The original atelier. Built in mid 16<sup>th</sup> century.

## The Claude Bernard story

Past. Present. And an eye to the Future.

Les Genevez 1892

A Claude Bernard creation is more than a mere watch; it is a miniature 'time machine' of engineering and design excellence forged from **500 years of Swiss watchmaking tradition.**

For nearly 50 years, the independent, family owned watchmaker **Claude Bernard has produced exceptional, beautiful - and affordable - timepieces.**

Founded in 1973, Claude Bernard takes its name from a master watchmaker from the Jura Valley where centuries earlier Switzerland's watchmaking industry had taken hold.

In the mid-16th Century Frenchman John Calvin broke with the Roman Catholic Church and fled to Geneva. French Huguenots followed him but when Calvin banned the production, and wearing of, jewellery because it had 'no place in the worship of God' local goldsmiths and jewellers were forced to turn to a new trade - watchmaking.

Most of these craftsmen farmed during the warmer months and honed their watchmaking skills in the winter

and Les Genevez, a plateau high in the Jura, became a focal point for what became a roaring trade.

And it's in Les Genevez today that Claude Bernard creates its gorgeous timepieces, either with mechanical or quartz movements, all assembled with a passion for detail that can be traced back to those 16th-century pioneers and Claude Bernard himself.

“We’re honoured at Claude Bernard to carry on the traditions of our great watchmaking pioneers. But we are equally proud to be using the most modern designs and materials and producing watches for the 21st Century that are fantastic value for money.”

Today, Claude Bernard prides itself on using the most modern of materials in its watches but without forsaking that magnificent Swiss watchmaking tradition.

**Precision, quality, reliability and attention to the finest detail** are hallmarks of Claude Bernard watches, now distributed to more than 70 countries throughout the world.

From sleek diver’s models such as the Aquarider to the slick Sophisticated Classics dress watches and the elegant, ultra-feminine Dress Code family, Claude Bernard’s portfolio is as diverse as watch-buyers themselves.

Combining tradition and innovation and the highest quality but without the price tag to match, Claude Bernard

watches are the best value Swiss-made watches available today.

## Hand-assembled Swiss watches

A passion for mechanics is what makes Claude Bernard tick

“Each and every detail of each and every timepiece, whether technical or aesthetic is equally important.”

One of the few remaining independent Swiss watch companies, Claude Bernard has produced quartz and mechanical watches at its building in the picturesque village of Les Genevez in the Swiss Jura.

The watchmakers at Claude Bernard are dedicated to producing high quality timepieces with intricate mechanical and quartz workings, superior reliability and functionality.

Claude Bernard is one of the last few Swiss independent family-owned businesses. True to its heritage, the brand stands out its creativity, its watch-making know-how and its independence of mind.

Performance and emotion: this is what Claude Bernard is willing to share with you, its worldwide clientele.

The brand Claude Bernard brings together all the elements of tradition of the Swiss watchmaking industry.

Precision, quality, reliability and the technical nature of the materials are among the many standards that the Les Genevez-based company combines with aestheticism and refinement in the creation of its models.

Claude Bernard timepieces are manufactured from the finest materials, to the highest standards, by the most talented watchmakers.

### A Passion For Details

Here at Claude Bernard we have a passion for creating beautiful, high quality watches with impeccable finish. Each and every detail of each and every timepiece, whether technical or aesthetic is equally important.

Right from the conception of a new model, we take the utmost care over even the smallest details and parts that make up your watch, to guarantee your complete satisfaction, in regards to both the design as well as the comfort on your wrist.

# The Claude Bernard Quality

## Movements

All movements used by Claude Bernard are Swiss-made movements

### Mechanical movement:

A mechanical movement undergoes several stresses in its life. To ensure it will remain functional and precise as long as possible, Claude Bernard simulates watch wearing in its own quality office for every single manual and self-winding mechanism.

### Quartz

Quartz movements provide time measurement accurate to within a few seconds per year. Most of Claude Bernard watches are equipped with quartz movements.

## Sapphire crystals

100% of Claude Bernard timepieces are fitted with a scratch-resistant crystal that has been cut from a polished slice of solid sapphire. Each has a triple-coated anti-reflective treatment on the internal side for better legibility.

## Stainless Steel

The 316L stainless steel alloy used in Claude Bernard cases and bracelets has strong anti-magnetic properties and is optimized for toughness and corrosion resistance. It is also a good choice for consumers allergic to nickels.

## Leather

All Claude Bernard leather straps are specially cut, stitched and padded by expert craftspeople. Various ways of tanning provide different touch and feel for the straps made of cow or calf leather. It is always important to

remember that colors and suppleness of leather are subject to change with time and exposure to external factors. Daily showers or swims are not recommended. If your consumers live a very active lifestyle, especially one involving frequent exposure to salt water and heavy perspiration, we recommend a steel bracelet or rubber strap.

## Rubber

Claude Bernard uses genuine high-grade rubber for its straps (a natural material and extremely comfortable). The rubber is silky finished and easy to maintain with the proper cleaning.

## Mother-of-pearl

Resilient, and iridescent, mother-of-pearl is integrated in many Claude Bernard dial designs. It is produced inside the shells of certain mollusk shells. This is why each dial made of mother-of-pearl is unique.

## Luminescence

This technology, branded under the name Super-Luminova, offers brightness in low-light conditions, thanks to a non-radioactive and non-toxic material like the tritium previously employed in the industry. Claude Bernard uses Super-Luminova for its highly functional attributes. It is applied on watch parts such as hands, numerals, bezel indices, etc.

## Batteries

In compliance with global regulations and standards, Claude Bernard equips its quartz timepieces with mercury-free batteries. This is a positive step towards environmental sustainability with no effect on the watch precision and efficiency.

## Open Heart

The Open Heart watches allow to view the beating heart of the watch through an opening on the dial and on the caseback and the mechanical movement can be admired.

## Zirconia Stones

Claude Bernard stones are carefully selected and matched not just according to carat value but also to cut, color and clarity.

## Conformity

Every component coming into our production facility in Les Genevez in the Swiss Jura is checked to ensure its dimensions, aesthetics, quality and interchangeability.

## Visual and manual testing

In addition to our testing process, all timepieces are visually checked between each manufacturing step ensuring overall quality based on our own Claude Bernard standards. If a timepiece does not pass inspection, it is checked and repaired. It can only go back to the production phase if it has passed the quality check.

## From Les Genevez\* to worldwide distribution in 70 countries

\* Hometown village of Claude Bernard

# Marketing & more

## Key reasons to buy Claude Bernard

### 1. Swiss Made

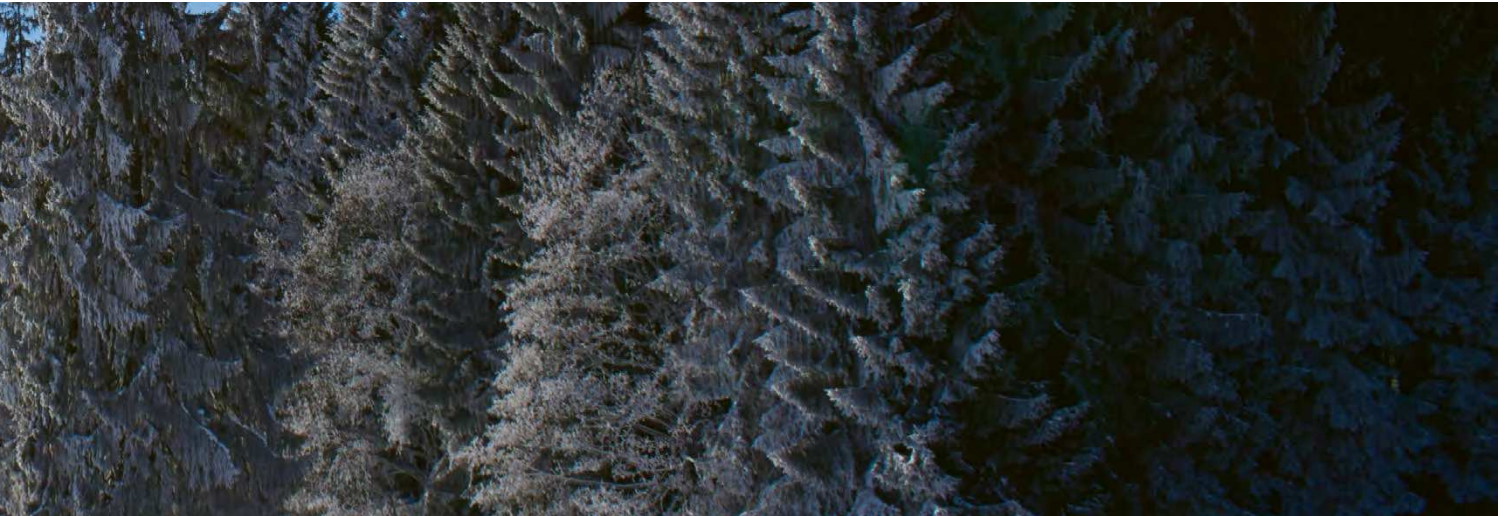

For a “Swiss-made” watch, at least 50% of its value has to be added within Switzerland. We go further than that. All our watches are produced at the world famous “Watch Valley” in the Jura Mountains, where our predecessors started to produce clocks over 400 years ago. All of our timepieces include a Swiss movement and are assembled and controlled by highly qualified craftsmen as well as state-of-art equipment. We take the “Swiss Made” label very serious. Moreover Claude Bernard offers outstanding value for money.

### 2. Accessible Luxury

Claude Bernard is one of the very few Swiss watch brands able to offer authentic Swiss Made timepieces at attractive prices.

Our motto is «Take a little less and you receive more.»

### 3. Hand-assembled

Claude Bernard watches are hand-assembled by qualified Swiss watchmakers. Each Claude Bernard watch is checked and controlled over a long period of time - by both human beings as well as special equipment to ensure optimal quality. Making no compromises in terms of quality is a strict priority for Claude Bernard. The best quality standards are respected.

Unless otherwise specified, all Claude Bernard respect the following standards:

- Swiss Made movement
- Hand-assembled in Switzerland
- 316L stainless steel cases and bracelets
- Minimum water-resistance of 30 meters

### 4. Design by Claude Bernard

We pay particular attention to the design at Claude Bernard. We like our watches to be mainly classical and traditional whilst remaining timeless. Every timepiece is created with a genuine passion for details. You will discover delicate guilloché decoration and refined printings on our dials, while our cases are entirely hand-polished for a luxurious, smooth feel and a remarkable shine.

# Advertising

All Claude Bernard visuals are available and native files can be obtained upon request. Corporate guidelines are also available and allow you to easily adapt the artwork to your specific requirements.

The use of the corporate advertising artwork gives the Claude Bernard campaign a perfect graphic design and increase the visual impact.

All visuals can be adapted for media advertising for magazines, indoor store decoration with posters, banners or window stickers, billboard campaigns, etc.

All landscapes can be used for any model of watch.

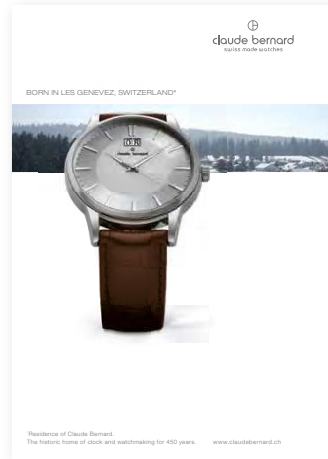

For specific project, please contact Claude Bernard for additional information.

Reference number system  
The operating instructions are related to the reference of the movement (calibre) in your watch. Please check first of all which movement is in your watch. You are able to find the reference on the case back of your watch.

IMPORTANT NOTICE

Watches shown in this catalogue are printed in 1:1 sizes. We reserve the right to make technical or aesthetic changes to the models shown in this catalogue.
